By ANDREW ALBERT

NEW YORK — Off to a slow start in 1987, new-issue activity in the asset-backed securities market is expected to pick up gradually as the year progresses. Several investment banks are planning to bring new deals to market within the next few months.

In anticipation of busier times, Goldman, Sachs & Co., Shearson Lehman Brothers Inc., and Merrill Lynch & Co., have spent the early part of this year beefing up their asset-backed units.

By securitizing assets, lending institutions raise cash by selling securities

New England Banks Are Big Deposit Gainers in 1986

Continued from Page 1

gland. New Hampshire posted the largest percentage gain in deposits — 42% — last year. The state had 39 banks ranked among the top 5,000 in deposits in 1986, compared with 36 in 1985.

Following New Hampshire were Rhode Island, with a 35.8% increase for its nine banks; Vermont, with 29.4% for its 19 banks; Massachusetts, with 26% for its 82 banks; and Connecticut, with 25.7% for its 42 banks.

Banks in seven states posted deposit declines from 1985 to 1986. All seven are in energy-producing or farm states.

The largest deposit declines occurred in Oklahoma, which had 123 banks ranked among the top 5,000 in 1986, compared with 141 banks in 1985. The deposits of Oklahoma banks in the top 5,000 in 1986 were down 12.4% compared with 1985.

The other six states with deposit declines were: North Dakota, with a 5.6% drop for its 30 banks; Texas, with a 4.3% decrease for its 697 banks; Wyoming, with a 4.2% decrease for its 25 banks; Idaho, with a 1.8% decline for its nine banks; Colorado, with a 1.4% decrease for its 90 banks; and Louisiana, with a 1.1% decline for its 131 banks.

Total deposits of the top 5,000 banks in the nation rose 8.4% to $2.07 trillion in 1986. This compares with a 8.1% increase in 1985.

The top 5,000 banks, which accounted for 33% of the 14,994 banks in the nation on Dec. 31, had 90% of total deposits. A year earlier, this ratio was 90.4%, and in 1984 it was 90.9%.

New York again ranked first in amount of commercial bank deposits.

Last year, New York had 127 banks ranked among the top 5,000, with a total of $466.9 billion in deposits. In 1985, New York had 124 banks on this list, and these had $432.4 billion in deposits.

California's 226 banks again ranked second, with combined total deposits of $232.8 billion at yearend 1986, compared with $232.4 billion a year earlier. Texas remained in third place, with $133.7 billion in deposits at its 697 banks. Illinois banks were fourth, with $117.4 billion in 453 banks.

These top four states accounted for 46% of the deposits of the top 5,000 banks, compared with 47.9% in 1985 and 48.8% in 1984.

Five states had more than 200 banks among the ranks of the top 5,000 last year. And these five accounted for 35% of all the banks ranked among the top 5,000. Texas again had the largest number of banks, with 697, a decrease of three from the previous year. Illinois was again second, with 453 banks, an increase of 11.

California remained in third place, with 226 banks, an increase of 15 banks from a year earlier. Michigan was in fourth place for the second consecutive year, with 207 banks. And Pennsylvania remained in fifth place, with 200 banks.

Greenwood Trust Co., New Castle, Del. — the Sears, Roebuck and Co. subsidiary that handles Sears' Discover credit card operations — had the largest nonmerger growth in deposits last year. The bank, whose deposits rose by more than 3,700% to $1.048 billion at yearend 1986, ranked 275th.

The bank with the largest percentage decrease in deposits among the top 5,000 was Citibank (Maryland) NA, Towson, one of Citicorp's credit card banks. The bank had a 66.7% decline in deposits, to $53.7 million at yearend 1986, to rank 4,708th. However, the bank's assets rose 3.7% last year to $984.4 million. The deposit decline, therefore, apparently reflected a change in funding strategy at the bank.

Bank No. 5,000

The 5,000th largest bank in the nation last year was Bank of Lemmon, S.D., with $50.6 million in deposits, which had an increase of 21.3% from $41.7 million a year earlier, when it ranked 5,731st.

In 1985, First National Bank, Wayzoata, Minn., with $48.2 million in deposits, was the nation's 5,000th largest bank. First National Bank ranked 4,953rd on Dec. 31, 1986, with $51.1 million in deposits.

In 1984, Ames Bank, Omaha, Neb., was the 5,000th largest bank, with deposits of $45.7 million. At yearend 1985, with deposits of $45.8 million, the bank no longer ranked among the 5,000 largest commercial banks. At yearend 1986, it had deposits of $49.8 million.

First National Bank, Valley City, N.D., was the nation's 5,000th largest bank in 1983, with $43.3 million in deposits. At yearend 1985, with deposits of $45.6 million, the bank no longer was among the 5,000 largest commercial banks. At yearend 1986, its deposits dropped 4.9% to $43.5 million.

In 1982, the 5,000th largest bank in the nation was Bank of San Felipe Green NA, Houston, with deposits of $39.4 million. At yearend 1985, this bank, which is now called MBank San Felipe NA, ranked 2,526th, with $91.3 million in deposits. In 1986, the bank again rose in rank to 2,268th, with $107.1 million in deposits. ■

Owner Convicted Of Stealing from Maryland Thrift

Special to the American Banker

BALTIMORE — Allan H. Pearlstein, a part-owner of Old Court Savings and Loan Inc., was convicted on four of six counts of stealing from the Maryland thrift, whose collapse precipitated the downfall of the state's privately insured savings and loan industry in May 1985.

A jury of nine women and three men, after six hours of deliberation, found Mr. Pearlstein guilty of stealing $645,000 from the thrift. He is the sixth person to be convicted of crimes arising out of Old Court's collapse.

The verdict was returned at 9:30 p.m. Monday. As he was leaving the courthouse, Mr. Pearlstein said, "My life is over."

The Baltimore circuit court jury decided that contrary to the charges, Mr. Pearlstein did not steal from the thrift the $65,000 that he received as fees.

Mr. Pearlstein, 57, owned a 41% interest in the Baltimore thrift. He also owns a Pennsylvania shoe-manufacturing concern known as Sylvania Shoes, which is headquartered in McSherrystown.

Throughout the trial, Mr. Pearlstein maintained that he earned all the money that he was accused of stealing. Although he was not an employee or an officer, Mr. Pearlstein said he contributed significant amounts of time to the savings and loan. In addition, he said the thrift was ostensibly quite profitable and he thought that a number of the payments were distributions of profits to its shareholders.

Mr. Pearlstein's lawyers attempted to cast Old Court's former president, Jeffrey A. Levitt, as the villain. They maintained that Mr. Pearlstein was a naive friend of Mr. Levitt's who believed the former Old Court president was a financial genius who had reversed the fortunes of the failing thrift.

In his closing statement, a defense attorney argued that Mr. Levitt's deceptions were so convincing that even the state regulators were unable to uncover the financial irregularities at Old Court until right before its collapse.

State prosecutors depicted Mr. Pearlstein as a smart entrepreneur who knew full well that he did not earn or deserve the hundreds of thousands of dollars in fees he collected between 1983 and 1984.

Mr. Pearlstein is the third owner of the savings and loan to be convicted. Mr. Levitt, who like Mr. Pearlstein owned a 41% interest, is currently serving a 30-year prison sentence after pleading guilty to stealing $14.6 million from Old Court. Jerome S. Cardin, an 18% owner, was convicted last December of stealing $385,000 and sentenced to a 15 years in prison. He is

Commercial Loan Growth Slows at Top Thrifts

By KENNETH J. HICKS

NEW YORK — Commercial loan portfolios maintained their strong growth last year at major thrift institutions although the rate of expansion slowed from 1985.

Total commercial loans outstanding at the top 100 thrift members of the Federal Savings and Loan Insurance Corp. totaled $16 billion at yearend 1986, up almost 43% from $11.2 billion at Dec. 31, 1985.

Over the 12 months from Sept. 30, 1984 to Sept. 30, 1985 — the period used in last year's survey — the top 100 thrifts posted a 73% gain in commercial loans outstanding.

Industry observers attribute the continued growth to several factors. Many of the largest thrifts are located in booming areas in the Southeast and Southwest. Also, the sizable gains for some can be attributed to the fact that commercial lending powers were not granted to thrifts until 1982. Thus, growth rates are calculated from a small base.

Top 5 Thrifts in Commercial Lending

Dec. 31, 1986 (Thousands of Dollars)

Old Stone Bank FSB, Providence, R.I.	$880,542
Goldome FSB, Buffalo, N.Y.	731,843
California FS&LA, Los Angeles	716,252
CenTrust Savings Bank, Miami	625,731
City Federal Savings Bank, Elizabeth, N.J.	615,448

These are among the findings of the *American Banker's* second survey of commercial lending at top thrift institutions. All data for this survey were taken from the quarterly financial reports submitted to the Federal Home Loan Bank Board. Rankings were provided by ADP Data Services, New York, from its computer tape of the Bank Board data base.

Commercial loans, as defined by the Bank Board, include all secured loans on commercial properties not qualifying as mortgage loans. Included are floor planning loans for automobiles or mobile homes. Retail auto loans are included only if autos are for commercial use. Unsecured commercial loans include all unsecured loans made for commercial purposes, including unsecured construction loans to builders for the purpose of constructing residential property. Also included are overdrafts on commercial demand deposits.

A total of 34 of the 100 thrifts reported commercial loan growth of 50% or more. Twelve of those were located in the Southeast, an area identified as one of the fastest growing in the nation. First Home Federal Savings & Loan Association, Greensboro, N.C., identified two major reasons for its loan growth — a favorable interest rates and the robust economy of its market.

Where Japan's Banks Now Stand

Second of a Series

"THE situation here is very different from what it is in the United States," says Yoshitoki Chino, chairman of Daiwa Securities, Japan's second largest brokerage and investment house.

"There, banks are completely forbidden to own equity in nonfinancial corporations. Here, banks own 20% of the value of all the securities on the Tokyo Stock Exchange — much more than 20% of the companies with which they were once associated in the financial cliques of former days.

"For banks to be stockbrokers here would be an obvious conflict of interest," he says. "If they would sell out their holdings of shares and stand on the same level as the American banks; we would have no objection."

"Right after the war," says Nobuya Hagura, president of Dai-Dichi Kangyo Bank, the biggest in the world, "the securities firms had no standing in Japan. Under the influence of the occupation, our government tried to develop securities firms and protect them from the banks' activities. Now the securities firms don't need protection, but there is still that principle in the law."

One notes in passing that though both of these eminent gentlemen had transla-

GAO Report Says Outlook Is Bleak For Ailing S&Ls

By JIM McTAGUE

Washington Bureau

WASHINGTON — Kid-glove treatment for ailing thrifts is not likely to help them recover, concludes a report from the General Accounting Office.

The study, prepared for Sen. William Proxmire, D-Wis., chairman of the Senate Banking Committee, concludes that institutions performing poorly in today's low-rate, low-inflation environment are unlikely to recover, regardless of the amount of regulatory and accounting leeway given to them by legislators and examiners. The General Accounting Office is the investigative

All data are from the Quarterly Financial Report to the Federal Home Loan Bank Board for FSLIC-insured institutions and were provided by **ADP Data Services, New York**, from their data base of FHLBB data. **Commercial loans** include both secured and unsecured loans. **Secured commercial loans** include all loans on commercial properties having a security interest but not qualifying as a mortgage loan. **Unsecured commercial loans** include all unsecured loans for commercial purposes. **Interest on Commercial Loans** is the gross interest earned for the year on commercial loans. **Gross Operating Income** is the sum of all interest and noninterest income earned for the year. **Commercial Loans/Total Assets** is total commercial loans at the end of the period expressed as a percentage of total assets at the end of the period. **Int. Comm. Loans/Gross Oper. Inc.** is gross interest earned on commercial lending expressed as a percentage of gross operating income for the year.

Dear Reader, How Are We Doing?

The *American Banker* wants to make sure our statistical tables of thrift earnings and thrift commercial lending meet your information needs. So would you spend a moment to give us some feedback? Please clip out this questionnaire and return to: William Zimmerman, Editor, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-5712.

(1.) How would you **change** the net income table or the commercial lending table to make them more useful? What would you add?

(2.) What do you like **best** about the tables?

(3.) What do you like **least** about them?

(4.) How do you use the tables in your work?

laws governing the nation's financial system, not to make the laws," said trade group president Edward I. O'Brien.

He charged that the board acted imprudently in denying the Securities Industry Association's petition for a stay. Given the 3-to-2 vote and dissent by Mr. Volcker and Fed Governor Wayne Angell, "prudence should have mandated granting a stay," Mr. O'Brien said.

He noted that in March the Senate had voted to support a moratorium on any regulatory action that would allow banks to expand their securities activities, pending a comprehensive review of the nation's financial system.

"By denying our request for a stay, in spite of likely congressional review of banking laws and pending court action to determine the legality of the decision, the Fed is encouraging marketplace changes of questionable legality," Mr. O'Brien said. ■

Commercial Loan Growth Slows at Top Thrifts

➸ Continued from Page 1

ment, said First Home has been "very careful in selection of businesses and areas we deal with. We are located in some of the fastest growing areas in North Carolina."

Mr. Barnett said that First Home has not been using advertising to bolster its commercial lending activities. "We have an active call program and we do refinancing of existing loans as well as new lending. We're not offering the lowest rates, just good packages." He said the thrift has been engaged in lending for shopping centers, apartment buildings and condominiums.

He described First Home's lending as "progressive" and administered by a "well-trained staff." He said the thrift "deals with quality business. We track area economies, judge an area's vacancy rate to see if it's going soft. We don't want to end up like a Texas bank."

CenTrust Savings Bank of Miami, Florida's largest savings institution, was another large gainer in 1986. CenTrust reported $625.7 million in commercial loans at yearend, a 788% jump. Gross operating revenues for all of 1986 increased 16%. Interest on commercial loans as of percent of gross operating income grew to 10.2% from less than 2% a year earlier.

In a release, CenTrust attributed its revenue improvement to loans.

"Strong growth in loans, combined with a favorable interest rate environment, produced the continuing improvement in net interest income," said David L. Paul, CenTrust chairman and chief executive officer.

At all FSLIC-insured thrifts, commercial loans increased 51.7% in 1986, to $22.1 billion. That compares with an increase of 33.4% in 1985, according to the Bank Board.

Old Stone Bank, Providence, R.I., remained the leader in commercial lending with $880.5 million, an increase of 20.6% from the previous year. Old Stone was followed by Goldome, Buffalo, N.Y., which reported $731.8 million, up 28.4%; California Federal Savings and Loan Association, Los Angeles, with $716.3 million, a rise of 19.5%; and CenTrust Savings Bank, with $625.7 million, up 788%. ■

North Dakota Bankers Announce Key Speakers

MINOT, N.D. — Speakers at the annual convention of the North Dakota Bankers Association, to be held here June 15-16, will include *Time* magazine columnist Hugh Sidey, network journalist Jerry Levin, who was held hostage by Arab terrorists, and Oklahoma Gov. George Nigh.

Also scheduled to be on the two-day program are Thomas Rideout, treasurer and senior vice president of the American Bankers Association; James Vining, president of Vining-Sparkes Securities Inc. of Memphis; Georgia Congressman Doug Barnard Jr.; and North Dakota Bankers Association president-elect John W. Pierson, president of Norwest Bank, Minot.

Introducing an indispensable guide to real estate financing transactions!

This extraordinary new manual is the one tool you need for drafting the right forms for all your financing deals. But it's much more than a forms book—its extensive commentary makes it a *complete sourcebook* on the technicalities of real estate financing transactions. Practical, convenient, and easy-to-use, **Real Estate Financing Forms Manual** will save you time and effort as it ensures the accuracy of your transactions.

You'll find complete, up-to-date forms for every major real estate transaction. Frequent checklists and commentary give you an overview plus the specifics of a transaction. You get practical advice on the best way to handle each transaction, and how to guard against costly mistakes or omissions.

Step-by-step, the Manual takes you through transaction processing:
- **General discussion** on the transaction describes the legal requirement along with the basic legal concepts involved.
- **Specific discussion** explains the purpose of each form, how it's used, and any other important information such as the effect of recent litigation.
- **Annotations,** when necessary, directly following the pertinent paragraph or article of the form, explanations of the meaning and significance of the provision. In addition, you get suggestions for alternative language to help you adapt each form to your specific needs.

These three types of commentary and an easy-to-follow format will help you make the most of every opportunity—and avoid the pitfalls in each transaction.

Net Income is total income (operating plus nonoperating) minus total expenses (operating, nonoperating, and income taxes) for calendar years 1986 and 1985, unless otherwise noted. The bulk of the data are from American Banker questionnaires. Federal Home Loan Bank Board were used for thrifts who did not report full-year earnings to American Banker. A dagger **(†)** indicates FHLBB data were used. **FHLBB data— which are the sum of current net income for the four quarters of the year— were provided by ADP Data Services, New York .** **ROA**— return on assets, or net income for 1986 divided by total assets on 12/31/86. **(a)**— Net income is for fiscal year-ended 9/30. **(b)**— Net income for 1985 and 1986 are on a consolidated GAAP ("generally accepted accounting principles") basis. **(c)**— In last year's listing, using unconsolidated, regulatory net income for 1985, Empire of America FSB, Fort Worth, ranked 34th and Empire of America FSB, Buffalo, ranked 63rd with $28.8 million and $17.8 million, respectively. **(d)**— 1985 net income is for last six months of the year. **(e)**— In last year's listing, based on unconsolidated, regulatory net income for 1985, Goldome FSB ranked 98th with $12.3 million. **(f)**— Net income is for fiscal year-ended 10/31. **(g)**— 1985 net income is for fiscal year ended 9/30. **(r)**— Rank institution would have had, if data were available.**(R)**— **Revised rank based on FHLBB data.** **( )**— A loss.

Who's News

The well-traveled road from the Federal Home Loan Mortgage Corp. offices in Washington, D.C., to the offices of Imperial Corporation of America in San Diego had another passenger this week, as **Michael J. Lea** became the fifth Freddie Mac official in the past two years to join the management team at Imperial.

The exodus began in September 1985, when Freddie Mac president Kenneth J. Thygerson left the government mortgage agency to become president and chief executive officer of Imperial, a $9.8 billion-asset thrift holding company. Three other Freddie Mac officers soon joined Mr. Thygerson: Kevin E. Villani, Imperial's chief financial officer; Stephen G. Haines, chief administrative officer; and Gary Palmer, head of corporate finance.

Michael J. Lea

Mr. Lea, 37, remained behind. "They didn't really have a spot for me when they first went out," he said.

While Mr. Thygerson's new management team began the process of turning Imperial's red ink into profits, Mr. Lea took over Mr. Villani's job as Freddie Mac chief economist. But during the past couple of months, Mr. Lea said, he and Mr. Villani have run into each other several times as speakers at the same conferences, and the new position at Imperial opened up for Mr. Lea.

He will become senior vice president of financial and economic analysis for Imperial. "Mike's knowledge of the capital and secondary markets and his experience in financial analysis will be instrumental in furthering ICA's profit goals," Mr. Thygerson said. "He will be responsible for developing our pricing strategy to insure the profitability of every ICA product line."

Mr. Lea joined Freddie Mac in 1983 as a senior economist. Before that, he was an associate professor in the department of consumer economics and housing at Cornell University, Ithaca, N.Y. He also served as a staff member for the President's Commission on Housing in 1982-83, and was a Brookings Institution economic policy fellow at the U.S. Department of Housing and Urban Development in 1981-82.

Also Noteworthy...

R. Keith Pedigo, an employee with the Veterans Administration since 1971, has been appointed director of the agency's Loan Guaranty Service, which manages its national home loan program. He succeeds **Robert M. O'Toole,** who resigned in April to join the Mortgage Bankers Association of America.

Maureen D. McCarthy has been appointed a senior vice president of American Savings Bank FSB, New York. She was previously a vice president in Citibank's international private banking division.

Frank Whelan has been named vice president of the Travelers Mortgage Services St. Louis wholesale division. He was formerly president of Citicorp Homeowners Services Inc., St. Louis.

Scott R. Christensen has been named senior executive vice president and chief operating officer of State Savings FA, Flushing, N.Y. He was previously senior vice president of administration and operations for City Consumer Services Inc., Somerset, N.J.

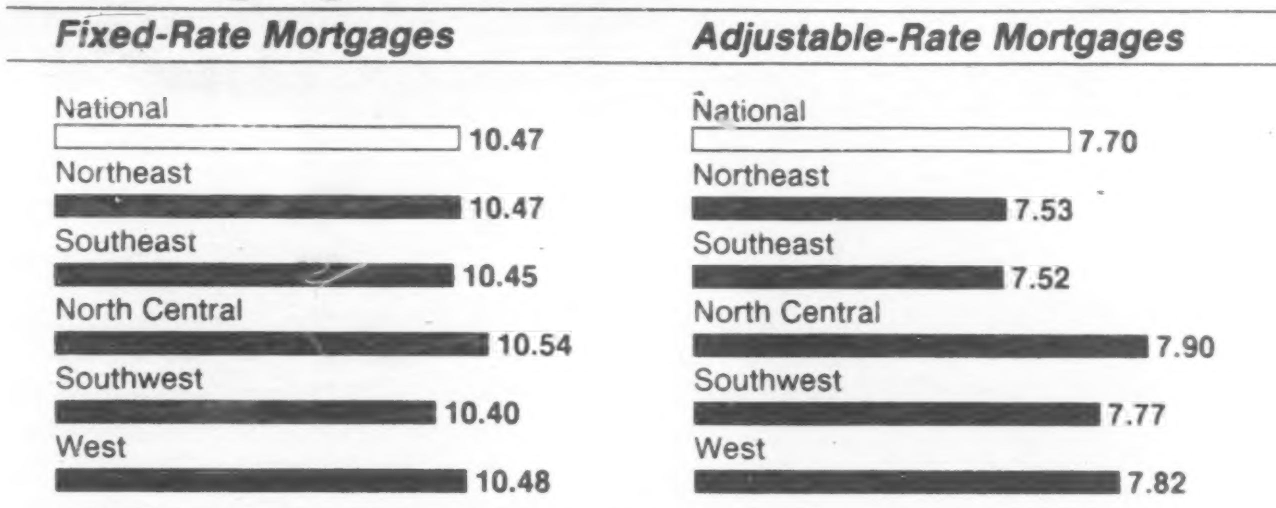
Mortgage Database



Mortgage data for the week ended May 1 provided by Federal Home Loan Mortgage Corp. Fixed-rate mortgages are 80% loan-to-value conventional 30-year mortgages. Adjustable-rate mortgages are one-year Treasury indexed conventional 30-year mortgages.

Selected Interest Rates

6-Month Treasury Bills	6.14%
1-Year Treasury Bills	6.76%
3-Year Treasury Notes	7.71%
5-Year Treasury Notes	7.92%

Average rates for the week ended May 1 compiled by the Federal Reserve Board.

Five Big California Institutions Head List of Nation's Most Profitable Thrifts

By LINDA ELLIS

FIVE large California thrifts took the top five positions in *American Banker's* annual survey of net income at thrift institutions.

Home Savings of America FA, the main subsidiary of H.F. Ahmanson & Co. was the leader for the second year in a row. Irwindale, Calif.-based Home Savings was followed by Great Western Bank FSB, Beverly Hills; Columbia Savings & Loan Association, also Beverly Hills; World Savings Federal Savings & Loan Association, Oakland, and California Federal Savings & Loan Association, Los Angeles.

Other survey findings showed:

- The leaders in earnings rise by percentage were Talman Home Federal Savings & Loan Association, Chicago; Dime Savings Bank of New York FSB; Seamen's Bank for Savings FSB, New York; St. Bernard Federal Savings & Loan Association, Chalmette, La., and Coral Gables Federal Savings & Loan Association, Coral Gables, Fla. Talman, Illinois' largest thrift, is a one-time "phoenix" association that converted to a stock association and has rebounded.
- Hit by the sharpest percentage drop in net income were Meritor Savings Bank, Philadelphia; Gibralter Savings Association, Houston; City Federal Savings Bank, Elizabeth, N.J.; Lincoln Savings & Loan Association, Irvine, Calif., and CrossLand Savings FSB, Brooklyn. Meritor restructured in 1986, reducing reliance on gains from the sale of loans and investments.
- In the category of return on assets, the winners were: Union Federal Savings Bank, Indianapolis; Uptown Federal Savings FA, Niles, Ill.; Coral Gables Federal; Washington Federal Savings & Loan Association, Seattle; and Champion Federal Savings & Loan Association, Bloomington, Ill. Jerry VonDeylen, Union Federal's senior vice president and managing officer attributed the healthy 5.54% return to a "highly successful" mortgage banking operation.
- Lowest ROAs among the top 100 earners were recorded by Meritor Savings; American Savings & Loan Association, Stockton, Calif.; Bowery Savings Bank, New York; Atlantic Financial Federal, Bala-Cynwyd, Pa.; and City Federal.

Top 100 Thrift Earners
Page 22

□□□

Citing "imprudent, high-risk lending" and sour real estate markets in some areas of the nation, a leading bank consulting firm reported this week that annual earnings at U.S. savings and loan associations dropped 53.5% nationwide in 1986.

Annual combined earnings were $2 billion, down from $4.3 billion for 1985.

The nation's thrifts, hit by major loan quality problems, particularly in the Southwest, posted the overall earnings drop despite improving interest spreads, said Sheshunoff & Co., Austin, Tex.

Top Profitable Thrifts

Ranked by 1986 net income in millions

Home Savings of America FA Irwindale, Calif.	**$336.7**
Great Western Bank FSB Beverly Hills	**$300.2**
Columbia Savings & Loan Assn. Beverly Hills	**$193.5**
World Savings FS&LA Oakland, Calif.	**$183.0**
California Federal Savings & Loan Los Angeles	**$143.4**

The country's 3,235 federally insured thrifts reported a return on average assets of 0.17% for the year, the worst since 1982 and down from the 1985 rate of 0.40%. Return on assets is net income, including securities transactions and nonrecurring items, as a percentage of total assets. It is considered a basic yardstick on profitability.

Twenty S&Ls were closed last year, up from 10 the year before. The number of FSLIC-assisted mergers and acquisitions increased to 34, up from 22 in 1985. FSLIC management consignments totaled 46 in 1986, up from 25.

"The major problems facing the savings industry today focus on the activities of a small minority of S&Ls, with loan quality the most pressing problem," said Alex Sheshunoff, the company's president, noting that dangerous lending practices, excessive loan growth, and deflation of real estate values in some markets will cost "tens of billions of dollars" before the crisis is over.

Of the 20 states with the highest ROA, 16 were east of the Mississippi River. Seventeen of the 20 poorest performing states for ROA were in the West.

Repossessed assets for the year continued to rise rapidly, the Sheshunoff report said, another sign of industry troubles. Nationally, repossessed assets as a percentage of total assets was 1.11%, up from .76%. The dollar figure was $13.5 billion, up 59% from the year prior.

Texas, with $3.1 billion in repossessed assets, accounted for 62% of the national increase in that category.

Mr. Sheshunoff identified three emerging tiers of S&Ls:

- Long-term winners that early on adapted to a variable-rate environment and kept consistently good asset quality through the troubled years.
- "Low interest rate wonders" that survived high rates and how have large portfolios of high-yielding fixed rate loans.
- "Major losers" that bet heavily on commercial real estate and land acquisition in the Southwest.

On the plus side, the spread between yields (interest income) and rates (interest expense) continued to improve nationally last year, at 1.55% up from 1.31% in 1985. ■

Agencies Undaunted on Stripped Issues

The Federal Home Loan Mortgage Corp., which made its first offering of stripped mortgage securities less than three weeks ago, said a recent $250 million loss at Merrill Lynch & Co. in deals involving these volatile securities would not deter it from continuing in the stripped mortgage securities market. "There is no change in our plans at this point," said a spokeswoman.

Mortgage Markets

Stripped mortgage-backed securities are instruments that separate the principal and interest payments from a mortgage loan into two classes — an interest-only and a principal-only class.

The Federal National Mortgage Association, which invented stripped mortgage securities last June and has been active in the stripped securities market for about a year, closely controls the issuance of its securities by dealers. Jayne Shontell, a vice president for mortgage-backed securities sales and marketing, said Fannie Mae keeps its deals relatively small — typically between $200 million and $300 million — making them easier to distribute. In contrast, the stripped deal brought by Merrill was close to $1 billion.

Stripped securities are issued only "as the market can withstand it," Ms. Shontell said. "I've made dealers wait as much as two to three weeks because I didn't think the market was ready," she said.

Fannie Mae also requires that dealers who wish to sell stripped securities through its conduit presell "a good part" of whichever piece is likely to prove more difficult to sell. In the current interest rate environment, with rates going higher, that means the principal-only portion, she said. Several months ago, it was the interest-only portion that dealers found hard to sell.

Fannie Mae has been the dominant player in the stripped mortgage-backed market, issuing about $6 billion of these securities. Analysts estimate the total stripped market to be between $8.4 billion and $11 billion. ■

US Urges Use Of Surplus for Farm System

Administration Resists Tapping Treasury Funds

By ROBERT M. GARSSON
Washington Bureau

WASHINGTON — The Reagan administration, eager to block the troubled Farm Credit System from tapping Treasury funds, is calling for legislation that would free up $1.2 billion of capital that it says is already available to the system.

At the same time, the administration is lobbying against a bill that would create a secondary market for farm mortgage loans. The secondary market, as it is being discussed on Capitol Hill, would probably take advantage of guarantees from the Farm Credit System.

The secondary market for farm loans is a high-priority item for bank trade groups, including the American Bankers Association and the Independent Bankers Association of America.

The Farm Credit System, which holds nearly a third of the nation's agricultural debt, has rolled up $4.6 billion in losses over the past two years. Although the red ink slowed in the first quarter — the system lost $155 million, compared with $206 million a year earlier — the system's governing agency estimates it will lose from $2 billion to as much as $11.7 billion by 1994.

Last week, the Farm Credit System asked a skeptical and budget-conscious Congress for an appropriation that would make $6 billion available to it through a line of credit to the Treasury.

The credit line was authorized in the last Congress, but it requires that the Farm Credit Administration, which oversees the system, certify that the

Survey Finds Most Americans Still Have Confidence in S&Ls

By LAURA GROSS

NEW YORK — Despite a raft of publicity about thrift failures and the ailing Federal Savings and Loan Insurance Corp., most Americans seem to have retained their confidence in savings and loans.

A nationwide survey commissioned by the *American Banker* finds that more than eight out of ten people say money kept in savings and loans is safe, compared with just over one in ten who say it is not.

Sixty-four percent of those polled say they have just as much confidence in the safety of savings and loans as they do in commercial banks. That's essentially the same percentage that rated banks and savings and loans equally two years ago in a similar survey commissioned by the newspaper.

AN **American Banker** SURVEY

The earlier survey, conducted in July 1985, found that 65% of the public had equal confidence in banks and savings and loans. Because of a possible sampling error of plus or minus three percentage points in such national surveys, the responses of consumers in the two polls are considered identical.

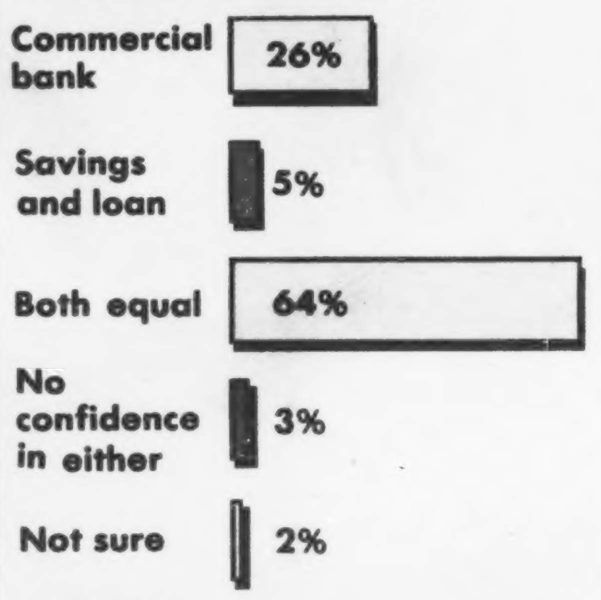
The level of public support has held up even though a record number of savings and loan associations went out of business or were merged into healthier counterparts during the last two years.

Also, it appears that the average American is not rushing to move his money out of a savings and loan association and into a commercial bank. Only 4% of a sample of savings and loan customers who are aware of the problems of S&Ls and who judge those problems to be serious say they have moved any money into a commercial bank because of their concerns.

These are among the findings of a nationwide telephone poll of 981 con-

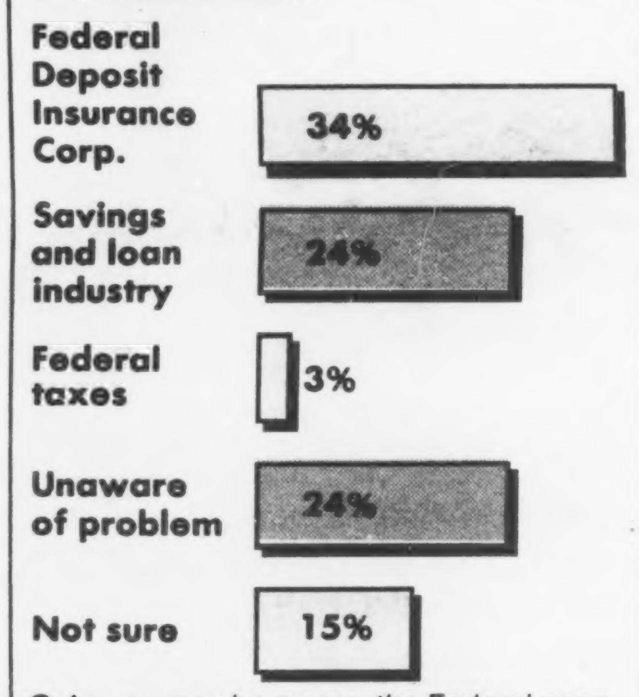
Survey: Page 32 ➻

Where Do You Have More Confidence Keeping Your Money?



Q: All in all, do you have more confidence in keeping your money in a federally insured commercial bank, or in a federally insured savings and loan association, or do you have equal confidence in both?

How Should the FSLIC Be Bailed Out?



Q: As you may be aware, the Federal agency that insures deposits at savings and loans is having financial problems. Several proposals to provide new funds have been suggested. Do you think the additional funds should come from the savings and loan industry itself, federal taxes, or the seperate agency that insures commercial banks, known as the FDIC?

Survey Finds Most Americans Continue to Trust S&Ls

Continued from Page 1

sumers questioned during March and April about their attitudes toward savings and loan associations and the S&L industry. The six-question poll was conducted by Trans Data Corp., the Salisbury, Md., research subsidiary of the company that publishes the *American Banker.*

At a time when a major topic of discussion in the Congress of the United States involves how to bolster the insolvent FSLIC, industry leaders and legislators say that the high level of loyalty shown in responses to the *American Banker*'s survey indicates a great deal of faith in the government's ability to handle the problems of the savings and loan industry.

"The bottom line is that people realize that the words federally insured mean just that. One way or the other, the federal government will stand behind that insurance," commented Kenneth McLean, staff director of the Senate Committee on Banking, Housing, and Urban Affairs.

The loyalty found in the survey, however, is expressed in the face of more than two years of declining deposit inflows at savings and loan associations, a loss that some industry experts fear could be exacerbated if consumer doubts are not nipped in the bud by swift handling of the FSLIC's problems.

Outflow from Uninsured Accounts

The latest figures from the Federal Home Loan Bank Board show a deposit outflow of $3.1 billion during the first two months of 1987, 80% of which came out of uninsured deposit accounts with balances greater than $100,000. That compares with a deposit inflow of $2.4 billion in the same period a year earlier.

For all of 1986, there was an outflow of $3.8 billion, primarily due to withdrawals from insured retail accounts of $100,000 and less. That compares with a 1985 outflow of $4.6 billion due mostly to withdrawals from uninsured deposit accounts with balances exceeding $100,000.

Those outflows are in marked contrast to deposit inflows of $63.2 billion in 1983 and $56.9 billion in 1984. All Bank Board figures are net of interest credited on deposits.

According to a report last week from the General Accounting Office, the FSLIC was $6 billion in the red on Dec. 31 as a result of liabilities it has had to assume in connection with thrift insolvencies. Meanwhile, hundreds of other thrift institutions are in need of assistance but, because of its own problems, the FSLIC cannot help. Plans to rescue the insurance fund have been under discussion in Congress for more than a year.

Congressional debate has centered on how much money is needed and where that money should come from. Last week, the House of Representatives passed a measure to provide $5 billion over two years, with the funds coming from the healthy majority of the nation's 3,200 savings and loans. Provisions of that bill will now be negotiated with the Senate, which passed a different bill earlier to provide $7.5 billion.

Public Looks to FDIC

Consumer confidence in the federal government's deposit insurance funds also showed up in responses to questions about where money should come from to assist the FSLIC. More people want those dollars to come from the Federal Deposit Insurance Corp. than want the S&L industry to contribute the money. Only 3% of the public votes to foot the bill by increasing federal taxes.

About that response, C.C. Hope Jr., a member of the FDIC board of directors, said, "The FDIC seems to some people to be an easy answer to a complex problem, and that is not an answer.

"The answer lies much more in trying to have a long-range plan to restore the stability of that industry than in letting some other agency take over the responsibility of providing insurance for S&Ls," Mr. Hope said.

The Federal Deposit Insurance Corp. traditionally has opposed a merger with the FSLIC. Only last week, L. William Seidman, chairman of the FDIC, predicted that healthy S&Ls would begin abandoning the FSLIC for the FDIC despite penalties for doing that in pending congressional legislation. He warned that any significant increase in the number of thrifts switching to the FDIC fund could mean additional premium assessments on FDIC-insured institutions.

A long-range solution to the difficulties of problem savings and loans was also advocated by William O'Connell, president of the U.S. League of Savings Institutions. Mr. O'Connell said that "the FSLIC would get well pretty fast, the FDIC would stay healthy, and we could get along with a moderate amount of cash coming from the S&L industry if the Federal Home Loan Bank Board could find better ways to stretch out the losses of institutions in some depressed states."

Last year, about 20% of the nation's savings and loans lost money, compared with 80% that were profitable. If it were not for the negative one-fifth, the industry would have had an annualized return on assets of 1.08%. Instead, the industry's aggregate ROA was 0.17%.

American Banker's recently completed poll finds that three out of five consumers are aware that some savings and loan associations have had problems, while about two in five are not.

Residents of the Northeast are less aware of savings and loan problems than residents of the West. That could be because most northeastern thrifts were chartered — until recently — as mutual savings banks. Savings and loans are more common in the West.

Men are more aware of S&L problems than women: 64% recall hearing about some S&Ls that have had problems, compared with 57% of women. More college graduates are aware than people who have not attended college. Also, people over age 55 are more aware than those under 35, and those who own their homes are more aware than renters. People from high-income households — where the earnings exceed $50,000 a year — are more aware than low-income people whose annual earnings are $20,000 or under.

Among those individuals who recall hearing about the problems of savings and loans, 89% consider the situation to be serious, while only 7% say it is not serious. More people characterize the situation as very serious than call it somewhat serious.

Even 73% of those calling the situation very serious think that it is safe to keep money in a savings and loan. More than half of those calling it very serious have just as much confidence in savings and loans as they do in commercial banks.

Of the total sample, 82% say they feel money is safe in a savings and loan and 12% say they do not. The more serious someone considers the S&L situation, the less safe they tend to consider it. Almost nine out of ten people who think S&L problems are not serious say it is safe to keep money in an S&L.

Men are more aware of S&L problems than women: 64% recall hearing about some S&Ls that have had problems, compared with 57% of women. More college graduates are aware than people who have not attended college. Also, people over age 55 are more aware than those under 35, and those who own their homes are more aware than renters. People from high-income households — where the earnings exceed $50,000 a year — are more aware than low-income people whose annual earnings are $20,000 or under.

Among those individuals who recall hearing about the problems of savings and loans, 89% consider the situation to be serious, while only 7% say it is not serious. More people characterize the situation as very serious than call it somewhat serious.

Even 73% of those calling the situation very serious think that it is safe to keep money in a savings and loan. More than half of those calling it very serious have just as much confidence in savings and loans as they do in commercial banks.

Of the total sample, 82% say they feel money is safe in a savings and loan and 12% say they do not. The more serious someone considers the S&L situation, the less safe they tend to consider it. Almost nine out of ten people who think S&L problems are not serious say it is safe to keep money in an S&L.

Those who judge the situation as unsafe, however, were four times as likely to have moved their money out of savings and loans into banks than those who judge it safe. Three-fourths of respondents who call S&Ls unsafe do not use an S&L at all.

About 259 individuals surveyed — or just over 25% of the total — fall into the category of savings and loan customers who are aware of S&L problems and judge the situation serious. Compared with the overall rate of 4%, westerners in that group moved the most at a rate of 8.7%, followed by 6.8% of residents in North Central states, and 6.1% of women. Although the subgroup is small, 10.2% of renters in the group of thrift customers calling the situation serious moved funds out of an S&L. Just over half of the sample do not use a savings and loan association.

Asked which they have more confidence in — federally insured commercial banks or federally insured savings and loan associations — people who regard commercial banks as their principal financial institution have more confidence in their banks than people calling S&Ls their principal institution have in S&Ls. Thirty-seven percent of people calling commercial banks most important to them say they have more confidence in commercial banks, while only 14% who call savings and loans most important say they have more confidence in their S&Ls.

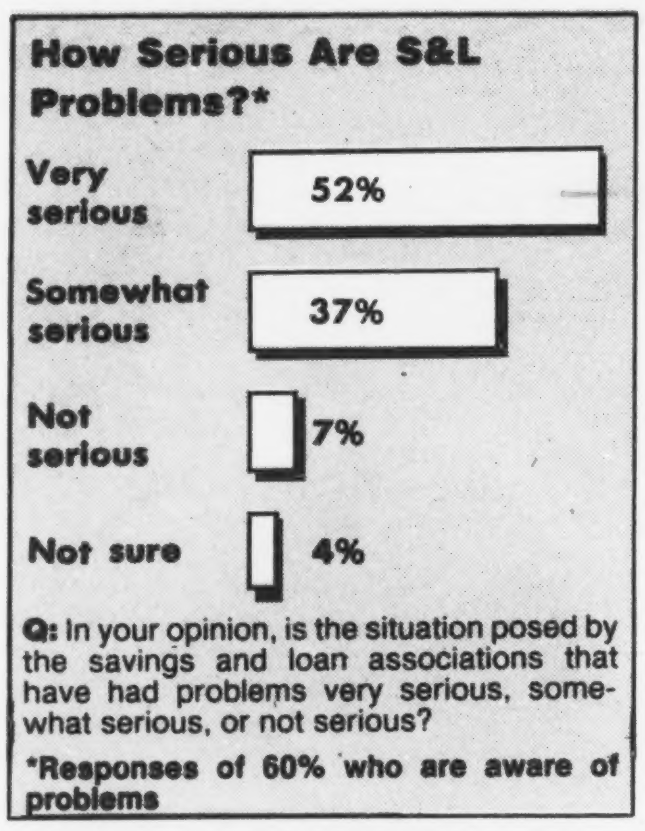
People calling savings and loans their main institution tend more than any other customer segment to have confidence in both commercial banks and S&Ls, with 75% saying they trust both equally. Only 58% of those calling commercial banks their main institution trust S&Ls as much as commercial banks.

Since mid-1985, there has been a slight decline in the number of people earning $50,000 a year and up who have more confidence in commercial banks. In 1985, 38% of them chose commercial banks and 56% had equal confidence in banks and S&Ls. In this year's survey, 28% choose commercial banks and 66% report equal confidence in banks and thrifts.

On the issue of who should bail out the FSLIC, people who call commercial banks their main institutions are slightly less eager than those calling S&Ls their main institutions to have the FDIC handle the problem. They may not want to see what they consider their insurance fund diluted by S&L problems. On the other hand, people whose principal institutions are S&Ls may seek the security that comes with the well-recognized words "FDIC insured."

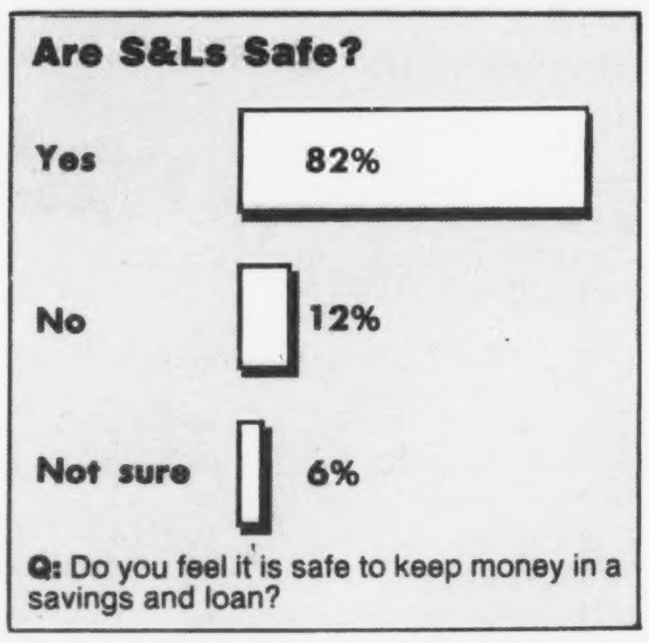
Despite this minor deviation from the norm, the survey finds that most people feel as good about one federal insurance fund as they do the other.

"It's the word federal: When people see a sign on the door that says the deposits are insured federally, they are secure. It reflects the fact that nobody whose deposits are insured in a federally insured bank or federally insured S&L has ever lost a nickel in the 50 years the insurance funds have existed," Mr. McLean said. ■



Q: In your opinion, is the situation posed by the savings and loan associations that have had problems very serious, somewhat serious, or not serious?

*Responses of 60% who are aware of problems



Q: Do you feel it is safe to keep money in a savings and loan?

How the Survey Was Conducted

The survey consisted of 981 telephone interviews of a random cross-section of the American public. Trans Data Corp., a Salisbury, Md., market research firm, and the *American Banker* developed the questions.

All interviews were conducted during March and April with "the person in the household who usually handles the finances."

The expected sampling error is plus or minus three percentage points. Subgroups that consist of smaller sample sizes have greater margins of error.

The *American Banker's* questions were asked as part of a national survey of consumer banking issues by Trans Data. Additional information, including copies of the *American Banker* survey questions, can be obtained from Howard Lax, Trans Data Corp., 530 Riverside Dr., Salisbury, Md. 21801 (301/543-4400). ■

Firm Foresees 30% Fewer Credit Unions by 1990

Decline Could Alter Political Clout of Movement's Strong Lobby in Washington

By JEFFREY KUTLER

NEW YORK — Credit unions, which have far outnumbered commercial banks for many years, may not do so much longer as the pace of consolidation accelerates, a study by the Madison Consulting Group has concluded.

By the end of 1990, there will be 12,000 credit unions, 30% fewer than the 17,300 extant in mid-1986 and about half the peak of 23,700 in 1970, predicted Madison, a consulting firm with offices in El Segundo, Calif., and Fort Lee, N.J.

Its scenario would leave credit unions less numerous than the 14,238 federally insured commercial banks that existed on Dec. 31, 1986.

Banks, according to some predictions, could decline to 10,000 or less by 1990. But even if credit unions remain more populous, the two industry segments would be closer to numerical parity than ever before. This could affect the political balance of power in Washington, where the credit union lobby is disproportionately strong relative to the assets its members control.

Credit union executives are not quite as pessimistic about their industry's attrition. The consensus of 40 managers whom Madison interviewed in March 1987 was that the number of credit unions would decline 5% a year through 1990, rather than 8% as envisaged by Madison.

A 5% attrition rate would leave

FROM THE REGIONS

Alabama Banks Are Ready to Go Interstate

By PETER MANTIUS

ATLANTA — Though Alabama's regional interstate banking law does not take effect until July 1, in many ways the state's largest banks have been playing the interstate game for months.

Their stocks jumped last spring when the law passed, and they have remained at premium levels ever since.

In addition, four of Alabama's five banks with assets of $1 billion or more have agreed to buy out-of-state institutions, and talks with the Southeast's superregional banks have been frequent.

"We've had more than one conversation with more than one regional bank," said Harry B. Brock Jr., chairman of Central Bancshares of the South Inc., a $3.9 billion-asset holding company based in Birmingham.

"Whatever courting there was to do is pretty well in the past," Mr. Brock added. "The price of everybody's stock reflects the ability to expand into other states."

First Alabama Bancshares Inc. of Montgomery, the state's third largest and second most profitable bank, has even gone on scouting missions to superregional banks to check out their management, organization, technology, products, and growth plans.

"We know a great deal more than we did about a handful of regional banks," W.R. Hurley, chairman of First Alabama, told shareholders on April 15. "We are much better prepared to analyze any offer we might receive involving an exchange of our stock for that of a superregional bank . . .

"We will be looking at their profits, policies, and practices as we continue to form our opinions of their operations."

Mr. Hurley said First Alabama is also considering three other strategies — buying Alabama banks, buying banks in contiguous out-of-state markets, or

IN THE NEWS

Interest Rates Drop in NY

NEW YORK — The average interest rate on credit card purchases and cash advances dropped from 18.4% in mid-November to 17% in mid-April, according to a survey by the New York State Bankers Association. Interest rates on home improvement loans fell to 11.7% from 12.3%; on car loans, they fell to 11.9% from 12.2%; and on unsecured personal loans, they fell to 13.55% from 14%. Time and savings deposits also dropped in January, to $119.1 billion from $119.6 billion in December 1986, according to the survey, the Consumer Banking Report.

US Bancorp's Ratings Cut

NEW YORK — The senior debt rating of U.S. Bancorp, Portland, Ore., was lowered to A-plus from AA-minus by Standard & Poor's Corp. Its commercial paper rating was lowered to A1 from A1-plus. About $200 million of debt is affected. The rating agency said the ratings were lowered because of the pending acquisition of Old National Bancorp., whose high loan leverage will cause a decrease in the consolidated ratio of equity plus reserves to loans.

Montreal Bank's Ratings Cut

NEW YORK — Standard & Poor's Corp. lowered the ratings of Bank of Montreal's subordinated debentures — issues of the bank's mortgage units guaranteed by Bank of Montreal and obligations backed by the bank's letters of credit — to AA-minus from AA by Standard & Poor's Corp. The senior long-term debt ratings of Bank of Montreal's unit, Harris BankCorp, Chicago, were also lowered to AA-minus from AA. About $1 billion of debt is affected.

S & L Posts $2 Million Loss

GRAND JUNCTION, Colo. — Valley Federal Savings and Loan Association of Grand Junction, which last week reported a 1986 loss of $28.6 million, said it had a loss of $1.8 million in the first quarter of 1987. The $126 million-asset thrift had a negative net worth of $39.6 million as of March 31. Valley Federal is operating under a management contract with Bank Western FSB, Denver, as part of the Federal Home Loan Bank Board's management consignment program.

Thrift Forms Investment Unit

DENVER — Capitol Federal Savings & Loan Association of Denver has formed First Capitol Financial Inc., a wholly owned subsidiary that will market a line of consumer investment services. First Capitol Financial Inc. completed negotiations with Great Northern Insured Annuity Corp., a Weyerhaeuser subsidiary, to offer its investment products.

Beneficial to Sell Insurer

WILMINGTON, Del. — Beneficial Corp. signed a definitive agreement for the sale of Northwestern Security Life Insurance Co. to a privately held Chicago-based company for about $40 million. Northwestern Security Life, a credit insurance subsidiary based in Wilkesboro, N.C., is classified as a discontinued operation by Beneficial.

— Compiled by Orest Mandzy

New Hampshire Bank Top Gainer of 2,500 Largest

By L. MICHAEL CACACE

NEW YORK — The total assets of the nation's top 2,500 commercial banks rose 8.7% in 1986, to $2.51 trillion on Dec. 31. A year earlier, the top 2,500 banks posted a 9.5% gain in assets, to $2.31 trillion.

The 2,500 banks had 85.3% of the $2.94 trillion in assets held by all 14,994 banks in the nation at yearend 1986. A year earlier, the top 2,500 banks held 84.6% of all commercial banking assets.

Tables Begin on Page 17

Those are some of the findings of the *American Banker*'s second annual listing of the top 2,500 commercial banks, ranked by assets. The listing was prepared in cooperation with R.L. Polk & Co., Nashville. The banks are ranked in order of their total assets on Dec. 31, 1986. Total assets for Dec. 31, 1985, are also shown, along with 1985 asset rank. (The tables begin on page 17.)

Biggest Gains in Asset Rank
(Dec. 31, 1985 to Dec. 31, 1986)

	1986 Rank	Gain
First NH White Mtn. Bank, N. Conway	1,437	2,399
Bank One Trust Co. NA, Columbus, Ohio	1,500	2,185
Olympic International B & T Co., Boston	1,659	2,102
Silicon Valley Bank, Santa Clara, Calif	1,550	2,064
MBank Westchase NA, Houston	1,368	2,060

The largest gain in rank was posted by the First New Hampshire-White Mountain Bank, North Conroy. It moved up 2,399 places to 1,437th as its assets soared more than 163% to $183 million on Dec. 31, 1986. Its assets were $69.5 million on that date a year earlier.

In 1985, the largest gain in asset rank was posted by another New Hampshire-based bank, Indian Head National Bank, Keene. In 1986, Indian Head's assets rose by almost 20% to $144.2 million, and it moved up 246 places to rank 1,816th.

Other Survey Findings

Texas Commerce Bank-Hillcrest, Dallas, ranked 2,500th at yearend 1986, with $110.2 million in assets. It ranked 2,468th in assets on Dec. 31, 1985, with a total of $104.5 million.

In 1985, American Bank, Norco, La., was the 2,500th largest bank, with assets of $103.7 million. Its assets fell by almost 12% to $91.4 million at yearend 1986 to rank 3,038th.

There were 33 banks with assets over $10 billion in 1986, compared with 27 in 1985 and 24 in 1984. Eighty-four banks had assets of $5 billion or more, versus 74 in 1985 and 67 in 1984. ■

David Ritz
President
Ritz Camera

“We're saving over 7 days of float with EDC from McDonnell Douglas.”

Ritz Camera, a leading retailer in photographic services and equipment, was one of the first national merchants to see the benefits of Electronic Draft Capture.

“With 190 locations across the country, we were looking for a way to drastically reduce the float on our credit card sales,” says David Ritz, President of Ritz Camera. “Electronic Draft Capture was the answer. Together with our bank, we chose McDonnell Douglas Payment Systems Company because their EDC system was comprehensive and easy to use.”

“We started realizing the benefits almost immediately. Not only was our float time reduced by over 7 days, but administrative costs were significantly reduced.”

“At Ritz Camera, we take pride in the quality of service we offer our customers and we expect the same level of service from people we deal with. McDonnell Douglas has always met our standards and that is why we have been a customer from 1983 through today.”

Today major merchants, like David Ritz, understand and demand the benefits of Electronic Draft Capture. With McDonnell Douglas Electronic Draft Capture, you can offer your merchants the most flexible and fully supported EDC system available.

To find out how you can strengthen and increase your merchant program with EDC, call John Maxey collect at 415/794-2634.

By MATTHEW KREPS
The Bond Buyer

NEW YORK — The nation's 1,000 largest banks reduced their holdings of municipal bonds by 13% in 1986, partly in anticipation of tax reform.

In book value, the banks held a total of $92.14 billion of bonds on Dec. 31, down 13% from the $105.89 billion they held at the end of 1985. Almost all of the decline came in the first six months of the year, before the Tax Reform Act of 1986's elimination of many tax advantages for holding tax-exempts.

The market value of the bank portfolios, boosted by falling interest rates, did not fall as far. In market value, the banks held $96.58 billion of bonds at the end of 1986, down 7.1% from the $103.99 billion of the year before. The market value dropped 8.3% in the first half of the year, but rose 1.3% in the second half.

Book value is the amount that the bank paid for the bonds; market value is what the bonds are worth when they are marked to market.

In 1985, the nation's top 1,000 banks increased the book value of their bond portfolios by 45%, and the market value jumped 56%.

The figures are based on the consolidated reports of conditions that the banks file with federal regulators every six months, under the category of "securities issued by states and political subdivisions in the United States." The list of banks excludes credit-card and other "specialty" banks that did not report any bond holdings.

More than three-quarters of the banks — 774 — reduced their bond holdings in 1986, by an average of $24.3 million. Two hundred and five banks added to their holdings, by an average of $24.5 million. Twenty-one banks either reported no change in bond holdings or no holdings at all.

Thirty-nine banks trimmed more than $100 million of bond holdings from their portfolios, while only seven added more than $100 million.

The nation's 100 largest banks reduced their holdings, but by a smaller margin than the larger group of 1,000 banks did. The top 100's portfolios had a combined book value of $49.28 billion at the end of 1986, down 10.9% from the $55.3 billion of the year before, and their market value fell only 4.5%, to $51.73 billion from $54.16 billion.

Seventy-nine of the 100 largest banks reduced their bond holdings, by an average of $115.2 million, while 21 banks added to their holdings, by an average of $146.6 million. Thirty-one banks reduced their bond holdings by more than $100 million, while six added more than $100 million.

Biggest Portfolios

Morgan Guaranty Trust Co., the nation's fourth-largest bank, continued to hold by far the largest portfolio of municipal bonds — $4.35 billion at the end of 1986, up $452 million, or 11.6%, from the end of 1985.

In a distant second place was Chase Manhattan Bank, which held $1.97 billion of bonds at yearend. Chase Manhattan, which also was second at the end of 1985, with $2.19 billion, reduced its holdings 10% last year.

Citibank jumped to third place with the year's largest increase in bond holdings as it added $1.15 billion, from the previous year's $801 million to $1.95 billion at the end of 1986 — a 143% rise. Citibank had cut its holdings back $26 million, or 3%, in the first half, but then gobbled up $1.18 billion in the second half, a 151% increase. Officials at the bank would not comment on the portfolio.

Chemical Bank remained in fourth place for the year as it increased its portfolio $72 million, or 4.4%, to $1.67 billion.

Manufacturers Hanover Trust Co. fell to fifth place from third the year before as its holdings declined $89 million, or 5.1%, to $1.66 billion.

Following Citibank and Morgan Guaranty with the largest increases in bond holdings in 1986 were Boston Safe Deposit & Trust Co., up $393 million, or 81%; Mellon Bank, up $270 million, or 34%; and First Union National Bank, up $161 million, or 19%. First Interstate Bank of Oregon in Portland added $126 million, or 22%, while Colonial National Bank USA, a limited-service bank in Wilmington, Del., went from zero to $107 million.

Profitable BanksWere Buyers

Banks often buy municipal bonds when they or their holding companies are profitable, to increase their after-tax income as much as possible — and most of the banks that added more than $100 million of bonds had highly profitable years in 1986.

Citibank's parent company, Citicorp, earned $1.06 billion of net income, the largest earnings of any U.S. bank holding company for the year. In second place was J.P. Morgan & Co., with $873 million. Boston Safe Deposit posted a 123% jump in net income, to $118 million — the sixth-largest percentage gain last year. First Union Bancorp and First Interstate Bancorp were among the top 10 banks in net income, and Mellon Bank Corp. was 18th on the list. And TSO Financial Corp., which owns Colonial National, doubled its earnings.

The Tax Reform Act of 1986 eliminated banks' 80% income tax deduction for the costs of carrying municipal

The Bond Buyer Municipal Bond Index

	May 12, 1987	May 11, 1986	May 5, 1987
Index	89.13	89.29	89.03
Yield to Par Call	8.73	8.66	8.77
Yield to Maturity	8.20	8.15	8.23

The Bond Buyer Municipal Bond Index was designed by the Chicago Board of Trade to serve as the basis for trading Long-Term Municipal Bond futures contracts when approved by the Commodity Futures Trading Commission. The Index represents an average of the figures obtained when the price of each of 40 select term bonds is divided by a figure derived from the amount at which the bond would be priced to yield 8%. In all computations, the maturity of a bond is represented by its first call at par. The Index is computed daily and is quoted in points and 32nds.

International Forum Set To Cover EFT/POS Issues

NEW YORK — What's being billed as the first international electronic funds transfer/point of sale forum is scheduled to take place June 22 through June 24 in Vienna, Austria.

Sponsored by Lafferty Conferences Ltd., the forum will address policy issues such as who should control point of sale systems — banks, retailers, or third parties — and how costs will be divided. The benefits of both independent and shared networks, as well as the role of legislators, will also be discussed.

Scheduled speakers include Roger Peirce, general manager of delivery systems for Visa International, and Meredith Fernstrom, an American Express senior vice president.

For more information, contact Lafferty Conferences Ltd., 2 Pear Tree Court, London, England, EC1R 0DS, 44-1-251-5545. ■

bonds. This spurred at least one bank, Morgan Guaranty, to substantially increase its tax-exempt portfolio before the law took effect.

In its annual report for 1986, J.P. Morgan & Co., Morgan Guaranty's parent company, noted, "In anticipation of the signing of this new legislation into law, holdings of securities of states and political subdivisions were substantially increased in order to ensure a continued flow of tax-benefited interest income until these securities mature." Officials at Morgan Guaranty would not elaborate further.

Though most of First Union Bancorp's portfolio growth has been in U.S. agency securities, its municipal holdings have jumped 165% in two years, from $673 million in 1984 to $1.78 billion in 1986.

In its 1986 annual report, the firm enumerated several reasons it has been increasing its investment portfolio for five years: "First, we anticipated slow loan growth and wanted to maintain our earnings momentum. Second, we didn't feel interest rates were going to turn up sharply. Third, we thought the chances were good that we would acquire banks that kept a higher volume of loans than investments on their books."

At the other end of the spectrum, Republic National Bank had the year's largest decline in holdings. The bank sold $970 million of the $1.44 billion of bonds it held at the end of 1985, to end last year holding only $474 million of the securities.

Officials at Republic National said the massive sell-off was the tail end of a short-term investment strategy that began in 1985. The bank bought a lot of

short-term municipals in December 1985, when the House proposed tough restrictions on tax-exempt financing with an effective date of Jan. 1, 1986, and short-term rates soared as high as 9% in reaction. Almost all of these bonds were sold off in early 1986, the officials said. The trading profits from that well-timed move probably contributed to Republic New York Corp.'s excellent earnings of $148 million for the year.

Bank of America had the second-largest decline in bond portfolios for the year, selling off $588 million, or 63%, to $339 million. The bank held more than $1 billion of municipals at the end of 1984. In this case, financial problems were the reason the bank cut back its holdings; the parent company, BankAmerica Corp., lost $337 million in 1985 and $518 million in 1986.

Another financially troubled bank, Allied Bank of Texas in Houston, divested more than 90% of its municipal portfolio. Allied Bank trimmed $381 million from its holdings, finishing the year with $38 million.

Israel Discount Bank of New York followed in Republic National Bank's footsteps in reducing its portfolio by $538 million, to end up with just $21 million at the end of 1986. The bank had added $173 million to its portfolio in 1985. A bank official said the portfolio moves were a short-term investment strategy similar to Republic National's.

Norwest Bank Minneapolis sold $354 million of municipal bonds from its portfolio, the fifth-largest dollar-amount reduction for the year. Meanwhile, its holding company, Norwest Corp., said in its annual report for 1986 that its banks more than doubled their combined portfolio of U.S. Treasury and agency debt and other taxable securities.

The shift in Norwest's fixed-income assets apparently had its roots in the tax reform law. According to the corporation's annual report, "the effects of the [Tax Reform Act's] repeal of the investment tax credit and new restrictions placed on tax-exempt income from loans and securities will likely be more than offset by the reduction in the maximum corporate income tax rate from 46% to 40% in 1987 and 34% thereafter, and as proceeds of tax-exempt assets are reinvested into higher yielding taxable loans and investments."

Amalgamated Bank of New York sold off all of the $379 million of bonds it held at the end of 1985 and reported no holdings at the end of 1986. It was one of 13 banks to sell off their entire portfolios last year, although none of the other banks began the year with more than $45 million.

Seventeen other banks sold between 90% and 99% of their bonds last year, with Israel Discount Bank showing the largest dollar decline. Twelve of the banks in this group had less than $60 million of bonds at the end of 1985.

New York's banks had by far the largest combined portfolio for any state, with 63 banks holding $19.75 billion, or 21.4% of the 1,000 banks' combined total. New York was followed by Florida, 58 banks with $6.08 billion; Pennsylvania, 59 banks with $5.66 billion; New Jersey, 47 banks with $4.4 billion; and Ohio, 43 banks with $4.28 billion. ■

The Risk Behind Parent Company Debt

Firm's Structure Must Be Examined

By JOHN P. FORDE

NEW YORK — Here's a multiple-choice question: When debt investors buy a Citicorp note, are they lending money to:

a) the $197 billion-asset financial behemoth, which can boast a wide range of income sources, including loans, information services, and investment banking, or

b) a much smaller company — with about $42 billion in assets — which derives its income primarily from three sources and which could see a large percentage of its income cut off by regulators if times got rough.

The answer is "b." And it does not apply only to Citicorp.

As was seen in Oklahoma last year, holders of the debt of many major bank holding companies could face problems if those companies' subsidiary banks get into trouble.

This is because of "double leverage," which is the use of parent company debt to finance the operations of subsidiaries. The parent company borrows funds in the form of debt, then passes the proceeds on to its own subsidiaries in exchange for stock. A large part of the parent company's income after this transaction comes from dividends the subsidiary pays on this stock.

In the case of the nation's largest banking company, there are actually two Citicorps. One is the $197 billion-asset consolidated holding company. But, from the debtholder's point of

Beefed-Up Thrift Audits Receive Mixed Reviews

Some Complain About Cost and Quality of Exams

By JIM McTAGUE
Washington Bureau

WASHINGTON — A pair of examiners spent two months in a small California thrift recently conducting an examination that, in the past, had routinely been done in two weeks. The cost: $25,400.

"We felt the time and expense of the examination could have been reduced considerably if the examiners had been better trained and more experienced," said Frank Donahoe, chief executive officer at the six-year-old Inland Savings and Loan Association, a $74 million-asset institution in Hemet, Calif.

Mr. Donahoe's complaint is not unique. In July 1985, the Federal Home Loan Bank Board took a bold step and turned over its examination function to the system's 12 member banks. Since then, thrift executives have been paying considerably more for checkups by a new crop of regulators and enjoying the more frequent experiences less than ever.

But, said William D. Hussey, president of the Florida League of Financial Institutions, "we're willing to pay the freight now in anticipation of eventual improvements. The industry wants to

14 Thrifts Ask to Switch to FDIC Insurance

By JIM McTAGUE
Washington Bureau

WASHINGTON — Fourteen thrifts have submitted applications to the Federal Deposit Insurance Corp. for coverage, according to the commercial banking agency.

Eight of the thrifts said they are dissatisfied with various aspects of the Federal Savings and Loan Insurance Corp., including the cost of premiums and examinations.

The remaining institutions said their desire to switch coverages is the result of mergers or acquisitions.

All but three of the applicants are from the East Coast.

The institutions are:

- Atico Savings Bank, Miami, Fla., an institution with $504.3 million in assets that has purchased a commercial bank. Application dated Feb. 2, 1987.
- First Mutual Savings Association of Florida, Pensacola, an $831.9 million-asset institution merging with a Georgia bank. Application dated March 5, 1987.
- First Federal Savings, Madison, Conn., a $274.5 million-asset institution that is seeking a state banking charter because of its liberal commercial loan provisions. Application dated Feb. 18, 1987.
- Savings and Loan Association of Southington, Southington, Conn., a $109.4 million-asset thrift which is merging with Hartford National Bank. Application dated March 10, 1987.
- First Federal Bank of Connecticut, New Haven, Conn., a $1.4 billion-asset thrift that is switching because of the opportunity for broader powers with a state bank charter and because the list of attractive FDIC takeover candidates outstrips the list of possible FSLIC takeovers. Application dated April 1, 1987.
- Shelton Savings and Loan Association, Shelton, Conn., a $107.7 million-asset institution that primarily is upset with FSLIC's double assessments to fund the insolvent deposit insurance pool. Application dated May 4, 1987.
- First Federal Savings and Loan Association, Bowling Green, Ky., a $188.8 million-asset institution that is switching because of "excessive" FSLIC assessments. Application dated March 9, 1987.
- Columbian Building Association, Havre de Grace, Md., a $14.5 million-thrift that objects tō FSLIC's fees for insurance and audits. Application dated April 21, 1987.
- Metropolitan Federal Savings and Loan Association, Bethesda, Md., a $528.9 million-asset thrift that is being acquired by the Bank of Baltimore. Application dated Jan. 29, 1987.
- Glen Burnie Savings and Loan Association, Glen Burnie, Md., an $18.1 million-asset institution that objects to FSLIC insurance assessments and examination fees. Application dated Nov. 20, 1986.
- Federal Savings Bank of Maryland, Baltimore, Md., a $67.3 million-asset thrift that is switching because its stockholders requested the change. Application dated Nov. 21, 1986.
- Everett Federal Savings and Loan Association, Everett, Wash., a $178.4 million-asset mutual institution whose customers want FDIC coverage. Application dated March 11, 1987.
- Home Federal Savings and Loan, San Diego, Calif., an $11.9 billion-asset institution that objects to FSLIC's assessments. Application dated March 30, 1987.
- University Federal Savings Bank, Seattle, Wash., a $687 million-asset thrift that wants greater investment flexibility. Application dated March 30, 1987.

Currently, FSLIC assesses thrifts at a rate of one-eighth of 1% of deposits annually for insurance and tacks on a special assessment of one-twelfth of 1% of deposits.

The industry may also be asked to borrow $5 billion to bail out the insolvent fund.

"The costs are out of sight for a small institution," said a spokeswoman at the Columbian Building Association.

Federal Home Loan Bank Board Chairman Edwin J. Gray has asked Congress to approve a hefty exit fee to try to stem any defections from the insolvent FSLIC fund. The loss of insurance premiums could jeopardize the fund's future, he said.

A spokesman at Glen Burnie said his institution would stay with FSLIC if the exit fee was raised from the two years of regular and special premiums proposed by Congress to a much higher figure favored by the Bank Board.

"Two plus two would cost us $60,000. FSLIC's plan would cost us $250,000, and it wouldn't be worth the change then, " he said.

Congress is debating the issue.

The Glen Burnie spokesman said FSLIC insurance costs $32,000 per year, while FDIC coverage would only cost $13,000. ■

Checkup Charges

What Members Pay for Exams by 12 Federal Home Loan Banks

ATLANTA: Regular, $296/day per examiner; Special, $520/day per examiner.

BOSTON: $300/day per examiner, regular; special $500/day per examiner.

CHICAGO: Regular examination, $325/day per person; Special $618. Annual assessment fee of $20 per million assets.

CINCINNATI: Regular, $315/day per examiner; Special, $565/day per examiner.

DALLAS: $360/day per examiner for regular ($250 per trainee); Special $595/day per examiner.

DES MOINES: Not available.

INDIANAPOLIS: Regular or Special, $280/day per examiner.

NEW YORK: The cost of regular exams depends on the experience of the examiners, but cannot exceed a $285/day average cost. Entry-level examiners cost $171/day; experienced examiners, $285/day; $313.50/day for senior examiners; and $342 for field managers. Special exams cost $475/day per examiner.

PITTSBURGH: $175/day for trainees; $275/day for field examiners; and $425/day for management personnel.

SAN FRANCISCO: $10 per $1 million of assets assessed annually. There is also an examination fee based on the experience of the examiner. Field manager, $75/hr.; senior examiner and specialist, $55 /hr.; Examiners, $45/hr.; and assistants, $25 hr.

SEATTLE: Regular exam,$45 to $60 per hour, depending on experience of examiner.

TOPEKA: Regular, $250/day per examiner; Special, $475/day.

Thrifts Complain About Home Loan Bank Examiners

➵ Continued from Page 1

clean up its act."

In fact, in a recent statewide poll of savings and loans by the Florida League, executives gave the new crop of examiners better marks than anyone had expected, Mr. Hussey said.

But not everyone agrees with that progress report. "So far, we've seen cost without the benefits," said Brian Smith, director of regulatory affairs for the U.S. League of Savings Institutions.

Mr. Smith said the U.S. League supports the transfer of the examination function from the Bank Board to the 12 Home Loan banks. He added that the industry does not begrudge paying higher salaries for examiners if the wage hike will attract better people.

"If we get value for the money, that's great. But the jury is still out," he said.

Bank Board Chairman Edwin J. Gray delegated authority for examinations to the district banks as a way to circumvent budget restraints on salaries imposed by the Office of Management and Budget.

Mr. Gray said the budget office's constraints prevented him from increasing his work force to deal with a record number of troubled thrifts that has been taxing the Federal Savings and Loan Insurance Corp. fund and, as a direct result, impacting the profits of healthy savings and loans that must pay higher premiums to keep the insurance fund going.

Many FSLIC examiners have sought better-paying jobs. In recent years, turnover has been high, with as many as a quarter of the examiners leaving in a single 12-month period. The Federal Deposit Insurance Corp., which regulates commercial banks, did not experience such difficulties, Mr. Gray claimed, because its budget is not subject to OMB scrutiny.

The district banks, federally chartered institutions that serve as central credit banks for the member institutions that own them, are not subject to the budget office, either. Thus, the 12 banks were free to beef up the examination force and fatten employee salaries once the Bank Board entrusted them with the police powers.

Industry people consider the yet-unproven program one of the few noteworthy innovations introduced by Mr. Gray during his stormy four-year reign, which ends on June 30.

Mr. Gray has noted that the shift permitted the industry to double its examination force from 747 people at yearend 1985 to 1,524 at yearend 1986.

Of this increase, 376 examiners (48.4%) were in the Atlanta, Dallas, and San Francisco bank districts, where many of the most serious industry problems exist.

"The flexibility afforded by the transfer of the examination function also has resulted in hiring a substantial number of additional examiners from among far better qualified candidates than was previously possible," Mr. Gray said in testimony Feb. 19 before the House Appropriations subcommittee that reviews administrative and operating expenses of the Bank Board and other agencies. "Many of the new examiners have advanced degrees in business or finance and have professional designations, such as certified public accountant."

The U.S. League's Mr. Smith said that it is not uncommon now for examiners to be at an institution for three to four weeks instead of a week or two.

"A number of institutions get a bit annoyed when the examiners are around and the meter is running," he said.

The cost is particularly irksome to institutions when the examiners are rookies, he said.

Individual institutions believe that they are being charged for on-the-job training that ought to be shared by the industry as a whole, he said.

"Some bear it philosophically. Some get fed up."

An example of the latter is one East Coast savings and loan that is becoming a commercial bank to escape the high cost of regulation and insurance.

"We're not getting our money's worth. Their exams are a farce. The examiners are poorly qualified if they are qualified at all," said an executive at that company, who asked not to be named.

A total of 14 thrifts plan to leave the FSLIC fund, and eight have indicated to the *American Banker* that the switch was prompted by the high cost of examinations and insurance premiums.

The Bank Board concedes the new program has some bugs.

"We've been building staff rapidly, and that has resulted in some inefficiency," said Robert J. Moore, deputy director of field services.

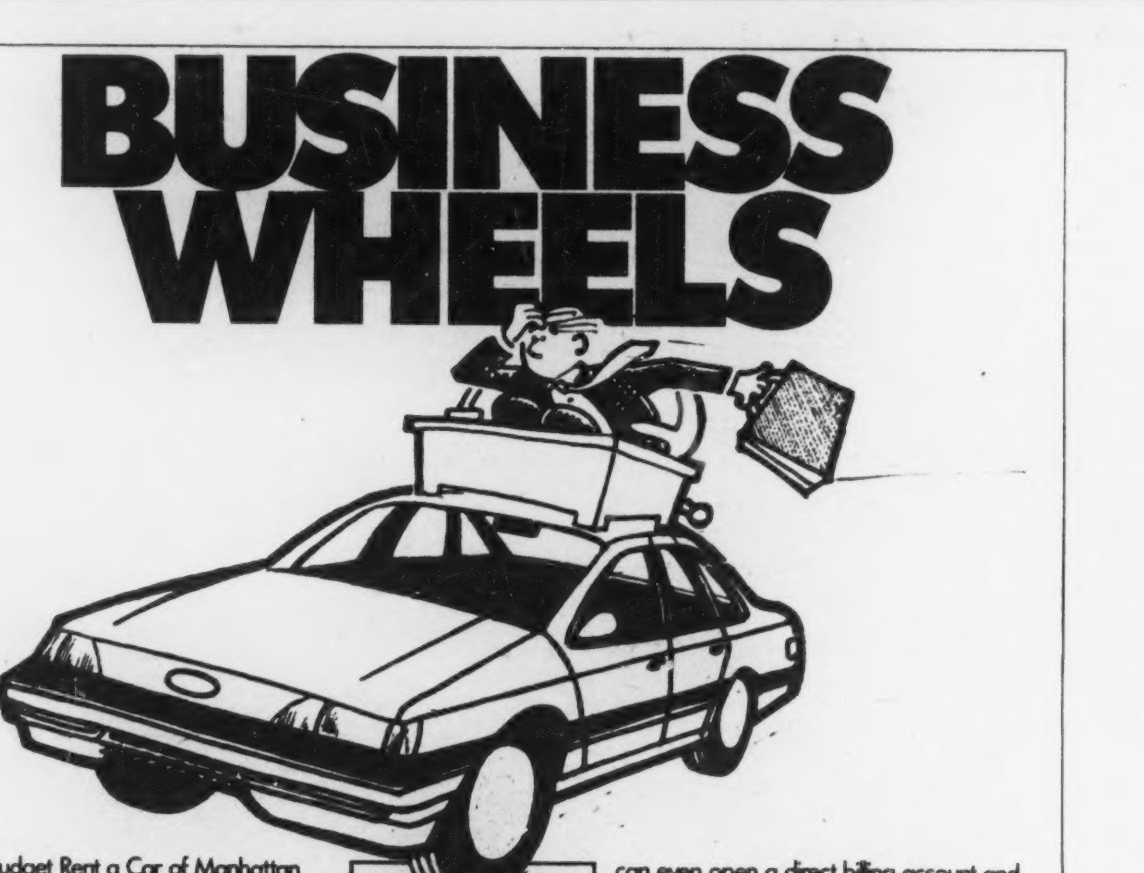
"Senior people are pushing and developing our people rapidly. We're not there yet, but we're getting there," Mr. Moore said.

Frank Passarelli, senior deputy director for policy, said that despite the fee increases for examinations, the district banks still are not covering their costs.

"They're not trying to make a profit from this. There are expenses involved that must be offset," he explained.

S&L trade groups appear confident that the glitches will be worked out.

"There's a level of expertise yet to be reached," said Dennis Montgomery, president of the Illinois League of Savings Institutions. "We realize there is a learning curve, and we anticipate a stronger, more viable force." ■



Budget Rent a Car of Manhattan is the only major car rental company that gives you and your employees this low rate. All you have to do is join our Manhattan Express Club. Rent only 4 times a month and we guarantee you a No. 1 priority reservation, the car you want plus the rate—with discounts on the weekends.

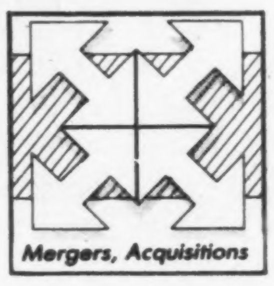
First Interstate in Merger Talks With Allied Bancshares of Texas

By NINA EASTON
and MICHAEL A. ROBINSON
West Coast Bureau

LOS ANGELES — Fresh from its rejected hostile bid for BankAmerica Corp., First Interstate Bancorp is negotiating a friendly merger with Allied Bancshares Inc., a Houston company that has suffered the ravages of a depressed energy economy.



First Interstate and Allied on Thursday announced that the two companies are "engaged in preliminary discussions regarding a potential merger." First Interstate had been rumored for several months to be interested in a Texas acquisition.

Like other Texas banks, Allied has posted losses as a result of the troubled Oil Patch economy. However, analysts say the company is a well-managed bank, and any merger with First Interstate won't involve financial assistance from the Federal Deposit Insurance Corp. As of March 31 this year, the $9.2 billion-asset bank holding's primary capital was at 8.13% of assets, well above regulatory requirements.

"Allied is a very good company that has come on hard times because of where it is located," said Donald K. Crowley, senior vice president at Keefe, Bruyette & Woods in San Francisco.

Sandra J. Flannigan, a bank analyst with PaineWebber Inc. in Houston, said that before this announcement her firm had predicted a 1987 loss for Allied of $2.25 a share, primarily because of troubled real estate loans. However,

MARTIN MAYER

Where Japan's Banks Are Going

Last of Three Parts

FIVE or six years ago when I visited the United States, I was very impressed by the extent and the pace of the deregulation. Now I am told that this progress has been very much slowed down. Is that true?" asked Michitsura Kitahara, executive director of the Federation of Japanese Bankers, who has been with that institution something more than fifty years.

I said I thought it was.

"Then," he said rather sadly, with the air of an old man who would like to see something happen but is not sure he has the time, "change will probably be slow here, too."

It is almost impossible to overestimate the degree of foreign influence in the organization of Japanese economic life. Over time, the Japanese have traditionally improved on foreign models, but the models remain as a skeleton.

Article 65 of the Securities Transaction law, which separates financial activities into well-walled compartments, was a legacy from the American Army of Occupation and the viceroyalty of General MacArthur. And every significant change in the

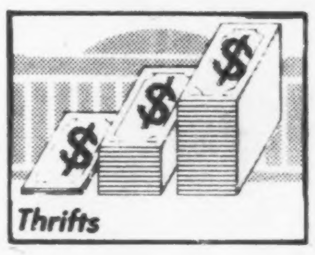
Proxmire Hints House to Bow On Nonbanks

Predicts 'We Can Work Out an Accommodation'

By ROBERT M. GARSSON
Washington Bureau

WASHINGTON — En route to an overwhelming Senate floor victory Thursday in his battle to close the loophole permitting limited-service banks, Sen. William Proxmire, D-Wis., dropped a strong hint that his counterparts in the House are now willing to bow on that issue.



"I have had discussions with my colleagues on the House side, and I am sure we can work out an accommodation within half a day," Mr. Proxmire, the chairman of the Senate Banking Committee, said on the Senate floor before a 62-to-37 vote to amend a House-passed banking bill.

Afterward, Mr. Proxmire said he has not asked House Banking Committee Chairman Fernand J. St Germain or other members of the House committee whether they will accept the nonbank-bank language. "But I just get the impression that there is a lot of support there."

When asked about his floor statement, he responded quickly: "That statement still stands."

Mr. St Germain has said on a number of occasions — and he has been joined by House Speaker Jim Wright at least once — that he will not accept the broad language in the Senate bill without first holding hearings.

However, the House Banking Committee chairman is a longtime opponent of nonbank banks and is widely believed to be eager to join Mr. Proxmire in closing the loophole. Nonbank

Would you feel more secure with a credit card program that offers very little risk?

If you have some good reasons to have a credit card program and also some good reasons not to want the full risk of running one, talk to Franklinton Financial Services.

Franklinton offers the perfect solution, and takes on the responsibility for conducting the program from beginning to end. Or, if you have a program now and want to convert, Franklinton may be interested in purchasing your portfolio. What could be easier? You benefit, and have the advantage of security, too.

It's just another way Franklinton takes a personal interest in your needs. And another reason why Franklinton is one of America's most popular credit card processors.

Call Joette Kuharic at 614/863-8222 for more information. You'll find her very helpful.

Investment bankers are concerned that the government housing agencies have overstepped their bounds and are dominating the secondary market.

James R. Jones

Debate Is Building Up In the Secondary Market

By Mark Basch

FOR THE FIRST three months of this year, players in the mortgage-backed-securities market held their breath while awaiting a decision from the U.S. Department of Housing and Urban Development (HUD) that would help shape the future of the secondary mortgage market.

They were waiting for HUD Secretary Samuel R. Pierce Jr. to decide whether or not the Federal National Mortgage Association (Fannie Mae) would be allowed to issue Remic securities. Remics are mortgage-backed securities issued under the real estate mortgage investment conduit provisions of the new tax code passed by Congress last year.

On one side of the debate were the large Wall Street investment banking companies, which feel that the government mortgage agencies — Fannie Mae, the Federal Home Loan Mortgage Corp. (Freddie Mac), and the Government National Mortgage Association (Ginnie Mae) — are crowding out the private sector and dominating the secondary mortgage market.

On the other side were mortgage banking and housing trade groups that support the housing agencies. These groups argued that Fannie Mae and Freddie Mac provide access for smaller mortgage lending firms to the secondary market and provide lower costs to home buyers.

Mr. Pierce's decision, announced on April 21, turned out to be something of a compromise: Fannie Mae could issue Remics, but it would be limited to $15 billion of the securities through July 20, 1988.

OVERVIEW

By agreeing to let Fannie Mae into the market but limiting its authority, Mr. Pierce avoided making a broad policy decision and assured that the war between the public sector and the private sector will rage on.

"This is only the beginning of a much broader discussion and dialogue of the role of subsidized government agencies," said Thomas Vartanian, a Washington attorney who represented five big Wall Street firms in their case against the use of Remics by Fannie Mae.

The three government-related mortgage agencies were created by Congress to develop the secondary mortgage market and thereby help provide funds for mortgage loans to the nation's home buyers.

Fannie Mae and Freddie Mac have similar functions, purchasing all types of residential mortgage loans from lending institutions, but the two agencies differ in ownership. Fannie Mae is a stock company whose shares are trading on the New York Stock Exchange. Freddie Mac's stock is owned by thrift institutions, with the Federal Home Loan Bank Board acting as its board of directors.

Ginnie Mae is a wholly owned government corporation within HUD. Its mission is to guarantee securities backed by mortgage loans originated through the Federal Housing Administration, the Veterans Administration, and the Farmers Home Administration.

The Fannie Mae/Remic battle publi-

Listing of the top 25 firms in the mortgage industry. The listing includes mortgage companies, commercial banks, and thrifts. For firms with more than one subsidiary engaged in servicing mortgages for others, a combined servicing figure for all of these subsidiaries is used, and the name of the parent company is shown in bold type. All data — except data for the thrifts — are from American Banker questionnaires sent directly to the mortgage firms. Data for thrifts are from the thrift's report of condition submitted by FSLIC-insured institutions to the Federal Home Loan Bank Board. Source of these thrift data is **ADP Data Services Division, New York.** The 1985 ranks and servicing volumes for some firms have been revised to reflect the inclusion of thrifts into the tabulation. **(a)**—The mortgage servicing total for Citicorp was computed by adding the mortgages serviced for investors by the following six subsidiaries: Citicorp Howeowners Services Inc., St. Louis ($19.76 billion on Dec. 31, 1986); Citicorp Real Estate Inc., New York ($2.1 billion); Citicorp Savings of Illinois, FS&LA, Chicago ($1.0 billion); Citicorp Savings, FS&LA, San Francisco ($703.1 million); Citicorp Savings of Washington, D.C., FS&LA ($431.6 million); and Citicorp Savings of Florida, FS&LA, Miami ($305.5 million) Data for Citicorp Real Estate Inc. were received after the reporting deadline for inclusion in the listing of the Top 100 Mortgage Companies that appears on page 19. Citicorp Real Estate would have ranked 85th among the top 100 firms, if the data had been available earlier. **(b)**—Fleet Real Estate Funding Corp., Florence, S.C. purchased all of the assets of Security Pacific Mortgage Corp., Denver, on Nov. 6, 1986. Security Pacific Mortgage had a servicing portfolio of $2.89 billion on Dec. 31, 1986. **(c)**—On June 1, 1986, Kissell Co., Springfield, No., was acquired by CityFed Financial Corp. Kissell Co. was servicing $6.7 billion for investors on 12/31/85 to rank 18th among the top 25 firms on that date. CityFed is the parent of City Federal Savings Bank, Elizabeth, N.J., who was servicing approximately $9.3 billion for investors on Dec. 31, 1986, through its mortgage division — CityFed Mortgage Co. **(d)**—Formerly Manufacturers Hanover Mortgage Corp, company was sold to Fireman's Fund Corp., Novato, Calif. on June 30, 1986. **(e)**—A subsidiary of Commonwealth Savings Association, Houston. Company changed name from Commonwealth Mortgage Corp. and now reports consolidated data which includes Commonwealth Western Mortgage Corp., Portland, Oregon. **(f)**—Three mortgage company subsidiaries — Mortgage Corporation of the South, Birmingham, Ala.; Stockton, Whatley, Davin & Co., Jacksonville, Fla.; and BancBoston Mortgage Corp., Wellesley Hills, Mass. — merged into one entity called BancBoston Mortgage Companies, Inc., Jacksonville. **(g)**—Formerly known as Cameron-Brown Co. **(h)**—Data for Bank of America NT&SA were not available for Dec. 31, 1985. The bank was servicing $4 billion in mortgages for investors on Dec. 31, 1986.

Newswatch

Bank Board to Hold Conference

The Federal Home Loan Bank Board will hold an open staff conference next Thursday and Friday on mortgage-related pass-through and derivative securities, such as collateralized mortgage obligations, real estate mortgage investment conduits, stripped securities and senior/subordinated mortgage-backed securities.

A notice published in the *Federal Register* says the conference will address legal and financial issues concerning the new mortgage products. The notice says the Bank Board "does not seek to impede the development of such mortgage-related securities and derivative products or to inhibit thrifts' prudent participation in the markets for such securities.

Rather, the staff merely seeks to identify the types of risk stemming from investment in or issuance of such securities."

The Bank Board has previously said it is developing a regulatory package to address thrifts' use of these mortgage-backed securities.

Co-op Bank Forms Mortgage Unit

Co-operative Bancorp, Acton, Mass., said it has formed a mortgage company called Bancorp Mortgage Co. It will be a subsidiary of the Co-operative Bank of Concord, which currently services about $400 million in loans.

Bancorp Mortgage will have four offices in Massachusetts and will also originate loans through the 13 retail banking offices of the Co-operative Bank and the Quincy Co-operative Bank. The Concord bank is waiting for regulatory approval to complete its acquisition of the Quincy bank.

Convertible Mortgage Offered

Home Owners Federal Savings and Loan Association, Boston, has introduced a convertible mortgage that can be converted from an adjustable rate to a fixed rate at anytime after the first year of the loan and up to the end of the fifth year. Generally, convertible mortgages can be changed from adjustable to fixed rates only during limited times.

Borrowers can convert the new product to a fixed rate for a $750 fee. The charge for converting under the terms of an earlier Home Owners' product was $250 plus 1% of the outstanding principal.

"We're in a very anxious interest rate cycle for home buyers," said Fred Biel, executive vice president. The new product "puts much more power into the consumers' hands."

Bank Offers Prime Equity Line

The Central Bank of the South, Birmingham, Ala., is offering a home equity line of credit with interest set at the prime rate. The special interest rate will apply only until Dec. 31. Then the rate will be adjusted to the prime plus 150 basis points.

The $3.7 billion-asset bank said that it is offering the incentive rate to attract customers and to introduce equity lines to consumers.

Pima Buying Home Builder

Pima Savings and Loan Association, Tucson, Ariz., said Wednesday it is purchasing a majority interest in the Tobin Co., a Tucson home building company.

Saul Tobin, managing partner of the home building firm, and his three partners will continue to manage and operate the Tobin Co. as a subsidiary of Pima. Terms of the deal were not disclosed.

Southold Completes Conversion

Southold Savings Bank, Southold, N.Y., said this week it completed its conversion from mutual to stock form of ownership by selling 5.5 million shares of common stock at $12 each.

The $581 million-asset savings bank sold all shares though a subscription and community offering.

Over-the-counter trading in Southold's common stock began on April 28, it said.

Mortgage Servicing – It's Not Just For Banking Companies Anymore

By MARK BASCH

THE mortgage-servicing business, which was dominated by commercial-bank-related firms just four years ago, is now more evenly spread out among bank-related, thrift-related, and other firms, according to an *American Banker* survey.

In 1983, 48.1% of the total servicing at the 100 largest mortgage-servicing companies was done by commercial bank-related firms, while only 17.4% of the business was done by thrift companies. But in 1986, bank firms' share dropped to 33.9% as thrifts' share rose to 27.2%. Mortgage banking companies owned by others now lead the market with a 38.9% share.

Thirty-five of the 100 largest mortgage servicers at yearend 1986 were bank-related, down from 45 in 1983. Meanwhile, the number of thrift-related companies has nearly doubled from 16 in 1983 to 31 in 1986.

There was little change among the largest mortgage servicers in the *American Banker* survey. GMAC Mortgage Co., Philadelphia, retained the top spot, followed closely by Lomas & Nettleton Financial Corp., Dallas.

Citicorp Homeowners Services Inc., St. Louis, ranks third, but its parent company, Citicorp, actually has the largest mortgage-servicing portfolio in the country when all of its subsidiaries are grouped together. Besides Citicorp Homeowners, the bank holding company's total servicing portfolio includes about $1.1 billion from its three thrift subsidiaries and $2.1 billion at Citicorp Real Estate Inc., in New York.

Top Mortgage Servicers
Tables Begin on Page 18

One new company did move into the top 10 mortgage companies. BancBoston Mortgage Companies Inc., which was created by the merger of three mortgage banking subsidiaries of the Bank of Boston Corp., has become the 10th largest mortgage company in the country, ranked by servicing volume.

Bank of Boston actually owned four mortgage banking subsidiaries. RIHT Mortgage Corp., Charlotte, N.C., will remain as a separate subsidiary of Bank of Boston, but it is being managed under a contract with BancBoston Mortgage, according to Dee Brown, vice president and director of corporate communications for BancBoston Mortgage. RIHT Mortgage was the 87th largest mortgage company at yearend.

The three companies that were merged to form the Jacksonville, Fla.-based BancBoston Mortgage were Stockton, Whatley, Davin & Co., which was the 23d largest mortgage company at midyear 1986; Mortgage Company of the South, which ranked 68th at midyear; and BancBoston Mortgage Corp., which ranked 143d.

Fleet Financial Group, Providence, R.I., owns two mortgage companies that rank in the top 15. Fleet Mortgage Corp., Milwaukee, is the eighth largest firm, while Fleet Real Estate Funding

WASHINGTON BRIEFING

Federal Deposit Insurers Pay Large Fees To Lawyers Handling Bank; Thrift Failures

By JIM McTAGUE

Washington Bureau

DEPOSIT institution failures might be the biggest boon to cash flows at legal firms since the discovery of whiplash.

In fiscal year 1986, the Federal Deposit Insurance Corp. spent about $40 million on lawyers, and the Federal Savings and Loan Insurance Corp. spent close to $15 million, although it obligated a total of $79 million. The unspent portion represents what the current FSLIC cases could end up costing in legal fees alone.

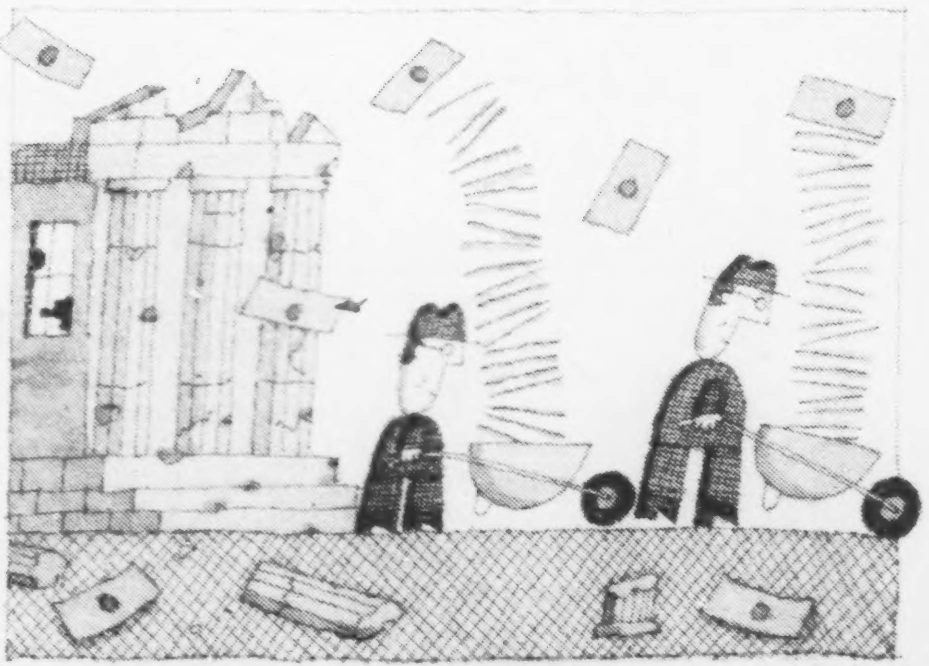
Hopkins and Sutter, a Chicago law firm, FSLIC's favorite legal beagles, have been the big money earners over the past three years, with fees totaling $12.3 million for 1984, 1985, and 1986.

In comparison, the Federal Deposit Insurance Corp.'s biggest fees went to Kemp, Smith, Duncan & Hammond of El Paso, Tex. They collected $6,552,766, according to the FDIC.

FSLIC's other big fee firms for the past three years include:

- Squire, Sanders & Dempsey, Washington, D.C., $6,540,656.
- Tuttle and Taylor, Los Angeles, $2,988,349.
- Pettit and Martin, San Francisco, $2,772,123.
- Hutcheson and Grundy, Houston, $2,142,260.

The FDIC's other big fee firms include:



John Segal

- Gable & Gotwals, Tulsa, $6,470,016.
- Schall, Boudreau & Gore, San Diego, $4,619,871.

The FDIC spends more on outside lawyers than any other federal agency, and FSLIC ranks second.

➞ Continued from Page 24

rill Lynch's legendary $275 million hit from its mortgage securities trading didn't assuage those nerves.

The regulators find they don't know enough about many of the new-fangled mortgage securities being hatched by Wall Street to effectively police the institutions that are buying the investment products. To help bridge that knowledge gap, the staff of the Federal Home Loan Bank Board will hold a conference next Thursday and Friday with mortgage industry representatives at its headquarters in Washington, D.C.

Much of what the staff learns will contribute to future staff actions regarding mortgage-related securities.

The meeting is open to the public, and there will be a comment period at the end of each day for members of the audience.

Among the staff's concerns are:

- The lack of a broad, deep market for many of the new products. They fear that such illiquidity could cause "major problems" if the FSLIC has to sell such assets promptly and at a reasonable price.
- The low quality of some assets held by institutions. The staff will ask if it should impose higher capital requirements on thrifts that invest in certain derivative mortgage products, "particularly those securities not eligible for investment by the Secondary Mortgage Market Enhancement Act of 1984." And they will ask the mortgage industry representatives if thrifts with less than 6% capital, as determined by applying generally accepted accounting principles, should be allowed to make such investments at all.
- A proposal that the Bank Board impose specific minimum legal safeguards for a derivative mortgage security, such as a stripped mortgage, to be a permitted investment for insured institutions. One suggestion is to restrict securities to investment-grade issues.

The Bank Board is also considering curbing the purchase of low-quality debt, or junk bonds, by thrifts, but that topic will not be addressed at the conference.

□□□

Eugene J. Sherman, an economist with the Federal Home Loan Bank of New York, said recent interest rate increases will translate into 180,000 to 200,000 fewer housing starts than would have been the case if rates had remained at February's low levels.

Mr. Sherman said the outlook for interest rates is grim.

"If the dollar were to stabilize and international policy coordination improve, interest rates would probably drop as quickly as they rose and return to the levels that prevailed before March 26, or go even lower," he wrote in the bank's May 11 *Economics Bulletin.* "But there is no reason for optimism. Economic policy coordination is not at hand."

Mr. Sherman said rates will depend on the direction of dollar prices. If the dollar stabilizes, rates may move slightly lower. A declining dollar will boost rates even higher, he predicted. ■

Lenders Feel Effects as Higher Rates Result in Fewer Loan Applications

For the past two weeks, traders have noted a shortage of mortgage securities because of two main factors — higher mortgage rates and dropping securities prices. Lenders, they said, are beginning to feel the effects of mortgage rates that have jumped 150 basis points in the past seven weeks, resulting in fewer loan applications.

Mortgage Markets

Mortgage bankers also sold off vast amounts of inventoried loans in early April, when the mortgage market began its downturn, flushing out the "pipeline." This, combined with fewer loan applications, means fewer mortgages are packaged for sale to dealers.

In addition, secondary mortgage market prices have dropped steadily to lose about six points in the last month. This means that many thrifts, which are the largest group of mortgage securities buyers, own loans that are worth less than the price at which they were purchased. And, traders said, many of these thrifts have a policy of not selling securities at a loss, which effectively keeps these instruments from being returned to the trading flow.

Although mortgage securities are in tight supply, traders said this poses no real problem because in the market's current inert state, buyers are also scarce. But, as one trader predicted, if buying interest picks up, "mortgages are going to go through the roof. Dealers are going to crawl all over each other to get securities."

Other traders disagree, saying that in the event of a market upturn, investors would bail out of mortgages and buy the more liquid Treasuries because prices of those securities would appreciate faster than comparable maturity mortgage-backeds.

Midwest Thrifts Are on Acquisition Trail

➞ Continued from Page 25

Dakota, and Wisconsin in July 1986.

Mr. Buendorf said the interstate law for thrifts in Minnesota required the state regulator to come up with rules and regulations surrounding takeovers. Because of an effort to avoid conflicts with other states' laws, "it's taken a while for the banking commissioner to come up with proper regulations."

Missouri banks got the right to expand into eight contiguous states in August 1986, but there have been no deals announced, partly because only one other state included in the region — Arkansas — has passed a similar law.

Another reason for the inactivity may be that, as in other states, there is not much interest in Missouri. "I don't think it's that hot a topic at this moment," said Robert C. Carroll, president of the Missouri Savings and Loan League. "We just had a management conference, and no one discussed it."

But recent signs lead some thrift executives to believe that activity may be picking up soon.

The ice may have been broken when Metropolitan Federal Savings Bank of Moorhead in Minnesota announced recently that it had reached an agreement to buy the $301 million-asset Community Savings and Loan Association of Fond du Lac, Wis., for about $22 million. Metropolitan Federal is a subsidiary of Metropolitan Financial Corp., Fargo, N.D., which also has savings and loan operations in Minnesota, North Dakota, and South Dakota.

In Michigan, several thrifts, including Standard Federal Bank in Troy, the state's second largest, and Great Lakes Federal Savings in Ann Arbor, the third largest, have indicated that they might be interested in using the interstate powers that are included in a new thrift bill that is making its way through the state Legislature.

Thrifts may also be playing close to the vest as far as their plans. "I've talked to a few people, and I haven't found anyone who admits he is going to use it or be acquired," said the Indiana thrift group's Mr. McKasson of that state's new law. "There seems to be a general attitude that if banks have it, they should too, so they don't find themselves in the situation in the future where they are under the gun and need it."

However, a recent survey by his group showed that almost 80% of the thrifts responding supported the new legislation, he said. ■

Mortgage . . .

➞ Continued from Page 24

Corp., Columbia, S.C., moved up to 13th. The South Carolina company acquired $2.9 billion in servicing when it bought the assets of Security Pacific Mortgage Corp. last November.

Fleet ranks fourth overall in combined servicing.

Among thrifts, City Federal Savings Bank, Bedminster, N.J., had the largest mortgage-servicing portfolio at year-end. City Federal operates a large mortgage banking subsidiary, CityFed Mortgage Co. The top thrift is the fifth largest servicer overall among banks, thrifts, and mortgage companies. ■

Remic Trading Isn't As Hot as Expected

CHICAGO — The much-expected growth and acceptance of real estate mortgage investment conduits, or Remics, has not occurred so far, according to a recently published report.

Hailed as the "wave of the future" for the mortgage-backed securities market when Remic legislation was passed, the effects to date "have been less dynamic than anticipated," according to a report by Duff & Phelps Inc., a research and ratings firm based here.

The report, in the May 11 issue of the firm's publication *Credit Decisions*, says the delay in activity is "principally because of the lack of implemental regulations." Once the necessary clarifications are worked out with regulatory authorities, the report concludes, Remics will be successful.

"A few issuers have tested the water with Remic offerings, and it is expected that others will follow," the report states. "Most feel the benefits of the legislation are clear despite the slow start, and Remics will ultimately live up to expectations."

FROM THE REGIONS

THE WEST

Most of Northwest's Big Deals Have Already Been Struck

By MIKE PARKS

SEATTLE — The biggest hands have already been played in the poker game of interstate banking in the Pacific Northwest, analysts of regional banking trends say. Only a couple of big players are still at the table, and the number of attractive acquisition candidates has been whittled down substantially, even though reciprocal interstate banking does not become official in Washington State until July 1.

Merger and takeover speculation increasingly focuses not on the biggest banks — they are already locked up — but on smaller banks and on the larger thrift institutions of Washington State, particularly those that have state charters and Federal Deposit Insurance Corp. coverage.

"The biggest deals have already been done," says Scott J. Drysdale, who analyses the banking industry from the Seattle office of Birr, Wilson & Co. "There are going to be smaller acquisitions within the states" as the players who have entered the game "round out their franchises."

One institution with more cards to play is Portland-based U.S. Bancorp, which will enter Washington after July 1 via acquisition of Old National Bancorp., Spokane. The takeover will

Regulators Can't Explain Recent Loss Of Deposits at FSLIC-Insured Thrifts

By JIM McTAGUE
Washington Bureau

WASHINGTON — Thrift regulators said on Tuesday that they could not explain the steep loss of net new deposits during March at institutions insured by the Federal Savings and Loan Insurance Corp.

But industry economists said the $4.7 billion outflow coincided with negative news about the industry, the most noteworthy being a March 3 report by the General Accounting Office that declared the FSLIC insolvent.

The March deposit loss — the seventh consecutive monthly deficit — compares with $1.1 billion lost by FSLIC institutions in February.

It was the largest monthly loss in deposits since since September 1986, when net new deposits decreased by $5.4 billion.

Richard C. Pickering, deputy director of the Federal Home Loan Bank Board's office of policy and economics, said he knew of no seasonal explanation for the deposit drain, $4.5 billion of which came from accounts of less than $100,000.

The withdrawals showed no unusual geographic trends.

"The largest number occurred on the West Coast, but that is where most of the deposits are," he said.

Although statistics for April are not yet available, Mr. Pickering said that month traditionally is one of the poor-

Fed Approves 4 More Banks' Securities Bids

But Court Stays Board's Prior Action on 3 Banks

By BARBARA A. REHM
Washington Bureau

WASHINGTON — The Federal Reserve Board voted 3 to 2 to grant Chase Manhattan Corp., Chemical New York Corp., Manufacturers Hanover Corp., and Security Pacific Corp. authority to underwrite and deal in selected securities and to place commercial paper through subsidiaries. It also gave Citicorp permission to place commercial paper.

The new batch of approvals, released on Tuesday, raises to seven the number of bank holding companies that the Fed has said can conduct the new securities underwriting activities through a subsidiary. On April 30, the Fed approved similar applications by Bankers Trust New York Corp. and J.P. Morgan & Co. to underwrite and deal in mortgage-backed securities, municipal revenue bonds, and commercial paper, and by Citicorp to deal in mortgage-backed securities and municipal revenue bonds.

The Fed has already been blocked in court over the issue. On Tuesday, the Securities Industry Association won a stay of the Fed's April 30 decision in the U.S. Court of Appeals for the Second Circuit. SIA president Edward I. O'Brien said that the trade group also will appeal the second set of approved applications.

The court is expected to hear oral arguments on the merits of the challenge in late June.

As was the case on April 30, Fed Chairman Paul A. Volcker and Fed Governor Wayne Angell on Tuesday dissented from the majority of the

Fed's Payment Services Produced More Fees, Less Profit

As Revenue Grew, So Did Expenses

By JEFFREY KUTLER

NEW YORK — Payment services that the Federal Reserve System provides to financial institutions produced more revenue but less net income for the central bank last year than in 1985.

Operations/Technology

In 1986, the 12 Federal Reserve banks took in $627.7 million from check collections, electronic funds transfers, and other fee-based services that it offers to financial institutions under provisions of the Monetary Control Act of 1980.

The revenue from what the Fed calls "priced services" grew 2.3% from $613.8 million in 1985. But expenses grew faster — by 4.4% — leaving $130.3 million in operating income, 5% less than in 1985.

After imputed costs and income taxes, which the central bank does not pay but calculates to make it comparable to a private-sector service provider, net income was off 8.5% to $57.6 million from the previous year's $62.5 million.

Check-Processing Productivity
Page 10

Both the gross and bottom-line figures are pittances compared with the $18 billion in net income from all operations that the Federal Reserve Board reported for 1986. Most of it came from interest on government securities and was contributed to the U.S. Treasury.

Despite their relative insignificance, Federal Reserve services and the way they are priced have been sensitive issues for bankers, particularly those at major correspondent banks that compete with the Fed for the business of smaller institutions.

These bankers have continually attacked the Federal Reserve for using its quasi-governmental status to assert a competitive advantage.

Guilty or not, the Federal Reserve has done well in the payments business: Its check processing volume grew 5% last year to 16.2 billion items; large-dollar funds transfers over Fed Wire rose 10.6% to 49.9 million transactions; and commercial automated clearing house activity grew 28.3% to 362.6 million entries.

The Federal Reserve also recovered from commercial banks the cost of more than $600 million worth of average daily float in the check collection system, which the central bank formerly subsidized.

To critics of the Fed, the growing revenue figure at the top of the income statement will be more meaningful than the declining net, which is arrived at by theoretical calculations of income taxes and a "private-sector adjustment factor" that approximates the financial characteristics of a nongovernment entity.

Even so, the Fed critics' case will be bolstered by the fact that the Fed overshot its target for net after-tax income by $30.3 million. The Fed actually improved its aim; in 1985 it earned $38.6 million more than its after-tax target.

"The increase in net income of $30.3 million from initial projections was due primarily to greater than anticipated volumes of automated clearing house, wire transfer, and check transactions processed by the system," the Federal Reserve said in a recent report on priced-service activities for 1986.

As mandated by the Monetary Control Act, the Federal Reserve must recover its costs of providing priced services, adding to those costs a private-sector adjustment factor for capital expenditures and imputed taxes. It recovered 104.7% of costs in 1986, an improvement from the previous year's 105.6% "overrecovery."

Interstate Law Makes It Tough for State Regulator

It's a 'Challenge' to Coordinate Rules, Arizona Banking Chief Says at Convention

Special to the American Banker

HONOLULU — It's not easy being a state banking regulator these days. Just ask Mary Short, superintendent of banks for Arizona.

Arizona's comprehensive new interstate banking law has made Ms. Short's job "very tough," she said here Monday at the American Financial Services Convention.

"We have to have meetings with the California regulators, the Federal Reserve, the Comptroller of the Currency and the FDIC just to figure out how this is going to work," Ms. Short said. "It's tremendously challenging."

She's already met twice with West Coast regulators to help determine how California banks entering Arizona under the new law should be regulated.

"We have to talk about everything, from sharing examination reports to figuring out who is responsible for what."

Ms. Short was one of four officials who discussed the pressures and trends in financial services during a session of the convention.

Ms. Short said state regulators today play a "tough" but "crucial" role. She said her office must monitor activity covered by new interstate banking laws, being watchful of "less visible" interstate banking such as mail-order deposit solicitations.

"It seems like every month when you get your Citibank Visa bill, they're asking you to send them your savings deposits, too," she said. "Add to that mutual fund advertising and other pitches, and the less visible side of interstate banking is out of control."

Ms. Short said she believes states should have the right to welcome or reject out-of-state financial institutions. "Arizona has adopted nationwide interstate banking, but states should have the right to hold their borders sacred if they like." She said state and federal charters should be maintained.

She and others on the panel said they were intrigued by the idea of functional regulation — that certain banking functions, such as checking accounts, would be regulated by one agency, regardless of the financial institution involved.

"Functional regulation is probably better than what we have now," said Thomas Durkin, director of research for the AFSA.

Jon Brown of Bank Watch, a consumer-oriented agency, agreed that functional regulation could help solve jurisdictional problems.

All agreed that barriers separating states are rapidly falling, and industry lines are blurring. "The public wants good financial services and they really don't care who's offering it," Mr. Durkin said. "The public wants a variety of sources from a variety of places."

Serge Uccetta, senior vice president of Household Financial Services of Prospect Heights, Ill., said service and safety are paramount concerns "but beyond that, people don't care where the service comes from."

Banking and nonbanking companies, therefore, are moving into new service areas, with legal loopholes permitting the rise of nonbank banks.

But Ms. Short does not believe nonbank banks rose in response to consumer demand. "I think they were bred on the corporate side, not in answer to consumer needs," she said. Moreover, she said she believes it's unfair to allow establishment of nonbank banks while limiting new activities for banks.

Mr. Uccetta acknowledged that companies go into the banking business "because they think they can make a good buck doing something better than the next guy. But the demand is there."

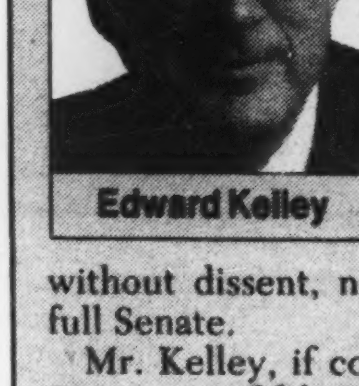
Mr. Brown of Bank Watch said he worries about nonbank banks, which he claims have not been endorsed by consumer groups.

"I don't think it's protectionist or old-fashioned to maintain some separation" between banking and nonbanking activities, he said. ■

Correction

Income from examination fees at the Federal Home Loan Bank of San Francisco rose from $3,193,015 in 1985 to $13,635,319 in 1986. A table of income from examinations at all 12 Federal Home Loan banks in the May 14 edition ("Beefed-Up Thrift Audits Receive Mixed Reviews," page 1) indicated that the fees went from $21 million to $35.3 million. The larger numbers reflected fees for services in addition to examination income, the San Francisco bank said. ■

Senate Panel Gives Its Nod to Kelley for Fed



Edward Kelley

WASHINGTON — The Senate Banking Committee approved President Reagan's nomination of Edward Kelley, a Houston investment adviser, to a seat on the Federal Reserve Board. The nomination, which was approved on Tuesday without dissent, now goes to the full Senate.

Mr. Kelley, if confirmed by the Senate, would bring the board up to six members, leaving one seat unfilled. The White House has chosen not to fill that seat, according to sources, until the unexpired term ends next January.

Continued from Page 1

give it only a small share of the banking market in the fast-growing Puget Sound area. U.S. Bancorp officers have said they intend a much larger Washington presence, which they will accomplish by internal growth or acquisition.

But U.S. Bancorp itself could become an acquisition target. Roger Breezley, the company's chief operating officer, said recently that the institution would just as soon remain independent. And John A. Elorriaga, chairman, says the holding company has had no offers. But he also told *Forbes* magazine recently: "I don't want to sell out, but this is a business. If somebody pays you what you think it's worth, you gotta sell."

The other giant player that has yet to reveal all its cards is First Bank Systems of Minneapolis, with assets of more than $26 billion. It edged its nose into Washington State last year under a law the allows out-of-state companies to take over failing Washington commercial banks.

But so far, First Bank's only Washington State holding is a small bank in a mill town far from Seattle, and almost everyone agrees that it has a lot more in mind. First Bank was talking to Rainier Bancorp. when the latter was swept away in late February by Security Pacific Corp., Los Angeles, in one of the biggest bank takeovers ever. Security Pacific will exchange stock worth over $1 billion sometime next summer to get control of Rainier. First Bank has yet to make another bid.

KeyCorp of Albany, N.Y., which has agreements to buy three Washington banks (the largest is Seattle Trust & Savings Bank with assets of $725 million), also is on the prowl for more banks in Oregon and Washington, where it already is represented, as well as in Idaho, Montana, Utah, and Wyoming.

Less Merger Activity Forecast

But analysts dismiss the idea that other big banks from California, New York, or other states are going to sweep into the Pacific Northwest. Robert J. Rogowski, vice president of New York-based Cates Consulting Analysts, says: "A respite from merger activity is likely to occur, with some major regionals° seeking to make marginally diluting acquisitions of only smaller institutions that fill in the necessary pieces of the regionals' network puzzles."

The compelling reason is that there just is not much merchandise left for the taking. Once the Rainier-Security Pacific deal is done, well over half the retail deposits in Washington State, by far the largest and most lucrative banking market in the Pacific Northwest, will be controlled by California banking companies. BankAmerica Corp. has owned Seafirst Corp., Seattle, parent of the region's largest bank, since mid-1983. Rainier is No. 2 in size in Washington. No. 3 is First Interstate Bank of Washington, wholly owned by First Interstate Bancorp of Los Angeles.

Two other banks in Washington's Top 10 are already spoken for: Seattle Trust and Old National Bancorp. of Spokane.

Among the commercial banks of large size, that leaves Peoples Bancorp., Seattle, with assets of $2.2 billion; and Puget Sound Bancorp, Tacoma, with assets of about $3.2 billion. Merger rumors periodically push their share prices higher.

U.S. Bancorp has been talking on and off with Peoples for years, but Joshua Green 3d, whose family has controlled Peoples since the 1920s, does not appear to have made up his mind whether to sell out or go it alone. Nor does Puget Sound, which has been making acquisitions, appear ready to give up its independence.

Commercial banking in Oregon, meanwhile, is dominated by U.S. Bancorp and by First Interstate Bank of Oregon, with assets of $9 billion and $5.3 billion, respectively. KeyCorp's Key Bank ranks third in asset size, just under $1 billion, and the Oregon Bank, taken over recently by Security Pacific, comes next, with assets of $962 million. The fifth-largest bank in Oregon has assets of only about $320 million and no presence at all in the Portland metropolitan area. The size of banks falls off dramatically from that level.

Spotlight on Thrifts

So when the question "who's next?" comes up in the Pacific Northwest these days, the attention shifts from commercial banks to thrifts, especially those in Washington. Washington Mutual Savings Banks, Seattle, with assets of $5.6 billion, and Pacific First Financial Corp., Tacoma, with assets over $4 billion, would come the closest to giving an acquirer a network with representation in the state's major metropolitan markets. Other thrifts whose shares run up occasionally on takeover speculation are concentrated in the Puget Sound area.

They include Washington Federal Savings and Loan Association, Seattle; University Federal Savings Bank, Seattle, and Prudential Bancorp., Seattle. Except for Washington Federal, they have assets of less than $1 billion.

Mr. Rogowski says the real question emerging in the Pacific Northwest, now that the big acquisitions have been lined up, is what steps midsize and smaller banks can take so they can compete with the biggest players.

In the long run, he says, the biggest banks are going to become the low-cost producers of banking services, which will put the squeeze on midsize and smaller community banks. The other side of the coin, he adds, is that costs do not always come down as fast as expected when banks merge. He suspects that until the recent wave of mergers and acquisitions settles out and shakes down, the smaller banks will have a "transition period" during which they can exploit long-standing relationships with customers for additional profitability.

FSLIC . . .

for the building, including a $650,000 down payment and an assumption of $1.2 million in debt. They received a loan for the remaining $1.2 million.

However, the loan was approved without adequate financial statements or tax returns, the suit says. The FSLIC alleges that Gateway actually provided Magna with the money for the down payment by lending the money to business associates who in turn lent it back to Magna. The suit charges Gateway agreed to pay inflated rents to Magna.

Based on the high rental income, the suit claims, Magna was able to sell the building 14 months later at a profit of $775,000. That figure does not include $325,000 in rental income. The suit says Magna officials received a total gross return of more than $1 million, all of it earned with no money down. ■

Fed . . .

Continued from Page 2

"Various factors, such as volumes and float, are difficult to anticipate and prevent an exact cost/revenue match from year to year," the priced-services statement said. "In 1986 prices were generally stable and certain fee reductions were implemented."

The Fed's pro forma balance sheet for priced services listed $2.5 billion in total liabilities, $219 million in equity, and $2.8 billion in total assets at the end of 1986. These were up from $2.2 billion in liabilities, $202 million in equity, and $2.4 billion in assets on Dec. 31, 1985. Assets and liabilities grew about 15% in the year. ■

Thrifts Face Strict FDIC Capital Rule

By BARBARA A. REHM

Washington Bureau

WASHINGTON — The FDIC on Thursday announced that thrifts seeking to join the insurance fund must meet its 6% minimum capital requirement — or possibly a higher one — when they convert.

The FDIC issued a policy statement in response to inquiries from thrifts contemplating a conversion from the Federal Savings and Loan Insurance Corp., said FDIC chairman L. William Seidman.

Fifteen applications are pending at the FDIC by thrifts seeking insurance conversion, the agency said. Three were approved at the end of 1986 and five have been granted this year, according to a spokesman for the FSLIC.

Practices of the past, when the FDIC allowed some leeway on capital requirements, are over. "Exceptions to these standards are not expected and will be considered only under very unusual and infrequent circumstances," the FDIC said.

In fact, 6% may not be enough. Some thrifts trying to escape the FSLIC may be forced to maintain a capital-to-assets ratio of up to 10% in some circumstances. This will be determined by "an analysis of the type and quality of the institution's assets, the kind of powers exercised, the extent of interest rate sensitivity, or other factors," the FDIC said. "Erratic growth patterns" could also be cause for increased capital reserves, the agency said.

Applications for conversion by institutions with more than $50 million in assets should be accompanied by an outside audit, the FDIC said. In addition, FDIC examiners will make an onsite inspection after an application is received.

Finally, the FDIC wants details of the converting institution's future op-

New Mortgages Simplify Move From Adjustable to Fixed Rate

By NINA EASTON

West Coast Bureau

LOS ANGELES — Volatile interest rates have led to adjustable rate mortgages that give borrowers greater flexibility to convert to fixed loans.

If the idea catches on, it will be a boon to home buyers, expert said. But it could also make asset-liability management a dicier task for lenders.

Adjustable-rate mortgages that carry a conversion feature are not new. But in the past, the borrower could convert only on the anniversary of the loan's origination, and only after making payments for several years. The new products provide greater flexibility.

In May, Sterling Savings and Loan Association, a $125 million-asset thrift in Irvine, Calif., began offering an adjustable-rate mortgage that requires the borrower only to act within the first three years, and give 30 days' notice, before converting to a fixed rate.

That means a customer could obtain an adjustable-rate mortgage today at an attractive 8.25%, wait a few months for fixed-rate mortgages to drop in price, and then lock in the more attractive rate.

Home Owners Federal Savings and Loan Association, a Boston thrift with $1.4 billion in assets, is offering a similar loan, although it requires the borrower to exercise the option anytime between the end of the first and fifth years of the loan. The loan is being offered through the thrift and its mortgage banking subsidiaries throughout the country.

The product has attracted a deluge

Pittsburgh National Offers Small Firms Loan with Fixed-Variable Switch Option

By PHILIP T. SUDO

NEW YORK — Pittsburgh National Bank will give small businesses the option of switching between fixed and variable rates on a single loan, the bank said on Thursday.

The Optional Rate Judgment Note, a product of the bank's metropolitan commercial banking division, is a floating-rate loan that allows customers to lock in a fixed interest rate for a minimum of one year.

Borrowers are required to stay with the fixed rate for the length of time they initially choose. At the end of that period, they may revert to a variable rate or elect a fixed rate for another term.

The product is aimed at companies with annual sales of up to $50 million, provided their loans have a maturity date in excess of one year.

"The beauty is, it's a standardized loan product," said Robert Cowman, metropolitan banking officer. "The big benefit is that it gives the borrower control and flexibility and potential savings on interest expenses. It takes the interest rate risk off his shoulders and transfers it to the bank."

The optional rate also eliminates the time and cost of renegotiating a new loan agreement, as well as certain prepayment penalties, he said.

Many banks offer such an option on residential mortgage loans, but Mr. Cowman said he believes the Pittsburgh National product is the first of its kind for small businesses.

The new option will be based on a formula tied to the bank's cost of funds and the length of time the borrower

Most of the data are from American Banker's questionnaire to the top 500 thrifts. FHLBB data were used for thrifts not reporting. **Total deposits and savings accounts** include: non-interest earning demand and NOW accounts; accounts earning in excess of regular rate in certificates with denominations of $100,000 or more and in other accounts; and accounts earning at or below regular rate in interest-earning NOW accounts, in passbook accounts, and all other accounts, except escrowed accounts. **Regulatory Net Worth** includes permanent, reserve, or guarantee stock; paid-in surplus; qualifying mutual capital certificates; income capital/net worth certificates; qualifying subordinated debentures; appraised equity capital; reserves; undivided profits; and net undistributed income. **Charter Types:** 1-Mutual Savings Bank; 2-Stock Savings Bank; (3)-Mutual Savings & Loan Association; (4)- Stock Savings & Loan Association. **Insurance Types:** 1-FDIC-Insured; 2-FSLIC-Insured; 3-State Insured. **(a)**— The Dec. 31, 1986, data for Goldome are on a consolidated GAAP ("generally accepted accounting principles") basis. **(b)**— Prior to 1986, data for Goldome were on an unconsolidated regulatory basis. Since these data are not comparable with the 1986 data, they are not shown here. **(c)**— Part of Empire of America FSB's financial service network. Empire of America FSB had consolidated deposits of $7.35 billion at the yearend. Had the consolidated deposit figure been used, Empire of America FSB would have ranked 12th in deposits. **(d)**— Based on revised deposits received after publication of Top 100 Thrifts on 3/6/87. The revision reflects yearend merger of Eastern Savings Bank, Scarsdale, N.Y. **(e)**— Deposits for 12/31/86 have been revised since publication on 3/6/87.

Top 300 U.S. Thrift Institutions

Most of the data are from American Banker's questionnaire to the top 500 thrifts. FHLBB data were used for thrifts not reporting. **Total deposits and savings accounts** include: non-interest earning demand and NOW accounts; accounts earning in excess of regular rate in certificates with denominations of $100,000 or more and in other accounts; and accounts earning at or below regular rate in interest-earning NOW accounts, in passbook accounts, and all other accounts, except escrowed accounts. **Regulatory Net Worth** includes permanent, reserve, or guarantee stock; paid-in surplus; qualifying mutual capital certificates; income capital/net worth certificates; qualifying subordinated debentures; appraised equity capital; reserves; undivided profits; and net undistributed income. **Charter Types:** 1-Mutual Savings Bank; 2-Stock Savings Bank; (3)-Mutual Savings & Loan Association; (4)- Stock Savings & Loan Association. **Insurance Types:** 1-FDIC-Insured; 2-FSLIC-Insured; 3-State Insured. **(a)**— A de novo institution established 12/5/86. Its predecessor was FirstSouth FA. **(b)**—A de novo institution established 9/12/86. It assumed the deposits of Sunrise S&L Assn., West Palm Beach. Sunrise was placed into receivership on 9/12/86.

Top 300 U.S. Thrift Institutions

In Order of Deposits, December 31, 1986, Compared with December 31, 1985

TOP 300 THRIFTS: The bulk of the data are from American Banker's questionnaire sent to the 500 largest thrifts in the nation. Data from the Federal Home Loan Bank Board were used for those thrifts not responding to the questionnaire. **(a)**— The Dec. 31, 1986, data for Goldome are on a consolidated GAAP ("generally accepted accounting principles") basis. **(b)**— Prior to 1986, data for Goldome were on an unconsolidated regulatory basis. Since these data are not comparable with the 1986 data, they are not shown here. **(c)**— Part of Empire of America FSB's financial service network. Empire of America FSB had consolidated assets of $9.10 billion at the yearend. Had the consolidated asset figure been used, Empire of America FSB would have ranked 18th in assets. **(d)**— A de novo institution established 12/5/86. Its predecessor was FirstSouth FA. **(e)**—A de novo institution established 9/12/86. It assumed the deposits of Sunrise S&L Assn., West Palm Beach. Sunrise was placed into receivership on 9/12/86.

THRIFTS & MORTGAGES

AN AMERICAN BANKER WEEKLY FEATURE

> *We have to get people thinking like that — like they are from Missouri. You know. Show me.*
> — Robert Sahadi, Federal Home Loan Bank Board

Newswatch

PSA Sets New Schedule

The Public Securities Association announced on Thursday it has set up a new settlement date system for mortgage-backed securities to be settled in October 1987 through February 1988. The new system, developed by the association's mortgage-backed securities division, increases the number of settlement days from three to five per month and regroups the securities affected into five classes.

"The new system has been developed to further alleviate the work load of operations personnel during the heaviest settlement periods," said Brian Hays, chairman of the mortgage-backed securities division and manager for all mortgage products at Drexel Burnham Lambert Inc.

He said the efficiency of the system will be evaluated and is therefore being set in four- or five-month intervals.

SecurNet Sells Securities

SecurNet Financial Corp., a mortgage securities company formed earlier this month, said on Wednesday that it has sold $191 million in Federal National Mortgage Association securities to Salomon Brothers Inc.

SecurNet obtained the securities by swapping a pool of loans with Fannie Mae. The company said this is the first time a group of lenders has joined together in advance to swap a pool of conventional conforming mortgages with Fannie Mae. Fannie Mae normally pools loans from unrelated lenders for resale into the secondary market.

Goldome Realty Credit Corp., Buffalo, was the largest participant in the issue, the first brought by SecurNet. Other members of SecurNet that joined include Lincoln Service Corp., Owensboro, Ky.; Commonwealth Mortgage Company of America LP, Houston; CenTrust Savings Bank, Miami; North American Mortgage Co., Houston; and Northeast Savings Bank, Hartford, Conn.

High Priced Homes Sell Better

Higher priced homes generally sold faster and appreciated more in 1986 than lower priced homes, according to a survey by the Coldwell Banker Real Estate Group. Homes in the East and West Coast areas ranging in price from $170,000 to $385,000 remained on the market for an average of 58 days and increased in value by 20.2% during the year.

Nationally, homes ranging in price from $74,817 to $775,000 were on the market for an average of 81 days and appreciated by 9.6%.

The survey showed that home values increased in 80% of the markets surveyed, while decreasing in 14% and remaining the same in 6% of the markets. It also said that 29% of the homes surveyed were on the market for 60 days or less, 55% were on the market for 61 to 116 days, and 16% sold in 120 days or more.

Central Holding Buys Superior

Central Holding Co., Mount Clemens, Mich., said its thrift subsidiary, Colonial Central Savings Bank, has signed a letter of intent to acquire Superior Mortgage Inc., based in Grand Island, Neb.

Colonial Central already owns a mortgage company with nine offices in four states and a servicing portfolio of more than $500 million. Superior Mortgage has 10 offices in five states and a servicing portfolio of more than $400 million.

Mass. Bank Forms Mortgage Unit

University Bank and Trust Co., Newton, Mass., said it is forming a mortgage company subsidiary that will begin operations on June 1. The unit, called University Mortgage Corp., will originate conventional and jumbo residential mortgages in Massachusetts. It expects to originate $60 million in new loans in its first 12 months of operation.

William Pirraglia, former vice president in charge of mortgage lending at Patriot Bank in Boston, will be president of University Mortgage.

WASHINGTON BRIEFING

Bank Board Wants Safer Environment For Thrifts Hedging Their Portfolios

By JIM McTAGUE
Washington Bureau

THE staff of the Federal Home Loan Bank Board held two days of hearings last week to get a simple answer to a simple question. It took them that long to get it, too.

The question in general had to do with mortgage portfolio hedging techniques and in particular with those newfangled securities like IOs, which pay the interest-only cash stream from underlying mortgages, and POs, which pay the principal portion.

How can we, the regulators asked, prevent your average thrift executive from being sweet-talked into a roll-the-dice hedging deal by some slick-haired, gilt-tongued securities salesman?

The question was first posed to a panel of Wall Streeters, most of whom, in almost Pavlovian response, magnanimously offered to sell their respective firms' services to the inexperienced S&L managements. The Wall Street guys are natural closers.

One major house's representative, rearranging his face into a most serious expression, announced that his outfit was not in the business of selling securities at all, but was rather a purveyor of just the sort of financial information needed by the thrift industry's hedgers.

This just goes to prove the old saying: Ask a securities man about the weather and he'll try sell you stock in a barometer manufacturer.

Toward the end of the second day of testimony, the staffers finally got the simple answer they'd been looking for all along. It came from Ernie Fleisher, a savings and loan executive from Ottawa, Kan., with an enviable hedging track record. Mr. Fleisher explained that he never speculates, but bases his decisions to buy IOs or POs or options or futures on thorough research.

Mr. Fleisher's remarks made a deep impression on Robert Sahadi, director of the Bank Board's office of policy and economic research.

"We have to get people thinking like that — like they are from Missouri. You know. Show me."

Mr. Sahadi said the staff perceived common threads in testimony from diverse quarters, all suggesting the need for prudence when highly interest-rate-sensitive hedging devices are employed.

He noted that panelists seemed to recommend that:

- People selling or issuing mortgage securities provide detailed information on the performance of such instruments in a variety of interest rate climates.
- S&L buyers of such volatile instruments analyze their effect on the company's entire portfolio.
- S&Ls implement strong internal controls, monitoring both the investments and the people who make them.
- The Bank Board establish a "swat team" to examine the asset/liability risks of larger thrifts that make extensive use of hedging devices.
- The uninitiated be prevented from leaping into the hedging game unprepared.

The Bank Board staff is likely to recommend that these proposals be drafted into some sort of regulation.

The regulators fear that S&Ls advertently or inadvertently will position themselves in a speculative situation where a big move in interest rates will either make or break the company.

But the people who market hedges and

Thrifts Still Stocking Up

Conversion Continues From Mutual Ownership in Scramble for Capital

By L. MICHAEL CACACE

FOR the third year in a row, the nation's top thrifts continued to convert from the mutual form of ownership to stock ownership at a rapid rate, *American Banker's* annual survey of the top 300 thrifts shows.

Among the top 300 thrifts in deposits, 177, or 59%, were stock companies at yearend 1986, compared with 155 institutions, or 52%, a year earlier. Just three years earlier, only 97, or 32%, of the top 300 institutions were stock-owned. Thus, from yearend 1983 to yearend 1986, the number of stock-owned thrifts ranked among the top 300 has risen by more than 82%.

The Top 300 Thrifts
Tables Begin on Page 11

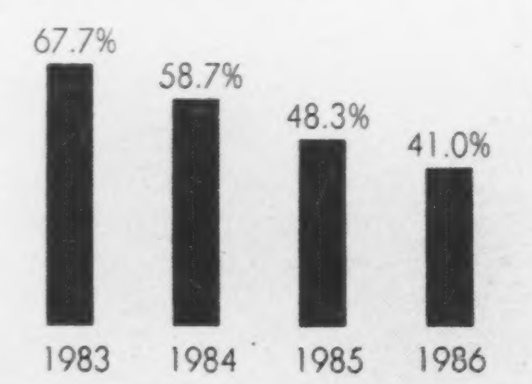
Thrifts have been converting to stock ownership primarily to recover capital lost during industry-wide hard times in the early 1980s.

The *American Banker* survey ranks savings and loan institutions and savings banks by their deposits and assets on Dec. 31, 1986.

For the top 300 thrifts in deposits, total deposits rose 6.9% to $642.9 billion on Dec. 31, 1986, from $601.4 billion a year earlier. The assets of these institutions rose 12.1%, while their regulatory net worth was up 13.9%.

Vanishing Mutuals

Percentage of Top 300 Thrifts With Mutual Ownership



The higher growth in net worth compared with deposits is attributable, in part, to the recent conversions from mutual to stock ownership. As reported in *American Banker* on March 6, when a listing of the top 100 thrifts in deposits was published, as institutions converted from mutual to stock form of ownership, not only did net worth increase but deposit growth slowed, since some depositors converted their deposits into equity.

For the top 300 thrifts ranked by assets, total assets rose $12.5% to $892.6 billion on Dec. 31, 1986, from $793.7 billion a year earlier.

Among the these thrifts, 297th-ranked St. Bernard Federal Savings and loan Association, Chalmette, La., had the largest percentage gain in assets, more than 1,200% from $65.3 million on Dec. 31, 1985, to $858.4 million on Dec. 31, 1986.

St. Bernard grew after it was acquired by Landmark Land Co., Carmel, Calif., in the third quarter of 1986. Landmark, which also owns Louisiana's largest thrift, the $1.6 billion-asset Dixie Savings and Loan Association, New Orleans, bought St. Bernard after being contacted by the Federal Home Loan Bank Board of Dallas. The Bank Board had been seeking buyers for several Louisiana S&L's with low or negative net worths.

The Bank Board granted a number of forbearances to Landmark to assist in its acquisition. Most significantly, it permitted Landmark to capitalize St. Bernard Federal with approximately 31,700 acres of land. Most of the land was in Louisiana and was undervalued at

Unitization Plans May Help the British Digest Massive Property Developments

By HOLLY SMITH

IT'S EASIER to sell a big building if you can divide it into bite-size units. So goes the theory in Britain, where the technique is being called the unitization of the property market. Over the last year and a half, no less than three separate approaches to carving up the properties have been developed. One has already been used; the others are expected to be applied later this year.

Promoters say unitization will bring a healthy liquidity to the commercial market, while critics say it could just pave the way for owners of big buildings to dump unprofitable properties on a naive public.

The increasing size of developments is a key reason for this sudden urge to unitize properties. Projects are getting so big that financing can be difficult to arrange, and the finished product is so expensive that only a few large institutions, such as pension funds, can afford to buy it.

Unlike the situation in the United States, there are few firms in the United Kingdom large enough to swallow a $112 million building whole. Also in contrast to the United States, taxation rules and partnership law have made it difficult for one building to be parceled out to numerous investors.

A year ago a group of financial institutions, property companies, and other real estate experts, led by Mercantile House Holding chairman John Barkshire, called for the creation of a stock market where units of single buildings could be bought and sold. The group proposed that this would be done through a unit trust arrangement, where a trustee would hold the ownership of the building and act as a custodian for the members of the trust. He would hire managers to run the building and be responsible for distributing dividends.

Because the unit trusts wouldn't be redeemable, the Barkshire committee proposed that they be traded in a secondary market to be created in the future. Characteristics such as rent income and the building's current value would dictate the value of the shares.

The Barkshire committee report got a warm reception, but the ideas needed legal sanction before they could be put into practice.

Then midway through last year two other unitization plans came on the scene.

One was property income certificates, or PINCs, proposed by County Bank and Richard Ellis Financial Services. Under this system an investor would buy taxable securities that would have two elements: an income certificate that would give the investor a share in the rental income of the property, plus a share in the management company set up to oversee the running of the property.

PINCs had the advantage of not requiring new legislation, and neatly sidestepped double taxation problems for the rental income that could otherwise have resulted in both the vehicle and the end investor being taxed on the income.

The other plan was one that has already been put into effect. America's Goldman, Sachs and Co. and Britain's Baring Brothers sold a $118 million London office building in June through a specially created company called Billingsgate City Securities, whose sole asset is the office building. The company issued three kinds of security: deep-discounted mortgage debentures, secured by the property; ordinary shares that involved more risk but gave investors 70% of rent increases and appreciation in the building's value; and preferred share, which had yield of 6% plus 30% of rent increases and appreciation.

This so-called "securitization" of a property was promoted as being similar to unitization, but offering more flexibility, since investors could choose the level of risk they wanted to assume.

From the start of the unitization movement, property observers warned that those most excited about the possibilities of the new market were the large institutions that were lumbered with huge buildings that were difficult to sell.

Spokesman Robert Rees of Greenwell Montague Securities, a member of the Midland Bank group, agreed with that assessment in a recent report on unitization: "Current expressions of interest from potential places must be considered in the light of a general desire for divestment of property holdings," he wrote.

Mr. Rees said the property units such as PINCs and the Barkshire-style unit trusts are shaping up to be a dull investment, since they are tax transparent and offer no prospect of any active management initiative. It's the securitization of property debt, he said, that seems to be the best way to introduce liquidity into the property market. ■

Cooper of TCF Banking Wants to Grow Eastward

➜ Continued from Page 26

insurance relating to financial needs, credit life, and so forth. The finance company business is synergistic. We'd like to do mutual funds, either startups or buying existing ones."

As a unitary holding company — owning only one S&L — we would sell or spin off or merge TCF Banking, and then the regulators permit a wide variety of activities," Mr. Cooper said.

"We can then do anything any commercial company can do at the holding company level, but we will stick to financial kinds of businesses. No windmills, no Wendy's."

TCF also hopes to trade up by moving its stock from the over-the-counter market to the New York Stock Exchange. ■

Stock Prices of Many Midwest Thrifts Seen as Low Compared to Other Areas

What Analysts Say

Shares of many thrifts in the Midwest are trading at attractive prices these days, with prices averaging only 77.3% of book value and 6.8 times earnings, according to statistics compiled by Blunt Ellis & Loewi, a Milwaukee investment banking firm.

The discounts that can be found in the north central part of the country contrast with New England, where thrift stock prices are averaging at 103.7% of book value and 13.4 times earnings, and California, where prices average 100.6% of book value.

John G. Cornwell, an analyst with Blunt Ellis & Loewi, said that one of the reasons for this disparity is the smaller size of midwestern institutions. "Market trading volume for shares is a definite deterrent to buying by major mutual funds and others who prize liquidity," he said.

Thrift stocks in the West, outside of California, are trading at prices in line with the Midwest, with prices at 77% of book value and seven times earnings. But Blunt Ellis' western region includes economically depressed states such as Texas, Oklahoma, and Colorado.

The national average for thrift stocks, using data from the end of April, is 89.6% of book value and 8.9 times earnings.

Mr. Cornwell said that most smaller midwestern thrifts have little goodwill on their balance sheets and are underpriced, based on their financial strength and outlook. "It's an excellent hunting ground for true investors."

He picks out five midwestern thrifts, all with net worth-to-assets ratios of more than 8%, as good buys. They are:

- Deerfield Federal Savings & Loan Association, Deerfield, Ill. At $16 a share, it's trading at 73% of book value and 8.2 times earnings.
- Indiana Federal Savings & Loan Association, Valparaiso, Ind. At $10.375 a share, it's trading at only 59% of book value and 7.4 times earnings.
- Federated Financial Savings & Loan Association, Butler, Wis. It's trading at $8 a share, 53% of book value and 6.7 times earnings.
- Republic Savings & Loan Association of Wisconsin, Milwaukee, which is trading at $19 a share, or 68% of book value and six times earnings.
- Horizon Financial Services Inc., Beachwood, Ohio. It's trading at $7.50 a share, or 59% of book value and six times earnings.

$750,000 on the company's books because it was last appraised in 1919 and 1920.

According to St. Bernard's quarterly financial report filed with the Bank Board, regulatory net worth went from a negative $2.9 million on June 30, to $701.8 million on Sept. 30, as $689.4 million was added to the thrift's paid-in surplus account. At yearend 1986, net worth totaled $711.7 million.

The thrift's net worth has funded its asset growth, since deposits dropped from $49.2 million on June 30, to $38.4 million on Dec. 31. Asset growth has been centered in two areas — ADC loans (acquisition, development, and construction loans for land and developed building lots) and equity investments in service corporation subsidiaries.

According to the Bank Board data, ADC loans totaled $486.1 million on Dec. 31, compared with only $3.4 million on June 30. And equity investments in service corporation subsidiaries totaled $299.3 million on Dec. 31, compared with $0.4 million on June 30. ■

Bank Board Wants Safer Way to Hedge

➜ Continued from Page 26

asset/liability management services think the greater risk is in institutions not being hedged at all.

One respected consultant said that in cases with which he is personally acquainted, thrifts that seemed perfectly hedged according to generally accepted accounting principles were in fact gravely mismatched and thus vulnerable to upward rate moves.

"The S&Ls often misclassify assets in terms of maturity," he said.

For example, a fixed-rate 30-year mortgage might be booked as a 20-year loan for maturity purposes when prepayment models suggest it is more likely to be paid off in three to four years.

Warren Lasko, executive vice president of the Mortgage Bankers Association of America, said that most of his membership is hedged constantly but that savings and loans that make mortgage loans and hold them in portfolio for the most part are not hedged.

"Mortgage bankers are more knowledgeable about hedging because their capital relative to the loans they make is much thinner than thrift capital. A sharp run-up in rates could very rapidly eat into this capital and company earnings," he said.

Mr. Lasko added that it was nearly impossible to hedge against the "incredible roller-coaster rate ride" of the past several weeks, and that many in the business lost substantial amounts of money.

□□□

The next big crisis facing the S&L industry is a loss of liquidity. Regulators are keeping their fingers crossed that Congress will pass a Federal Savings and Loan Insurance Corp. recapitalization plan before a cash squeeze develops.

March statistics showed a sharp drop in thrift deposits, and April figures are not expected to show any improvement. Furthermore, the Federal Home Loan Banks are unable to make any more unsecured advances to thrifts until the FSLIC gets new funds.

Regulators estimate that even with recapitalization, the FSLIC technically might remain insolvent for five or more years. ■

What Retailers Really Want From Banks

BANKERS AND RETAILERS have never been the best of friends. In fact, they have long been vigorous competitors for the same limited resource: consumers' disposable income. Bankers want deposits, retail merchants want to sell their wares.

Their antagonism prevented the banking industry from realizing one of its greatest ambitions: to build a comprehensive payment system linking all retail points of sale in a high-speed, electronic network.

Without retailers' cooperation — which came only grudgingly when they agreed to accept bank credit cards — fully electronic funds transfer (EFT) at the point of sale (POS) could never work.

Now there are signs that EFT at the POS is nearing the "critical mass" that eluded bankers for more than a decade.

Today's *American Banker* includes a special feature that assesses the banker-retailer relationship at a critical juncture in the evolution of payment systems.

Are the two industry groups finally putting their disagreements behind them in the interest of mutual efficiency?

Or are the antagonisms still there, except that they flare up in different places? If they do, will POS payment systems ever succeed?

Today's edition examines the state of the POS art as viewed from various retailing industry and banking perspectives and finds unanimity lacking.

Biggest Banks Dominate in Technology

Smaller Institutions May Not Close Gap

By JEFFREY KUTLER

NEW YORK — A few large bank holding companies have become so dominant in their acquisition and use of technology that the rest of the industry may never be able to catch up.

But it remains uncertain whether the major technology banks — the top 14 accounted for almost one-third of all commercial banks' systems expenditures in 1985 — can convert their current advantage into long-term competitive gains.

McKinsey & Co., the New York-based management consulting firm, sounded these warnings in a report currently circulating among its clients. The study was partially funded by Salomon Brothers, which itself has published some of the findings in a booklet, "Technology and Banking: The Implications of Strategic Expenditures."

The report portrayed an industry that is throwing money at technology, increasing annual budgets seven-fold between 1980 and 1990. But it said that individual institutions face "a difficult strategic choice" in deploying automated systems, and that "no single [technology strategy] will be appropriate for all lines of business."

The nation's biggest banking company, Citicorp, typifies the large banks' grab for technological preeminence. It is currently spending an estimated $850 million to $900 million per year on computers and related systems, almost twice the sum of its closest rival,

Third World Loan-to-Equity Switch Faces Federal Reserve Limitations

By JED HOROWITZ

NEW YORK — Banks wanting to swap their troubled Third World loans for equity investments in Third World companies are hitting a regulatory roadblock.

The Federal Reserve Board's Regulation K — which covers international banking operations — limits bank companies and their subsidiaries to 19.9% of the voting shares in nonfinancial companies, with a maximum investment in each company of $15 million. In addition, it restricts the banks to "passive investments," which, according to bank attorneys, appears to prohibit banks from placing directors on a company's board or otherwise influencing business policy.

"They're not prepared to swap their debt for millions of dollars of equity in a manufacturing company when they have no say in running the company," said a lawyer who represents a major bank seeking to trade its Brazilian debt for equity.

Meanwhile, Congress has been reacting to the problem.

On Thursday, Reps. Alex McMillan, R-N.C., and Tom Carper, D-Del., introduced a bill in the House that would allow bank companies to buy, through debt-for-equity swaps, 100% of the voting stock in nonfinancial companies based in heavily indebted nations. It would also raise the dollar investment limit from $15 million to either $50 million or 2% of a bank company's capital, whichever is smaller. The bill directs the Fed to maintain oversight in each swap.

The proposal would also extend the period of investment from the Fed's current two-to-five year limit to ten

Thrift Conversions Could Be Hindered By Tax Reform Act

By MARK BASCH

NEW YORK — A technicality in the 1986 Tax Reform Act is throwing some thrift conversion plans up into the air, because the public stock offering could limit the use of the thrifts' net-operating-loss carryforwards.

"It raises a tremendous cloud as to what will become of the NOLs post-conversion," said Frederick Remeschatis, chief financial officer of First Federal Savings and Loan Association, Madison, Wis. First Federal is in the process of converting.

The new law states that if a change of ownership in a thrift institution occurs, the institution loses some of its net-operating-loss carryforwards, which are tax benefits that can be used because of

New Optimism At the Point of Sale

Merchants seize the initiative.

By Jeffrey Kutler

FOR YEARS, almost everyone in banking agreed that point-of-sale payment systems were a dubious proposition. Today, almost everyone agrees that this technology is at last on the verge of significant growth. Some foresee an outright explosion.

Are they right? What happened in the recent past to turn perceptions around so drastically?

Have bankers put their longstanding antagonisms with retailers behind them, finally giving the retailers the deals they wanted in return for participating in electronic payment networks?

The answers to these questions are complex, but one thing is certain: any truce between bankers and retail merchants is uneasy at best.

There are many reasons to believe that the point-of-sale tide has finally turned. Computers and communications systems are less costly than before, and retailers seem more open-minded than ever toward different kinds of payment systems.

Several researchers in the point-of-sale field independently have concluded that the long-moribund point-of-sale debit concept — where consumers' funds are immediately transferred to a retail merchant — has indeed

made a breakthrough.

Whether this gives bankers cause to rejoice, however, remains an open question.

The retailing industry may already have stolen the march from bankers who thought that no payment system could work without their help. Sears, Roebuck and Co., J.C. Penney Co., and others are continually shaking bankers from that historical complacency with competing payment systems of their own.

Recently publicized advances for point-of-sale payment systems, in the petroleum and fast-food industries, arose more from retailers' initiatives than from financial institutions'. Meanwhile, department store executives fume at every mention of debit cards, as they have for well over a decade.

The banking-retailing rivalry is not new in the United States. Bankers and retailers alike want access to consumers' disposable income, whether in the form of deposits or purchases. Bankers also want to profit from payment systems, notably the credit card infrastructure that they built over the past 20 years, much to the chagrin of retailers whom bankers ask to pay card-transaction fees.

Today, in the debit card era, this factional competition has taken on a different form. In this sense, the point-of-sale struggle may be far from over.

Retailers are quick to point out that they invented credit cards. It is the bankers who invaded *their* turf.

Sears was among the first stores, early in this century, to give its customers metal charge plates. The customers could use them to spread out their payments over time. Retail stores invented not just charge plates, which eventually came out in colorful plastic versions that made cardholders feel loyal to particular merchants, but the entire revolving consumer credit market.

It was not until the 1950s that innovative banks started muscling in on the credit card business. Early entrants, beginning with Franklin National Bank on New York's Long Island, served smaller merchants in local markets, mainly because larger retailers refused to let bank sales representatives in the door.

In the 1960s, Bank of America took its BankAmericard, which later evolved into Visa, nationwide. Other banks countered with Master Charge, now MasterCard. The two increasingly powerful ventures, now boasting almost 300 million cardholders worldwide between them, eventually persuaded many larger merchants to accept bank credit cards.

In 1979 J.C. Penney became the first of the major mass merchandise chains to take bank cards, first Visa and later MasterCard. Montgomery Ward & Co. Inc. quickly followed. K mart Corp. was already in the fold.

Sears made diversified payment plans of its own, built around the Discover card that it introduced in 1985. For Sears, accepting bank cards was less imperative than for J.C. Penney and others because most creditworthy bank customers also carry Sears credit cards.

Even such holdouts as Bloomingdale's, which had repelled bank card marketing efforts for many years, signed up last year after a "full-court press" orchestrated by both MasterCard and Visa. The bank card ventures still have about 20 retailers with an upscale image on their list to sign, but the banks' biggest credit card victories have already been won.

By the end of 1986, commercial banks controlled 64% of the $127.9 billion in revolving consumer loans outstanding, compared with retailers' 28% share. In 1986 alone, the banks gained 1.5 percentage points of that market, the retailers lost 1 point, according to Federal Reserve Board data.

Gasoline companies also climbed earlier than banks onto the plastic bandwagon. Competition and, because of lower oil prices, decreasing business volume has meant trouble for the petroleum marketers' credit programs.

The oil companies that extend revolving credit to consumers not only lost market share in 1986, they also lost loan assets. Gasoline revolving credit fell to $3.4 billion, or 2.6% of the market, from $4.3 billion, or 3.6% of the market, in 1985.

While bankers have been complaining about losing mortgage loans to insurance and automobile companies, and losing automobile loans to the auto manufacturers' captive finance companies, bankers have made the market for credit cards and other revolving loans their own at the expense of their retailing rivals.

The Debit Card Irritant

When debit cards came along, they only exacerbated banker-retailer tensions held over from the early credit card era.

Except for some local experiments in the early 1960s, notably at the Bank of Delaware and at Hempstead Bank on Long Island, the first wave of debit cards were those that banks began issuing in the late 1960s and early 1970s for cash withdrawals at automated teller machines (ATMs).

The point-of-sale debit concept remained mostly in the minds of "cashless society" futurists until 1974, when First Federal Savings & Loan Association of Lincoln, Neb., put direct-debit terminals inside Hinky Dinky supermarkets. The Hinky Dinky experiment became known more for the political furor it touched off than for any technological breakthrough. It put legislators and regulators in the quandary of deciding whether the presence of those terminals turned the supermarkets into branches, and if so, whether the branches were legal.

Meanwhile, the financial industry itself had internal strife over debit cards.

Keep the change.

In the financial services industry, one thing that remains constant is change. That's why Electronic Data Systems (EDS) designs processing solutions that can constantly adapt to change. Quickly. Easily. Solutions that let you focus on how change affects your business and less on how it affects your processing.

How do we do it? One key element is our vendor independence. We're not tied into selling one brand of hardware or software. This lets us select system components that offer the greatest flexibility and economy. So, whether you're adding a new product or adding another branch, you don't have to worry about your system keeping current.

But the most important element is our people. People who know financial services as well as they know computer services. And when faced with change, they know how to adapt.

So, when it comes to your processing, your choice is simple. A system that defies change. Or a solution that gives you change to spare.

EDS

People who have what it takes.

Continued from Page 16

Dee W. Hock, the visionary chief executive of BankAmericard, which changed its name to Visa in the mid-1970s, regarded debit and credit as two variations on the generic theme of "value exchange." Mr. Hock wanted Visa to be the leading value exchange system in the world, and he did not care how his member banks approached that goal.

In other words, Mr. Hock saw no reason to differentiate between debit and credit cards. Visa's electronic network would handle any transaction regardless of the account out of which payment was made.

Retailers revolted at Mr. Hock's suggestion that debit and credit cards could look exactly the same. The retailers accepted cash and checks without paying bank fees like the discounts charged on credit card transactions. They saw no reason to pay credit card-like discounts on debit cards, which were, in effect, replacements for cash or checks.

MasterCard, always eager to offer a competitive alternative, proposed a separately identified debit card, first known as Signet, then as MasterCard II.

These, as well as an earlier Visa debit product called Entree, flopped in the national market.

But local and regional financial institution ATM cards proliferated, along with the machines and the interchange networks connecting them. Today there are an estimated 140 million bank ATM-debit cards in circulation — enough to form the nucleus of a national debit system if they can all be brought together in a technically workable, cohesively marketed program.

The Banks Come Together

Within the past two years, bankers have become more cooperative with each other, and more unified in their approach to a potential direct debit program whose appeal might approximate that of the universal cash and check systems.

Banking industry cooperation asserted itself in two places: an American Bankers Association (ABA) standards committee; and MasterCard and Visa's joint debit card project, which resurrected the old Entree name.

The ABA brought together MasterCard, Visa, and the Plus and Cirrus ATM networks to set technical guidelines for debit cards accepted at the point of sale. The proposed technical guidelines were published last year to wide acclaim from the banking industry.

MasterCard and Visa are currently seeking commitments from banks and regional ATM-POS networks to join Entree, which they hope to have up and running later this year. It remains to be seen whether they have smoothed over the old national-regional disagreements.

Entree sought a middle ground — Entree's logo that will be added to participating banks' ATM-debit cards, denoting their acceptance at merchants that display the same logo. There will be no single, national debit card per se — not even a single, national ATM card or service mark, which some critics complain will dilute the value of the chosen identity.

What do retailers have to say about all this? Some are cautiously optimistic, others lukewarm at best.

Most of the optimism is found in the petroleum industry, where companies such as Mobil Oil Corp., Exxon Corp., and Arco Petroleum Products Co. have installed electronic point-of-sale terminal systems. The more transactions that flow through these systems, the more cost-effective they are. So the major oil companies have struck deals to accept numerous credit and debit cards.

Some, such as Amoco Corp. and Shell Oil Co., are connecting their stations with J.C. Penney's electronic network, which allows the flexibility to accept any number of cards of different kinds if the outlets so choose.

Arco, which was so disenchanted with the costs of credit cards that it stopped accepting them after the second Arab oil embargo, has gone the debit route. In California and Nevada, more than 600 Arco stations welcome any of 18 million ATM-debit cards issued by financial institutions.

The most noteworthy supermarket debit system is Lucky Stores' E-Z Checkout in more than 300 California groceries. Lucky has spent a reported $9 million advertising its system, which accepts cards issued by the big California banks that own Interlink, a point-of-sale debit network also connected to Arco's system known as PayPoint.

Lucky has not disclosed its operating results, but officials say the system has increased sales volume and improved employee productivity.

The fast-food industry is now opening itself to debit cards, with Wendy's International Inc. outlets in Ohio and California and the Carl's Jr. chain in California taking the first steps.

Department store operators, perhaps showing scars of earlier card battles and reeling from erosion of their proprietary credit card balances, remain skeptical of debit cards. They do not like the pricing arrangements that bankers have presented them, and they resist adding PIN pads — the small keyboards where debit cardholders enter personal identification numbers — to service counters already crowded with POS hardware.

Michael Sweeney, director of corporate credit for Federated Department Stores in Cincinnati, told the recent Electronic Funds Transfer Association Expo that most Federated divisions — including Bloomingdale's, Burdine's, Filene's, and Rich's — have come around to accepting credit cards, but debit cards are a different story.

"The customer always gets what the customer wants," he said. "To date, we have not seen sufficient interest on the part of our department store customer

Continued from Page 18

to warrant, to any great extent, attention to the issue of debit card acceptance.

"We have too many other things on our minds these days, such as the interest-rate issue, the impact of third-party credit cards [bank cards and American Express cards] on our sales, and bad debts."

Mr. Sweeney also complained that in a recent presentation about Entree, "I heard nothing about any input from retailers, and particularly from department stores, in the process. I don't see that systems such as Entree are going to succeed very quickly without some input from the people who are going to have to work with those systems."

Despite the progress — and there has been a lot, much of it at the retail merchants' initiatives — the two industries remain divided for political and economic reasons. Until they coalesce, debits at the point of sale will not match the success of credit cards, something they must do to be truly cost-effective. ■

TECHNOLOGY REVIEW

Grocers Make it Easier To Buy Bread and Butter

Installation of EFT systems enhances customer services and store operations.

By Bill Atkinson

SUPERMARKETS

DON LEWIS WHEELED his grocery cart down the check-out lane at Lucky supermarket in San Jose, Calif.

Instead of paying for his two bags of groceries with cash or a check, Mr. Lewis slipped a plastic bank card through an electronic system called E-Z Checkout. The system debits customers' accounts and makes cash withdrawals.

"I think this is great," says the 46-year-old Mr. Lewis, referring to the system. "I never bring my checkbook and I use this [system] wherever it's available."

With electronic funds transfer (EFT) systems, grocery stores like Lucky are aiming to provide more services, such as automatic approval of checks, speedier check acceptance by grocers, and the ability for customers to buy food with special plastic debit cards.

Why all the fuss about the electronic systems? Grocery store chains are trying to capture more customers by offering improved convenience services, reduce the number of bounced checks, and boost employee productivity.

EFT service "is the wave of the future," says Bob Huck, vice president of retail operations at Fry's Food and Drug Stores, a retail chain based in El Sobrante, Calif. "In time every store will have this service. At some point, stores are going to have to have this or they won't be competitive."

Fry's Food plans to install an electronic system soon in its 25 stores. Mr. Huck would not be specific about the type of system the chain will use or when equipment installation will begin.

"Any time you can give your customer more service and better service, you have a competitive advantage," he says.

Customers Indicate Success

But the key to success with the electronic systems will be customer acceptance. "This is really uncharted waters," says Virginia Miller, treasurer of Vons Grocery Co., based in El Monte, Calif.

Vons installed a test system that approved checks electronically in five stores in July 1985. The company's goal was to establish a check cashing card that customers could use throughout the Vons chain.

"We were pleased with the results" of the test system, says Ms. Miller. It accomplished improvements in check-out time. "Customer acceptance has been favorable. We have seen continued growth in the percent of transactions that are processed electronically."

After having worked out the bugs in the system, the company is gearing up to expand the system to three more stores in Burbank, Calif. It then plans to equip all of its 180 stores with the system.

"We think the [electronic balance system] concept is really a good fit for the supermarket business," Ms. Miller says. "It allows a couple of things. I think there are still a lot of our customers who like to write checks on uncollected funds. This [system] gives them two days of float. Also, I think people perceive it as a new benefit for them to make check-out [transactions] faster."

She added that the electronic check-approval system speeds up the check-out line 10 seconds per customer.

Meanwhile, Lucky Stores Inc. of Dublin, Calif., and Safeway Stores Inc. in neighboring Oakland are not about to fall behind Vons.

Safeway launched a pilot study last January in two of its stores, installing a system that electronically debits a customer's bank account.

THERE IS STRENGTH IN OUR NUMBERS.

Each day a company writes its autobiography.
And ours tells a very powerful story.
A story of a company that places over
$1 billion in treaty reinsurance a year.
A company adding new offices
to serve its growing national accounts.
A company whose staff has grown fifteen-fold
since 1962.
How does a company write chapter
after chapter of successes in an industry
known for some heartbreaking tales?
At Sullivan Payne,
we do it by doggedly insisting
on the highest levels of service to our clients.
And equally high levels of respect
and trust to our people.
That's the story behind our story.
But it's certainly not the end of it.

Biggest Banks Hold Dominant Position in Use of Technology

→ **Continued from Page 1**

BankAmerica Corp.

Citicorp alone spent between 10% and 11% of the $8.2 billion that the entire banking industry spent on systems technology in 1985. McKinsey predicted that Citicorp's share will rise to 14%-15% of an industrywide technology budget that should exceed $17 billion in 1990.

McKinsey said that the technological gulf between big and small institutions has exacerbated the decline in small banks' profitability while leaving the bigger banks in a stronger position to compete.

"We believe that this deterioration in performance of [smaller] banks is due to the competitive weakness of the smaller banks relative to the large banks in a deregulated environment," McKinsey concluded.

McKinsey regarded technology, or lack of it, as a contributor to this deterioration, which occurred concurrently with weakness in the agriculture, petroleum, and some real estate loan markets. While this was happening, Citicorp and several other leading holding companies in effect took control of the technology market, leaving less resourceful competitors behind in the dust.

After many years in which the small banks' return on assets exceeded that of major money center and regional firms, the ROA of Salomon Brothers' 35-member "large bank universe" in 1985 equaled the .61% ROA of the nation's other 14,435 commercial banks.

Since 1979, the smaller banks' return on equity has trailed that of the Salomon group. In 1985 the big banks' ROE was 12%, almost half again as much as the rest of the industry's 8.5%.

"The divergence in economic performance between the large banks represented by the Salomon Brothers 35-bank universe and other banking institutions has been paralleled by a similar schism in effective investments in technology," the investment banking firm said. Its report was written by a team of banking analysts led by Thomas H. Hanley.

From 1981 to 1985, the 35 big banks spent $16.2 billion on computer hardware, applications development, telecommunications, and related support. The 35 outspent the more than 14,000 other banks by $2.1 billion.

Between 1986 and 1990, the big banks will spend an estimated $40 billion, Salomon said, 2.5 times their technology spending in the first half of the decade and almost double the $22.8 billion that the rest of the industry will spend in the same period.

The $8.2 billion spent by the entire industry in 1985 "represents more than 10% of total industry operating expenses of $80 billion and more than half of all estimated discretionary expenditures," Salomon Brothers said.

"Over the 1981-85 period, the 17.6% annual growth rate of systems expenses was significantly higher than the 10.5% growth rate of industrywide operating expenses," the firm added. "In our opinion, this differential in growth rates reflects a transfer of the work effort to automated systems from traditional manual processes. We expect this differential to remain constant, and to possibly even increase, over the next five years."

Concentration at the Top

As in its last small book on the subject — "Technology in Banking: A Path to Competitive Advantage," May 1985 — Salomon Brothers analyzed bank performance in a technological context.

McKinsey's data showed that technology spending is highly concentrated even within the group of 35 major institutions on Salomon's list. The 14 holding companies with at least $100 million in annual technology expenditures accounted for 51% of the entire industry's technology spending in 1985.

The analysts separated those top 14 into two groups: seven "superplayers" whose individual spending exceeds $200 million and who together accounted for 32% of total industry spending in 1985; and seven "big players" with 19% of the aggregate.

The first 13 institutions on the McKinsey-Salomon ranking were the nation's 13 biggest holding companies at the end of 1986. J.P. Morgan & Co., fourth when ranked by assets, fell into the lower tier of technology spenders, while First Interstate Bancorp, the ninth biggest in assets, earned "superplayer" status.

Norwest Corp., Minneapolis, despite its rank as the 24th largest holding company by assets, was 14th in technology spending.

Greater Performance Disparity

McKinsey characterized most of the big banks as "running well in a fast pack."

"Nevertheless, we also believe that the pattern of increasing disparity in performance shown over the past five years will continue," said the report, the principal author of which was McKinsey principal Thomas D. Steiner. "In other words, in a deregulated environment the winners will win by a greater and greater margin, and conversely the losers will fall increasingly far behind."

While it deemed banks' attention to technology essential, McKinsey urged technology managers to learn "the new rules of the road for competition in a deregulated, highly electronic environment."

The consultants warned against "overcapacity and overcompetition," which result when too many banks duplicate each other's investments in similar areas. It has already happened in international funds transfer systems, McKinsey said, affecting most money center banks.

"We believe that large banks generally, and the superplayers particularly, will need to develop new approaches to avoiding overcapacity," the report stated.

Seven companies — six of them not in the top 14 — won praise for using technology in specialized niches to increase their returns on equity. They are:

- State Street Boston Corp., which McKinsey said gets 40% of net income from services to mutual funds, credit card customers, and other data processing clients. These raised what would have been a 13% return on equity a full five percentage points, to 18.1%.
- The Bank of New York Co., whose mutual fund processing, government securities clearing, and institutional trust and custody services accounted for 30% of 1985 net income and raised ROE by about three percentage points to 14.6%.
- CoreStates Financial Corp., Philadelphia, whose Mac electronic banking network, payments clearing, and trust processing operations brought in 31% of net income and raised ROE three points to 13.4%.
- PNC Financial Corp., Pittsburgh, whose corporate cash management, corporate trust, and mortgage servicing business contributed 13% of net income and two points of a 17.3% ROE.
- First Chicago Corp., whose information products, payment systems, and remittance processing businesses produced 18% of net income, raising ROE by 150 basis points.
- First Wachovia Corp., Winston-Salem, N.C., whose student loan processing, mortgage servicing, and trust services added 7% to earnings and 1.4 points of a 19.6% ROE, highest of the 35 banks.
- Banc One Corp., Columbus, Ohio, whose check and credit card processing services added an estimated 8% to net income and one full point of a 17.3% ROE. ■

MEMORY BANK

Following are the answers to the Memory Bank Quiz on page 4.

1. Great American. (Great American Bancorp will sell its name to Great American First Savings Bank.) **May 26, page 6 : column 3.**

2. Mr. Magnani was denying parts of a story from Japan's Kyodo News Service, which reported last week that on a business trip to that nation on May 30, BankAmerica chief executive A.W. Clausen would solicit buyers for a portion of at least $1 billion in securities that BankAmerica plans to issue. **May 27, 1:4.**

3. Provident Bank of Maryland. **May 27, 20:1.**

4. Under the amendment, foreign bank operations that were grandfathered under the 1978 International Banking Act would not be permitted to expand during the bill's one-year moratorium period. **May 28, 1:2.**

5. Norwest Corp. **May 28, 2:1.**

6. Chase Manhattan Corp. **May 28, 3:1.**

7. Commercial and retail banking. **May 28, 3:2.**

8. Reuters. **May 28, 5:1.**

9. Canadian regulators do not include specific or general loss provisions in capital. **May 29, 2:3.**

10. The suspect wrote his holdup note on the back of a card from his parole officer. The card had the officer's name on it, along with the date and time of their next appointment. **May 29, 25:1.** ■

Chemical Challenges Florida Law On Nonbank-Bank Acquisitions

By BARBARA A. REHM
Washington Bureau

WASHINGTON — With a Federal Reserve Board victory in hand, Chemical New York Corp. charged in a federal court on Monday that Florida's 1984 law banning acquisitions of limited-service banks by bank holding companies is unconstitutional.

The Fed on Friday voted unanimously to permit a Chemical subsidiary, Chemical Trust Company of Florida NA, Palm Beach, to become a limited-service bank and thereby accept deposits and make consumer loans. Chemical Trust will not be allowed to make commercial loans, which means it will not be a "bank," according to the Fed.

Since 1982, Chemical Trust has operated as a federally chartered trust company, offering investment advice, as well as fiduciary, custody, and agency services.

Chemical's new limited-service facility is an expansion of an existing subsidiary, not a new entity. In October 1986, an appeals court in Atlanta ruled that the Fed was authorized to allow New York's U.S. Trust Corp. to expand the powers of its Florida trust company. The Fed's decision does not violate a February 1985 court order prohibiting the Office of the Comptroller of the Currency from chartering any new nonbank banks.

In its approval, the Fed devoted 15

Dollar Dry Dock's Financial Centers Are NY's First 'Branches of the Future'

By JEFFREY KUTLER

NEW YORK — Neither Citibank nor Chemical Bank nor any of the other big commercial banks will be the first in New York to convert all of its retail branches into futuristic financial service centers.

That distinction will go to the Dollar Dry Dock Savings Bank, the eighth largest thrift institution in New York State.

By the end of this year, all 23 Dollar Dry Dock offices will breathe life into the artists' renderings that many bankers have been using to project the "branch of the future."

Next week, Dollar Dry Dock heralds its financial center strategy with a grand opening celebration at one of its largest midtown branches, coinciding with a television advertising blitz that is rare for this bank.

As in the artists' drawings that have circulated widely in the bank marketing community, Dollar Dry Dock offers everything from stocks to airline tickets in a setting that more resembles a department store than a typical bank branch.

"We have created a true retail environment. We wanted it to be as inviting to a customer as if he or she were coming in to browse for shoes or a shirt," explained Bruce C. Long, a Dollar Dry Dock executive vice president.

To make the financial center pleasing to the eye, the bank retained Turner Associates as design consultant. It is the architectural firm used by Bloomingdale's, whose flagship department store sits across Lexington Avenue from the headquarters of the old Dry Dock Savings Bank.

The bank, reconstituted since the

Merger Will Create Largest Software Firm

Computer Associates to Acquire Uccel with Stock

By DAVID O. TYSON

SAN FRANCISCO — Computer Associates International Inc. and Uccel Corp. announced on Monday that they plan a merger to form the biggest independent vendor of software.

In their latest fiscal years, the two companies had combined revenues of $450 million. Computer Associates proposes using about $800 million in stock to acquire Uccel, a major seller of systems software and bank applications packages.

The merger plan was disclosed at a press conference in New York, not at the national operations and automation conference here. But when word spread, it was Topic A among those attending the annual gathering sponsored by the American Bankers Association.

Investors enthusiastically greeted the announcement. In late afternoon trading, Uccel stock changed hands at $43.50 on the New York Stock Exchange, up $11.50 from its closing price on Friday.

Computer Associates, based in Garden City, N.Y., is a major international vendor of systems software for IBM mainframes, primarily the DOS operating system. It also sells applications software and microcomputer software, but none for banks.

The Dallas-based Uccel, in addition to its prominent position in the market for bank applications software, is a major vendor of systems software for IBM mainframes. Its systems division deals mostly with the OS operating system, although an acquisition has put it into DOS systems as well.

DOS is an operating system for

Vendors Enter Combat

Marketers of software and remote data-processing services are battling each other for banks' business.

By David O. Tyson

IT MAY NOT be as unsavory as free-for-all mud wrestling, but a battle royal is under way in the arena of banking applications software.

The combatants are mostly the vendors of the software. But joining in also are the vendors that use their own computers to do the job for the banks by remote processing, relieving the institutions of the expense and bother of acquiring and running their own systems.

MTech, the biggest remote processor of all, vows to win back banks that have shifted to in-house processing. Darwin Deason, MTech chairman, predicts only 50 banks will end up doing it themselves.

That view is held by a minority, maybe even a minority of one. The trend is away from third-party processing toward in-house processing. And the in-bank market is what software vendors are fighting over.

Hogan Systems Inc. and Software Alliance Corp., ranked first and second as vendors of primary applications systems to the largest banks, are breaking out of their niche and expanding into the community bank market.

Meantime, the newly consolidated Kirchman Corp., whose affiliates had gained a significant share in the small and medium-size bank market, now claims that it is the only vendor with systems for any size bank.

So no one is safe from competition.

This special section of *American Banker* takes a look at the antagonists. The starting point is the survey of bank equipment and software conducted annually by TransData Corp., American Banker•Bond Buyer Inc.'s market research subsidiary in Salisbury, Md. It shows who held what share of the market last year.

In the TransData tally for year-end 1985 — the latest available — NCR Corp. was far and away the leader in demand deposit account systems. Since this is the most basic bank applications software, it is useful as a market share proxy.

According to TransData, NCR systems are used in 23% of the banks that

Continued on Next Page

David O. Tyson is an American Banker associate editor.

Banks May Do More In-House Processing

A comprehensive survey of the market for banking applications software shows NCR Corp. is the leader by far in sheer numbers of clients.

Though banks are considered pioneers in automation, the TransData Corp. survey also reveals that little more than a third of them use their own computers to run such basic banking functions as checking accounts and consumer installment loans. In-

Continued on Page 18

> ***"The trend is away from third-party processing toward in-house processing."***

Continued from Previous Page

do their checking account processing in-house. Its clients are bunched at the low end of the market.

Tables summarizing the TransData survey of demand deposit account and installment/consumer loan software appear on pages 18 and 19. Accompanying articles discuss the results (page 11) and explain the methodology (page 19). A related table with article shows the overall market for mainframe host computers among banks and thrifts (page 17).

Software Agreements

Unlike NCR Corp. and Unisys, International Business Machines Corp. (IBM) sells no banking applications software of its own. Until last year, it sold scarcely any such software at all, leaving the market entirely to the legions of third-party vendors. But a widely accepted precept is that software sells hardware. Recognizing this, IBM has entered into two key marketing agreements with developers of banking applications systems.

In May 1986, IBM struck its famed deal with Hogan, in effect making a partner of that Dallas firm. IBM now markets all Hogan software in North America, so it has plunged into the market for applications systems at the big banks, Hogan's niche. And on March 1 this year, IBM and Kirchman signed an agreement to jointly market systems to community banks.

Bradley Stertz discusses what this means to Kirchman, in an article on page 16. The 19-year-old Orlando, Fla., company is owned 100% by its founder, Kenneth P. Kirchman, whose Dimension line of software is designed for different size banks, from smallest to largest.

Mr. Kirchman expects Dimension 5000, a package still in development, to solve the problem of meshing incompatible systems when banks merge. It will act as a computer bridge so a big bank's systems can communicate with any small bank's Dimension systems.

Though NCR has more mainframes installed in more depository institutions than any other manufacturer, it has been losing market share, mostly to IBM. Why? It had no software for big banks. So when big banks have acquired little banks using NCR, they both have ended up on the big banks' IBM systems, as John Byczkowski reports in an article on page 20.

NCR is coming out with its answer to that problem, breaking out of its small-bank niche to introduce an integrated package called Universal Financial System, or UFS. It is in beta test at seven sites and slated for delivery in September or October. Not surprisingly, in view of the experience of Anacomp Corp., Hogan, and Uccel Corp., NCR has run into delays in bringing the integrated system to market. The target is medium-size banks, with $250 million or more in deposits.

UFS has a feature that enables bankers instead of programmers to write programs. Using what NCR calls Element Structured Programming, a marketing manager and systems analyst can sit at the keyboard of a personal computer and create a new deposit or loan product by selecting blocks of code already in the machine.

Such capabilities in this and other fourth-generation software systems are expected to spur the move toward in-bank processing. They do away with much of the expense of maintaining a staff of professionals to rewrite and modify software as the market demands new products and regulators demand new procedures.

Introducing New Software

One software vendor using fourth-generation languages to shorten the development cycle is Unisys, formed last year in the merger of Burroughs Corp. and Sperry Corp.

As Marc Meltzer reports in the article on page 14, Unisys was to take the occasion of the American Bankers Association's National Operations and Automation Conference in San Francisco to introduce international banking software packages developed completely from fourth-generation languages.

Unisys sees spending for financial software growing by 20% to 25% annually, much of it coming from institutions updating their old software. And it believes the central information file, or customer information file, will be most in demand as the pivot for integrated systems.

A number of software vendors also are in the service bureau business, doing the data processing for banks either on-line or in batch mode, either by themselves or through affiliates. One of these is Systematics Inc. of Little Rock, Ark., which the TransData results show to be a major factor in the medium-size bank and thrift applications software market.

Others are M&I Data Services, Milwaukee; Datalink Systems Inc., a Mellon Bank affiliate; and NCR. But the biggest is MTech, a subsidiary of MCorp, the Dallas bank holding company.

MTech last year realized about 20% of its $200 million revenues from software. But as David LaGesse reports in the article on page 13, it now will emphasize the software that enables its data processing customers to interface with its own computers.

In-house processing will fade, in the MTech view of things to come. Mr. Deason says that by 1990, no bank with less than $10 billion in assets will depend on its own computer.

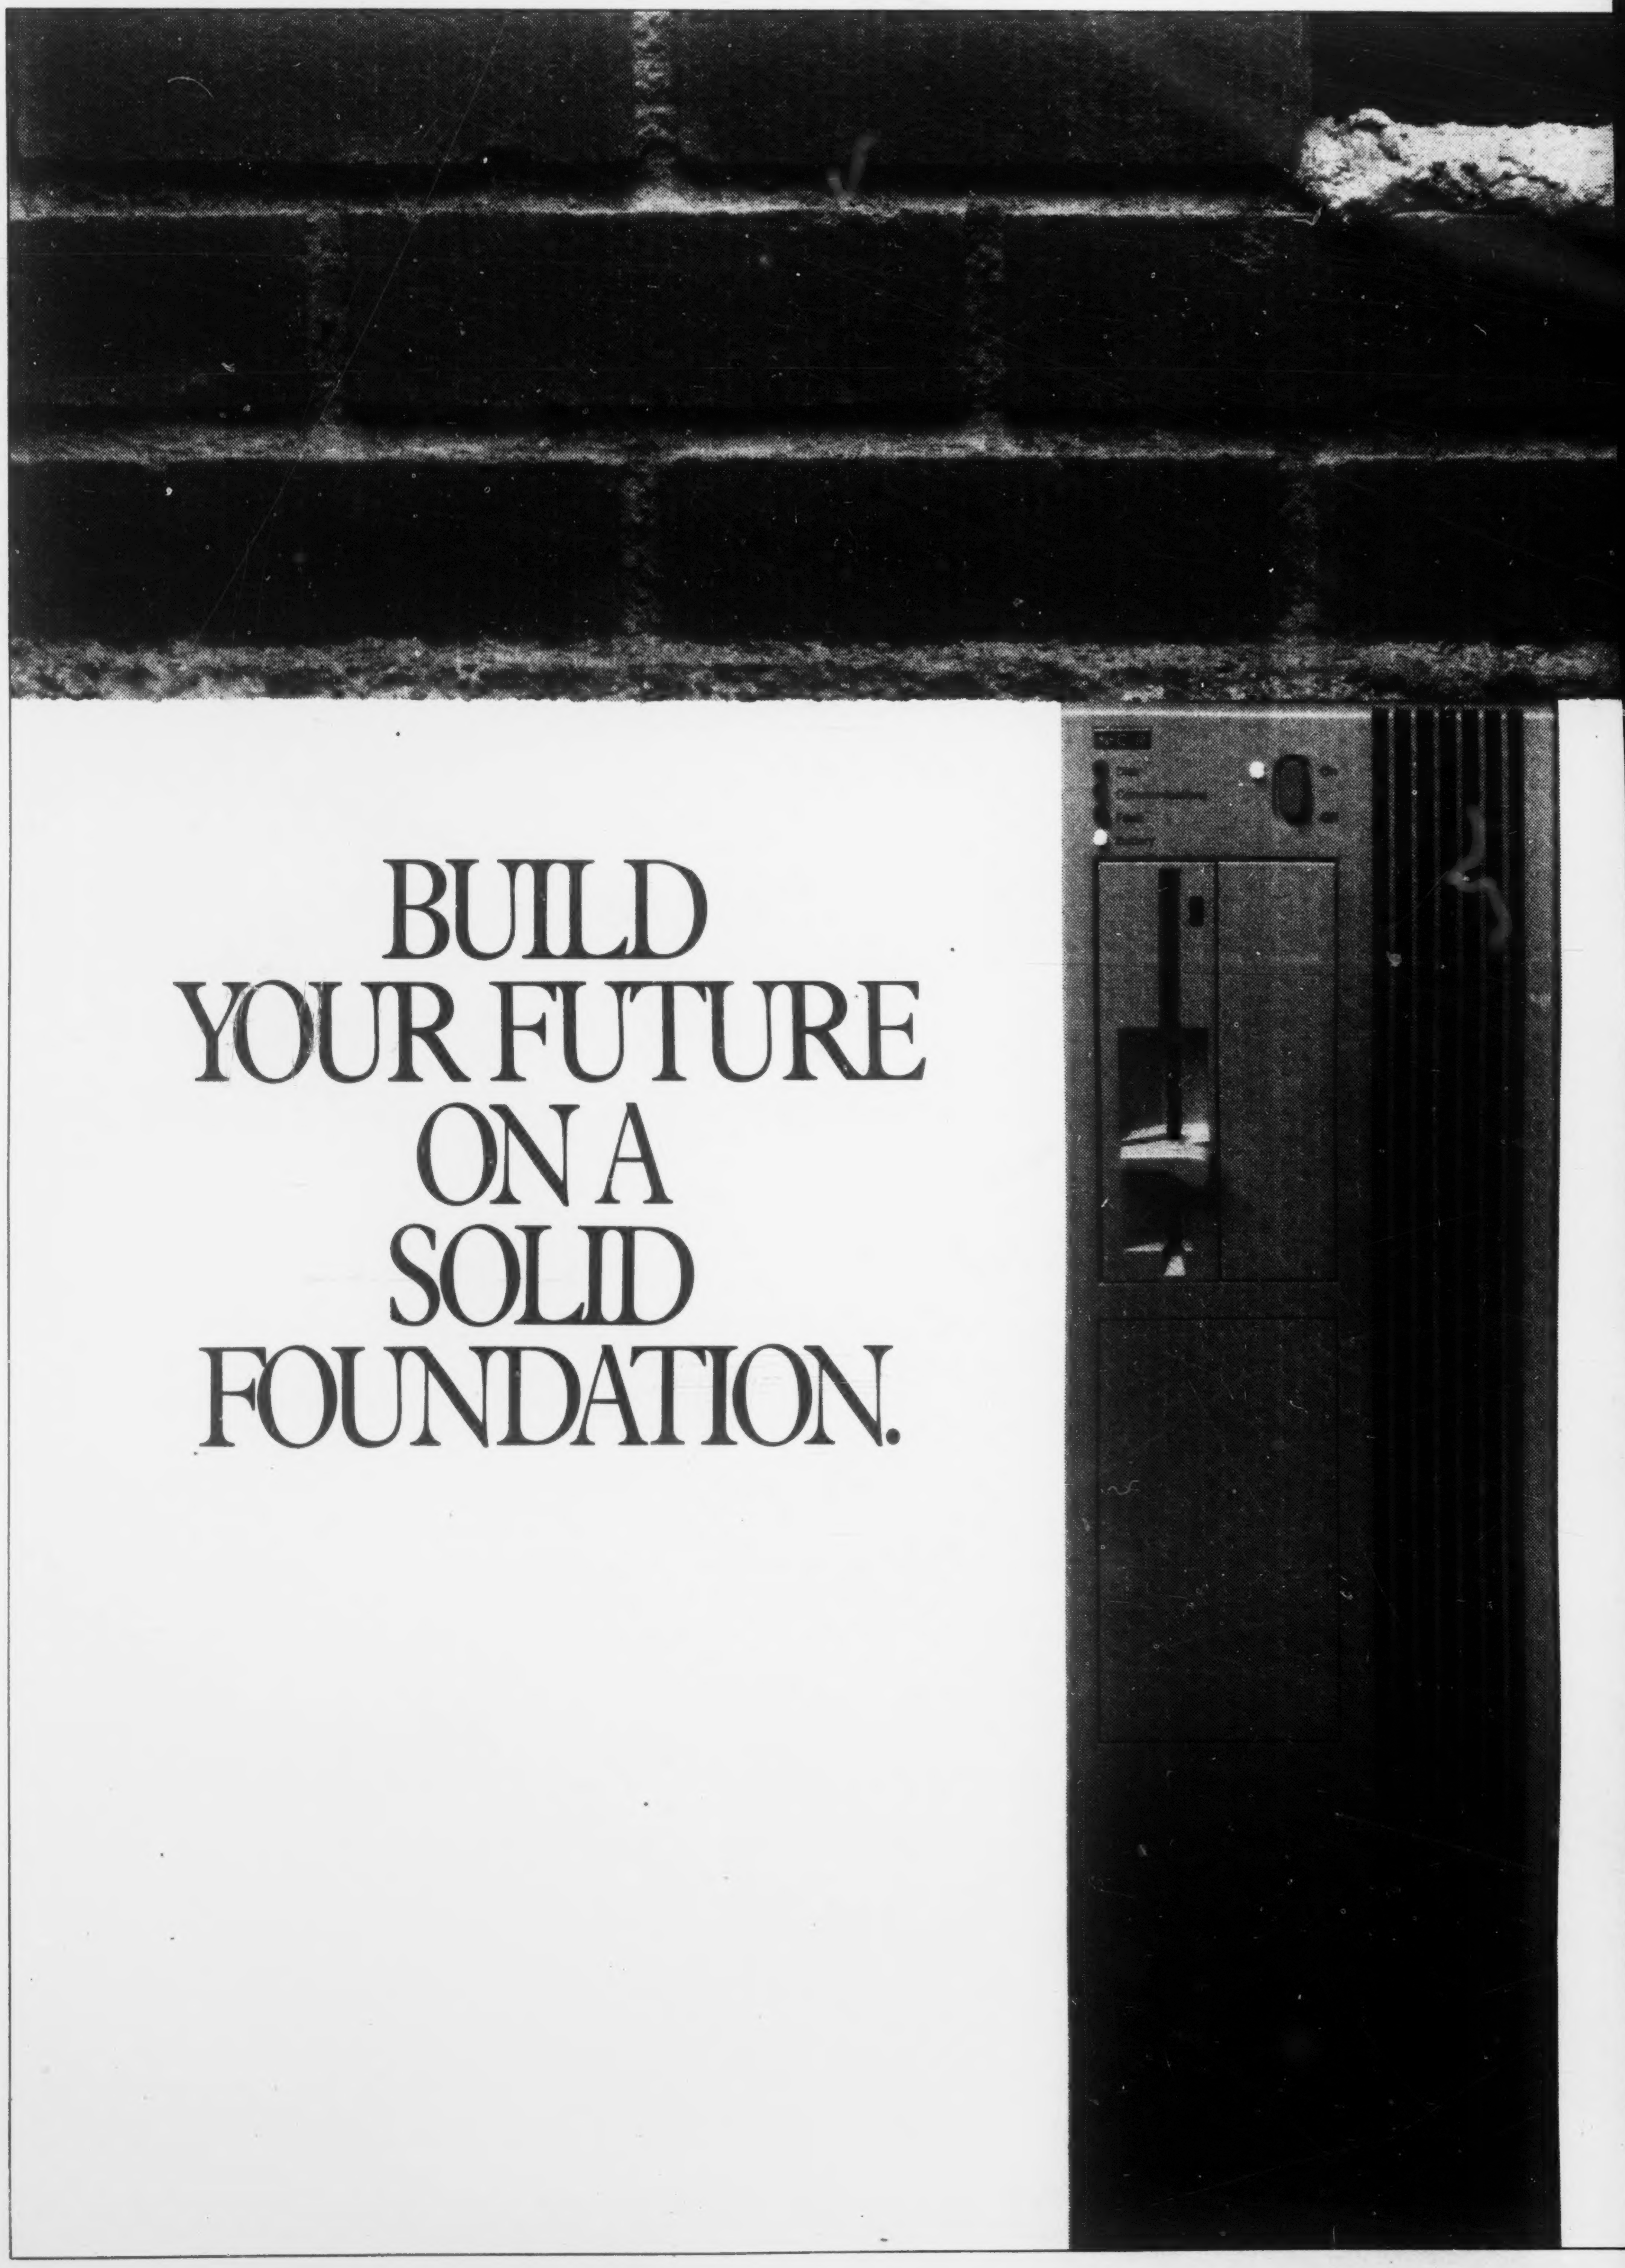
MTech is one of a number of software vendors that trace their origins to the programming departments of banks. Their founders had written the applications software for their institutions and, when it worked well, they figured "Hey, why don't we sell this to others and make some money?"

Yvette D. Kantrow profiles four of these bank-affiliated vendors, starting on page 22. They claim to have a better appreciation of bankers' needs because, after all, they were bankers themselves at one time.

Mellon Bank is the maverick of the group. It is about to offer integrated software developed outside its own shop, by Data-Link Systems of South Bend, Ind., which it acquired in February 1986.

Furthermore, Mellon does not subscribe to the MTech view that most banks will rely on service bureaus eventually. Its strategy is to convert its service bureau clients to software licensees.

Maybe the two could strike a deal: Mellon takes over MTech's software licensees, MTech takes over Mellon's remote processing clientele. ■



TECHNOLOGY REVIEW

The Heart of Processing?

Though many disagree, a vendor of remote data processing says banks will abandon in-house processing.

By David LaGesse

THE COMPUTER ROOM of MTech's new building outside Dallas features walls with windows to allow visitors a look at the Buck Rogers-like equipment inside. The view is one that may impress customers with what MTech officials are convinced is the future heart of financial data processing.

Armed with its impressive hardware and a wide array of software, the company bases its strategy on the view that more banks will abandon in-house computers for the service of a third-party processor to address their basic needs. MTech already is the largest vendor of data processing services for banks.

Software markets will largely fragment, and the widest opportunity is in specialized applications — pieces of the bigger pie, according to the MTech scenario.

The company, which earned about 25% of its $200 million in 1986 income from software, will concentrate on programs that control electronic funds transfers and manage credit cards and credit unions. It also will focus on such new specialties as electronic distribution of food-stamp benefits.

"We think it has paid off not trying to be all things to all people," says Charles M. Young, president of the corporate services group at MTech, which includes its software products.

The market instead will shrink for all-purpose programs that serve banks, predicts Darwin Deason, MTech's chairman.

"Maybe only 50 banks in the country will end up with their own computers that run a fully integrated system," says Mr. Deason.

In this view, Mr. Deason and MTech fly in the face of the widely held belief that a trend is under way for service bureau customers to bring their data processing in-house.

Flush with cash from a stock offering in December, his company is staked to widen its swath through the world of computers in financial institutions. Combined with a $103 million debenture offering in March, the capital gives MTech a formidable war chest that will continue its 30% annual growth — with about half to continue coming from buyouts.

Most of the acquisitions will come in data processing, or the support services that bring recurring income, such as the purchase in May of a microfilm company, says Mr. Deason.

"We're concentrating on the long-term contracted types of services," he says.

Running Software with a Smile

MTech

To encourage use of its processing centers, MTech has gone so far as running any major banking software on its IBM computers, with a smile.

Only in the last year and a half has the communications technology been available to allow banks to decentralize their data facilities, says Mr. Deason. Satellites have provided for timely transmissions from remote sites.

Banks with assets of $500 million to $2 billion will largely convert to the MTech type of service within the next couple of years, he says. (Of the 312 banks in that size group at the end of 1985, a TransData Corp. survey shows 146 used vendor software, 84 used in-house software, 40 did their processing through holding company affiliates, and 26 used third-party processors, such as MTech. The remaining 16 did not respond.)

The urgency will vary because of a bank's location, says Robert A. Heckman, MTech executive vice president. The farther a bank is from a large, perhaps money center competitor, the more likely it will feel it can compete locally with data processing facilities, he says.

Recent surveys indicate that the trend of banks taking their basic computer needs in-house in recent years "is substantially slowing now," says Mr. Heckman.

By 1990, Mr. Deason predicts, no bank with less than $10 billion in assets will depend on its own computer.

Third-party processors, then, "I think are the key to survival for midsize banks," he says.

MTech has de-emphasized its own bank integrated applications software. MTech will enhance its own system designed for a bank's basic needs — its Bank Management Information System. "But we won't be enhancing it to sell it as a software product as such," says Mr. Young.

About 600 banks now use the MTech integrated software that interfaces with the firm's data processing service.

The bulk of its specialized software customers come in the funds-transfer area, which complements the MPact network of automated teller machines that MTech also operates. MTech's wire transfer systems have attracted a number of the nation's largest banks, and the company acquired its specialty in serving credit unions through an acquisition in 1986.

Acquisitions come more easily in a decentralized view of data processing, says Mr. Deason. They fit more easily into his description of MTech as a "holding company" for a variety of data services, each a product in its own right.

Interplay between the business lines at MTech becomes less important. The economies of scale will come in common hardware and support.

"Every key manager is still here from 16 acquisitions so far," he says.

David LaGesse is American Banker's bureau chief in Dallas.

Two solid foundations, actually.
The Financial Tower Branch Automation System. And NCR.
The Financial Tower™ System is the first branch automation system designed to protect your institution against obsolescence.
We call it an open platform because it's built around open, industry-standard architecture, so it will accept a wide range of peripherals, software, and expansion options.
From a wide range of suppliers.
You can reconfigure your system to meet your changing requirements. Expand hardware and software without waiting for your vendor to get around to offering upgrades. And avoid dependence on any one automation supplier.
Now and in the future.
Avoiding dependence doesn't mean you shouldn't look for a vendor you can count on, though.
Which is why you should consider NCR carefully.
You can count on us to understand your needs and to respond with well-thought-out solutions. After all, we're no strangers to the financial marketplace.
We're the world's largest supplier of both ATMs and proof machines, and a major supplier of teller terminals as well.
Now we're determined to be the dominant supplier in the branch automation market, by offering the best product at a competitive price.
But simply providing a superior product is not enough. We're also committed to first quality support and service. And we have the people to back it up. Over 10,000 customer support personnel dedicated to customer satisfaction.
These commitments come from a successful and stable company. That means we're a partner your organization can rely on for years to come.
For complete information on the Financial Tower System, phone 1-800-CALL NCR for the name and number of the NCR representative nearest you.
It could be the foundation of a profitable new relationship for both of us.

Addressing the Needs Of Financial Services

Unisys plans to aggressively market software that answers the diverse requirements of financial concerns.

By Marc Meltzer

EVERY BANKER who wants to compete with a brokerage firm, an insurance company, or a travel agency, or wants his bank to merge with another, becomes a target for Mark Roberson.

For Mr. Roberson, vice president of the Detroit-based financial systems division of Unisys Corp., change cannot come quickly enough.

"Bankers today may not be doing the same kind of things next year and the year after," he said. "They may be offering insurance, offering brokerage services, offering travelers services.

"They will need a computer system with the architecture that lets them grow the product, enhances the product quickly, and is responsive to the requirements of the market, and that enables them to do this without great expense. They're looking for systems that are flexible, easily modifiable, and can accommodate to the changing environment in which they operate.

"And it is also important that the software and the system they buy be able to coexist with systems from other companies and other banks. As they get into a network with merger and acquisition activity, it is important to tie systems together of different institutions, without converting to new systems."

Mr. Roberson sees Unisys playing an important role helping banks that are changing rapidly to change successfully.

Unisys was formed last year from the merger of Burroughs Corp. and Sperry Corp. Besides commercial banks, the company is addressing change in the savings and loan, savings bank, and mortgage banking industries. But analysts are unsure about the role Unisys will play in financial services.

"It's never been terribly clear to me what the Burroughs software product really is," said Cato D. Carpenter, computer services analyst at Alex. Brown & Sons, Baltimore. "Since vendors are selling all the IBM software, it's of little consequence what Burroughs is up to."

Noting that IBM mainframes dominate the financial services industry, Mr. Carpenter declared: "No IBM mainframe user would convert to Burroughs. So they [IBM end-users] don't really care what Burroughs is doing. So much software runs on IBM [systems] that Burroughs customers are converting to IBM" products.

Mr. Carpenter said Unisys likely will press on with a defensive strategy and continue to be successful selling software to its existing base of hardware users.

About one-third of the former Burroughs business was in the financial services industry, and Sperry served big banks overseas, said Michael Geran, a computer analyst at E.F. Hutton & Co. Inc.

"Historically, Burroughs has had good operating systems and very efficient software, but they've been a little bit of a laggard versus independent third parties in software applications," he said.

Mr. Geran said the company is "devoting more resources, trying to expand the product software it works on, working more aggressively with third parties."

Old Software, New Opportunity

Unisys stresses the financial services business largely because it believes many institutions are candidates for updating their computer software.

"These are areas that have older software application packages that are looking for updated solutions," said Mr. Roberson.

"The spending rate by these institutions for new software is high. They're looking for solutions and looking for packages now as opposed to doing inhouse developments.

"We see the growth rate of expenditures for financial software running at 20% to 25% annually, a very attractive rate for many ventures," he said.

UNISYS

The cost of developing software and maintaining it is escalating, largely because of the age of many users' systems. "The talent to maintain the old software is getting scarce as new packages have become available," Mr. Roberson said.

Many banks developed existing software internally, but Mr. Roberson said the trend is away from that because of the cost of developing and maintaining it. Also, because of rapid change, banks are finding that software can have a short product life.

The industry's greatest demand, he said, is for central information file systems, sometimes called customer information files. The software provides a data base on customers to enhance cross-selling and account profitability analysis.

Many older software packages were not integrated so they could not offer effective central filing. Some of the packages go back 20 years, although they have been updated over time.

"That is why it is important to have a central information file," Mr. Roberson said. "You can pull [information about] an entire relationship a custom-

ACI® has paved the way to total systems integration.

MERGING ELECTRONIC DELIVERY SYSTEMS

Financial institutions worldwide have grown to depend on ACI as the recognized leader in transaction processing. Now we're ready to take that leadership role even further by providing the total systems integration solutions today's business environment demands. ACI is ready to provide the hardware, software, communications and people required to implement systems integration projects regardless of size.

Our Electronic Delivery Systems solutions can help you address a number of the potential roadblocks ahead:

- making complex hardware/software/communications decisions
- integrating existing systems with new applications
- planning for and responding to the effects of acquisition and merger opportunities
- developing a strategy to take advantage of constantly changing technology

No other company is better qualified to guide you on this important path. Our BASE24® software is an industry standard and runs on all major fault-tolerant, front-end computers.

Today over 50% of all EFT transactions worldwide use ACI software. Eight of the fifteen largest U.S. financial institutions are ACI clients, and our expertise goes well beyond national borders. Forty percent of ACI's customer base is international. We're addressing foreign business requirements and leading the development of multiple national POS networks.

And now ACI is part of U S WEST, a company with an unequalled reputation in communications expertise.

Call ACI at (402) 390-7789 to learn more about our total systems solutions that also include facilities management, custom design, capacity planning, project management and disaster recovery. Together we've come a long way. Now we're ready to make the road ahead even smoother.

ACI®

er has with a bank. If a customer service representative sees that you have a checking account, a loan, and a credit card, she might suggest you open a savings account or a Christmas Club."

$40 Million Plus from Licensing

Newer packages also have been created by the company for demand deposit accounting, savings accounting, time deposit accounting, mortgage loans, installment loans, commercial loans, general ledger, trusts, check processing, and wholesale banking.

Like NCR Corp. but unlike IBM, Unisys writes applications software for its hardware. Other software products come from third-party developers, and Unisys sells those products through marketing arrangements.

Newer software addresses needs for branch automation and networking. It ties together tellers, the new account desk, loan desk, and bookkeeping department, linking them into a centralized system.

Software that provides departmental solutions also is being sold to assist in specialized operations in the bank, such as insurance, trust, and brokerage.

Mr. Carpenter said Unisys likely will grow at an acceptable rate simply because the market for software is so good. "But it's bleak in terms of gaining market share," he said.

The TransData Corp. hardware and software survey for 1985 shows Burroughs had its mainframes in 22% of the banks and thrifts that do their data processing in-house, and about 8% use Burroughs' software for two of the most basic applications — checking accounts and consumer installment loans.

The Unisys financial systems division sells software, hardware, and installation and support services through the 1,500 sales and sales-support personnel throughout the world. They come from inside the company, from banks, and from consulting firms.

Customers do not actually buy the software. The company licenses it, with an option to obtain support services.

About $40 million to $50 million in revenues will come this year from software licensing, including professional services and consulting. Mr. Roberson said he could not provide a breakdown for international operations.

"One of the challenges we face is the stream of products, the diverse requirements of the financial services industry," he said. "Certainly, the cost of developing these is a challenge. To combat that, we're utilizing fourth-generation languages to shorten the development cycle."

Such fourth-generation-language packages are software for writing software. They enable end-users to do the programming themselves, without depending on professional programmers.

Part of the expense, Mr. Roberson said, is development time. The longer the time, the more risk the producer takes that the software, when it does appear in the marketplace, will be out-of-date.

A Neglect of Marketing

Mr. Roberson said there is "no clear leader today in applications software. There are a lot of people with a little piece of the market for software. That is why an opportunity for a leadership position can be claimed."

However, he noted that a number of third parties represent formidable competition, such as Hogan Systems Inc., which has an agreement to provide software for IBM to sell.

Unisys has entered into a number of such joint-marketing agreements. For thrift industry software, it has deals with Information Technology Inc. of Lincoln, Neb., for Infotech software; and with Modular Information Systems Inc. of Orlando, Fla., for Miser software. For commercial bank software, it has an agreement with McDonnell-Douglas Banking Systems Inc. of Birmingham, Ala., for PBS and Premier software. And for credit union software, it has an agreement with Electronic Processors Ltd., also of Birmingham, for Vision software.

"We believe we're going after niche markets with key products," Mr. Roberson said. "We believe the big guys won't massively convert, but there are a lot of opportunities to supplement and augment our growth."

For example, at the American Bankers Association National Operations and Automation Conference in San Francisco, the company was to introduce software packages for international banking developed completely from fourth-generation languages.

Mr. Roberson said Unisys, and its predecessor company, Burroughs, failed to adequately inform the financial services industry about its products.

"Not enough people recognize that we're not only a major computer supplier but also a supplier of software solutions," he said. "So we're trying very hard to correct that mistake."

The company is advertising its products more and seeking industry marketing awards that it overlooked previously.

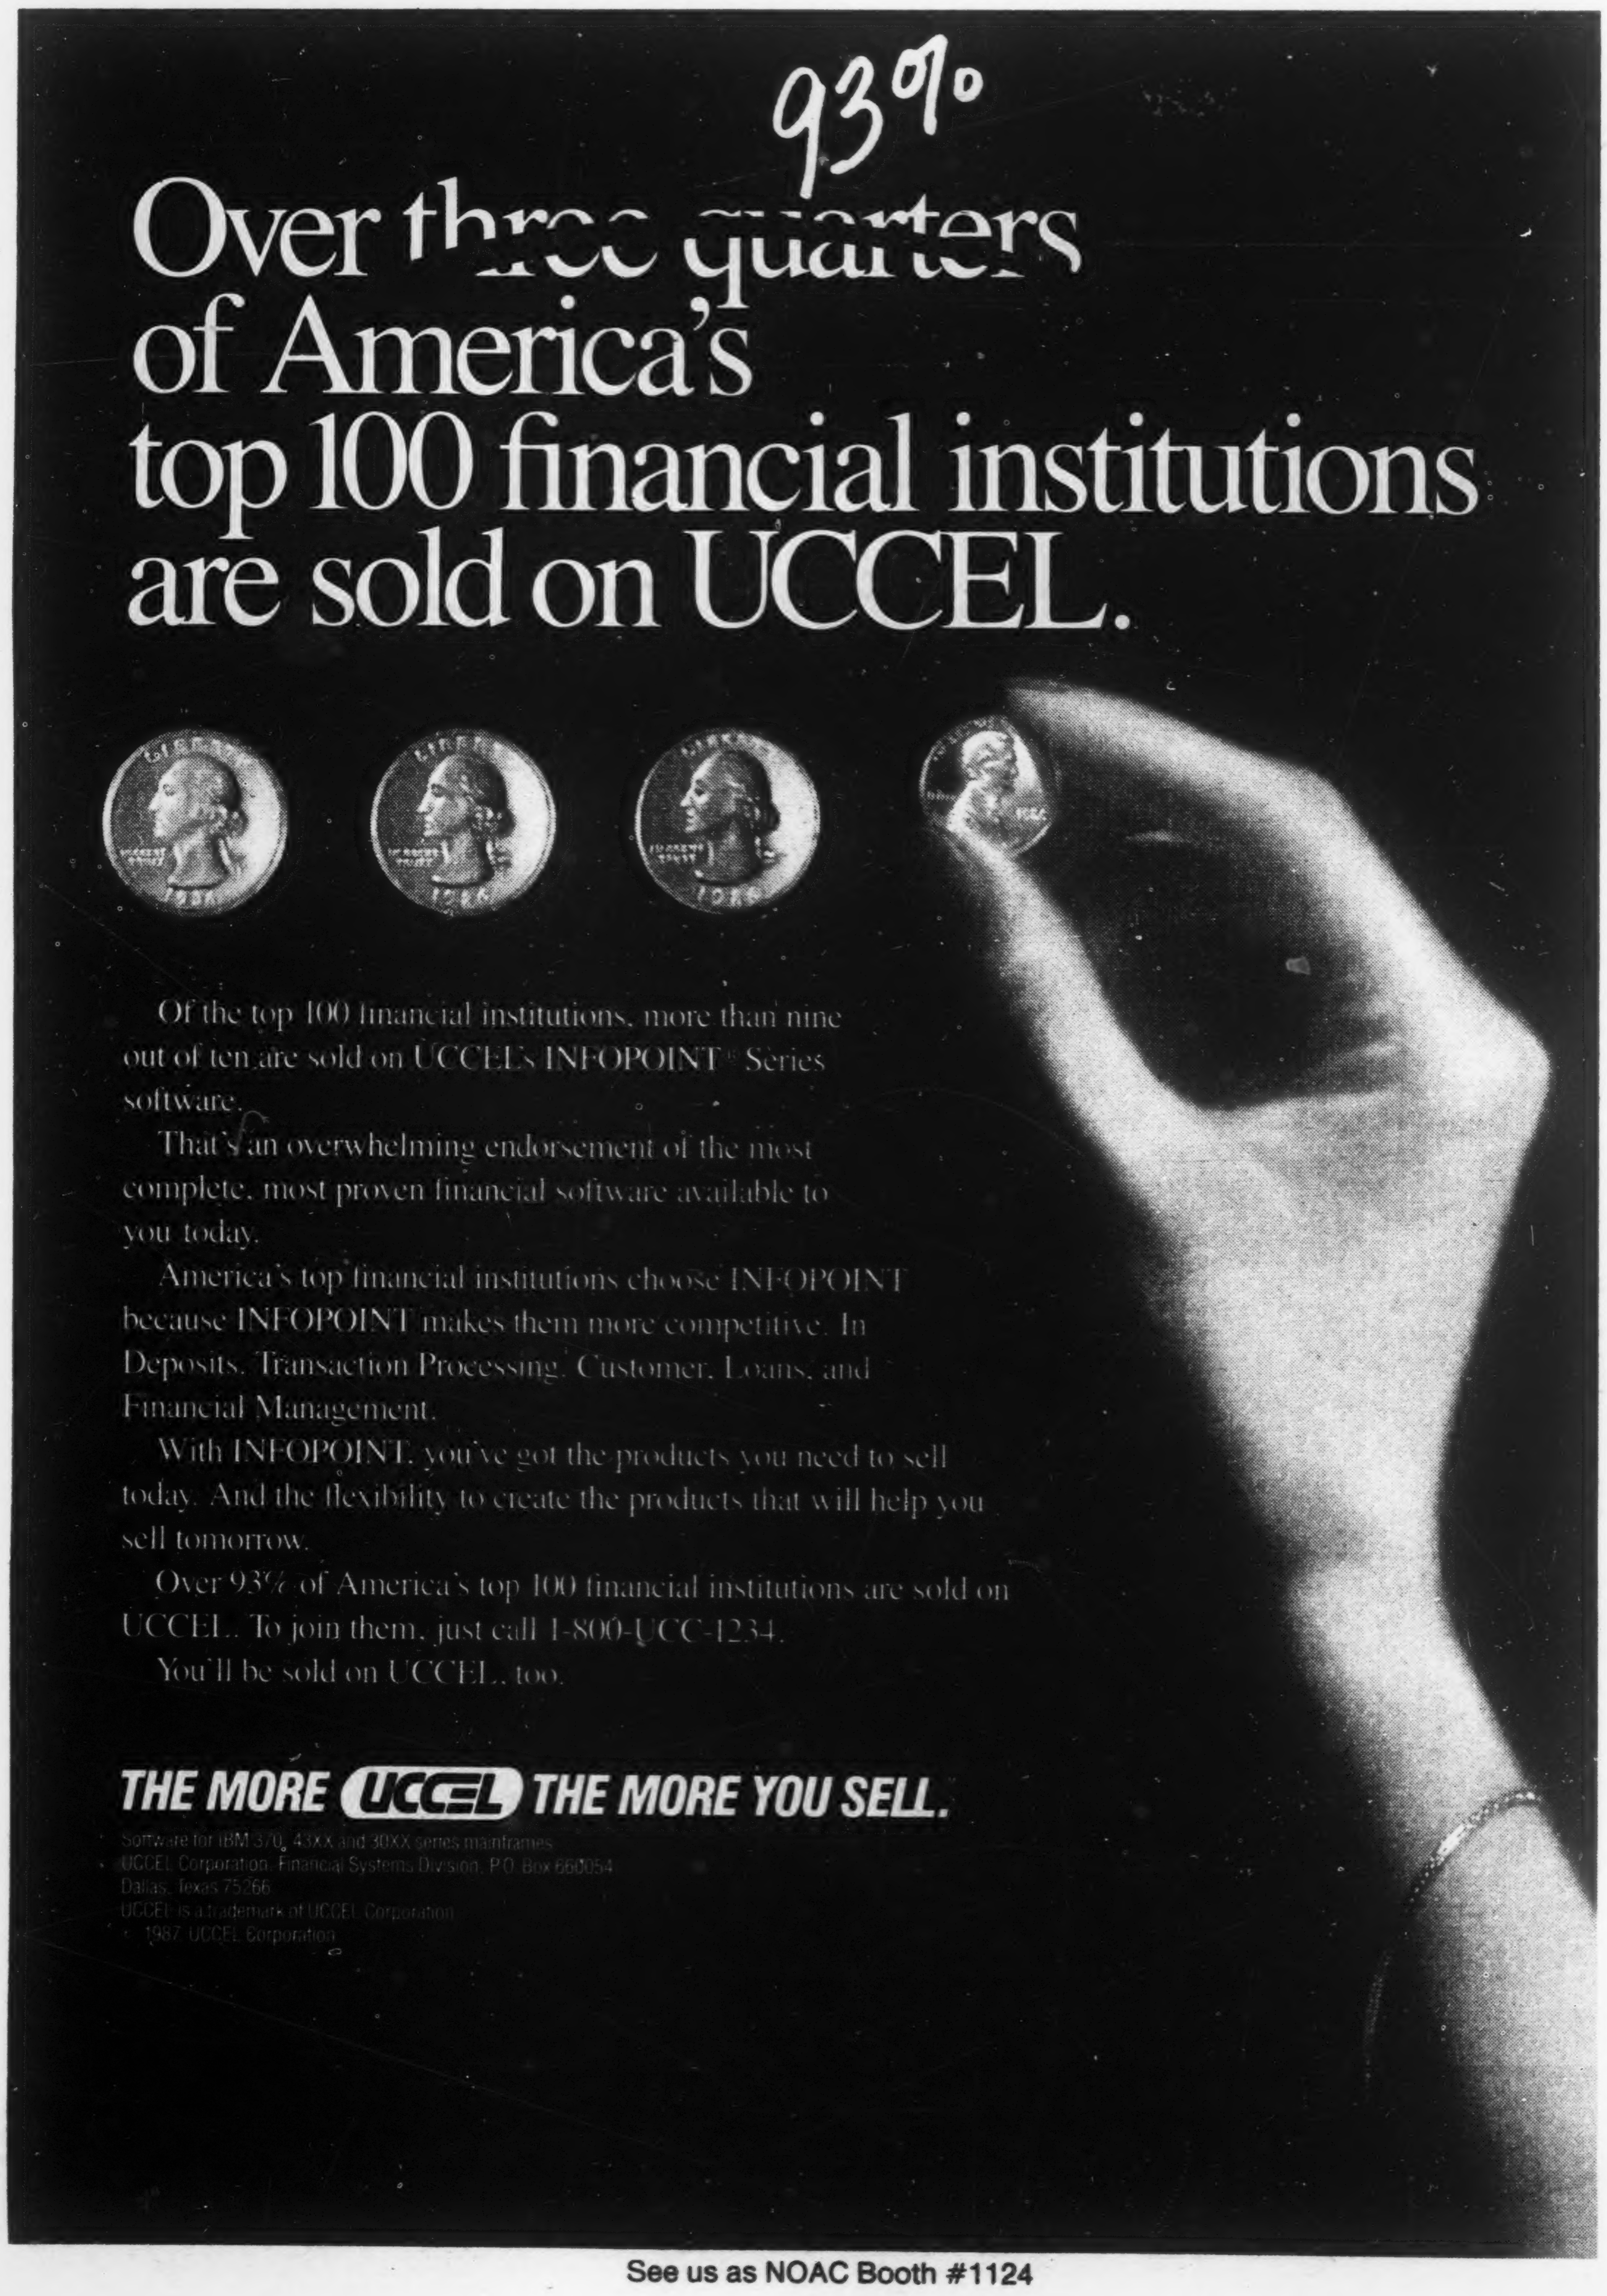
For example, the company was cited by International Computer Programs Inc. for more than $1 million in sales of its Global Financial System and more than $10 million in sales of its Item Processing System software.

But Mr. Carpenter said the company also should learn other lessons.

"The company that spent more time on marketing and sales than on being technically superb was the one that came out ahead," he said. "I imagine IBM always had the edge on sales and marketing over its rivals.

"The customers don't understand what is in the box. The sales guys make the difference. That is true in many ways in the software business, too.

"Some of the more successful software companies didn't necessarily build the best product, but had the best salesmen." ■



93%

Over three quarters of America's top 100 financial institutions are sold on UCCEL.

Of the top 100 financial institutions, more than nine out of ten are sold on UCCEL's INFOPOINT® Series software.

That's an overwhelming endorsement of the most complete, most proven financial software available to you today.

America's top financial institutions choose INFOPOINT because INFOPOINT makes them more competitive. In Deposits, Transaction Processing, Customer, Loans, and Financial Management.

With INFOPOINT, you've got the products you need to sell today. And the flexibility to create the products that will help you sell tomorrow.

Over 93% of America's top 100 financial institutions are sold on UCCEL. To join them, just call 1-800-UCC-1234.

You'll be sold on UCCEL, too.

THE MORE UCCEL THE MORE YOU SELL.

A House Divided By Itself Undergoes Unification

One of the largest bank software companies has consolidated its divisions to improve overall business.

By Bradley Stertz

WHEN GLENS FALLS National Bank & Trust Co. in New York considered changing its computer system, it got strong bids from Florida Software Services Inc., which already was its vendor, and Kencom Inc., which badly wanted a new account.

The problem was that Florida Software and Kencom were really the same company — both subsidiaries of Orlando-based Kirchman Corp. Although privately held Kirchman developed into a major player in banking software in the last few years, the company lost some momentum by competing with itself for the same contracts.

"It reached a point where the setup was self-defeating," Kenneth P. Kirchman, founder, president, and chairman of the company, said in an interview. So on Jan. 1 this year, Kirchman's Florida Software Services, Omni Resources Inc., and Kencom Inc. merged into Kirchman Corp.

The consolidation has helped Kirchman streamline its corporate operations. Rather than having three overlapping sales, support, and finance teams, Kirchman is able to focus all its resources on one overall strategy.

"Eliminating conflicts has allowed us to better respond to what a bank needs for its software," Mr. Kirchman said. "The competitiveness was creating a delay in being able to select the best solution for a bank."

Kirchman's restructuring also could foreshadow an initial public offering for the 19-year-old firm. The company currently ranks among the nation's largest bank software companies, but it bumps up against far larger publicly held corporations. In primary applications software for banks with less than $500 million in deposits, Kirchman's Florida Software a year ago ranked third behind NCR Corp. and Burroughs Corp., now a part of Unisys.

But Mr. Kirchman, 52, strongly denies having plans to issue stock to raise capital to compete against the larger firms.

"I still own 100% of this company and don't see any need for having it any other way," he said. "We have a nice-running company right now without the pressure of shareholders and a board of directors only interested in what their stock is worth and whether it is earning dividends."

Indeed, the corporate structure of Kirchman might not work well under public ownership. Of the firm's 300 employees, only about 20 are involved in sales. About one-third of the staff works in research and development.

"Public software companies will typically spend only 12% to 15% on research," said Michael Newes, senior vice president for Kirchman Corp. "The way we're set up, that would be a big constraint."

Mr. Kirchman insists he has not felt the need for additional capital. One big reason is a recent agreement signed with IBM to jointly market community bank systems.

THE
KIRCHMAN
CORPORATION

Dealing with IBM

The IBM deal basically calls for Kirchman Corp. to provide software when IBM provides hardware. Kirchman gets the benefit of marketing help from IBM, while IBM can go to small banks and offer a total computer package.

Kirchman also expects the IBM pact to boost its market share along with IBM's. Software from Kirchman companies currently is used by 6,000 banks, including banks that rely on other banks for their servicing. Kirchman has discontinued its software for Burroughs systems.

> ***"It reached a point where the setup was self-defeating."***

"We're now a partnership with IBM," Mr. Kirchman said, "in contrast with our previous relationship where we worked at arm's length. We can go in to a banker together and give a total solution. They have a strong track record with hardware and we have the only software that has an answer for a bank, no matter what the size."

The IBM agreement, a major accomplishment for Kirchman Corp., stems from a technological development that saved the company.

From the start, Kirchman's affiliates wrote custom software for each banking client. The strategy worked, but the business had large swings up and down. The growth of the companies was stagnating.

Then Mr. Kirchman struck upon a solution on an airplane trip. Rather than change the data processing packaging for each bank, he wanted software that

Three new features that make our bran

1. 32-bit power and flexibility.
Because you've told us you're processing more and more data at the branch level, we've enhanced our Pinnacle® branch automation system with 32-bit processors. Benefits to you? Pinnacle meets all your processing needs today, and positions you for new opportunities tomorrow.

2. An industry standard operating system.
To enhance Pinnacle even more, we've incorporated our DNIX™ operating system, fully compatible with UNIX™ System V. DNIX is perfect for Pinnacle, and your branches. We've developed enhancements specifically for financial institutions, such as a real-time scheduler for efficient transaction processing, and a hardened file system to prevent data loss. This gives you — and us — the competitive edge. It's what you've come to expect from a company that

UNIX is a trademark of AT&T.

> **"Our dream is to bring local control and management closer to the holding company."**
>
> **— Kenneth P. Kirchman**

would let banks set their own control-records parameters with processing that would fall in line.

The concept was not unique, but it led to the formation of Kirchman Corp.'s various Dimension software packages for different sized banks. The packages range from Dimension 1000 (originally an Omni Resources product) for community banks to Dimension 4000 (originally a Florida Software product) for large banks.

It was Dimension that propelled Kirchman Corp. to become one of the largest companies in its field and attracted IBM.

Now Kirchman is working on a software line that will make transitions easier when major banks acquire smaller banks that use a Dimension system. The still unfinished Dimension 5000 will act as a computer bridge that can communicate with smaller Dimension packages at the acquired banks across the country.

"Our dream is to bring local control and management closer to the holding company," Mr. Kirchman said. "It will set up a communications system that's the same for Citicorp in Florida as it is in California. It's really not that complex. Airlines have been doing this for years."

Management Problem

Completion of the Dimension 5000 system is at least 2 1/2 years off. Meanwhile, Mr. Kirchman said he must confront the difficulty of developing qualified management.

"When we get to the next product, the question is not whether we have the capital to carry it through," Mr. Kirchman explains, "but do we have the management to handle everything?"

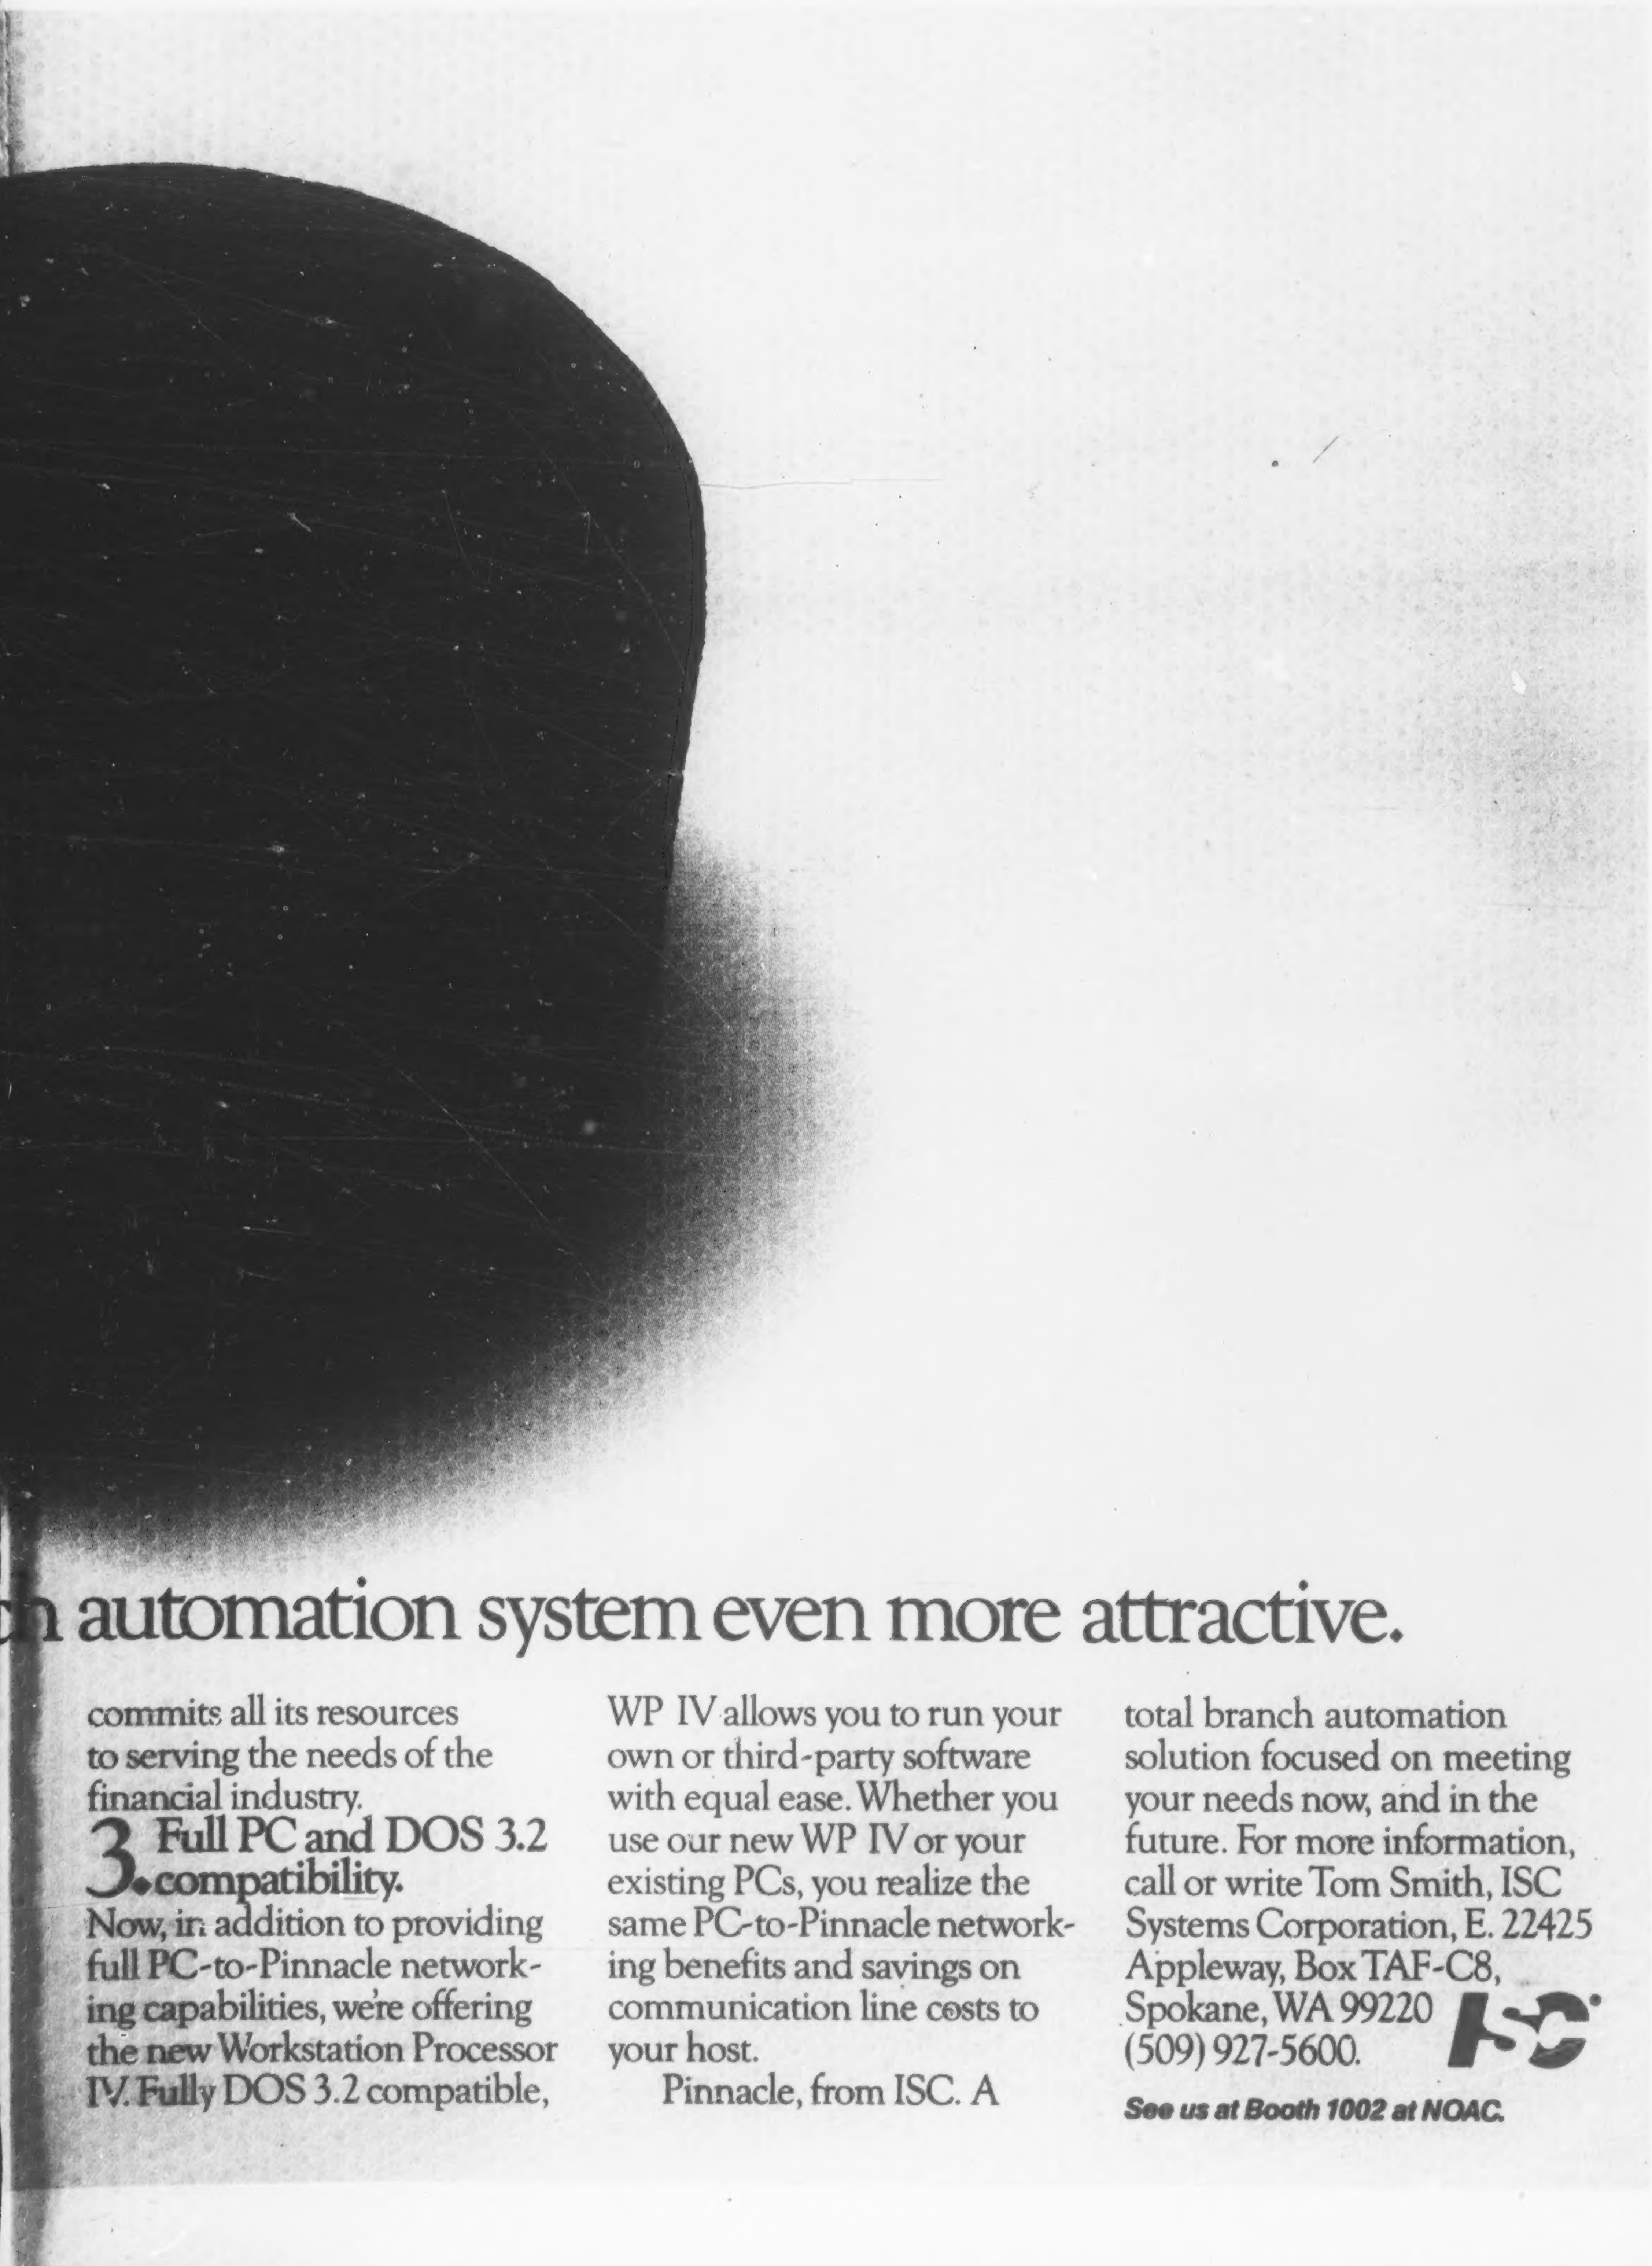
But relations with former managers have not always been so rosy at Kirchman.

A little more than a year ago, Bonnie McIntire Smith resigned as president of Kirchman Corp. shortly after Mr. Kirchman returned from a sabbatical in February 1985.

Two years ago, Omni sued a software company founded by former Omni Resources president Larry C. Prince. Kirchman Corp. charged that Prince's Lasine Financial Solutions stole corporate secrets and clients. Lasine countersued, saying Omni practiced unfair trade tactics. Parts of the suit are still outstanding, but two Lasine officials named in the suits have returned to jobs at Kirchman.

Even with the restructuring, the company has rehired 50 former employees in the past year, including a former chief financial officer who had been gone for six years.

"Decentralization had its advantages for us," Mr. Kirchman explains. "Centralization just seems to be the answer for us now to unify things so we can all move in the same direction." ■



h automation system even more attractive.

commits all its resources to serving the needs of the financial industry.

3. Full PC and DOS 3.2 compatibility. Now, in addition to providing full PC-to-Pinnacle networking capabilities, we're offering the new Workstation Processor IV. Fully DOS 3.2 compatible, WP IV allows you to run your own or third-party software with equal ease. Whether you use our new WP IV or your existing PCs, you realize the same PC-to-Pinnacle networking benefits and savings on communication line costs to your host.

Pinnacle, from ISC. A total branch automation solution focused on meeting your needs now, and in the future. For more information, call or write Tom Smith, ISC Systems Corporation, E. 22425 Appleway, Box TAF-C8, Spokane, WA 99220 (509) 927-5600.

See us at Booth 1002 at NOAC.

Survey Shows Mainframe Distribution

In its equipment and software survey last year, TransData Corp. found that 3,959 mainframes were installed in 3,156 commercial banks, savings banks, and savings and loan institutions.

The summary table shows NCR Corp. computers are in 46% of those institutions, far more than IBM Corp. systems, which are in 34%. Burroughs Corp., now a part of Unisys Corp., was third, with 22%.

The totals in the table add up to more than 3,156 institutions and the percentages to more than 100% because some institutions have mainframes from more than one vendor.

Also, the 3,156 population differs from the bigger base numbers shown in the market-share tables for demand deposit account software and installment-/consumer loan software. The reason for this is that only 47% of the institutions covered by TransData run the software on host mainframes, while 40% use minicomputers and 2% use microcomputers. An additional 11% did not respond when questioned about the issue.

NCR is the principal host-computer vendor to small institutions. Of the 1,445 using its mainframes, 1,208 were banks with deposits of less than $500 million. By contrast, IBM had only 399 banks in that size group.

At the upper end — the 119 institutions with more than $2 billion in deposits — NCR was the vendor to only 15, or 13% of the market. But IBM's 3080 series was installed in 72 institutions, its 4300 in 36 institutions, its 3090 in 30 institutions, and other models were in yet more banks. Again, these numbers reflect multiple installations by some banks.

— David O. Tyson

Vendors of Host Mainframes At Banks and Thrifts

Vendor	Number	Percent
Amdahl	13	0.4
Burroughs	686	21.8
Honeywell	18	0.6
IBM	1,062	33.7
NCR	1,445	45.7
Other	170	5.4
Don't know/refuse to say	75	2.4

The survey in early 1986 included 3,156 institutions, some with more than one mainframe vendor.
Source: TransData Corp.

> ***"As the cost of processing hardware drops and the capabilities of low-end systems rise, we are going to have more institutions that can justify bringing software in-house."***

Continued from Page 11

stead, the institutions have their data processing done remotely, either through holding-company affiliates or independent service bureaus.

Some observers believe the modest market penetration of in-bank computers into these activities is an opportunity for vendors. They see a trend away from service bureau processing toward banks doing it with their own computers and software. New systems are more powerful and versatile than their predecessors, and cost less. Some community banks now do what some big banks cannot. "In-house systems are outselling service bureaus five to one," says M. Arthur Gillis, consultant.

According to TransData, a research subsidiary of American Banker•Bond Buyer Inc. located in Salisbury, Md., more than 60% of all institutions do their data processing remotely, either through holding company affiliates or independent service bureaus, labeled "Third Party" in the accompanying tables. The remaining 6% to 8% either still handle the work manually or do not offer demand deposit accounts or consumer loans.

MTech, a subsidiary of MCorp., a Dallas-based bank holding company, is one of the biggest vendors of data processing services and makes a diametrically opposite forecast about the future of that business, as David LaGesse reports elsewhere in this section. (See page 13). It expects banks to get away from in-house processing.

Within the group that does its own processing, NCR furnishes the computers for 46% and the primary applications software for nearly a quarter, most of them small banks and thrifts.

TransData since 1981 has conducted an annual survey of equipment and software at banks and thrifts. The year-end 1986 project is still under way, so the latest available results are from the year-end 1985 survey.

The nationwide survey a year ago sampled 1,535 institutions and projected results across a population of 19,903 commercial banks, savings banks, and savings and loan associations. Credit unions were not covered.

Of the total sample, 47% of the institutions run applications software on host mainframes, 40% on minicomputers, 2% on microcomputers, and 11% did not answer that question.

TransData does not identify participating institutions but is releasing publicly for the first time the aggregate results on what it considers the two most basic software applications — demand deposit accounts and consumer installment loans.

As arrayed in the tables on this page and page 19, the results show the market share of applications software vendors in three size groups — institutions with less than $500 million deposits, between $500 million and $2 billion deposits, and more than $2 billion deposits.

NCR Corp. leads the overall head count, with a 23% share of both the deposits and installment/consumer loan systems.

International Business Machines Corp., an acknowledged computer giant in banking as well as in other industries, lags behind NCR in hardware at the low end of the size scale. However, it dominates the upper end, but does not sell applications software of its own. It strikes deals to market software developed by others, such as Hogan Systems Inc., Dallas.

But most of the banking applications software that runs on IBM machines either comes from other third-party vendors, such as Uccel Corp. and Systematics Inc., or is written in-house by banks.

As a matter of fact, about 11% of the institutions using their own computers write their own software for deposits and installment loan systems. For banks, the proportion is 9%. For thrifts, it is 24%, a surprisingly high figure since they gained checking account powers only in recent years and consumer lending powers even more recently.

The Market Shares

For demand deposit systems, the combined market shares after the 23% from NCR and 12% from in-house sources are Burroughs Corp. 8%, Florida Software Services Inc. (now part of Kirchman Corp.) 5%, Tymshare 3%, and Electronic Data Services 3%.

Another 3% identified IBM as their software vendor, despite the fact that IBM markets hardware, not software. Some of those who cited IBM may have been using the community bank system developed by NuComp Systems Inc., St. Paul, Minn. IBM was the exclusive NuComp marketing agent for two years, ending in April 1985. Or perhaps since the institutions had IBM hardware, they have assumed their applications software was IBM's, too.

H. Leon Majors 3d, research associate in the TransData financial systems and equipment division, said the survey until now has reflected respondents' perceptions, which can be faulty. This year TransData is doing a more detailed analysis of each software function.

At the upper end, the banks with more than $2 billion in deposits numbered 128 at the time of the year-ago survey. Of these, 106, or 83%, did their own data processing. Their applications software supports many more terminals, handles many more accounts, and costs much more than that of the small banks.

The top vendors of demand deposit account systems to this group are Hogan with nine; and Software Alliance, which markets Marshall & Illsley systems, with eight.

But 71, or more than 67%, of the top-tier banks process their demand deposit accounts on in-house software. These are the money center institutions with their own staffs of programmers. In some instances, they develop a system they consider saleable, so the

Tracking Bank Equipment and Software

TransData Corp., which did the survey reported in this section, is a research firm located in Salisbury, Md., that was founded in 1979 and acquired by American Banker-•Bond Buyer Inc. in 1984.

It has conducted this annual survey of bank equipment and software since 1981; this is one of the many studies it does of banking, other financial services, and their providers.

The year-end 1986 equipment and software survey is still in progress. The tables published here present some of the data from the year-end 1985 survey.

This is the first time TransData has released aggregate results of the survey in such detail. It does not disclose the identity of respondents.

The firm surveyed 1,535 institutions, including 1,304 commercial banks and 231 thrifts. The results were projected across a total population of 17,903 institutions, including 14,435 commercial banks, 549 mutual savings banks, and 2,919 savings and loan institutions.

Within each of these groups, TransData explains, it established five strata based on total institution deposits reported to the Federal Deposit Insurance Corp. (FDIC). It set no deposit size cutoff at the bottom, so the survey encompasses institutions down to the $500,000 minimum deposit size needed for FDIC coverage.

"Within each of the deposit strata," TransData says, "the proportion of institutions to be surveyed was calculated and established based on a target confidence level for population projections of 80%, with a confidence interval of no more than 2% error."

The tables show three size groups for both banks and thrifts. The full TransData report breaks them down into seven size groups for banks and six for thrifts. The percentages of total size populations surveyed ranged from 2.4% for one of groups of small thrifts up to 89% for the nine banks with more than $20 billion in deposits at the time.

TransData says the overall response rate — the percentage of institutions originally contacted that completed the survey without being replaced because they refused to complete it — was more than 85%, except for thrifts with more than $2 billion in deposits. A 48% response rate was achieved there.

The TransData staff of 35 professional interviewers conducted the survey by telephone. Data entry, editing, and analysis was done on the firm's own computers.

TransData is located at 530 Riverside Dr., Salisbury, Md., 21801. Telephone: (800) 562-5652.

bank itself becomes a vendor to others. M&I Marshall & Ilsley Bank, Milwaukee, is the preeminent example.

Bringing Software In-House

Mr. Majors said a lot of the in-house software is written from scratch, and a lot that was originally bought from vendors has been modified so heavily over time as to lose its original identity.

"Many use spaghetti code: rewrites on top of rewrites on something that somebody wrote 20 years ago," he said.

"Vendors are going after them for a fourth-generation language that allows them to rewrite more efficiently. We now have fourth-generation packages that you can use to generate in-house software more easily than [you could] a year ago."

NCR itself has introduced such capability, which it calls Element Structured Programming, in its new Universal Financial System.

Whether the processing ends up being done on vendors' software or on what are known as roll-your-own systems, the trend is to bring the processing into the bank.

"As the cost of processing hardware drops and the capabilities of low-end systems rise, we are going to have more institutions that can justify bringing software in-house," Mr. Majors said.

"It's going to change the consistency and makeup of the market. The overall effect is going to be an increase in the distribution of these various types of software. Part of it is the thrust toward distributed data processing. If that works, it will drive a tremendous increase in the software market."

William G. Seymour, vice chairman of the software development and consulting firm of Broadway & Seymour, Charlotte, N.C., notes that software systems for small and medium-size banks these days tend to be fully integrated and of a more advanced design than some of the larger systems.

"We work with large and small banks and are acutely aware that when we get through installing an independent bank, they often have more capability than large banks in such basics as knowing the profitability of customers and the ability to keep a customer information file in good, clean order," he said.

"Big banks have more sophisticated products and get into more exotic applications. But in mainstream financing, the community bank likely will have more capability than the larger banks. When you get that kind of capability and it's easier to use and you can put it in-house under your own control, we think that's what's driving the trend."

TECHNOLOGY REVIEW

NCR Corp. Gives IBM A Run for Its Money

With its new software, NCR competes with IBM for dominance in the bank automation arena.

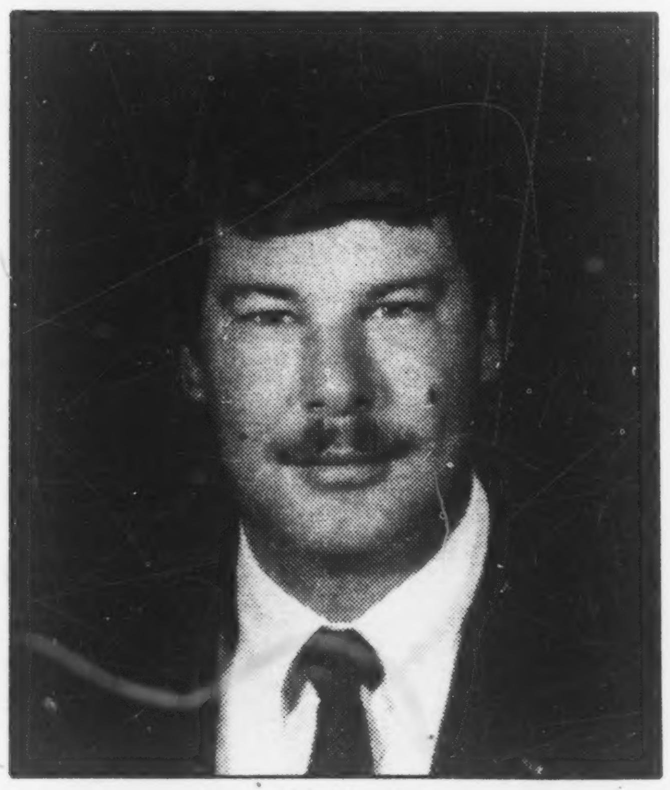
By John Byczkowski

THE NCR CORP., which started out as a cash register maker 103 years ago, today is the biggest obstacle to International Business Machines Corp.'s (IBM) overwhelming domination of bank automation.

The Dayton, Ohio, company reigns supreme among community banks and thrifts. Its host mainframe computers outnumber IBM's in that sector. And its own applications software is installed on more of them than any other vendor's.

For the NCR enterprise, which has operations worldwide and 63,000 employees, banking and financial services is the largest customer group. Last year some 31% of NCR's more than $2.5 billion in sales and rentals of computer hardware and software came from the financial services industry.

Explaining the company's sales, NCR managers speak of the "solution sell." In dealing with bankers, the company can sell entire packages of both hardware and software to address virtually any area of the bank — branch automation, item processing, work stations, customer files.



Kevin M. Karcher

Recognizing that it is software that sells hardware, NCR since the early 1970s has relied on two account processing programs of its own to sell its hardware to banks. One program is Customer Information File, or CIF, for commercial banks. The other is a similar program for savings and loan associations, called Customer Loan and Savings System (CLASS).

The programs have been a success. With CIF, CLASS, and the company's Banker 80 software line for small banks, NCR has been able to sell 1,575 host mainframe installations to 1,445 institutions, according to TransData Corp. of Salisbury, Md., a market research subsidiary of American Banker Inc. IBM is second with 1,324 installations in 1,062 institutions.

But the age of bank consolidation has taken its toll on CIF and CLASS, and exposed weakness in NCR's strategy. NCR had no product for big banks, which tended to use IBM systems. And when big banks have bought small banks that use NCR products, the loser has been NCR.

At one time, nearly 1,000 institutions used CIF and CLASS. The number is now down to "several hundred," with 80% to 90% of the loss attributable to mergers and acquisitions, said Peter J. Augusta, assistant vice president in charge of marketing and development for NCR's Universal Financial System (UFS) in the financial systems division.

The other 10% to 20% of the loss is blamed on customers switching to more up-to-date software. "Sometimes they'd say 'We want something new,' and we didn't have new," Mr. Augusta said.

CIF and CLASS "are quite old, so we've been in a stagnant position for a while," he said, putting that period at about five years.

With a new product under development, NCR has been trying to keep its current users as up-to-date as possible, with new CIF enhancements and new hardware, he said.

The Universal Financial System

For NCR, a solution is on its way. On April 13, NCR told its users' conference in Chicago that its new product, UFS, would be released soon.

Like other vendors, NCR has suffered delays in the introduction of such an integrated banking system. Mr. Augusta said CIF and CLASS were supposed to be replaced earlier, but UFS took a lot longer to develop than anticipated.

Now the product has been released. Mr. Augusta said NCR salesmen are selling it, there are a few orders in for it, and UFS will be generally available in September or October.

The system is undergoing a beta test at seven sites, including Jefferson Data Services in Charlottesville, Va., and The First FA, a savings and loan association based in Orlando, Fla. In Mr. Augusta's view, the system puts NCR back in the ball game, allowing the company to update its current customer base and win new users.

NCR will not discuss the number of employees in its bank software division or the division's revenue or market share. But the company, long successful among smaller institutions, had begun to lose market share to others, particularly IBM. Now it may be recovering some of the market.

"We saw some erosion at one point," said Jack Ivers, vice president for Cincinnati-based Software Clearing House, the largest seller of third-party software for NCR and Unisys computers.

"But we've had some NCR shops convert to IBM, and we have had some coming back now. What happens is that you're looking at a minimum investment of $1 million to go to IBM from NCR, and then you have to double or triple your staff to support the operating system.

"The size of a staff required for an NCR machine, compared to a comparable IBM, is far smaller. And I think NCR's philosophy is to try to keep things such that it doesn't require a whole staff of systems programmers."

That philosophy is embodied in the new UFS program, Mr. Augusta said. UFS software will cost $275,000 to $550,000, depending on the size of the institution purchasing it.

New Products, No Programming

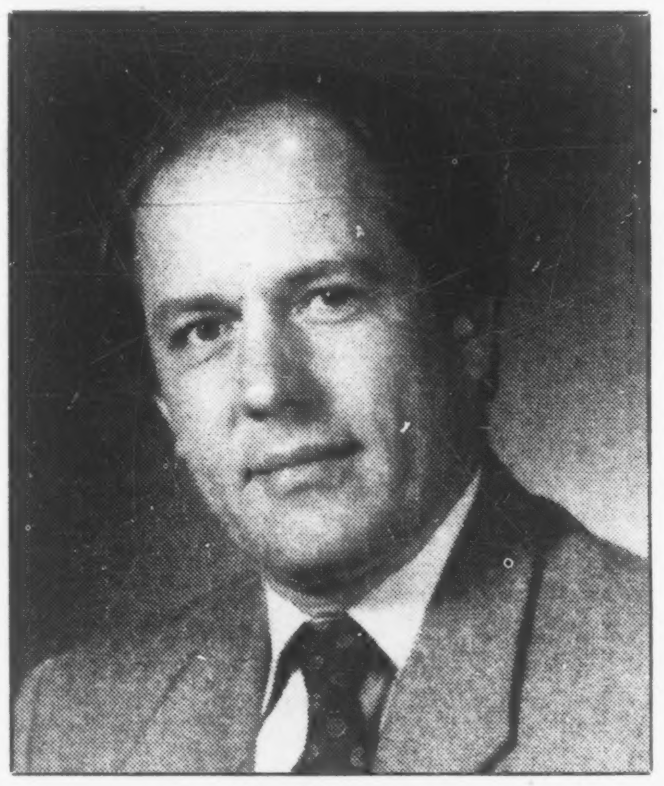
Mr. Augusta describes UFS as "an integrated package that handles deposits and loans, has a central information file concept to it, is transaction-driven," and allows either real-time or memo posting.

UFS can serve as a common data base for a general ledger; and can be interfaced with general ledger systems from Management Science America Inc. and Financial Technologies Inc. of New York, as well as NCR's own general ledger. It will run on NCR's new 9800 mainframe, as well as on older NCR machines, such as the models 18500, 8600, and 8800.

UFS is designed to allow bankers to establish new types of deposit and loan products without doing a lot of programming. A marketing manager and a systems analyst can sit down at a personal computer and, from code already in the machine, create new bank products, working all the while in plain English.

"It puts the banker in charge again, instead of the data processing guy," Mr. Augusta said.

The UFS program features Element Structured Programming (ESP), in which the code is organized into blocks, or elements, that perform specific tasks. The UFS system contains hundreds of such elements.



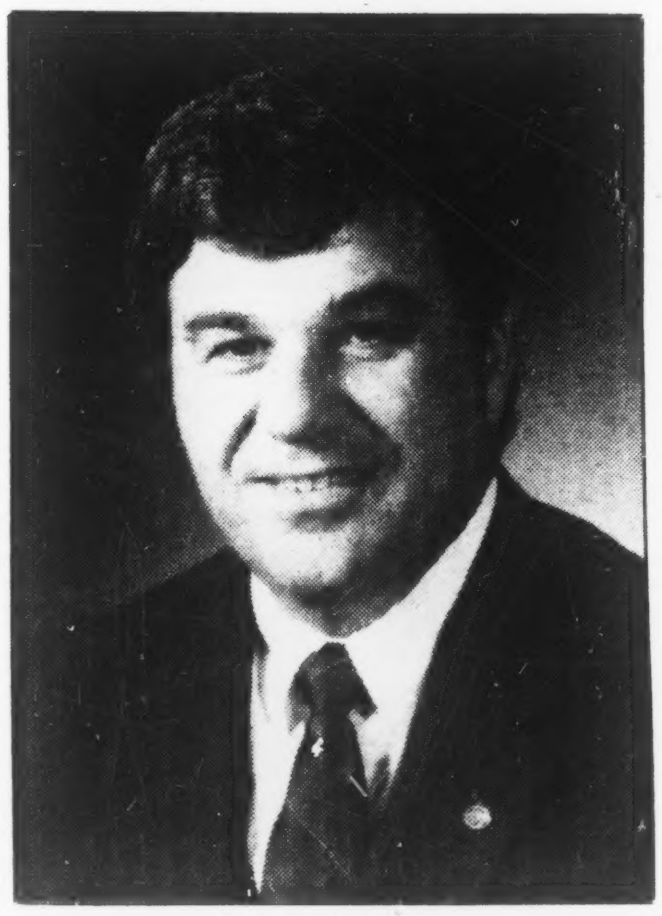
Win Billingsley

Rather than creating a new product from scratch, users select the elements required for a specific bank product and put them in the proper sequence. This is accomplished through a series of plain-English menus. The user selects from the menus the elements he needs for the product.

For instance, consider the NOW account. "We'd have to write a whole set of code before this, even though we know the NOW account is a demand account with some interest payments, some interest accruals in it," Mr. Augusta said. "Rather than go through the savings subsystem — which has all that interest-accrual logic — we pull it out and throw it into demand deposit accounts. We end up writing it again.

"With ESP, we can simply go and look at all our demand deposit logic and then call up the savings and accrual logic, and be able to pick up by number those elements we want to use to accrue interest for a demand account, and we could then move them over.

The program will not eliminate the writing of code. Some new elements that are not contained in UFS will have to be written, but even that will be easier, Mr. Augusta said. UFS is written in COBOL, a common business computer language.



Peter J. Augusta

The system, Mr. Augusta said, will reduce the time it takes to bring new products to the market. The backlog on work in a bank's data processing department averages two years, he said. Because UFS eliminates much of the writing of code, the time to bring out new bank products will be in terms of weeks and months rather than months and years, he said.

The system will allow users to control their data processing staffs, keeping them at a constant level, if not reducing them somewhat, Mr. Augusta believes. "Low-level coders will not be necessary to the extent that they're necessary today," he said.

Additional capabilities for UFS are in the works. One is improved report writing, including customer profitability. Mr. Augusta would not discuss the other capabilities.

But Win Billingsley, assistant vice president of NCR sales west of the Mississippi River, said bankers today want software to have much more than operational value.

"They want it to be an integral part of how they improve the profitability of the bank," he said.

"They want to have reports, and information that tells them whether they're making money or whether they're losing money. They want to know is Joe Smith a good customer or a bad customer? Who are my top 1,000 most profitable customers, and who are my 1,000 least profitable customers? They want software that gives them that ability to look at customers on a profitability basis."

UFS is aimed at medium-sized banks, those with assets of $250 million or more, though Mr. Augusta said NCR is not aiming at the top 100 banks in the nation. The major competitors include Hogan Systems Inc. on the high end, where NCR seldom ventures; Florida Software, which is now part of Kirchman Corp.; Uccel Corp.; Systematics Inc.; and Modular Information Systems Inc. of Orlando, Fla., whose product is called Miser.

NCR will attempt to convert current customers to the new system, as well as win new customers.

"There are users out there who are looking for some kind of solution, and they need both a hardware and software solution," Mr. Augusta said. "And there are some IBM banks who have software that's antiquated that we'd like to move, and we can compete directly with some of the software houses that supply IBM software."

The Banker 80 Packages

In the Banker 80 product line, aimed at banks with less than $250 million in assets, are NCR's Banker 80 and Banker 80-II packages. The former is designed for smaller banks in that niche, where one person in the bank is the primary user. The latter is designed for the larger banks in that niche, those that have more employees and a higher degree of specialization. NCR has more than 1,000 installations of the

---

John Byczkowski is assistant business editor of the Cincinnati Enquirer.

Banker 80 software.

Kevin M. Karcher, director of account processing for NCR's financial systems division, said competition in that small-bank niche is tough and getting tougher, with 20 companies — some national, some regional — seeking the business.

Small banks, Mr. Karcher said, are demanding more sophisticated tools to help them run their banks and produce better report writing. They are also seeking the ability to manage new investment opportunities, such as selling mortgages on the secondary market, and better tools for asset-liability management.

But in an age of consolidation in banking, the Banker 80 line has taken on a new significance, Mr. Billingsley said.

"There's developing a strong will for independent banks to stay independent," he said. "They don't want big banks doing their processing work for them, because they have the advantage of knowing exactly the details of the bank. So [other] than processing through the big banks, they'll put in their own system."

In its push to remain a force in the bank computing business, NCR is known for encouraging development of software by third parties. Mr. Karcher said that right now, for users of the Banker 80 products, the best program available for managing sales of mortgages in the secondary market is a third-party product. NCR is negotiating a licensing agreement with the developer, whom NCR declines to identify.

"We really try not to compete with the third-party developers," Mr. Augusta said. "We try to supply meat-and-potatoes applications, the real guts applications, while allowing third parties to develop a lot of ancillary products."

Cooperating With Developers

Mr. Ivers, of Software Clearing House, said NCR "is far and away more cooperative" with third-party developers than many other companies.

"In the past five years, they've been increasingly cooperative," he said. "They give us discounts on software. They release operating system information. We have our conflicts. We compete against NCR's UFS and Banker 80 with our Super CIF. But on the other hand, they realize the competition is really good for them. They've been very cooperative."

For the customer, the decision to buy new software is filled with anxiety, Mr. Billingsley said.

"When you put a piece of software in a bank, you are impacting every customer and every organization in that bank," he said. "So you are in effect betting the company. It's a big decision.

"These things take a lot of study. The selling cycle is six to 18 months, and I have grave concern about people who make the decision in six months. I wonder if they really know what they're buying. Have they really thought about the implications of converting to it? Do they really have an education plan for their employees?"

Mr. Billingsley advises banks to involve the key department heads in the decision to buy new software.

"No one guy is smart enough to be able to evaluate all that software's capabilities," he said. "You've got to have the loan guy look at the loan module to see if it does everything he wants to run his loan department. You need to have the savings guy look at the savings module.

"Many times today, the decision is made by the computer guy, who understands computers but knows very little about banking." ■

Dear Reader, How Are We Doing?

American Banker wants very much to provide you with articles that are both interesting and useful in our feature editions. Would you take a moment to give us some feedback on today's special section on **TECHNOLOGY**? We hope to use your suggestions to make our special sections more valuable. Please return this questionnaire to Patricia Stundza, Feature Editions Editor, American Banker, One State Street Plaza, New York, N.Y. 10004 (212-943-5733).

(1.) How useful was the information in this feature edition?

(A) Very Useful ☐ (B) Useful ☐ (C) Not Useful ☐

What good are 24-hour banking services without 24-hour banking systems?

Without the right software, your 24-hour banking services could be available something less than 24 hours.

You know when that downtime will come. And what your customers will do when it happens.

That's why financial institutions increasingly choose ON/2® EFT software from Shared Financial Systems.

It's software designed to take full advantage of the reliability built into IBM® System/88 and Stratus®/32 fault-tolerant computers.

With ON/2, uptime for ATM, POS and other electronic banking terminals means 100% — even at peak loads. Plus, the systems give you the flexibility to offer competitive new EFT services.

Support is the key.

The 100% uptime is a direct result of the support each ON/2 user receives.

It includes the expected user training and 24-hour hot line.

But Shared Financial support means much more. It means a senior corporate officer with full authority to make on-the-spot decisions assigned to each client.

It means a technical support team with at least 10 years experience per person. It means users group seminars on enhancements, system use, and industry trends.

In short, it means software that can keep your 24-hour banking services available 24 hours a day.

Proven resources.

Shared Financial is the fastest growing company in the EFT software industry. In fact, over the pas five years, we've grown to become one of the nation's ten largest financial software companies.

Today, ON/2 systems are installed in over 70 customer sites in 19 countries around the world.

That solid growth is a direct result of the advanced capabilities of the ON/2 system and of the exceptional support we provide.

Call for free information.

Our free information package details how our support keeps 24-hour banking systems online. For your copy, call toll free

Banks in the Business of Selling Software

By Yvette D. Kantrow

IF IT'S GOOD enough for us, then it's good enough for you.

That seems to be the sales pitch used by banks that sell their major software systems to other institutions.

Whether or not banks should involve themselves in nonbanking endeavors has been debated for more than a decade. But no matter what the industry watchers say, many banks are involved in and committed to the business of selling software.

And it is no wonder. Some two-thirds of the nation's largest banks write their own demand deposit accounting software. More than a third write their own loan systems. These figures, supplied by TransData Corp. of Salisbury, Md., indicate that banks are spending a bundle on developing software. Vending the results of their efforts seems like a logical way to recover some of those costs.

But, warns Robert A. Heckman, an executive vice president of MTech Corp., unless a bank makes a firm commitment to the business of selling software, it would be wiser not to enter that market at all. MTech is a partly owned subsidiary of Dallas-based MCorp, the parent of MBank.

"Run it as a business, not a cost center," he says. A commitment to selling software involves more than merely saying software development is very expensive so lets recover those costs by selling, and let's do it in our spare time, he adds.

Mr. Heckman's sentiments are echoed by other bankers in the software business. Kerry Ryan of Mellon Bank Corp. also stresses the importance of a commitment to the business. And, he adds, it is more than just a strategic or management commitment — it is a financial one.

"You must be of a certain size to sustain the business," he says. "We are spending a lot of money now and it won't be the end of it." Mellon is spending approximately 20% of its service bureau's data processing revenues on product development, he adds.

Other problems can arise when banks enter the software business. Los Angeles-based Security Pacific Corp., for example, found that when it had to support the products it was selling outside the company, it was at the expense of users within its own organization. Security Pacific says it remedied that problem by seeking out external vendors to distribute its products to the marketplace.

Marshall & Illsley Corp., the parent of M&I Marshall & Illsley Bank in Milwaukee, has followed that approach for some time now, selling its products through Software Alliance Corp.

What follows is a brief look at the software entities of the four bank holding companies mentioned here. Each has its own strategy and philosophy for entering the software business. But they share one common piece of ground. When asked how being a bank influences their business, they all say it is a tremendous help.

Perhaps Mellon's Mr. Ryan sums it up best: "We're related to a bank holding company. We know what bankers need." ■

Yvette D. Kantrow is a writer for American Banker.

Mellon's Golden Opportunity

ASK A BANK WHY it would want to sell its in-house software to other institutions and, more likely than not, the given reason will be to recoup steep development costs. But at Pittsburgh-based Mellon Bank Corp., that is not the case.

Mellon, a longtime major player in data processing services, is now gearing up to enter the integrated banking software scene. But the system it will be offering is not one it developed totally in-house. Rather, it is one it purchased to run in the Mellon Datacenter.

In February 1986, Mellon Bank Corp. acquired Carleton Financial Corp., sole owner of Data-Link Systems. Data-Link, based in South Bend, Ind., is both a service bureau and licenser of integrated banking systems. It is best known for its mortgage processing product, currently licensed by approximately 25 banks, including Citibank and Bank of America.

Mellon is now finetuning Data-Link's offerings, and plans to market them this fall. Its strategy largely depends on converting its service-bureau clients to licensees.

"We found Data-Link when we were looking for a new software architecture for the Datacenter," says Datacenter head Kerry Ryan. "We felt some of our software had to be updated for the future, and we scoured the nation for an alternative." Mellon Datacenter currently serves 270 bank clients.

Mr. Ryan, a Mellon Bank senior vice president, stresses that Mellon was not in the market for a software company — just a loan system — when it stumbled upon Data-Link. However, he adds, entering software sales was part of Mellon's long-term strategic plan. With Data-Link, he says, Mellon felt it had found the perfect avenue for doing so.

For one thing, Mellon was impressed with Data-Link because it offered an integrated loan system that Mellon says works. This is no small feat, considering that loan modules are often cited as the Achilles heel of integrated banking packages. Loan systems that did not work properly caused financial troubles for Anacomp Corp. and Hogan Systems Inc.

"We service so many different banks that we have to supply so many different features and functions," Mr. Ryan says. "This loan package allowed us to modify our system in a simplistic way."

Mr. Ryan credits Data-Link's systems architecture with supplying function flexibility. According to Mr. Ryan, the architecture found in all of Data-Link's products provides an overall framework that enables components and features to be looked at in the context of the entire system.

Since Mellon's acquisition of Data-Link, the Datacenter has begun servicing approximately 25 clients on Data-Link's loan software. Mr. Ryan describes these banks as those that sell specialized loans. It has licensed the system to five institutions, including a large thrift in Texas and a $3 billion bank holding company in Denver.

Currently, Mr. Ryan says, the Mellon Datacenter has "been taking the basic software and adding additional resources and a lot of money to it to build it into a total product." The results of those efforts will be marketed to other institutions this fall. It will also be employed by both the Mellon Datacenter and Mellon Bank.

While other data processors, such as MTech, scoff at the integrated banking software market, Mellon views it as a golden opportunity to gain more luster from an economy favoring bank mergers and acquisitions. As banks become larger, Mr. Ryan says, they will look to bring their processing services in-house. Mellon is looking to remain its clients' supplier, even when they outgrow service bureaus.

"Service bureaus traditionally cater to community banks. We've been servicing the high side of that market, with most of our clients in the $300 million range," he says. Because of what Mr. Ryan terms "mergermania," many of those clients are going to grow into large banks very shortly and require their own software tools.

"As our bank customers become $1 billion to $2 billion banks, they ask to license our software in a turnkey type fashion," Mr. Ryan says. "They find installing what we use in their own shop an attractive alternative." ■

Change in Strategy Utilizes Distributors

SECURITY PACIFIC Automation Co. recently changed its strategy regarding the sale of its software, and interestingly, its approach is now similar to the one subscribed to by M&I Data Services. While the company once marketed its software directly to outside users, it now looks to other vendors to sell its wares.

Security Pacific Corp. created the automation company in September 1984, at a time when many banks were abandoning the data processing business. Aside from providing data processing services, it also began to offer software and telecommunications services. From the beginning, the company was more or less guaranteed at least one substantial customer — Security Pacific National Bank.

But Security Pacific, like other banks pouring hefty sums of money into technology development, looked for other ways to recover some of its development costs. And selling its products looked like the logical way to do that.

However, after bringing several products to the external marketplace, problems soon arose, says James E. Watt, vice president and director of software services for the company.

"We wanted to use the same people that developed the products to support them when we sold them," Mr. Watt says.

More than 1,000 of the company's 3,800 employees are development and software professionals. "But we didn't want to degrade the service to our users within the bank," he says.

Unfortunately for Security Pacific, this is what eventually happened. The automation company soon found that it could not offer a high level of service inside, as well as outside, the bank. There simply were not enough product developers and supporters to go around, Mr. Watt says.

In addition, he says, "during 1986, we looked at the specific goals of our company and realized that the bottom line we were supplying to the corporation wasn't as good as we felt it could be."

So, at the end of 1986, Security Pacific changed its strategy. "We decided to work with external vendors that can act as distributors for us," Mr. Watt says.

Other changes took place in 1986 as well. For one thing, DuWayne J. Peterson, a Security Pacific executive vice president who chaired the automation company, moved to Merrill Lynch & Co. Mr. Peterson, who is credited with masterminding Security Pacific's move into the telecommunications business, was replaced by John P. Singleton, who previously served as president under Mr. Peterson.

Security Pacific saw the first fruits of its search for outside distributors in March. That is when the company struck a deal with Software Alliance Corp. of Berkeley, Calif. Under that agreement, Software Alliance — best known for marketing M&I's software line — will sell Security Pacific's on-line item processing reconciliation and adjustment system. Similar deals between Software Alliance and Security Pacific are expected to follow.

According to Mr. Watt, Security Pacific hopes to have somewhere between five and ten distributors selling about 20 of its products by the end of 1987. Because Security Pacific offers a heterogeneous selection of software products, Mr. Watt says, it will be looking for numerous distributors.

"We try to match our products with vendor strengths," Mr. Watt says. "Who we negotiate with depends on what type of products we are trying to sell. Of course, we make sure that our products are not in competition with their product lines."

Pressed to describe Security Pacific's software product mix, Mr. Watt stresses its variety. Rather than choose a target market it wants to sell to, the corporation considers any product it develops for its own use fair game to be sold elsewhere — as long as it is determined not to provide Security Pacific with a competitive edge.

Products designed to address a problem so unique to Security Pacific that they would be of little use to others also are kept away from the market.

As a result of this approach, Security Pacific's software line consists of both applications software and utility products. It offers software for microcomputers, minicomputers, and mainframes. The line is so diversified, Mr. Watt adds, that it includes products that can be used by businesses outside of the financial services arena. ■

Selecting Software

WITH A GLUT of software vendors hawking their wares, choosing the right major applications system is not easy. Vendors speak a language speckled with terms like "user friendly," "responsive," and the ever-popular "state-of-the-art." The words sound glorious rolling off of the tongue of a savvy software marketing executive, but they really do not say much about a system.

So how does a banker wade through the jargon and choose a system that has more than just a good sales pitch?

At The First National Bank of Atlanta, Randall Teteak is a vice president in charge of the bank's retail systems development. When a product group in the retail bank needs a system, it very likely looks to Mr. Teteak's unit.

Mr. Teteak has assembled a list of criteria designed to guide his department's software choices. The process, he says, is not a simple matter. Rather, it is filled with compromises and changing expectations.

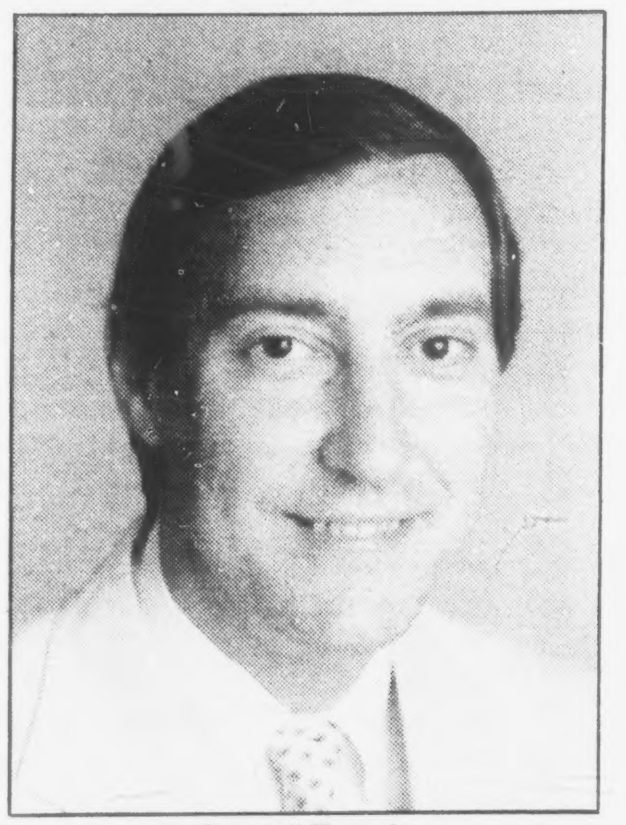
"We look for a product that best meets our business requirements as defined by a project team," Mr. Teteak says. "We may not find one that meets 100% of those requirements. But we may find one that can meet 70% to 80% of them."

But business requirements are not the only ones to address. Technical requirements are just as important.

"Software that satisfies business needs but requires additional hardware expenditures may not at all satisfy a bank's overall objective and project budget," Mr. Teteak says.

"We might have to go with a system that meets only 65% of our business requirements but all of our technical ones. Some tradeoffs may be necessary, depending on the features and flexibility of the package."

After examining a number of offerings, Mr. Teteak's group usually identifies about three packages that meet an adequate percentage of the bank's business needs, plus its technical ones. At that point, the unit puts together a matrix for each possible package, examining the product from a business point of view, a technical point of view, as well as a cost point of view.



Randall Teteak

This evaluation can last anywhere from two to seven months. During that time, the group looks at how well various packages and vendors stand up against these criteria:

- Is the system state-of-the-art? First Atlanta's definition of this often-elusive term is twofold. From a technical standpoint, Mr. Teteak says, banks should look for a system that employs the latest proven technology available. Second, from a business standpoint, banks should look for a system that can adapt to the latest trend in its product area. A loan system, for example, should be flexible enough to accommodate any new loan offerings a bank may want to bring to the marketplace.
- Does it use your hardware resources efficiently? Mr. Teteak says a bank should look for a system that requires a minimum amount of its hardware resources.
- Is the product up and running at another institution? "A larger package should be in production at another bank," Mr. Teteak says. "No one likes to be a pioneer when it comes to using new software. You want to know that a package is debugged and error-free."
- Does the vendor have a good support program? "If a vendor has 15 different customer sites, it probably has a multitude of support personnel," he says. Smaller vendors may not be as well staffed. "Many vendors may support you on-site during initial installation," he adds. "Although some packages may not require that effort, that's always comforting to have."
- Does the vendor have good financials? "You want to do business with a reputable firm. Not someone who is building a system in his garage."
- Does the vendor offer a complete range of maintenance options? "Technology changes, the business changes, laws change. You need someone who can make those modifications on an ongoing basis commensurate with the movement of the industry."
- Does the system easily interface with your bank's other applications, particularly your demand deposit accounting and general ledger systems? "No system will automatically interface with everything, but consideration should have been given to easing other application interfaces," Mr. Teteak explains.
- What type of training programs does the vendor offer? Mr. Teteak points out that someone is going to have to train bank employees to operate the system.
- What type of conversion programs does the vendor offer? "Most organizations will already have some system in existence, whether it's manual or automated but antiquated. They have to convert that to a new one, and any assistance the vendor could offer would be a plus."
- What type of procedural documentation does the vendor supply? "Make sure the documentation is not only excellent on the operations end, but on the business end as well."
- Can you modify the system to meet your needs? Always try to get what is known as source code, Mr. Teteak says. Source code — the written statements that explain a program's logic — will provide the bank with an option to modify the software.

Data-Processing Giant Targets Transaction-Oriented Business

ANY LIST OF BANK holding companies in the software business would not be complete without MCorp. Until recently, that Dallas-based company was the sole owner of MTech. Now, after an initial public offering of 20% of MTech stock in December, MCorp retains 80% of that data processing giant.

MTech's ties to MCorp were never very tight, says Robert A. Heckman, MTech executive vice president for marketing. And that was true, he says, even in the days when MTech was wholly owned by MCorp.

"They encourage us, they want us to do well. They're also our single biggest customer, representing 29% of our business," Mr. Heckman says. "But they're close to us only in that they sit on our board. Physically, MCorp is 15 miles away from here."

MTech provides basic banking applications processing to more than 1,000 institutions. A recent study of the data processing business by Computer Based Solutions Inc. of New Orleans listed MTech as the number one provider in the country, by number of banks served.

But interestingly, the company chose not to sell the proprietary software — called the Bank Management Information System 2000 — that runs its clients' basic bank applications. It opted to sell its electronic funds transfer systems instead.

"Software sales is a very volatile business," Mr. Heckman explains, referring to software for primary banking applications. "Once you sell the system, there is not much revenue to be made off of it, other than on maintenance."

The only way to prosper in the primary applications market is to constantly re-invent your own product, he says. And even then, success can be elusive. To make his point, Mr. Heckman cites the troubles some of the major software vendors have experienced lately.

"Until Uccel got successful recently, nobody was doing that well," he quips.

MTech's philosophy involves going after a more transaction-oriented business — electronic funds transfer. The company develops, maintains, and markets an electronic banking software line under the name Action 2000. The line includes systems for electronic funds transfer, credit card, wire transfer, and credit union processing.

Its licensees include financial industry giants, such as MasterCard International; retailers, such as Lucky Stores; and petroleum companies, such as Exxon Corp. MTech is also well-known as the operator of the MPact automated teller machine network.

MTech plans to continue its 30% annual growth, with much of that coming from company buyouts. While most of those purchases will strengthen the company's already mammoth data processing efforts, some will contribute to MTech's electronic funds transfer software line.

Currently, according to Mr. Heckman, about 300 banks license MTech's electronic funds transfer software. He describes the company's customers as the large money centers and anybody in the $1 billion-asset range — a target market that in this era of mergers and acquisitions gets more fruitful every day.

Mr. Heckman adds that much of its new product development efforts are joint ventures between MTech and a bank customer. "An institution will come to us interested in whether we do something or not," he says. If what the bank is looking for seems viable, MTech will try to get that institution to partly fund its development.

Although MTech has always played down its relationship with MCorp, Mr. Heckman says, "we occasionally still get asked the question [by potential licensees], 'aren't we fraternizing with the enemy when we come to you?' But we've proven our confidentiality, so it's not such a big factor anymore."

Selling Software

MARSHALL & ILLSLEY Corp., the $5 billion-asset holding company for M&I Marshall & Illsley Bank, has taken an unusual approach to selling its software to other institutions. The Milwaukee-based company operates M&I Data Services — a business that processes accounts for 370 banks nationwide. But when it decided to market the bureau's systems to other institutions, it looked outside its own organization to an established software vendor — Software Alliance Corp., Berkeley, Calif.

"When we made the decision in 1981 to sell our software, it was critical that we get out in the marketplace quickly," says Dennis J. Kuester, president of M&I Data Services. "Deregulation was in its heyday and we designed our systems to accommodate deregulation quickly."

The faster M&I could hit the market, the better it would be able to use deregulation as a selling point, he reasons.

According to Mr. Kuester, marketing the systems through a vendor that already had the right bank contacts in place was the fastest way for M&I to strike the iron of deregulation while it was hot. Software Alliance, he says, had a list of clients that included the nation's largest banks — precisely the market M&I was targeting. It also had a trained sales force scattered around the country.

M&I bills itself as a provider of integrated banking systems. They include deposits and loan processing, customer information files, branch automation, wire transfer, and other smaller systems, such as those for profitability analysis. Software Alliance sells and installs the systems. M&I writes the programs and provides maintenance and development.

More than 35 banks have licensed M&I systems. That figure includes five of the country's 12 largest banks, Mr. Kuester boasts. TransData Corp., in its hardware and software survey a year ago, found that M&I's demand deposit accounting system was used in eight banks, second only to Hogan Systems Inc.'s system, which is installed at nine institutions.

M&I realizes the importance of using a bank's hardware resources efficiently, something he says other vendors often neglect. "Other systems designers don't have the responsibility of considering the need for hardware in a bank, so they don't design systems with the same efficiency," he says.

While M&I's bank affiliation has helped the company in some ways, it has presented some problems. But, Mr. Kuester is quick to add that they have been minor. For instance, because other banks have entered this business and then hastily retreated from it, potential customers sometimes question M&I's commitment to staying in.

"Some other banks have gotten out of the business and customers often question that. But we have some history here," he says.

For one thing, M&I joined Barnett Banks of Florida Inc. to design a trust system in the 1970s. Today, the same system is still in use and being sold by Dyatron. More important, Mr. Kuester says, M&I's agreement with Software Alliance also demonstrates the bank's commitment to the business.

"Software Alliance — that's their mission in life," he says.

Greenspan to Replace Volcker at Fed

**By ROBERT M. GARSSON
and JAY ROSENSTEIN**
Washington Bureau

WASHINGTON — President Reagan announced Tuesday that he plans to replace Federal Reserve Board Chairman Paul A. Volcker with noted economist Alan Greenspan, a move that could make the central bank more receptive to broad deregulation of the financial industry.

Mr. Volcker's decision to reject a third term at the Fed stunned financial markets Tuesday, but the shock was cushioned by the decision to nominate Mr. Greenspan, a former White House economic adviser who is well respected in his field.

Mr. Volcker, whose term expires Aug. 6, said he plans to stay on board at the Fed until a new chairman takes office. Mr. Greenspan's nomination must be approved by the Senate Banking Committee and then the full Senate before he can take over at the Fed. He is expected to win approval without difficulty.

Once the transition is completed, President Reagan will have appointed all seven members of the Federal Reserve Board. Mr. Volcker was originally appointed by President Carter in 1979.

Observers interviewed Tuesday said they expected no major changes in Fed monetary policy under Mr. Greenspan. Both Mr. Volcker and Mr. Greenspan are considered tough inflation fighters who are also aware of the benefits of economic expansion.

However, most Fed watchers said they consider Mr. Greenspan to be more sympathetic than Mr. Volcker to financial industry deregulation. That could make the Fed more willing to support regulations and legislation that would permit banking firms to expand into securities, real estate, and insurance.

Also, observers said, Mr. Volcker had been a leader of the opposition to diversified firms entering banking through the so-called nonbank-bank loophole. The Fed stance now could soften under Mr. Greenspan and become more attuned to the administration position, which supports the more free-market approach.

Although Mr. Volcker was a strong advocate of new powers for banks, he had argued that Congress, rather than the Fed, should take the lead in authorizing new products and services. Most recently, Mr. Volcker dissented from a decision in which the board approved new securities underwriting authority for several large New York banks.

Greenspan Wins Waiting Game To Lead the Fed into New Era

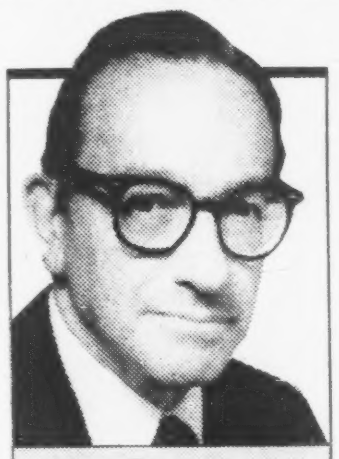
By BART FRAUST

NEW YORK — Alan Greenspan did not earn his doctorate in economics until 1977, 27 years after receiving his master's degree from New York University. Thus, the 61-year-old economist is used to waiting.

For the last five years, he waited as he was mentioned repeatedly as the individual most likely to lead the Federal Reserve Board into the post-Volcker era, whenever that arrived.

That era began on Tuesday when President Reagan announced that Paul A. Volcker had chosen not to seek a new term at the Fed and that Mr. Greenspan will succeed him.

Representatives at Mr. Greenspan's New York economic consulting firm, Townsend-Greenspan & Co., said he was not giving interviews. He told White House reporters on Tuesday that he would not discuss Federal Reserve issues until his Senate confirmation hearings.



Alan Greenspan

Bankers, economists, and other financial analysts were more than willing to talk about Mr. Greenspan, and the comments were universally favorable.

"If a change had to be made, the country is extremely fortunate to have a man like Alan Greenspan waiting in the wings,"

Volcker Exit Will Overhaul Banks' Outlook

By ROBERT TRIGAUX
Washington Bureau

News Analysis

WASHINGTON — Federal Reserve Board Chairman Paul A. Volcker's influence in the banking and financial markets is so pervasive that his resignation will require a complete overhaul of industry issues affected by the central bank, say observers.

The rethinking must include international and domestic policies, ranging from Third World debt to financial deregulation in the United States.

Technology Topics

TANDEM GETS AVAIL: Tandem Computers Inc., Cupertino, Calif., said that Avail, the statewide electronic funds transfer network in Georgia, has installed a Tandem NonStop VLX mainframe that will begin switching transactions among member financial institutions in late 1987.

The system will process transactions from 2,500 automated teller machines and point-of-sale terminals owned by more than 145 institutions and serving 2.4 million cardholders.

Avail's operator is Georgia Interchange Network Inc., a consortium of 12 financial institutions.

The network currently switches 2.2 million transactions per month.

Avail's own Tandem VLX will take the place of a three-year data processing service contract, which expires in December, with Citizens & Southern National Bank of Atlanta.

Ron Dennis, president of Avail, said the company has been happy with C&S service, using its Tandem computer, but growing transaction volumes now make an in-house arrangement more economical.

Software will be provided by MTech of Dallas. MTech is a member of the Tandem Alliance, a program to encourage development of application software that runs on Tandem systems.

□

AUSTRALIANS CONNECT ATMS: Westpac Banking Corp. and Commonwealth Banking Corp., the second and fourth largest banks in Australia, respectively, have signed a nationwide automated teller machine sharing agreement.

Customers of both banks now have access to 1,300 machines throughout the country using Westpac ATM cards, the Westpac MasterCard, Commonwealth Keycard, and Commonwealth MasterCard.

Automation Takes Bigger and Bigger Bites

Banking Industry Not Holding Line on Costs, Survey Shows

By JEFFREY KUTLER

San Francisco

THE BANKING INDUSTRY is finding it impossible to hold the line on automation costs, the American Bankers Association's latest national operations and automation survey showed.

Operating expenditures have been growing faster than the United States inflation rate, and automation has been eating up progressively larger slices of that expanding pie since the association started measuring it in 1963.

In 1985, U.S. commercial banks' noninterest operating expenses exceeded $80 billion, up 10% in a year when the consumer price index rose less than 4%.

Seven percent of the industry's aggregate operating budget, more than ever before, went for data processing in 1986. This percentage was twice as high at the largest banks, whose automation needs are the greatest.

The smaller the bank, the more likely it is to rely on larger banks, service bureaus, and consultants for its data processing needs. This factor seems to have loaded more noninterest operating costs on those latter organizations.

Banks in all size categories, but especially the larger ones, expected their automation burdens to worsen in 1986 and 1987, according to results of a questionnaire completed a year ago by executives of 706 commercial banks.

For example, at banks above $500 million in assets, data processing accounted for 12.8% of 1985 operating expenses, compared with 9.1% in 1980.

At banks with more than $5 billion in assets, the 1985 proportion was 15.3%, 1986 budgets showed 16%, and their 1987 estimate rose to 18.2%.

By contrast, banks under $100 million in assets held the line at 6.9%, actually two-tenths of a percentage point below where automation budgets were in 1980 at the time of the last ABA survey. They budgeted for the same 6.9% of operating expenditures to go for data processing in 1986 and expected only a slight upward bump to 7% in 1987.

For medium-size banks — $100 million to $500 million in assets — the 1985 automation percentage of 8.1% widened significantly from 6.6% in 1980 but was only slightly above their 7.9% in 1978. These bankers budgeted for 8% in 1986 and anticipated 8.3% this year.

System Costs as a Percent of Total Operating Expense

(1986 Budgets and 1987 Projections)

Bank Asset Size (In Millions)	Data Processing 1986	Data Processing 1987	Check Processing 1986	Check Processing 1987	Telecommunications 1986	Telecommunications 1987
Under $100	6.9%	7.0%	9.7%	9.6%	2.8%	2.8%
$100-$500	8.0	8.3	7.6	7.5	2.8	2.9
$500-$1,000	11.9	11.8	4.1	4.2	3.2	3.2
$1,000-$5,000	13.0	13.2	5.5	5.0	4.2	4.3
Over $5,000	16.0	18.2	6.0	6.0	2.9	2.9

Source: American Bankers Association national operations and automation survey.

On top of these percentages devoted to data processing, banks spent up to 10% more of total operating costs on check processing and an additional 4% on telecommunications. These statistics did not change in proportion to bank size the way the data processing percentages did.

Smaller banks in 1986 budgeted proportionally more for check processing than did larger banks: 9.7% of operating expenses at banks under $100 million in assets; 7.6% at banks between $100 million and $500 million; 4.1% at banks between $500 million and $1 billion; 5.5% at $1 billion to $5 billion banks; and 6% at those $5 billion and higher in assets.

As a percentage of total operating expense, the average under-$500 million bank spent 2.8%; the average $500 million to $1 billion bank 3.2%; the average $1 billion to $5 billion bank 4.2%; and the average over-$5 billion bank only 2.9%.

Respondents foresaw virtually no change in their check-processing and telecommunications proportions for 1987, in contrast to the anticipated increases for general data processing.

Salaries the Biggest Item

The largest component of operations and automation spending was salaries and fringe benefits for employees. Annual employment budgets ranged from $241,000 for the average under-$100 million bank to $12.9 million for the average over-$500 million institution. Medium-size banks averaged $986,000, the ABA survey showed.

For all survey respondents, the 1986 employment budget was 6.5% higher than actual spending in 1985. They anticipated limiting that increase to 5.2% in 1987. Both growth rates would be higher than secular inflation in recent years but lower than those years' industry-wide salary increases as calculated from Federal Deposit Insurance Corp. income statements.

After employment, the next biggest operational expense category was computer equipment. The 1986 budgets ranged from $39,000 at the average small bank to $4 million at the banks over $500 million in assets, with medium-size institutions well below the largest at $182,000.

Inflation in equipment costs — 11% for all banks in 1986 and 6.3% anticipated in 1987 — exceeded the salary growth. As would be expected, the 1986 increase was an even greater 13% among banks above the $500 million-asset threshold. These banks wanted, or hoped, to hold this budget increase to only 5% in 1987.

A Comprehensive Picture

The American Bankers Association conducts the national operations and automation survey every three to five years. In its 1986 edition, the survey contained almost 200 questions covering virtually every aspect of domestic bank operations: budget categories; computer and software configurations; telecommunications; retail and wholesale operations; electronic funds transfer systems; check processing; and fiduciary and securities operations.

The Bond Buyer Municipal Bond Index

	June 2, 1987	June 1, 1987	May 26, 1987
Index	89.08	89.29	87.09
Yield to Par Call	8.88	8.79	9.00
Yield to Maturity	8.39	8.32	8.41

The Bond Buyer Municipal Bond Index was designed by the Chicago Board of Trade to serve as the basis for trading Long-Term Municipal Bond futures contracts when approved by the Commodity Futures Trading Commission. The Index represents an average of the figures obtained when the price of each of 40 select term bonds is divided by a figure derived from the amount at which the bond would be priced to yield 8%. In all computations, the maturity of a bond is represented by its first call at par. The Index is computed daily and is quoted in points and 32nds.

Chicago Board of Trade Delays Institutional Index Contract

CHICAGO — The Chicago Board of Trade has postponed indefinitely its plan to trade an institutional index futures contract, originally scheduled to open on June 15. The contract is based on a 75-stock institutional index option contract, which has been trading lightly on the American Stock Exchange.

The futures mart attributed the postponement to the need to complete computer technology related to stock quotations and to enhance computer support systems for its new evening trade session and upcoming municipal bond index contracts. The municipal contracts are set to open on June 11.■

Security Pacific . . .

➼ Continued from Page 7

even with this $58 million addition to reserves, we expect significant profits for the full year 1987."

After the addition, Rainier's reserve for loan losses will be about $136 million, or 2.07% of total loans and leases. Rainier has equity of almost $600 million, and it is projected that primary capital on June 30 will be 7.5%.

Jon Christopherson, Rainier's president, said that while Rainier and Security Pacific kept one another apprised of their decisions to boost loss reserves, Rainier's decision was made in Seattle, not Los Angeles. ■

Automation Costs Take Bigger and Bigger Bites

➼ Continued from Page 8

The ABA has published the results, reflecting on banks' automation status at the end of 1985, in a 172-page book. The book includes a management summary and about 400 tables and graphs enabling comparisons of a bank's strategies and performance with others of the same size. Some of the tables revealed the following:

- Automation has virtually saturated the commercial banking industry. Only 3% of all banks, almost all of them small, do not use computers on or away from their own premises. The percentage was the same 1980. As recently as 1977, 11% of banks were not using any computer systems.
- The falling costs of computing along with the advent of mini- and microcomputers have made on-premises systems feasible for even the smallest banks. Forty-two percent of banks below $100 million in assets said their primary sources of computer processing in 1985 were on their own premises, up from 24% in 1980 and equal to the 42% reported by medium-size banks in 1985. Although 47% of small banks were still relying on the data processing services of correspondent banks or nonbank suppliers in 1985, this was down from 62% in 1980 and 67% in 1977.
- At banks under $100 million in assets, 31.7% rated their correspondent bank data processor excellent, 65% said it was satisfactory, and only 3.3% said it was unsatisfactory.
- About one bank in two used outside data processing consultants. Small banks budgeted an average $47,100 for consultants in 1986 and expected to raise that 5% in 1987. The average bank above $500 million in assets budgeted $286,300 for consultants in 1986 and projected a 21% increase for this year.
- Automated teller machines are operated by 97% of banks over $500 million in assets, 87% of banks between $100 million and $500 million; and 33% of banks under $100 million. The average $5 billion or larger bank operated a 137-machine network at the end of 1985. Nine of ten banks charged a fee, averaging about 20 cents, for an ATM cash withdrawal, but the fee tripled for transactions originating at machines owned by another bank in an ATM network.
- Half of banks above $5 billion and more than one-fourth of those between $500 million and $5 billion said they operated or planned to operate point-

Marine Senior Promotions Are Part of Reorganization

By FRANKLIN SMITH

NEW YORK — Marine Midland Bank has made several senior management appointments as part of a major reorganization of its operating structure in New York State.

Two new sectors, the major business units of the bank, will be established on July 1. They are the community banking sector and the national consumer sector. Existing sectors are capital markets, corporate-institutional-international banking, corporate resources-administration, and strategic positioning.

Alan J. Heuer will become sector executive for the new community banking sector, which comprises Marine's direct consumer banking activities and its business with small and middle-market firms throughout New York State.

Mr. Heuer previously was division executive for the bank's direct consumer banking division.

Peter Laqueur has been named sector executive for the national consumer sector, which includes Marine's auto lending, credit card, education lending, residential mortgage banking, and other individual finance activities throughout the United States. Mr. Laqueur had been division executive for the indirect consumer banking division.

Within the community banking sector, Marine's consumer and commercial banking activities in New York State will be merged and reconfigured into five new geographic divisions, each managed by a newly appointed regional president-division executive.

Antoinette Tomai Heron will head the eastern region, headquartered in New York City, which includes New York City and Long Island. She was previously group executive for the bank's consumer banking activities in New York City, Long Island, and the Hudson Valley.

The Hudson Valley region, headquartered in New Rochelle, will be headed by Garrett Goodbody, previously group executive for administration and support in Marine's corporate-institutional-international banking sector.

In the midstate region, headquartered in Syracuse, regional president Robert E. Wehrle was promoted to regional chairman and Richard D. Callahan was appointed regional president. Mr. Callahan had been group executive for direct consumer banking in the Syracuse area.

In the Rochester region, headquartered in Rochester, regional president Martin F. Birmingham was named regional chairman and Stephen C. Ames, previously group executive for commercial banking in the Buffalo area, was named regional president.

Charles M. Mitschow continues as president of the western region, with headquarters in Buffalo. ■

Oregon to Get State-Chartered Bank

Special to the American Banker

SEATTLE — A group of businessmen in Portland, Ore., plans to open the first state-chartered bank in Oregon in nearly four years.

The institution, which will be called the Anchor Bank of Oregon, will target its loans to local small businesses, according to Robert E. Laughlin, one of the organizers.

The bank will be capitalized at between $1.5 million and $3 million and plans to open its doors by Dec. 1, according to Mr. Laughlin.

The organizers hope to make the bank the centerpiece of a financial services center that will include lawyers, accountants, an investment banking and brokerage firm, and a real estate office, all geared to small businesses. They also hope to file a charter application with the state banking supervisor within 30 days, Mr. Laughlin said.

Mr. Laughlin and some of his partners were directors of another small Oregon bank, the Stewardship Bank, which opened in 1981 but failed in 1984 because of bad real estate loans. Mr. Laughlin said the failure was attributable to a weak economy, inexperienced directors, and poor management. He said the directors of the new institution will keep a closer eye on management.

"Our management team will be a notch above what it was before," Mr. Laughlin said.

The organizers include Joe Lutz, who nearly unseated Sen. Bob Packwood in the state's 1986 Republican Senate primary, and Kenneth R. Kraus, the manager of the central division of the Portland General Electric Co. They are trying to raise capital from a group of about 25 Oregon businessmen.

A related group is considering opening a similar community bank in Washington State.

Mr. Laughlin, the owner of the Western Food Equipment Co., Portland, said one of the reasons for organizing a new bank is the decline in home-owned banks in Oregon. ■

of-sale terminal systems. The $5 billion-asset and larger banks were by far the most active, projecting almost 2,000 terminals per bank in 1986 rising to 3,800 by 1988.

- Half of all banks operated on-line teller terminal systems, and about 30% had platform automation systems in their branches at the end of 1985. Penetration was deepest at the over-$5 billion banks, 88% of which had on-line teller terminals and 72.4% platform terminals.
- In the wholesale area, 87% of all banks offered wire transfer services; 77% business money market accounts; 68% automated clearing house payrolls; 67% business savings accounts; 42% previous-day balance reporting; and 42% automated clearing house debits. Many cash management, wire transfer, and automated clearing house services were almost universally available from the larger institutions.
- More than six in ten banks, and almost 100% of those above $1 billion in assets, process checks on their own premises. About one-third of banks above $500 million in assets anticipated that they would increase their usage of Federal Reserve check clearing services in 1986 and 1987, but almost half of the over-$5 billion group said they would use the Fed less. ■

1st of America Buys Keystone

KALAMAZOO, Mich. — The First of America Bank Corp. completed the purchase of Keystone Bancshares Inc., Kankakee, Ill., for $25 million. First of America said Keystone shareholders will receive $45 per share payable in a First of America convertible preferred stock at a dividend rate of 9%. ■

Shaky Real Estate Loans Hitting Banks

This story was reported by Nina Easton in Los Angeles, David LaGesse in Dallas, Richard Ringer in Chicago, Paul Tosto in Washington, D.C., and Michael Weinstein in Boston.

Kroh Brothers Inc. of Kansas City was the kind of company that bankers dream of bankrolling.

The 77-year-old firm, which is family-owned and operated, chalked up spectacular successes in the real estate market, first with residential construction and later with commercial development. Limited partnerships, providing new avenues of financing, became a favorite vehicle for the Kroh brothers, John and George.

Then came trouble — overbuilt markets, weak cash flow, and tax law changes that rendered real estate partnerships useless as tax shelters. With 120 properties stretched across 13 states and $700 million in debts, Kroh Brothers filed for bankruptcy the day before Valentine's Day.

Commercial Real Estate Lenders

Banks with Largest Percentage Of Commercial Real Estate Loans

RepublicBank Dallas NA	39.23%
MBank Dallas NA	32.73%
Arizona Bank, Phoenix	32.43%
Florida National Bank, Jacksonville	31.98%
Barnett Bank of South Florida NA, Miami	31.92%

Two months later, three St. Louis bank holding companies paid dearly for their infatuation with Kroh Brothers. In the first quarter of 1987, Mercantile Bancorp. charged off $7.1 million in loans to Kroh Brothers; Boatmen's Bancshares Inc. had a $4.1 million increase in its loan-loss provision, mostly because of charged-off loans to the company; and Centerre Bancorp. charged off about $2.5 million in Kroh Brothers loans.

Those Missouri banking concerns are in good company. Overbuilt markets and tax changes are colliding to make 1987 a painful year for banks with sizable exposure to the commercial real estate market. Yesterday's favorite cus-

Banks Win Japan Securities Nod

By JED HOROWITZ

NEW YORK — Four major U.S. banks have allied themselves with nonbanking partners to bring their bid for securities units in Japan to fruition.

Japan's Ministry of Finance on Wednesday said it invited 10 foreign institutions to apply to open brokerage firms. Under Japanese regulations, the banks cannot control more than 50% of a securities company, and they must purchase it through an existing unit.

Bankers Trust New York Corp., Chemical New York Corp., Manufacturers Hanover Corp., and J.P. Morgan & Co. said they will quickly send in applications, which they have been negotiating for more than a year.

They will be the first U.S. banks to directly apply for securities firms in Japan, though others are operating there through the purchase of existing brokerage houses.

To meet the 50% ownership stipulation, each applicant has taken a nonbanking partner. Bankers Trust has joined with Exxon Corp., Morgan with Bechtel Investments, Inc., Chemical with Lord Howard de Walden, a private British investor, and Manufacturers Hanover with Chrysler Corp.

The banks said they will underwrite, distribute, trade, and broker debt and equity securities through their planned units. To meet regulatory requirements for licenses in each of these areas, the firms will have to be capitalized at 3 billion yen, or about $21 million, according to Douglas Ebert, an executive vice president at Manufacturers Hanover.

The banks, limited in U.S. securities activities by the Glass-Steagall Act, have been flexing their muscle for several years in the Euromarkets as underwriters and traders.

An invitation from the Ministry of Finance to apply for securities firms is tantamount to approval, banking officials said. Unlike the United States, where an application presages a review process, Japan's finance ministry issues

Barclays Bets On Debit Card

By JOHN J. DUFFY
London Bureau

LONDON — Barclays Bank PLC on Wednesday launched Britain's first mass-market debit card, the vanguard for a new generation of cards that are expected to replace checks and pave the way for electronic, cashless shopping.

Called Connect, the new card is being issued through the Visa system. Most of the 5.3 million Visa merchants worldwide are expected to accept it.

Unlike purchases made with a charge card or a Visa credit card, Connect card transactions will be debited directly from the holder's checking accounts, with most transactions clearing in about three days.

"Barclays' Connect is the first of a new generation of banking services and is set to revolutionize purchasing hab-

Real Estate Loans Rocking Lenders' Bottom Lines

➽ **Continued from Page 1**

tomer, like Kroh Brothers, in too many cases has become today's source of losses.

Among large American banks that have concentrated more than 20% of their loans in land and development, about half saw their bad real estate loans at least double in 1986, according to a ranking prepared for the *American Banker.*

That trend has focused concern on real estate among bankers and their regulators, most of whom say they expect the losses to continue growing this year.

While holding companies are taking dramatic hits from soured Third World loans, those problems are at least quantifed, unlike the final exposure of banks to a real estate recession.

Real estate apparently has not hit bottom in a number of markets, particularly in the Southwest, where many regulators and analysts fear that the losses could threaten the survival of many banks.

Analysts expect real estate to wipe out any chance for earnings this year among the Texas holding companies, and to weaken profits at banks around the country.

High on the list of problems, bankers say, are construction loans for office buildings, hotels, apartments, and shopping centers. "The banking industry remains highly exposed to conditions in the real estate market," Manuel H. Johnson, vice chairman of the Federal Reserve Board, told Congress last month. Mr. Johnson said that while new construction has slowed in energy-depressed markets, "it has not done so in the aggregate."

In 1986, Mr. Johnson said, real estate construction loans held by banks grew by nearly 20%, while total loans grew by less than 8%. Over the past three years, construction loan growth averaged 21%, compared with a total loan growth average of 10%.

Comptroller of the Currency Robert L. Clarke said he expects troubled commercial real estate loans to be one of the factors behind lower bank earnings this year. "The number of nonperforming assets is high and it's going to get higher," he said in an interview this week.

The Comptroller's office is considering forbearance plans to provide relief to banks with large portfolios of these loans, Mr. Clarke said. One option under consideration is a change in appraisal standards that would assess the value of a real estate project based on the anticipation of stronger markets in the future.

"I personally think the problem will be a big one," Harry W. Green, vice president for bank holding company and international regulation at the Federal Reserve Bank of San Francisco, said in a recent interview.

While others are more sanguine about commercial real estate loans, there appears to be a growing consensus that the problem will get worse before it gets better.

"I think it's a while before we hit bottom," said Robert Grossman, a bank analyst at Standard & Poor's Corp., a bond-rating agency.

Alex Sheshunoff, president of Sheshunoff & Co., stated in a recent report on bank performance that the major problems for many U.S. banks in the future will continue to be in the real estate sector. "It is difficult," Mr. Sheshunoff wrote, "for many banks to quantify their problems in this area, due to the significant drop in real estate values."

"A lot of banks have been and will continue taking big writedowns," said John W. Hancock, executive vice president and head of Security Pacific Corp.'s real estate industries group in Los Angeles. Added Thomas Tabasz, chief economist for First Interstate Bank of Washington: "There is cause for concern."

Warning signs were evident throughout the country as major banks reported their earnings for 1986 and the first quarter of 1987:

- In Texas, real estate chargeoffs doubled as a share of total loan chargeoffs in 1986 — to 25% for the overall year, and 29% of fourth-quarter chargeoffs.
- In New York, Manufacturers Hanover Trust Co. earlier this year foreclosed on the Allied Tower in Dallas, only half of which is occupied. The bank's nonperforming real estate loans had already jumped from 2.93% of total construction loans at yearend 1985 to nearly 10% at yearend 1986.
- In Pittsburgh, Mellon Bank Corp. charged off $20 million in the first quarter, contributing to a $60 million loss in that quarter. Analysts at Smith Barney, Harris Upham & Co. cited the bank's real estate construction and commercial loan portfolios as "our biggest concern," and predicted more problems to come.
- In San Francisco, Wells Fargo Mortgage & Equity Trust, a real estate lender and investor that is advised by, but not formally affiliated with, Wells Fargo & Co., received a downgraded credit rating from Standard & Poor's in May. The credit agency said it did not expect the trust's poor performance to improve "unless [it] finds several large tenants for its problem properties."

Widespread Trouble

The commercial real estate market is particularly troubled in the Southwest, where the effects of the depressed oil and energy industries are now trickling down to the real estate sector. Nonperforming real estate loans among Texas banks more than doubled in 1986 to nearly 12%, and could nearly double again in 1987 to 20% or more, said Sandra J. Flannigan, a bank analyst with PaineWebber Inc. in Houston.

Some sectors of the country appear to be virtually immune to commercial real estate woes. New York, Boston, and Washington, D.C., remain robust markets, although some banks may pay for straying into the Southwest with real estate loans, as Manufacturers Hanover did in Dallas. "The whole Northeast corridor is much stronger than the rest of the country," said James F. Murray, senior vice president at Chase Manhattan Bank.

But regulators are keyed on problems in regions far from the oil patch. Overbuilding is evident in San Francisco, Seattle, Oregon, Miami, Los Angeles, and Phoenix. And banks throughout the Sun Belt have large exposures to the commercial real estate market.

Unlike energy loans, which severely crippled banks in the Southwest but touched only isolated banks elsewhere, real estate problems will affect banks throughout the country, Mr. Green said. Nearly a third of the $775.7 billion in outstanding loans at large banks — $220.4 billion — was linked to real estate projects, according to April figures published by the Fed.

Federal Deposit Insurance Corp. data show that the nation's total banking system at the end of 1986 contained $13.8 billion in problem real estate loans, representing 2.7% of total real estate loans, an increase from 2.5% in 1985. However, that figure does not reflect the true size of the problem, because total real estate loans include the residential sector, which has remained robust in most parts of the country.

Unlucky Timing

An unlucky confluence of events makes 1987 a harrowing year for banks with commercial real estate loans on their books. As one West Coast banker succinctly put it, "It's a deadly combination of overbuilding and tax reform."

After 1982, when the nation's economy showed signs of healing from recession, banks plunged into commercial real estate lending. And often they did not stay close to home. "It used to be that local bankers lent money to local developers, and both knew the market well," said Mr. Grossman. "In the past few years, we've seen a dramatic rise in national developers and syndicators, and national real estate lenders."

Commercial real estate lending in the early 1980s provided banks with lending opportunities at a time when troubles in the oil patch were drying up safe energy lending opportunities, noted a senior Washington bank

American Banker surveyed all banks with total assets greater than $4 billion on 12/31/86. From this group of 106 banks, all banks with 20% or more of their domestically booked loans in commercial real estate are listed. The banks are ranked by the ratio of commercial real estate loans outstanding on Dec. 31, 1986, to all domestic loans outstanding on Dec. 31, 1986, expressed as a percent to two decimal places. This ratio is reported in column 3 above and shown in bold face. Data are from the Federal regulatory report of condition and were provided by **ADP Data Service Division, New York. Commercial Real Estate Loans** are the sum of the following three items from Schedule RC-C (Loans and Lease Financing Receivables), Column B (Domestic Offices), item 1 (Loans secured by real estate): (1) Construction and land development loans (item 1a); (2) Loans secured by multifamily (5 or more) residential properties (item 1d); and (3) Loans secured by nonfarm nonresidential properties (item 1e). **Total Loans** are all loans booked domestically, net of unearned discount (Schedule RC-C, Column B, item 12). **Real Estate Loans** are all real estate loans: commercial, plus loans secured by farmland (Schedule RC-C, Column B, item 1b) plus loans secured by 1-4 family residential properties (Schedule RC-C, Column B, item 1c). **Commercial real estate lending as a percentage of real estate loans** is commercial real estate loans divided by (all) real estate loans, expressed as a percentage-. **Bad Real Estate Loans** are the sum of the following two items: All real estate loans 90 or more days past due (Schedule RC-N item 1a, Column B) plus All real estate loans on a nonaccrual basis (Schedule RC-N item 1a, Column C). **Bad Domestic Loans** are all domestically-booked loans 90 or more days past due plus all domestically-booked loans on a nonaccrual basis. **Bad real estate loans as a percentage of total bad loans** as of Dec. 31, 1986, and Dec. 31, 1985, are reported in the last two columns of the listing above.

Shaky Real Estate Market Rocking Banks with Big Loan Losses

Continued from Page 10

regulator.

The historically high vacancy rates in office buildings that now bedevil real estate lenders have become a familiar refrain: 30% in Denver, 25% in New Orleans, 23% in Miami, 20% in Houston and St. Louis, and 15% in downtown Los Angeles and Seattle. Take away the tax incentives of some of those projects, and the troubles deepen. That is exactly what Congress did in adopting the Tax Reform Act of 1986.

"The change in tax laws will have wide ramifications on bank portfolios," predicted the Fed's Mr. Green.

Most banks' loans to developers consist of two- to three-year financing. To service that debt, the developer needs a source of long-term financing. In the past, important sources of long-term financing were syndications of investors who bought real estate projects as tax shelters. But Congress killed those shelters in the 1986 tax reform law.

That factor, combined with growing vacancy rates, means that "there are now more restricted sources of repayment for a construction loan," said Mr. Hancock. Savings and loans, which have been granted more liberal powers to invest in, as well as lend to, commercial real estate projects, will be hit especially hard by the tax changes.

"It's worse than what we had thought," complains William Popejoy, chief executive officer of the troubled Financial Corporation of America. "Commercial real estate has been very badly hurt by the tax legislation."

While most bankers appear to believe that Congress' crackdown on real estate tax shelters last year will ultimately benefit the economy, they already are feeling the expected short-term drag on real estate values. "We've probably seen an erosion in value overall," perhaps by as much as 15%, said Dale Walker, executive vice president for real estate industries at Wells Fargo & Co. in San Francisco.

Ralph M. Carestio, executive vice president at NCNB Mortgage Co., a subsidiary of NCNB Corp., Charlotte, N.C., said that not all properties are losing value. However, he said there is still a large segment of commercial parcels whose value is optimistically estimated to be falling by 15%. "In the near term, it is not a time to be swinging, not a time to take chances," he said.

Andrew Arnold, an assistant vice president at Florida National Bank in Jacksonville, said the new changes in the tax law could diminish current market values on some properties by as much as 20%. "I consider this tax act to be one of the biggest travesties Congress has perpetrated on the public," said Mr. Arnold. Congress changed the rules of commercial real estate investment in mid-game, he complained.

A Bright Side

There is a bright side to all this. Historically, the losses associated with loans backed by real estate have been lower than with other types of loans. Bankers can hold on to buildings or land and sell them when the market rebounds, an option that provides a cushion from excessive chargeoffs that could threaten a bank's capital.

"I don't think we will see as dramatic a following in writeoffs in real estate as we did, say, in energy," said James McDermott, a bank analyst with Keefe, Bruyette & Woods Inc., New York. "I don't think it's going to result in unmanageable levels of writeoffs."

Moreover, regulators say they may allow capital to fall below usual levels for lenders with large portfolios of real estate loans, the sort of forbearance program they held out last year to agriculture and energy lenders.

The other good news is that while tax-driven partnerships are leaving the market, there are signs that institutional investors are returning to the market to provide long-term financing. Mr. Carestio of NCNB said he has noticed a return to the commercial real estate market by some institutional investors, mostly insurance companies. That trend increases the odds that banks will get their loans back on commercial projects.

Mr. Carestio said institutional investors a few years ago began leaving the commercial real estate market and turning to the equity markets because the returns were better. Now, a combination of lower interest rates and tax law changes has put the returns for "permanent" lending on a par with equities, several bankers say.

Standards Tightened

Are lenders responsible, at least in part, for the overbuilt real estate markets? Erik N. Prenzler thinks so.

Real Estate: Page 12

Furr Elected President Of Foreign Trade Group

WASHINGTON — Anthony F. Furr, executive vice president of First Wachovia Corporate Services, the Atlanta-based corporate banking subsidiary of the First Wachovia Corp., has been elected president of the Bankers' Association for Foreign Trade for 1987-88.

In his position at First Wachovia Corporate Services, Mr. Furr heads the international corporate division, which is responsible for all markets outside of the United States and Canada and for providing international services to domestic clients of First Wachovia and its subsidiary banks. He is also an executive vice president of the Wachovia Bank & Trust Co., Winston-Salem, one of First Wachovia's two principal units.

Mr. Furr succeeds William R. Rhodes as the new president of the Bankers' Association for Foreign Trade. Mr. Rhodes is the chairman of the restructuring committee of Citibank, New York.

Elected vice president of the foreign trade association was John J. Simone, executive vice president in charge of the international corporate and government division 1 at Manufacturers Hanover Trust Co., New York.

Thomas Dowen Jr. was reelected secretary-treasurer of the group. Mr. Dowen is senior vice president of the Continental Illinois National Bank & Trust Co., Chicago. ■

MANUFACTURERS HANOVER

Opportunity

Our Controlled Disbursement Licensing Program lets you offer a major service without a major investment.

Controlled Disbursement. The cash management service most often requested by corporate treasurers. It offers high potential profits to the bank that provides it.

Yet the cost of operating a Controlled Disbursement Service is usually prohibitive to all but the largest commercial banks.

Usually prohibitive.

But not when you participate in our Controlled Disbursement Licensing Program. Manufacturers Hanover has been a leader in Controlled Disbursement for more than 10 years. Our service and our products are of the highest quality. And our commitment to our clients is known throughout the industry. Offered by Manufacturers Hanover Bank (Delaware), a subsidiary of Manufacturers Hanover Corporation, the Program:

- Enables you to start up with little or no initial investment.
- Requires no hardware or capital expenditure.
- Gives you pricing flexibility for maximum profitability.
- Allows establishment of an East Coast disbursement site.
- Provides first presentment clearing totals on terminals at 8:00 AM E.T., with full presentment by 10:15 AM E.T. Funding totals can be provided to you or your customers or both, either electronically or by phone.

For information on how you can take advantage of this profitable opportunity, please call us at (212) 286-4129 or 808-0166.

Real Estate Loans Hitting Banks Hard

➵ Continued from Page 11

Mr. Prenzler, a loan officer with Focus Real Estate Finance Company of Colorado Inc., believes that lenders and developers chased marginal deals in order to generate fees.

"Lenders compromised their standards for location, market, and credit because they needed to place funds," Mr. Prenzler wrote recently in a periodical published by his firm's parent company, Focus Financial Group Inc. "Syndication firms looked at maximum tax writeoffs and ignored market demand. The realities of the marketplace were sometimes ignored."

That may be changing. Most of the bankers interviewed for this report said they had tightened their underwriting standards in recent years, requiring more personal guarantees and proof of income, and were shying away from overbuilt markets. "We've deemphasized new project lending in energy-impacted geographic areas," said Mr. Hancock of Security Pacific. "We're looking very strongly at the underlying credit — seeking larger equity, less leverage, more personal obligations."

Banks have become much tougher in evaluating office building projects. For a major project, such as 300,000 to 400,000 square feet, banks now require preleasing. "Banks are taking a tougher look at these things," said Chase's Mr. Murray.

"We are becoming very cautious in the transactions we are going into," said Adolfo Henriques, regional senior vice president for Barnett Bank of South Florida. "There will always be a large number of deals around, but only a few bankable ones." The number of good commercial real estate deals, he said, is shrinking.

But banks that lend to markets in the oil patch may find it fruitless to demand more equity and personal guarantees from developers. "They're going to be finding out that the developers themselves have little or no money left," said Craig Hall, a Dallas-based real estate syndicator who last year reworked more than a $1 billion in loans with savings and loans. ■

THE EUROMONEY
INTER-AMERICAN DEVELOPMENT BANK
CONFERENCE ON

Global Debt Strategies

THE PLAZA HOTEL, NEW YORK CITY, JUNE 24-26, 1987

THE CONFERENCE: This Euromoney/Inter-American Development Bank Conference on Global Debt Strategies could not have been more timely. Not only will it directly expose the central bank governors and finance ministers and other top level financial officials (listed below) of some of the world's most heavily indebted LDC's, to the latest and much needed innovations for managing the huge ($380bn) global debt problem, but it will allow them and other delegates to learn first hand the reasons and implications for both debtor countries and banks alike behind Citicorp's just announced blockbuster decision to add $3 billion to its loan-loss reserve. Many other financial innovations will be presented and discussed for the first time at the Plaza Hotel by leading figures pioneering the development of new solutions to the on-going global debt crisis. These will include new strategies for debt securitization, the use of the international capital markets for refinancing global debt, and more creative approaches to debt conversion, including swaps and funds. Members of the international banking, financial, and corporate communities should not miss this exciting opportunity to meet leading financial politicians from around the world, and to gain first hand knowledge of new financial techniques and opportunities for dealing with this global financial problem. Call now to guarantee your place at the **Euromoney/Inter-American Development Bank, Global Debt Strategies Conference.**

MAIN SPEAKERS: Henry Kaufman, Chief Economist & Member, Executive Committee, Salomon Brothers Inc; **John W. Ingraham,** Senior Vice President & Member, Credit Policy Committee, Citibank/Citicorp; **Jean Claude Trichet,** President, Paris Club; **Mary Chaves,** Acting Director, Office of International Debt Policy, U.S. Department of the Treasury; **Eugene H. Rotberg,** Vice President & Treasurer, World Bank; **Professor Benjamin M. Friedman,** Professor of Economics, Harvard University; **Michael E. Curtin,** Executive Vice President, Inter-American Development Bank; **Max Watson,** Head of International Capital Markets, International Monetary Fund; **John Heiman,** Vice Chairman, Merrill Lynch Capital Markets; **Ambassador Thomas O. Enders,** Managing Director, Salomon Brothers Inc; **Neil Osborn,** Editor, Euromoney Magazine; **Richard A. Marin,** Managing Director, Bankers Trust Company; **Jay Newman,** Senior Vice President, Shearson Lehman Brothers; **Luis G. Schirano,** Senior Vice President, First Interstate Bank Ltd.; **Lee C. Buchheit,** Partner, Cleary Gottlieb, Steen & Hamilton; **Andrew C. Quale, Jr.,** Partner, Sidley & Austin; **Steven W. Dizard,** Vice President, Salomon Brothers Inc; **Richard E. Omohundro, Jr.,** Managing Director, High Yield Bond Group, Merrill Lynch Capital Markets.

SPECIAL GUESTS: The following officials have confirmed their attendance at the conference: **Cesar Gaviria Trujillo,** Minister of Finance, Colombia; **Dr. Fernando Naranjo,** Minister of Finance, Costa Rica; **Ahmed Bannani,** Governor, Central Bank of Morocco; **Alhaji A. Ahmed,** Governor, Central Bank of Nigeria; **Yavuz Cenevi,** Undersecretary of the Treasury and Foreign Trade, Office of the Prime Minister & Minister of State, Turkey; **Jose Angel Gurria,** Director General of Public Credit, Mexico; **Ariel Buira,** Director of International Organizations and Agreements, Central Bank of Mexico; **Eduardo Lizano,** President, Central Bank of Costa Rica; **Tahar Sioud,** Vice Governor, Central Bank of Tunisia; **Hedi Zar,** Deputy Director, Central Bank of Tunisia; **Dr. Jorge Jimenez,** Head of External Debt, Central Bank of Colombia; **Shee Yul Ryoo,** Director of Exchange Control, Central Bank of Korea; **Dr. Santiago del Puerto,** Ministry of Finance, Argentina; **Galo Perez,** The Development Bank of Ecuador; **Kyung Jae Lee,** Central Bank of Korea; **Romeo Bernardo,** Ministry of Finance, Philippines; **Armando Suratos,** Head of Debt Rescheduling, Central Bank of the Philippines; **Dr. Fernando Montes,** Central Bank of Colombia. This conference is timed to coincide with the IDB interim meeting in Washington. Official delegations from the following countries have also been invited and are expected to attend: **Brazil, Chile, Egypt, Ivory Coast, Peru,** and **Venezuela.**

WORKSHOPS: The following organizations have kindly agreed to host workshops: **Bankers Trust Company, First Interstate Bank Ltd., Merrill Lynch Capital Markets, Salomon Brothers Inc,** and **Shearson Lehman Brothers.**

REGISTRATION: The registration fee of $895 includes two full days of conference and workshops, all supporting conference materials, lunch and refreshments both days at the Plaza Hotel, and full conference transcripts. Send check payable to **EUROMONEY-IDB GLOBAL DEBT CONFERENCE** along with name, title, organization, mailing address and phone number to:

EUROMONEY CONFERENCES

New England Banks Finance A Healthy Real Estate Market

By MICHAEL WEINSTEIN
New England Bureau

BOSTON — To even a casual observer, the sounds of this city are the roar of jackhammers, the rumbling of dump trucks, and the slop of wet concrete.

Construction here in the hub of New England is ubiquitous, fueled by the nation's most prosperous regional economy. And the construction boom has generated strong demand for bank credit.

Over the last few years, commercial real estate loans have grown faster than other kinds of loans at major New England banking companies. And unlike other parts of the country, the forces of supply and demand have ensured a healthy real estate market.

Although some industry observers worry that problems will crop up if the regional economy runs out of steam, commercial real estate in New England has been an attractive market for lenders. The sheer volume of building, spurred by economic growth and recovery from the depressed years of the early and mid-1970s, has ensured strong demand for credit.

"There was a lot of catch-up to be done," said Edwin B. Morris 3rd, who heads up real estate lending at Bank of Boston Corp.

At Hartford National Corp., commercial real estate loans at yearend 1986 were 23.2% of total loans compared to 12.7% two years earlier. And at Bank of New England Corp. these loans were 20.7% of total loans at the end of last year compared to 14.3% two years earlier.

Meanwhile, local zoning laws and Yankee prudence have kept a lid on the supply of office space.

"You have strict zoning in New England," said Gary D. Smith, president of Fleet Real Estate Inc., Providence, R.I. "Ordinances are strict. Town councils are strict. The political machine is strict."

And bankers said that New England builders have been relatively cautious.

"The builders [around] Boston are not going hog-wild like they did in Houston," Mr. Smith said. "The New England marketplace, I think, is a sensible market."

The office vacancy rate in downtown Boston is running about 8%, compared to the national average of 13.5% reported by Cushman & Wakefield Inc., a New York City real estate concern.

Softness in the Suburbs

There is, however, some softness in the office market in certain suburban areas, such as the region between state Highway 128 and Interstate 495 west of Boston.

"You drive along 495, you see empty building after empty building," said James E. Moynihan Jr., senior vice president at Moseley Securities Corp. in Boston.

Some lenders are relying on the region's economic vitality to cure any ills. "We've just had such a terrific market, it's hard to make mistakes," said Leo T. Spang, senior vice president at Provident Institution for Savings, a Boston-based subsidiary of Hartford National Corp.

But in its success, the New England economy may be sowing the seeds of its own decline. Some industry observers worry that problems could crop up in real estate.

"I'm concerned about it," Mr. Moynihan said. "My concern is we've had enormous inflation in real estate values. If there's a slight hiccup up here, there could be severe repercussions."

Rising real estate values have made homes around Boston among the most expensive in the nation, making the region's cost of living too high for many moderate-income people. A labor shortage is hampering growth in parts of New England, according to economists.

"We have a lot of new space coming on percentage-wise," said Oscar Wasserman, senior vice president at First Mutual of Boston, a thrift active in commercial real estate lending. "That space, to be filled, needs people, and it needs people at an affordable cost. We don't have secretaries to fill that space."

Demand for Inexpensive Condos

High housing costs have created intense demand for inexpensive condominiums. "This is a terribly tight market for housing up to about $125,000," said Dick Pollard, vice chairman at BayBanks Inc., Boston, which concentrates on financing condo projects.

There is also strong demand for luxury housing. But industry observers have detected softness in the medium-priced condominium market.

Capitol Bancorp., a Boston-based banking company, last month restated its 1986 results to show a loss of $572,000, reflecting a large increase in its reserve for loan losses due to troubled loans to condominium projects. Initially, the company, with $606 million in assets, reported a $7.7 million profit for 1986.

"We feel in general there's a tremendous slowdown in the [condominium] market," said Karl Walczak, president of Capitol Bank and Trust Co. "We are going to diversify our portfolio, I can assure you that."

Even the most optimistic lenders admit that the cyclical nature of commercial real estate means that problems could emerge when the economy turns down.

House-Senate Conference on Banking Is Likely

By ROBERT M. GARSSON
Washington Bureau

WASHINGTON — A proposed ban on new limited-service banks gained momentum Thursday, as the House Banking Committee voted with only one dissent to direct its chairman to request talks with the Senate on omnibus banking legislation.

A number of committee members, including Chairman Fernand J. St Germain, D-R.I., have expressed opposition to negotiations with the Senate on anything other than a bill to recapitalize the Federal Savings and Loan Insurance Corp.

But Mr. St Germain told the committee on Thursday that the Senate has rejected that approach on two separate votes and would likely do so again.

"In my conversations with members of the Senate, I can tell you they are not going to roll over now and play dead," he said.

A conference is necessary because the Senate has approved an omnibus bill that would, among other things, recapitalize the FSLIC, close the nonbank-bank loophole, impose a moratorium on new bank powers, and authorize interstate takeovers of failing banks.

The House has approved only two bills, an FSLIC rescue and a measure limiting check holds. The different approaches must be reconciled in conference before a bill can be sent to the President.

Committee sources said they now expect Mr. St Germain to go to the full House next week for a vote authorizing a conference with the Senate. If that motion carries, as expected, House conferees would be appointed.

"Our position is keep the process going," said Edward Yingling, chief lobbyist for the American Bankers Association. "The big question for us now is, who will be the conferees?"

The makeup of the House delegation is critical for the banking industry.

A sizable majority of the Senate conferees is almost certain to push hard not only for the ban on nonbank banks — which most of the industry supports — but also for a moratorium on new powers, which the industry generally opposes. That means bankers' hopes of defeating the moratorium rest with the House conferees.

Also complicating the picture is pressure apparently building for an FSLIC measure that authorizes a larger recapitalization than either the $5 billion approved by the House or the $7.5 billion approved by the Senate. A larger amount would be outside the scope

A VIEW FROM OUTSIDE

MARTIN MAYER

The Pilot Bails Out

ABOUT two and a half years ago, I had occasion to listen to a tape of a public meeting of the Federal Reserve Board. The subject under discussion was the board's attempt, later overthrown by a federal appellate court, to write definitions that would make it impossible for a nonbank bank to function.

One proposal defined repurchase agreements on Treasuries as commercial loans. Therefore a consumer bank, to qualify for exemption from Federal Reserve rules under the Bank Holding Company Act of 1970, would have had to eschew not only what are normally regarded as commercial loans but also any dealings in government bonds.

After this proposal was brought forward one could hear a rumble on the tape, like Mount St. Helens getting ready to let go. Soon it became apparent that this rumble was the voice of the chairman.

"We make repurchase agreements all the time," the voice said finally. "We don't consider them commercial loans." Nobody had a more heartfelt feeling that the nonbank bank was bad for the nation's financial system, bad for the Fed, bad for the country — but Paul Volcker wanted to fight fair.

I used to say he was the only honest man in Washington, which was probably a slight exaggeration. His country owes him much, for the quality of his work, in compensation for the personal sacrifices he made in eight years on this job, as a token of respect for all the burnished facets of his incorruptibility; one hopes the

Security Pacific Plans Staff Cuts To Boost Profits

By NINA EASTON
West Coast Bureau

LOS ANGELES — Security Pacific Corp. is cutting its staff and streamlining operations in an attempt to boost earnings in the wake of its planned acquisition of Rainier Bancorp. in Seattle.

The cutbacks are part of an effort by Robert H. Smith, president and chief executive officer of Security Pacific National Bank, to reduce the dilutive effect on earnings caused by the $1.15 billion acquisition. They have sent a chill through the ranks of the 32,000-employee company. "Everybody is nervous," said one industry source.

Last week, two long-time officials on the bank's Los Angeles government relations staff, Marvin J. Benowitz and

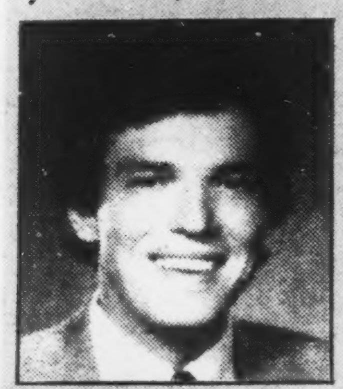
Who's News

It was a matter of timing.

As chief financial officer and developer of a financial services group within Ivan F. Boesky & Co., **Reid Nagle** was very close last winter to acquiring a thrift institution, a property and casualty insurer, and a retail brokerage firm for the Boesky interests. When Mr. Boesky admitted to massive trading violations and his empire disintegrated, Mr. Nagle was left at loose ends.



Reid Nagle

He's tied them all together with the founding of SNL Securities LP, a research firm providing corporate, market, and financial coverage of all publicly traded thrift institutions. Of the largest 300 thrifts in deposits, 177, or 59%, were stock companies at yearend 1986, up from 155 institutions a year earlier. Mr. Nagle has 350 institutions on his list of stock thrifts of all sizes, about which he will produce a research digest on a quarterly basis with monthly market updates.

The report, Mr. Nagle said, is designed for use by investors seeking to "identify market opportunities and misvaluations" within the $30 billion-market. It is also directed at thrift institutions who wish to evaluate their performance against other institutions, at potential thrift acquirers, investment and mortgage bankers, accountants, and lawyers.

Included in each quarterly publication, which begins with this month's issue, are historical standardized GAAP financial information; corporate information about management, bank charters, and states of operations; available research publications; public filings; interstate banking laws; inside and officer stock ownership and trading; price and volume history; and comparative market and financial ratios.

Before his post with Mr. Boesky, Mr. Nagle had been vice chairman, chief administrative and financial officer of City Federal Savings Bank, Bedminster, N.J.

Briefly Noted

Kathleen B. Timberlake of Youngsville, N.C., has been named vice president and manager of North Carolina operations for Margaretten & Co., Perth Amboy, N.J. Ms. Timberlake had been vice president in charge of branch operations for two other mortgage companies.

Sentinel Savings and Loan Association, Phoenix, has appointed **Michael Dickes** vice president for commercial real estate construction lending, and **Bert K. Oster** assistant vice president and commercial construction loan officer. Mr. Dickes was branch manager at the Scottsdale-Shea office of United Bank. Mr. Oster was vice president and commercial loan officer with Great Western Savings.

Michael J. O'Neill has joined Bay View Federal Savings & Loan Association, San Mateo, Calif., as manager of the Lakeside branch in San Francisco. Mr. O'Neill was an account executive for GFC Securities, San Francisco.

The Bowery Savings Bank, New York, has appointed **Arthur C. Thomas** deputy data processing officer and operations manager of the data processing department. Mr. Thomas was an associate director at the New York City Health and Hospitals Corp. Also, **Victor Sung** was named assistant personnel director and manager of compensation in the personnel division. Mr. Sung was manager of compensation programs at Philip Morris Inc.

— **Linda Ellis**

Thrifts' Home Equity Lending Shoots Up

By MARK BASCH

Second-mortgage loans at thrifts averaged 3.27% of all mortgage loans outstanding at yearend, according to an *American Banker* survey, but that ratio could increase in 1987 as the new tax code encourages home owners to take advantage of home equity loans.

A census conducted by the Federal Home Loan Bank of New York of its 274 members indicates that the home equity business was growing rapidly in the first quarter of 1987.

Only 119 of the members were offering home equity loans at yearend 1986, when home equity loans outstanding totaled $1.7 billion. But by the end of the first quarter of this year, 140 thrifts in the district were offering the loans, and the total of home equity loans outstanding was $2.2 billion.

Eugene J. Sherman, chief economist, said "a significant number" of the other thrifts in the district planned to offer home equity loans by the end of 1987. The Home Loan Bank of New York's district includes thrifts in New York, New Jersey, Puerto Rico, and the U.S. Virgin Islands.

Second-Mortgage Leaders
Tables on Pages 14-15

The Tax Reform Act of 1986 maintained full tax deductability of mortgage interest payments, provided that principal amounts do not exceed the initial purchase price of the home plus capital improvements, while eliminating the deductability of other types of consumer loans. Logically, the 1987 totals for second-mortgage loans should increase as consumers seek mortgage-type loans to finance other purchases.

The *American Banker* ranking of second-mortgage loans at all thrifts insured by the Federal Savings and Loan Insurance Corp. defines second-mortgage loans as all mortgage loans secured by junior liens, except where the institution holds all prior liens. The totals include home equity loans and other types of second-mortgage loans, as reported to the Bank Board.

"The reports we get from members do not break down home equity loans," said Mr. Sherman, explaining that the Home Loan Bank of New York obtained its data by sending a survey to its members. All 274 member institutions responded.

The *American Banker* ranking shows that City Federal Savings Bank, Bedminster, N.J., is the nation's top lender in second mortgages, with $771.9 million at the end of 1986. The $10.7 billion-asset thrift's figures for 1985 were not available from the Bank Board, but the annual report of CityFed Financial Corp., the thrift's parent company, said that the company had $813.2 million in second-mortgage loans outstanding at yearend 1985.

Top Thrifts In Second Mortgages

In thousands of dollars

City Federal Savings Bank Elizabeth, N.J.	$771,856
Citicorp Savings of Florida Miami	$557,380
Sears Savings Bank Glendale, Calif.	$435,183
Western Federal Savings & Loan Dallas	$366,577
American Savings & Loan Assn. Stockton, Calif.	$346,002

Another interesting finding of the survey is that the Essex Savings Bank Inc., Elizabeth City, N.C., has almost 90% of its total mortgage loans outstanding in second-mortgage loans. The $112 million-asset thrift had $81.8 million in second-mortgage loans outstanding as of yearend. Essex officials could not be reached for comment on their unique loan portfolio.

Goldome Savings Association, St. Petersburg, Fla., showed the highest percentage gain in second-mortgage loans, as its total jumped from only $491,000 at yearend 1985 to $119.2 million at yearend 1986. But the increase occurred because the Florida division of Goldome FSB, based in Buffalo, N.Y., purchased most of the loans from another Goldome affiliate in a transaction that took place at yearend, according to Jim Suskiewich, senior vice president of lending at the Florida division.

The total of second-mortgage loans at the top 200 lenders of these loans represented 3.27% of all mortgage loans outstanding at those institutions at yearend. Mr. Sherman's data from the Home Loan Bank of New York showed that home equity loans alone amounted to 3.26% of all mortgage loans of its members at the end of March.

Mr. Sherman said that by extrapolating his data to all 12 Federal Home Loan Bank districts, he estimates that thrifts nationwide have a total of $15.2 billion in home equity loans outstanding. The Bank Board said that FSLIC-insured thrifts had a total of $14.6 billion in second-mortgage loans outstanding at yearend 1986.

While the actual figures may vary widely, Mr. Sherman said, his figure for the New York district "suggests home equity loans outstanding of $23.4 billion nationwide among thrifts and commercial banks."

Other data from the census shows that borrowers had used just over 55% of their credit lines extended in March, and that 92.3% of the loans outstanding had variable rates.

Mr. Sherman said that while the number of thrifts offering home equity loans should increase in the near future, the recent increase in interest rates will discourage potential borrowers, so the total of home equity loans will not increase as rapidly. "The economics of it say no," he said. ■

Miami Thrift Plans Conversion

Financial Federal Savings and Loan Association, Miami, and Collier Financial Holding Co. announced Thursday an agreement in principle to convert Financial Federal from a mutual to a stock association, with Collier buying at least 80% of the newly issued stock. Customers of the thrift would be given the opportunity to buy the other 20%. Collier Financial Holding Co. is a subsidiary of Collier Enterprises. ■

Mortgage Securities Drop in Sell-Off Following Volcker Announcement

Mortgage securities dealers reacted to news of Paul A. Volcker's pending departure as chairman of the Federal Reserve Board by staging an extensive sell-off, driving prices down by about 1½ points Tuesday, the day Mr. Volcker's decision was announced.

Mortgage Markets

Traders and analysts said the market's reaction stemmed from possibly unfounded fears that Mr. Volcker's successor, Alan Greenspan, the former chairman of economic advisors under President Gerald Ford, would not be as strict on inflation as Mr. Volcker had been.

"Mortgages are getting hammered," said one trader, who added that some thrift institutions and a small number of other investors had also entered the selling fray. But he, like other traders, emphasized that most of the selling was by dealers, who seemed to have been caught holding excess inventory prior to Tuesday's plunge.

One veteran mortgage securities trader noted that mortgages fared better than did Treasuries Tuesday, as some investors actually bought securities. He pointed to the narrower yield spreads of mortgages to Treasuries as evidence. "Spreads actually tightened by about five basis points," he said, adding, "I think its just people looking to bottompick."

Mortgage securities prices rebounded Wednesday, however, closing as much as 1⅛/points higher.

All data are from the Quarterly Financial Report to the Federal Home Loan Bank Board for FSLIC-insured institutions and were provided by **ADP Data Services Division, New York**, from their data base of FHLBB data. **Second Mortgage Loans** are all mortgage loans secured by junior liens, except those where the institution holds all prior liens. **Total Mortgage Loans** are the unpaid balance of all mortgage loans and contracts held as assets of the bank. Included are first and second mortgages and mortgage-backed pass-through securities. **Ratio:2nd Mtg. Loans/Total** is second mortgage loans expressed as a percentage of the institution's total mortgage loans and contracts. **N.A.— Not available.**

Top 200 Thrifts in Second Mortgage Loans

Dec. 31, 1986 Compared with Dec. 31, 1985 (Thousands of Dollars)

Compiled by American Banker Copyright 1987

Securities Gains Help Boost Midwest Banks' Performance

By RICHARD RINGER
Midwest Bureau

CHICAGO — Despite record numbers of failures, higher-than-normal problem loans and loss provisions, and an increase in the number of institutions losing money, Midwest banks on average outperformed banks in the rest of the country last year. But the manner in which some of them accomplished this feat indicates fundamental weakness.

The surprising findings are documented in a report published recently by three research analysts at the Federal Reserve Bank of Chicago — George M. Gregorash, manager of banking industry studies in the Chicago Fed's supervision and regulation department, and senior analysts Eileen P. Maloney and Donald H. Wilson.

Ranking bank performance according to return on assets, a key gauge, the analysts showed that Midwest banks last year fared slightly better than the average for banks nationwide. Tallying data from bank call reports, the study found that Midwest banks earned 69 cents for each $100 of assets, while the the average for banks nationwide was

BankAmerica Says Loan-Reserve Hike Won't Force Other Drastic Measures

By MICHAEL A. ROBINSON
West Coast Bureau

SAN FRANCISCO — Despite their decision to boost loan-loss reserves by $1.1 billion, BankAmerica Corp. officials insisted they will not be forced to sell their Seafirst Corp. subsidiary or undertake similar drastic measures.

Nevertheless, Frank N. Newman, vice chairman and chief financial officer, said BankAmerica will continue to sell assets this year, which could drop the company from its current ranking as the nation's second largest bank to No. 3, behind Citibank and Chase Manhattan.

"Why should this force us to do anything?" Mr. Newman said in an interview shortly after BankAmerica disclosed Monday it is increasing reserves and will lose $1 billion in the current quarter, and an unspecified amount for the full year.

"We are just continuing on with our program of turning the company around, which we think is headed in the right direction," Mr. Newman said. "This really just is moving one form of primary capital to another. It shouldn't force us to do anything we wouldn't have done otherwise."

BankAmerica had total assets of $99

Chrysler Passes Ford as No. 2 Finance Firm

GMAC Is Still Largest, Based on Capital Funds

By L. MICHAEL CACACE

NEW YORK — Chrysler Financial Corp., the financing arm of Chrysler Corp., has surpassed Ford Motor Credit Co., as the nation's second largest finance company in capital funds. Ford Motor Credit, which had trailed General Motors Acceptance Corp. for 14 years, moved down one notch to rank third.

Chrysler Financial Corp., which is based in Troy, Mich., had total capital funds of $3.72 billion on Dec. 31, 1986, up 33% from $2.79 billion a year ago. Ford Motor Credit Co. — the financing arm of the Ford Motor Co., based in Dearborn, Mich. — had $3.28 billion in total capital funds at yearend, up barely from $3.27 billion the year before.

GMAC — the Detroit-based financing arm of General Motors Corp. — remained in first place with $7.21 billion in capital funds on Dec. 31, up 10% from $6.56 billion a year earlier.

Total capital funds — the yardstick used to compare the relative size of finance companies — is the sum of

Chrysler Passes Ford to Become Second Largest Finance Firm

➼ Continued from Page 1

stockholders' equity and noncurrent subordinated debt. Stockholders' equity is the sum of capital plus surplus. Noncurrent subordinated debt is subordinated debt with a remaining maturity of more than one year.

The primary reason for the sharp gain in total capital at Chrysler Financial last year was the issuance of $750 million in subordinated debt. Chrysler Financial had stockholders' equity of $1.97 billion on Dec. 31, 1986, up 11.3% from $1.77 billion a year earlier. But subordinated debt soared 75% last year to $1.75 billion from $1 billion in 1985 and accounted for 80% of the gain in total capital funds.

These are some of the findings of the *American Banker*'s 37th annual survey of the finance company industry. The *American Banker* ranks the 100 largest firms in order of their total capital funds as of Dec. 31, 1986. The list appears on page 14. Last year's listing was expanded to include finance companies primarily engaged in leasing activities.

Several large companies, which would have ranked among the top 100, refused to provide data for this year's survey. For this reason, only the top 100 firms in capital funds are reported, and a breakdown of the top 100 companies by income, net receivables, and assets is not provided this year.

Chrysler Financial Corp.'s financial statements show that the company last year issued about $245 million in junior subordinated notes at an average rate of 7% and more than $500 million in senior subordinated debt at average rates ranging from 6.9% to 9.2%. These relatively inexpensive funds were used to finance Chrysler's continued expansion.

Table of Top 100 Finance Companies
Page 14

According to Chrysler Financial Corp.'s annual report, last year "Chrysler Credit began a $75 million investment in new technology to improve the efficiency of its branch and home office operations." In addition, a subsidiary company, Chrysler First Inc. — the former FinanceAmerica Corp., Allentown, Pa., acquired by Chrysler Financial in 1985 — "acquired the inventory financing division of Westinghouse Credit Corp." last year.

Another subsidiary, Chrysler Capital Corp. — the former E.F. Hutton Credit Corp., Greenwich, Conn., also acquired by Chrysler Financial in 1985 — "broadened its range of financial products and increased its outstandings by 77% during the year."

At the end of 1972, Chrysler Financial was the seventh largest finance company in the U.S. with $537 million in capital funds. In 1981, it slipped to 12th place in the rankings, with capital funds of $894 million, and remained in 12th position in 1982 and 1983, reflecting its parent's financial problems.

As its parent recovered, Chrysler Financial moved up to sixth position in the rankings with $1.4 billion in capital funds in 1984. Boosted by the two major acquisitions mentioned above, capital funds almost doubled to $2.7 billion on Dec. 31, 1985.

Other Survey Findings

The largest newcomer to the listing of the nation's top 100 finance companies is IBM Credit Corp., Greenwich, Conn. The company is a captive firm founded in 1981 by its parent, IBM Corp., Armonk, N.Y. IBM Credit ranks as the fourth largest finance company in the U.S. with total capital funds of $2.96 billion, up 5.7% from the year before.

IBM Credit chose not to participate in the 1986 survey. Had IBM Credit provided data last year, it would have ranked as the third largest finance company with total capital funds of $2.8 billion on Dec. 31, 1985.

Captive companies are those whose main function is financing sales of their parent's products or services. This year, 33 such companies appear in the listing.

There were three other newcomers this year. Nissan Motor Acceptance Co., Carson, Calif., ranked 41st, with capital funds of $202.9 million. The company is a captive firm owned by Nissan Motor Corp. in the U.S. At year-end, Nissan Motor Acceptance had net receivables totaling $744 million. Of this total, $550 million were consumer receivables and $194 million were commercial receivables.

Another newcomer was 58th-ranked

Freedom Reduces Costs, Sells Unit

Special to the American Banker

TAMPA, Fla. — Battling to stay afloat until it can find a buyer, Freedom Savings and Loan Association has taken several steps to reduce its overall operating costs.

The Tampa-based thrift had a negative net worth of $80.9 million as of March 31 and needs an infusion of capital to keep its doors open. But company officials say it has not found a buyer.

"We are still holding discussions with potential investors but have nothing to report at this time," said Robert Garrison, vice president in charge of communications.

However, Freedom closed the sale of its mortgage-servicing operation and two loan production offices to Chase Home Mortgage Corp. on June 1. Mr. Garrison said the company would show a profit of $13.5 million from the sale.

The company also closed three branches that it said overlapped with other offices.

In addition, Freedom will save approximately $1.25 million annually in rent by consolidating office space, Mr. Garrison said.

In its mortgage-servicing subsidiary, Freedom will retain four offices in its primary markets of Tampa and Orlando. Chase takes over offices in Fort Myers and Atlanta.

Along with the offices, the subsidiary of Chase Manhattan Corp. also purchased the servicing rights to a loan portfolio of approximately $900 million and mortgage loan inventory of $8 million.

Freedom will take $9.5 million of the profit from the sale in the quarter ending June 30, Mr. Garrison said. The remaining $4 million will be spread out over the life of the loan portfolio, he said. ■

NO PARKING

No two banks are alike. They might look alike on the balance sheet, but in reality they can be very different. And when it comes to a merger, acquisition or sale the differences are critical in maximizing shareholder value.

As a leader in correspondent banking, Chase understands this far better than any traditional investment bank.

When consulting with you, Chase doesn't just do it by phone and mail you a glossy study. They have teams of corporate finance advisors dedicated to bank mergers and acquisitions who know the importance of going beyond your balance sheet. They will visit your offices. And work with you to determine the effects of factors that don't show up on a balance sheet. Such as credit policy, funding, hedging strategies, tax implications and capital structure. They'll even visit each of your branches because, bankers themselves, they understand the role of brick and mortar in valuation, from branch location and appearance to community growth potential.

Taking all these factors into consideration

U S West Financial Services Inc., Englewood, Colo., with $97.5 million in capital funds. U S West Financial is a leasing company affiliate of U S West Inc. The company was incorporated in January 1984. Until August 1985, it was a captive finance company of its parent, limited by "line of business restrictions" contained in a decree between American Telephone and Telegraph Co. and the United States Department of Justice.

In August 1985, the Justice Department granted the company a "line of business waiver." This allows U S West Financial to compete in the general business and public marketplace, but it may not provide financial services to any telephone company owned by U S West or any other telephone or interexchange carrier, information services provider, or telecommunications manufacturer.

The fourth newcomer is Unisys Finance Corp., Detroit, which ranked 66th with $62.8 million in capital funds. It is a captive company primarily engaged in leasing. Its parent is Unisys Corp., Detroit, which was formed in September 1986 by the merger of Sperry Corp. with Burroughs Corp.

Seven firms that ranked among the top 100 in 1985 did not submit data for the current survey. They are listed below in alphabetical order.

Allied Stores Credit Corp., New York, ranked 66th with $63.4 million in capital funds on Dec. 31, 1985; Amca International Finance Corp., Brookfield, Wis., ranked 74th with $55.5 million; Bank of New England Commercial Finance Corp., Boston, ranked 77th with $46.0 million; Chase Manhattan Leasing Co., Englewood Cliffs, N.J., ranked 26th with $462 million; Clark Equipment Credit Corp., Buchanan, Mich., ranked 33d with $268 million; Maryland National Affiliates Corp., Baltimore, ranked 63d with $74.6 million; and Sunoco Credit Corp., Wilmington, Del., ranked 47th with $152 million.

Clark Equipment Credit Corp. was acquired by Chase Manhattan Corp. in the first quarter of 1987 and made part of Chase Manhattan Leasing Co. Chase forbade Clark to release its yearend 1986 results for the survey.

In addition to these seven companies, for the third year in a row Citicorp Person-to-Person Inc., St. Louis, which was the largest bank-related finance company in the nation with capital funds of $614 million on Dec. 31, 1983, refused to participate in the survey.

Another Chase subsidiary, Chase U.S. Consumer Services Inc., Newark, Del., refused to participate in this year's survey. Chase U.S. Consumer Services had $46.3 million in capital funds on Dec. 31, 1985, and would have ranked 78th among the top 100 firms of 1985 if its data had been made available for last year's survey. ■

Top 100 Finance Companies: Summary Statistics

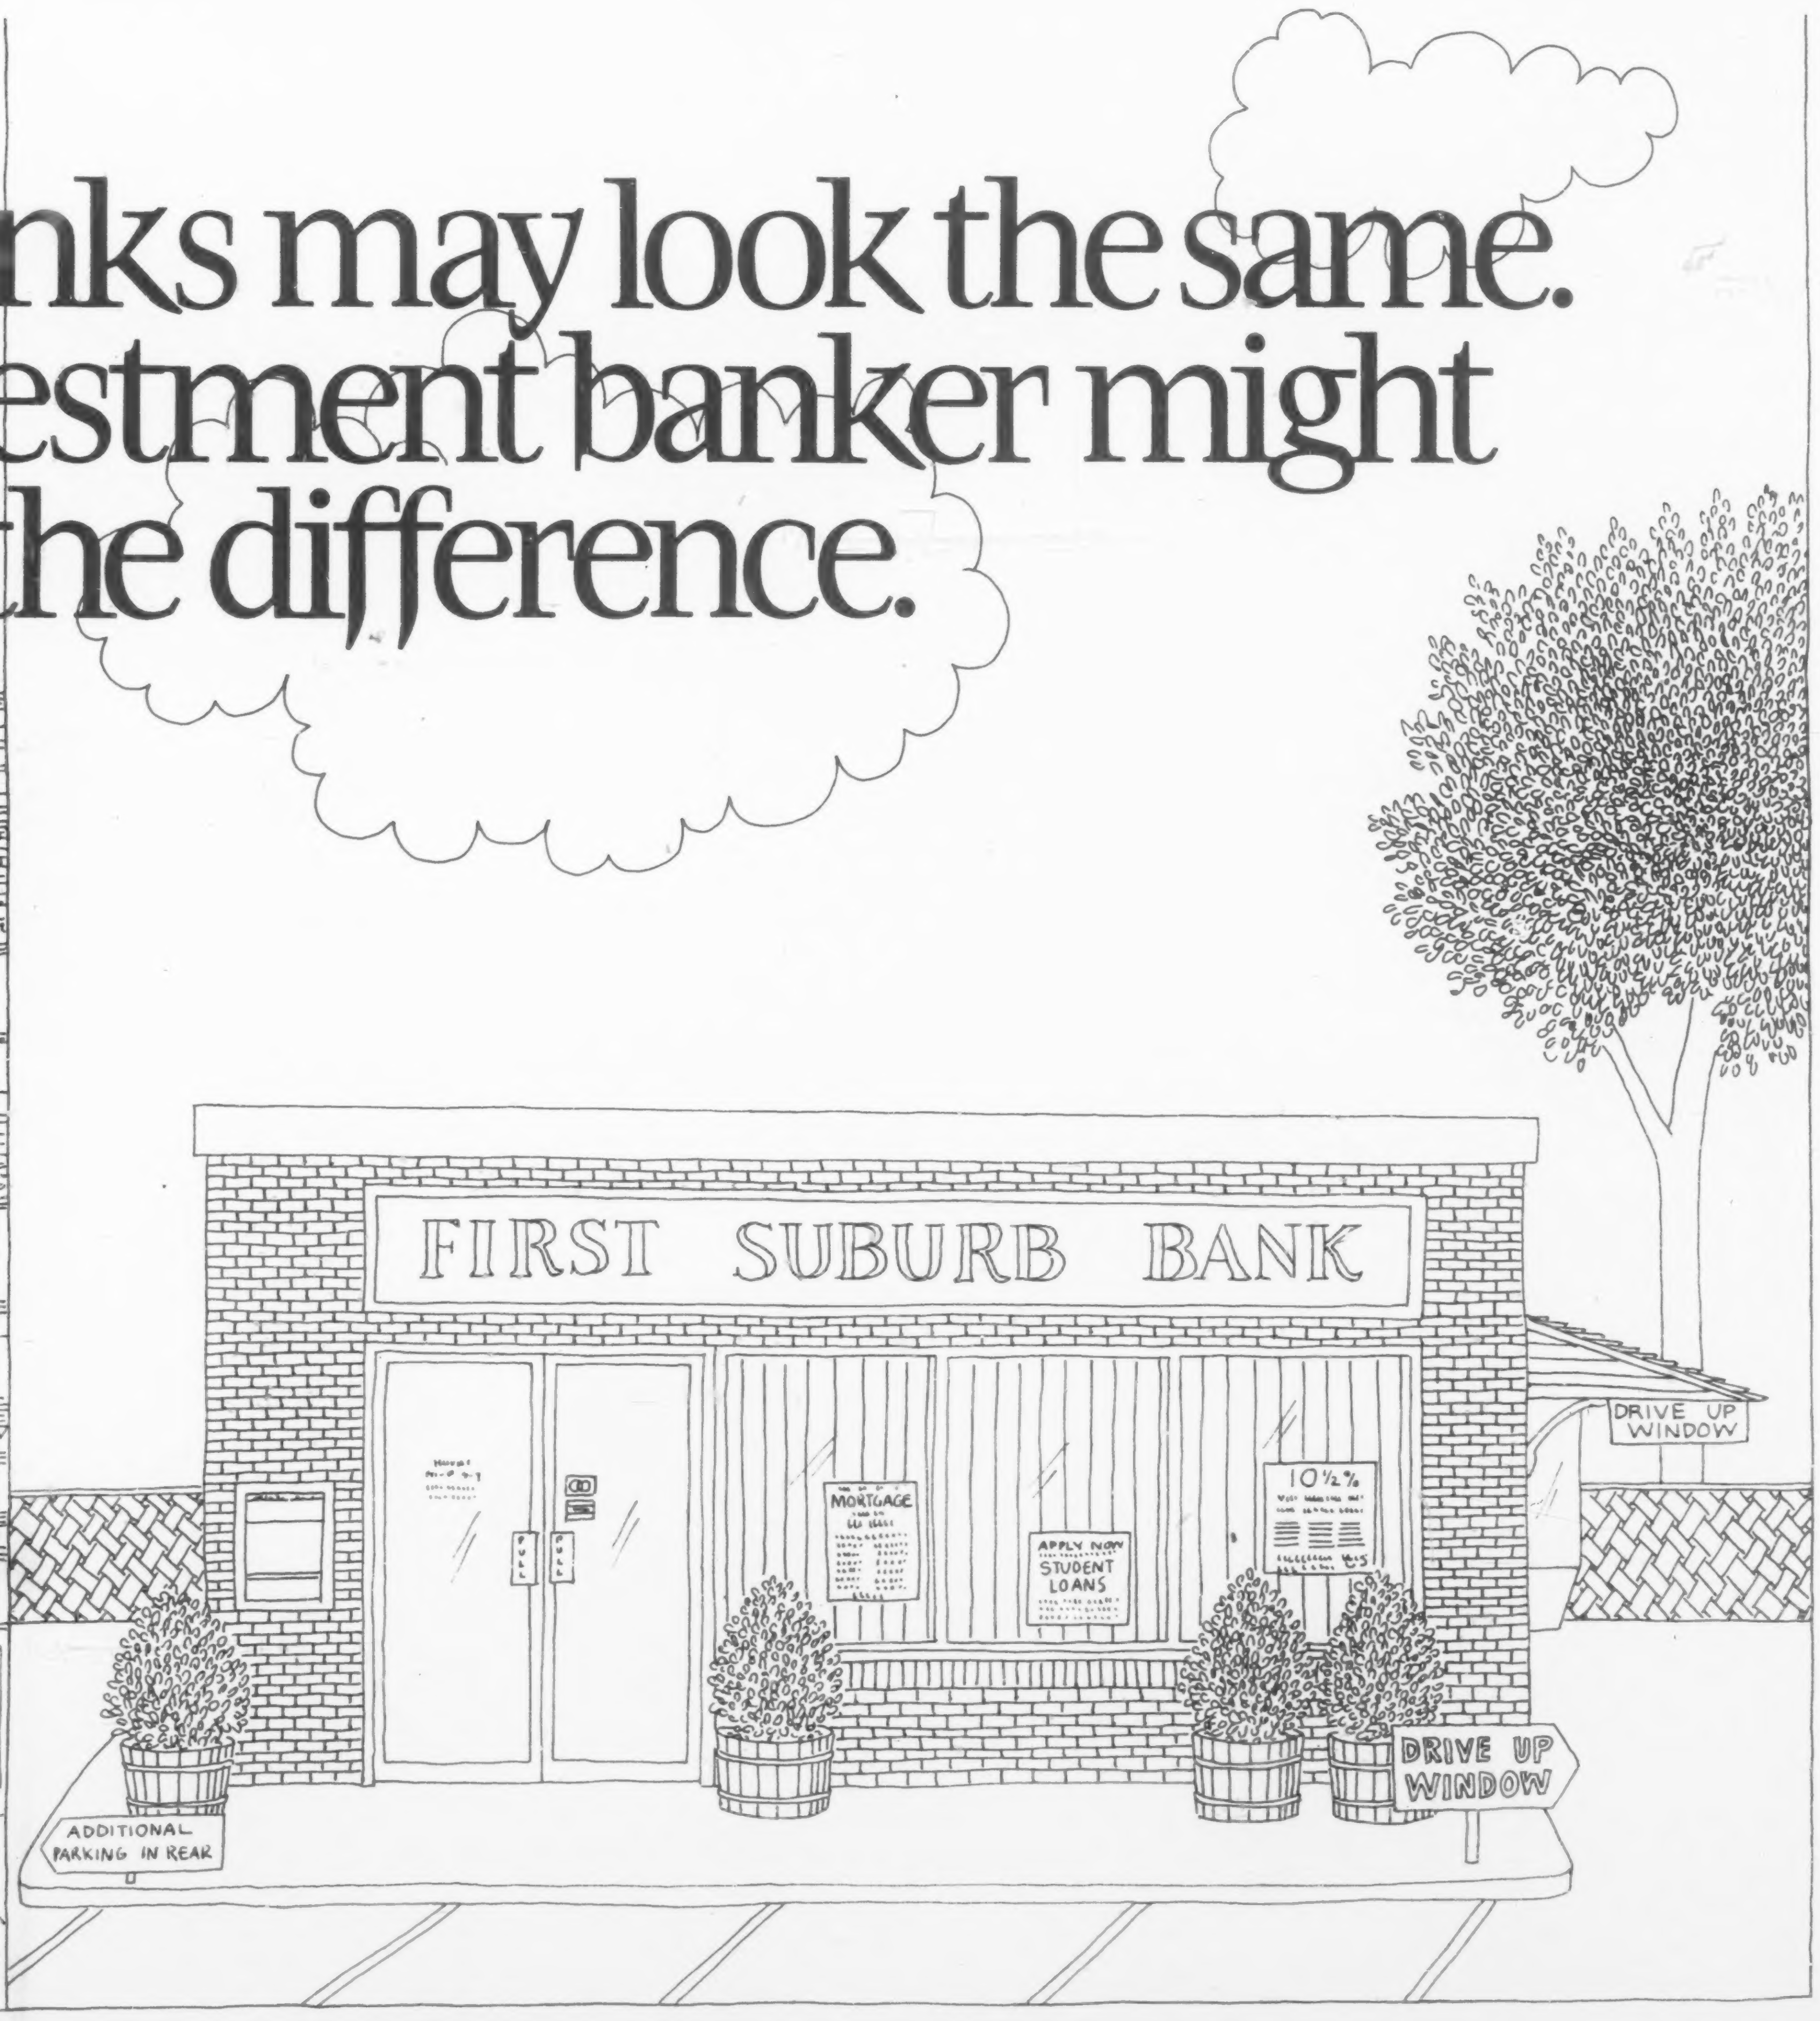
[1] Captive firms are those whose main activity consists of financing sales of their parent firm's product or services. [2] Affiliated firms are subsidiaries of other companies, but are not captive. [3] A component of independent and affiliated companies.



they will help you identify your strengths and weaknesses, and show you how you can turn them into opportunities for increased shareholder value. They'll advise you in the development of alternative strategies. And will provide the information you need to make the right decisions. Including a recommendation to not enter into a buy or sell position if inappropriate.

However, should a merger, acquisition or sale be right, Chase can manage the execution quickly and efficiently. They can even help you find the best 'match.' Because as a leader in correspondent banking, Chase has built an extensive network from which to readily target the right candidates.

Clearly, the value of your bank goes beyond your balance sheet. Combining its corporate finance and M&A expertise with nearly 200 years in the banking business, Chase is uniquely qualified to help you identify the opportunities that will make the difference. For more information call Mary Small, Managing Director, (212) 552-3901.

Survey is based on responses to American Banker questionnaire sent to commercial and consumer finance companies and leasing companies. Please note that several large companies— that would have ranked among the top 100— refused to provide data. For this reason, no breakdown of the top 100 companies by income, net receivables, and assets is provided this year. Capital funds consist of stockholders' equity plus non-current, subordinated debt. Minority interest is excluded. **(b)**— Year ending on date other than Dec. 31. **(c)**— Current year's figures are for a date different from preceding year. **(e)**— Net income is before extraordinary items. **(f)**— Gross receivables acquired during the year. **(g)**— A subsidiary of a domestic commercial or saving bank organization. **(k)**— Bank credit available plus in use. Please note that many bank-related finance companies report zero for bank credit lines because they are funded by their parent company. **(m)**— Foreign bank-related. **(‡)**— Rank firm would have had, if it had been included in survey. **(†)**— Data are for one month only. Crossland Savings Bank FSB, Brooklyn, New York, purchased FMC Finance Corp., on Dec. 1, 1986. **( )**— Deficit. **N.A.** — Not available.

Seidman Lauds Banks' Reserve Additions

But Allows Action Could Wipe Out 2nd-Quarter Earnings

By BARBARA A. REHM
Washington Bureau

WASHINGTON — The recent spate of additions to loan-loss reserves by the nation's biggest banks could wipe out aggregate net earnings for the industry in the second quarter, the Federal Deposit Insurance Corp. said Monday. The losses could set quarterly records.

L. William Seidman

However, the lack of additions to loan-loss reserves also played a big part in making record earning increases possible in the first quarter, according to the agency's *Quarterly Banking Profile.*

In an interview last Friday, FDIC Chairman L. William Seidman applauded the banks for making additions to loan-loss reserves. The recent add-ons by 10 banks totaled $9.17 billion. "It's all for the good," he said. "The market had already put these reserves in place in valuing the stocks."

Commercial banks earned $5.3 billion in the first quarter, up 4.4% from the same period of 1986. "A major reason for this improvement was a 12.7% decline in loan-loss provisions," the report stated. Seventy percent of that falloff took place at large Southwest banks that had made huge additions to loan-loss reserves in the first quarter of 1986.

After the roller coaster of record earnings in the first quarter and expected record declines in earnings for the second quarter, the FDIC predicted that the banking industry's fortunes would improve in the second half of 1987 because less cash will be needed to cover soured loans.

While Mr. Seidman favored the loan-loss additions, he questioned the effect the larger loan-loss reserves would have on banks' negotiations with Third World debtor countries. "The decision is still out."

Uncertainty also surrounds the issue of whether reserves for loan losses should be considered part of primary capital. "It [the huge reserve addition] does call into question

Banks Spend Heavily on Losing Candidates

Over One-Third of Funds Go for Failed Campaigns

By BART FRAUST

AN American Banker SPECIAL REPORT

NEW YORK — Everybody loves a winner, nobody loves a loser — except the nation's largest commercial banks.

Federal Election Commission reports show that more than one-third of the money contributed by political action committees of the 10 largest banks to U.S. Senate candidates in 1985 and 1986 went to individuals who later were defeated in primaries or elections.

In fact, the Senate candidate who received the most money from the individual bank political action committees was Slade Gorton, the Washington Republican who lost his reelection bid last year to Democrat Brock Adams. Mr. Adams did not get any funds from the political action committees of the 10 banks, the reports show. Mr. Gorton was a member of the Senate Banking Committee.

Other Senate losers who got big bucks were Mack Mattingly of Georgia, Ed Zschau of California, James S. Abdnor of South Dakota, and Mark N. Andrews of North Dakota — all Republicans. Mr. Mattingly was a Banking Committee member.

Of the 11 Senate candidates who received the most money, five lost their election bid.

Senate Spending

The top 10 bank political action committees last year contributed $480,963 to 83 senators and candidates. Sponsors of these PACs are listed below, with 1986 Senate spending.

	Contributions
J.P. Morgan & Co.	$124,000
Citicorp	103,143
BankAmerica Corp.	49,025
Manufacturers Hanover Corp.	44,604
Chase Manhattan Corp.	33,200
Chemical New York Corp.	31,333
Bankers Trust New York Corp.	28,000
Security Pacific Corp.	23,500
First Chicago Corp.	22,500
First Interstate Bancorp	21,658

A. Wright Elliott, the chairman of Chase Manhattan Corp.'s political action committee, described the results as surprising, but he added that the

Banks Spend Heavily to Support Losing Candidates

➻ Continued from Page 1

most recent election was "one of those unusual years." Several races were very close, with the winners in eight races being decided by margins of victory of less than two percentage points, he said.

Mr. Elliott, who is also an executive vice president at Chase, noted that the securities industry outspends banking by an enormous amount. Asked whether this affects the success or failure of the banks' congressional lobbying efforts, he said, "We think that, philosophically, you have to vote for people who support the free-market system. That may be naive, but that's how we operate."

Reports were obtained from the Federal Election Commission for political action committees of the 10 largest bank holding companies: Citicorp, the BankAmerica Corp., the Chase Manhattan Corp., Manufacturers Hanover Corp., J.P. Morgan & Co., the Chemical New York Corp., the Security Pacific Corp., Bankers Trust New York Corp., the First Interstate Bancorp, and the First Chicago Corp. The reports cover two years' worth of contributions.

Under federal law, corporations are prohibited from making direct contributions to candidates for President, the Senate, or the House. However, corporate officers are permitted to contribute up to $5,000 a year to political action committees formed by their companies.

Such committees are under fire, with critics charging that they constitute federally sanctioned mechanisms enabling corporations to buy influence with politicians. The Senate currently is debating proposed legislation to limit spending by these committees.

Governing panels of the political action committees at the individual companies decide where the money will go. The councils comprise officers from throughout the corporation. For example, Chase's political action committee council includes a treasurer and representatives from its corporate communications, individual banking, trading and securities, and public policy groups. Participants may earmark funds for particular candidates.

Besides contributing to candidates, the political action committees also allocate funds to trade group PACs, such as the one administered by the American Bankers Association.

Citicorp says that before it makes a contribution, it has candidates screened by the political action committee governing panel, executives, political strategists, and the corporation's representatives in Washington, Albany, and other state capitals.

At least 60% of Citicorp political action committee funds not earmarked by contributors go to political figures who have demonstrated "a constructive attitude on issues related to our theme of competition and deregulation," according to a brochure put out by Citicorp's PAC.

The rest of the nonearmarked monies are distributed to politicians who have requested funds. "This gives us the opportunity to present Citicorp's views to legislators who have not always shared our philosophy," the brochure states.

In total, political action committees for the 10 banks contributed $1.135 million to 1,078 Senate and House candidates in 1985 and 1986.

Citicorp Leads the Pack

Citicorp was the leader, contributing $302,514 to 184 candidates, the reports show. However, J.P. Morgan & Co. was the most generous of the banks, giving an average of $1,982.57 to 109 candidates. Citicorp's average was $1,644.10, the second highest among the 10 banks.

First Interstate was least active. Federal Election Commission reports show that the company's political contributions are divided among six political action committees: one administered by the holding company, the others by bank subsidiaries in California, Colorado, Oregon, Washington State, and Nevada.

The First Interstate political action committees contributed a total of $44,133 to 63 candidates, or an average of $700.52.

As a group, the banks contributed more money to Republicans than to Democrats. The political action committees gave $643,402 to 555 Republican candidates. This amount represented 56.7% of the total paid out by the PACs to individual candidates.

A total of 522 Democrats received $491,653, or 43.3% of the total. One candidate not affiliated with either major party got $500, or less than 1%.

The average contribution was $217.42 higher for Republicans than for Democrats: a total of $1,159.28 against a total of $941.86.

The average contribution was higher for Republicans than for Democrats at nine of the 10 banks. The one exception was First Chicago, which on average contributed $34.98 more to Democrats than to Republicans.

At Morgan, Republican candidates received $678.43 on average more than Democrats. Security Pacific contributed three times as much to Republicans as to Democrats. Among banks with pro-Republican tilts, Manufacturers Hanover had the thinnest margin between candidates of the two parties: $39.46.

Total Contributions: Senate Candidates

	No. of Recipients	Amount of Contributions	Average Contribution	% of Total For Top 10
Republicans	42	$325,708	$7,755	67.7%
Democrats	41	155,255	3,787	32.3
TOTAL	83	480,963	5,795	42.4%

Total Contributions: House Candidates

	No. of Recipients	Amount of Contributions	Average Contribution	% of Total For Top 10
Republicans	513	$317,694	$619	48.5%
Democrats	481	336,398	699	51.4
Other	1	500	500	0.1
TOTAL	995	$654,592	$658	57.6%

Republican candidates got 67.2%, or more than two-thirds, of the money allocated to campaigns for the Senate. Senate contributions accounted for 42.4% of the total.

The top 11 recipients got 53.5% of the money committed to Senate candidates. Mr. Gorton led with 8.6% of the Senate total; Sen. E.J. "Jake" Garn, the Utah Republican who until last year was chairman of the Senate Banking Committee, was second, with 7.9%; and Sen. Daniel Patrick Moynihan Jr., D-N.Y., followed with 6.8%.

The other candidates in the top 11 were: Mr. Mattingly with 6.1%; Mr. Zschau with 4.6%; Sen. Alan J. Dixon, D-Ill., with 4.5%; former Sen. Abdnor, R-S.D., with 3.4%; Sen. Bob Packwood, R-Ore., with 3.1%; Sen. Arlen Specter, R-Pa., with 2.9%; and former Sen. Andrews, R-N.D., and Sen. Alfonse M. D'Amato, R-N.Y., shared 10th place with 2.8%.

Mr. Abdnor was the favorite of the Citicorp political action committee, receiving 9.7% of its Senate contribution. Mr. Moynihan was clearly Chemical's favorite, getting 19.5% of its Senate monies. He also was the top money recipient at Morgan, taking in 8.1% of its contributions.

Mr. Garn got top money from Chase and Manufacturers Hanover, pulling in 15.1% of Chase's Senate contribution and 13.5% of Manufacturers Hanover's. Bank of America allocated 15.7% of its Senate contributions to Mr. Gorton, and Security Pacific gave him 10.6% of its Senate total.

Mr. Dixon received 31.1% of First Chicago's Senate campaign outlays, Mr. Mattingly 17.9% of Bankers Trust's, and Mr. Zschau 19.9% of First Interstate's.

While Citicorp was the most generous donor to federal elections overall, Morgan was the leading contributor to Senate campaigns. Morgan doled out $124,000 to Senate campaigns, compared with Citicorp's $103,143.

The election reports also show that although banks backed Senate winners by a 32-to-14 clip in the 1986 elections, losers captured 35.5% of the total funds expended on Senate campaigns.

On the House Side

In the House campaigns, the individual bank political action committees contributed to more Republicans than Democrats. However, the total and average contributions were higher for Democrats than Republicans.

A total of 513 Republican House candidates received $317,694, or

PAC: Page 19 ➻

Brokerage Houses Vie with Banks in Backing Politicians

NEW YORK — While Ed Zschau, the Republican senatorial candidate in California, was raking in bank political action committee money last year, his victorious opponent, incumbent Alan Cranston, D-Calif., was the big money recipient from the committees of Merrill Lynch, First Boston, and Salomon Brothers.

Mr. Cranston, who was not among the top money getters from the political action committees of the nation's 10 largest banks, is a member of the Senate Banking Committee.

In fact, Mr. Cranston was the Senate leader in contributions from the Merrill, First Boston, and Salomon Brothers political action committees, Federal Election Commission reports covering 1985 and 1986 show. He narrowly edged out Mr. Zschau in the general election.

Other top recipients from these securities houses were Sen. Donald W. Riegle Jr., D-Mich.; Sen. Timothy E. Wirth, D-Colo.; Sen. Christopher J. Dodd, D-Conn.; and Sen. Dan Quayle, R-Ind.

In total, political action committees from the three securities houses pumped in $357,450 to 315 House and Senate campaigns in 1985 and 1986, the reports show. Of the total, 166 Democrats got $190,550, or 53.3%, and 149 Republicans received $166,900, or 46.7%.

During the same period, political action committees of the 10 largest banks contributed 56.7% of the House and Senate outlays to Republicans and 43.3% to Democrats.

Among the three firms, First Boston had the greatest Democratic tilt, allocating 71.9% of its House and Senate contributions to Democrats. Merrill Lynch had the greatest Republican slant, with 56.3% of its funds going to Republican candidates. Salomon Brothers gave 54.4% of its Senate and House outlays to Democratic hopefuls.

The average contribution from the three securities firms was $1,135, compared with $1,053 for the 10 largest banks.

If the three securities firms were ranked with the 10 largest banks in terms of number contributions, Merrill Lynch would rank third behind Citicorp and Morgan, First Boston fifth, and Salomon ninth. By average contributions, Salomon would have ranked third, Merrill fifth, and First Boston sixth.

The Bond Buyer Municipal Bond Index

	June 15, '87	June 12, '87	June 7, '87
Index	91.08	90.25	88.21
Yield to Par Call	8.31	8.37	8.68
Yield to Maturity	7.99	8.03	8.25

The Bond Buyer Municipal Bond Index was designed by the Chicago Board of Trade to serve as the basis for trading Long-Term Municipal Bond futures contracts when approved by the Commodity Futures Trading Commission. The Index represents an average of the figures obtained when the price of each of 40 select term bonds is divided by a figure derived from the amount at which the bond would be priced to yield 8%. In all computations, the maturity of a bond is represented by its first call at par. The Index is computed daily and is quoted in points and 32nds.

Farm Loans . . .

➸ Continued from Page 3

remain with their agricultural borrowers in light of governmental efforts to tie lenders' hands in working through problem loans."

BankAmerica Corp., based in San Francisco, is the one of the largest agricultural lenders in the nation. In 1986, BankAmerica Corp.'s problem agricultural loans inched up to 18% of its total farm loans, from 16% the previous year. Total problem farm loans at BankAmerica totaled $209 million last year, according to the company's financial reports.

In releasing the survey, the California Bankers Association called on Congress to adopt legislation creating a secondary market for agricultural real estate loans. Sen. David Pryor, D-Ark., and Sen. Thad Cochran, R-Miss., have introduced such a bill in the U.S. Senate. ■

Banks Are Big Contributors to Losing Candidates

➸ Continued from Page 18

48.5% of the total spent on House elections. Four hundred and eighty-one Democrats got $336,398, or 51.4% of the total.

Citicorp was by far the biggest House contributor, pouring $199,371 into those elections. This was more than double the House expenditures of Morgan, which has the No. 2 bank political action committee.

The House money was disbursed widely. Rep. George C. Wortley, a New York Republican and House Banking Committee member, got more money than any other candidate. Mr. Wortley received $25,825, or 3.9% of the total given to House candidates.

Close on Mr. Wortley's heels was Rep. Stephen L. Neal, a North Carolina Democrat and Banking Committee member, who got $25.500. Other big recipients were Rep. Joseph J. Dioguardi, R-N.Y., with $17,500; Rep. Doug Barnard Jr., a Georgia Democrat and member of the Banking Committee, who got $15,750; and Rep. Thomas J. Manton, a New York Democrat and also a Banking Committee member, who received $13,685.

Mr. Dioguardi was Citicorp's favorite congressman, garnering 6.3% of its total House contributions. Morgan favored Mr. Neal with 6% of its total House outlays. Mr. Wortley was the top recipient of money from Chemical, Manufacturers Hanover, Chase, and Bankers Trust, though he shared top spot with Mr. Neal at Chase and with Mr. Barnard and Mr. Manton at Bankers Trust.

BankAmerica's favorite was Rep. Richard H. Lehman, D-Calif.; Security Pacific's were Rep. Robert T. Matsui and Rep. Tony Coelho, both California Democrats; First Chicago's was Mr. Barnard; and First Interstate's was Rep. David Dreier, a California Republican.

As interstate banking has spread, banks' political action committees also have increased their state legislative activities.

For example, Citicorp's federal political action committee last year contributed $6,750 for state and local elections in Arizona, $2,160 in Maryland, $14,800 in Nevada, $750 in Oklahoma, $11,700 in South Dakota, and $300 in Utah, according to the 1986 annual report of Citicorp's political action committee. The state and local political action committee spent $95 238 on New York elections. ■

Favored Senators

The top 10 bank political action committees last year gave 11 senators and candidates $257,540, equal to 53.5% of their total Senate spending. The 11 recipients are listed below, with winners in bold.

	Contributions	% of Total
Slade Gorton, R-Wash.(b)	$41,369	8.6%
Jake Garn, R-Utah(b)	**37,756**	**7.8**
Daniel P. Moynihan, D-N.Y.[1]	32,705	6.8
Mack Mattingly, R-Ga.(b)	29,300	6.1
Ed Zschau, R-Calif.[2]	22,302	4.6

Sinclair Joins Penney's Card Network

By YVETTE D. KANTROW

NEW YORK — J.C. Penney Co.'s data communications subsidiary has brought yet another petroleum retailer into its electronic point-of-sale network.

Point of Sale

Sinclair Oil Corp., Salt Lake City, said that it will use J.C. Penney System Services for electronic credit card authorization and sales data capture at 2,000 outlets in 23 states.

Other major petroleum companies, including Amoco Oil Co., Shell Oil Co., and Citgo Petroleum Corp., already use the retailer's services.

With Penney's data network, Sinclair service stations can instantly authorize and process transactions made on its private label card, as well as on MasterCard, Visa, and travel, entertainment, and government cards. Stations are linked to the Penney network by telephone from point-of-sale terminals owned by Sinclair.

In a pilot program, Sinclair connected 350 stations to Penney's network.

Penney designed the network in the 1970s to speed checkout times for its 30 million credit card holders. In 1983, it formed J.C. Penney Systems Services to market the network's services to users other than the parent company. The subsidiary now handles more than 300 million credit card transactions annually.

The retailing giant picked up its first bank user, Zions First National Bank, Salt Lake City, in March. Although Penney has been slow to sign bank customers, its success in attracting petroleum retailers has led it to bill itself as the largest provider of point-of-sale services to the petroleum industry. ■

COUNSELOR'S CORNER

➸ Continued from Page 4

control.

In summary, the principle that a holding company should be a source of strength to its banking subsidiaries is laudable. But it does not translate easily into a declaration that a failure to inject capital into a weak bank is an unsafe or unsound banking practice. A variety of practical difficulties and competing policy issues must first be accommodated.

The comments the Fed will be receiving through July 1 on the policy statement will no doubt facilitate such an effort. But the new policy was made effective upon its issuance; so for the moment, at least, an additional element of uncertainty has been introduced into the multibank holding company environment. ■

Morgan, Fleet, and State Street Get Top Performance Ratings

By L. MICHAEL CACACE

NEW YORK — J.P. Morgan & Co. led the nation's top-performing money center banks in 1986; it has been the best performer over the past five years.

The *American Banker* seventh annual survey of top performers also identifies the Fleet Financial Group as the top regional bank with assets over $10 billion in 1986. State Street Boston Corp. ranked as the top regional bank with assets of $5 billion to $10 billion for 1986.

From 1982 to 1986, Banc One Corp., Columbus, Ohio, was the top performing regional bank.

Three key ratios are used in the survey: return on average assets, return on average equity, and the market-to-book value of a bank's stock. Return on average assets, or ROA, is net income as a percentage of average assets. Return on equity capital, or ROE, is net income as a percentage of average equity capital. The market-to-book value

Bank Employment Scene Grim in Texas

By DAVID LaGESSE
Southwest Bureau

DALLAS — Employment prospects for Texas bankers appear grim for the next few years, particularly for senior officers.

Economists predict overall banking employment will continue the downward trend that began in Texas in 1986.

In response, out-of-state banks are flocking to Texas to court surplus bank officers, a fact demonstrated by newspaper ads in several cities. Houston, in particular, has hosted a number of visits by far-flung banks, particularly from the healthier markets of the Southeast.

Many Texas bankers have resisted, however, largely because southeastern banks do not offer the high salaries that have become the norm in an oil-rich economy.

With the advent of branch banking, more Texas banking jobs will be lost,

Citicorp to Sell South African Subsidiary

Business Constraints Led To Move, Company Says

By JAMES R. KRAUS

NEW YORK — Citicorp said it will sell its wholly owned South African subsidiary because of growing constraints on the unit's business operations.

The subsidiary, Citibank NA Ltd., will be sold to the First National Bank of Southern Africa Ltd., Johannesburg, for 130 million rand, or $38.2 million, the bank holding company said.

The deal is expected to be completed by June 30 and has received South African government approval, the company added.

Citicorp is the last U.S. banking company with a direct investment in South Africa. Two other U.S. banking companies — the Chase Manhattan Corp. and the NCNB Corp. — closed their South African units in 1985 and 1986.

First National Bank of Southern Africa, the largest bank in South Africa, formerly was the Barclays National Bank Ltd. First National was set up after Britain's Barclays Bank PLC sold its remaining 40.4% stake in the bank last November to a group of South African investors that included the Anglo American Corp., De Beers Consolidated Mines, and the Southern Life Association.

The sale does not affect loans to South African borrowers and those loans will remain on Citibank books. The bank has about $700 million in loans outstanding to South African borrowers but has not lent any new money since mid-1985.

Citibank NA Ltd. has a main branch in Johannesburg with 180 employees and a small branch in Durban with a staff of five. Activities largely focus on

Peer groups include all bank holding companies with assets of $5 billion or more at yearend 1986.

(a) In 1985, the bank was in Peer Group 3: Banks with Assets of $5 billion to $10 billion.
(b) In 1985, the bank was in Peer Group 2: Bank with Assets over $10 billion.
(c) In 1985, the bank had less than $5 billion in assets, and therefore was not in the study.

Definitions and Methodology

The statistical tables for the *American Banker's* annual performance study were compiled by the *American Banker* from data provided by *Cates Consulting Analysts, New York.*

A listing of the bank holdings in today's study appears to the left. The firms are divided into three peer group: Peer Group 1 — Money Center Banks; Peer Group 2 — Banks with assets over $10 Billion on Dec. 31, 1986; and Peer Group 3 — Banks with assets between $5 Billion and $10 billion on Dec. 31, 1986. Within each peer group, the firms are listed in order of their asset size on Dec. 31.

This table was prepared by the American Banker statistics department. Banks that are not owned by holding companies are excluded.

The first table, is called "1986 Performance of Top U.S. Banking Companies". The banks in Peer Groups 1 and 2 appear on page 22, and the banks in Peer Group 3 appear on page 24. The banking firms are ranked by three measures of performance: return on average assets; return on average equity; and percentage change in earnings per share.

Cates defines **return on average assets** as net income before extraordinary items for the entire year 1986 divided by a daily average of total assets. If daily average assets is not available, Cates uses the mean of Dec. 31, 1985, and Dec. 31, 1986.

Return on average equity is net income minus preferred stock dividends divided by average common shareholders' equity. Here, average equity is computed by taking the mean of Dec. 31, 1985 and Dec. 31, 1986, common equity.

The percentage change in earnings per share is the difference of earnings per share (12/86-12/85) divided by earnings per share 12/85. Earnings per share is primary, based on net income before extraordinary items, and for the 12-month period.

In this listing **American Banker** shows the 1985 data as reported in 1986; lists firms geographically if two or more firms have the identical return on assets for 1986; calculates the group mean; and calculates the group median.

The group **mean** is calculated by summing all of the values and dividing that number by the total number of observations. The **median** is obtained by finding the midpoint of the array of values.

Thee second table entitled "How the Market Looks at Banks," appears on page 26. Here, the banks are ranked in order of market-to-book value of their stock. In addition, the price earnings multiple and dividend yield are shown.

Market-to-book value for 1986 is the stock price divided by the book value per share. Cates uses the bid price on common stock as of Jan. 31, 1987, (or the closest trade date) and divides this by book value per share on Dec. 31, 1986. The market-to-book value for 1985 is calculated by dividing the bid price on common stock as of Feb. 3, 1986, (or the closest trade date) by book value per share on Dec. 31, 1985.

The price earnings multiple is the stock price, as defined above, divided by earnings per share.

The dividend yield is the indicated annual dividend divided by the stock price as defined above.

Morgan, Fleet, and State Street Get Top Performance Ratings

➸ Continued from Page 1

measures the market's perception of bank performance.

Based on those ratios, the worst-performing money center bank was Continental Illinois Corp.; the worst large regional bank was First City Bancorp of Texas Inc., Houston; and the worst smaller regional was Texas American Bankshares Inc., Fort Worth.

Included in the survey are the 92 commercial bank holding companies with assets of $5 billion or more on Dec. 31, 1986. These 92 companies are then broken into three peer groups: 14 money center banks, 36 large regional banks with assets of $10 billion or more, and 42 smaller regional companies with assets of $5 billion to $10 billion. The survey is based on data supplied by Cates Consulting Analysts, New York.

Morgan Stays on Top

Over the past five years, J.P. Morgan & Co., the nation's premier wholesale banking firm, each year has ranked among the top money center banks in ROA and ROE. In 1986, for the second year in a row, it ranked first in both of those measures, with an ROA of 1.19% and an ROE of 18.94%. And in 1986, for the third year in a row, Morgan had the best market-to-book ratio among the money centers: 169.58. This was up from 138.71 in 1985, and 103.72 in 1984.

Since 1982, Morgan has been second only to Citicorp in earnings. But over that period, Morgan's earnings growth has been much more impressive. Morgan's net income has grown three times faster than Citicorp's over the period — 150% compared with 46%.

The $11.7 billion-asset Fleet Financial Group, Providence, R.I.— which moved from the small regional group to the large regional group last year — was the top large regional firm in market-to-book, with a ratio of 185.58. Fleet also ranked as the top large regional in return on average assets, with 1.37%, and it ranked second in return on average equity, with 20.00%.

Over the past three years, Fleet has followed a "dual-strategy philosophy" of expansion, acquiring both bank and nonbank firms to maintain its diversity of lines of business. On the bank side, Fleet has acquired two top performing banking firms in 1986: First Connecticut Bancorp, Hartford, and Merrill Bankshares, Bangor, Maine. Currently, Fleet is in the process of merging with $11.1 billion-asset Norstar Bancorp., Albany, N.Y.

On the nonbank side, in 1983 Fleet acquired Bankers Mortgage Corp., a mortgage company, and Credico Financial Inc., a finance company. In 1984, Fleet acquired Davidge & Co., an investment counseling firm; in 1985, it bought Denrich Leasing Inc., a small equipment-leasing firm; and last November, it acquired Security Pacific Mortgage Corp. and its $2.5 billion servicing portfolio.

Best of the Small Regionals

For the second year in a row, State Street Boston Corp. was the top small regional firm in ratio of market to book value, with 263.63 for 1986, compared with 236.02 for 1985. In addition, it topped the small regionals in return on equity, with 19.95% for 1986, up from 18.74% in 1985 when it ranked fifth in ROE. Its ROA of 1.14% last year ranked it fifth, down one notch from 1985, when it ranked fourth with 1.12%.

State Street joined the performance survey in 1985, when its assets surpassed the $5 billion mark. The bank went through a restructuring several years ago, investing heavily in the securities-processing business. Today, it is one of the largest transfer agents and record keepers for mutual funds. This processing business generates an above-average amount of fee-based income for a bank of State Street's size

Over the past five years, Banc One has consistently ranked as one of the top firms in the *American Banker*'s performance surveys. It ranked second in ROA for five consecutive years, with an average over the 1982-86 period of 1.36%. It ranked no lower than fourth in ratio of market to book value over that period, ranking second for three of the other five years and first in 1985. Its market-to-book ratio averaged 189.07 over the period. Its ROE averaged 18.50%, falling from a high of 20.36% in 1982, when it ranked second among small regional firms, to 17.57% last year, when it ranked ninth among the large regionals.

Banc One Corp. has been one of the nation's most profitable banks over the past five years. Earnings grew by more than 165% from $62 million in 1982, when it ranked 34th, to $164.7 million last year, when it ranked 20th. Banc One is considered a merger specialist with a remarkable ability to assimilate acquired institutions.

Other Survey Findings

Nineteen eighty-six was a year of sharp dichotomy in the performance of the nation's largest banking firms. For example, of the large regional banks, four posted substantial losses, compared with one in 1985. On the other hand, 12 firms, or one-third of the panel, had an average return on assets greater than 1.00%, compared with nine firms in 1985. The mean, as a measure of central tendency, is greatly affected by this wide divergence. Therefore, last year's median was a better measure of the average performance.

The median is the midpoint of the array of observations. If there are 15 members in a panel, for example, the eight observation is the median. If there are 14 members in a panel, the midpoint is a simple average of the sum of the seventh and eighth observations.

At money center banks, the median ROA moved up five basis points to 0.70% last year. Since 1982, it has moved up 13 basis points. The group's median ROE rose 33 basis points last year to 13.33%, but it is down 54 basis points from 13.86% in 1982.

At the large regional firms, the median ROA moved up eight basis points to 0.89% last year. Since 1982, it has moved up 19 basis points. The group's median ROE rose 78 basis points last year to 15.68%, and it has risen 100 basis points since 1982.

At the small regional firms, the median ROA rose by only one basis point to 0.89% last year. Since 1982, it has moved up eight basis points. The group's median ROE fell by 13 basis points last year to 14.24% from 14.37% in 1985. Over the past five years, the group's median ROE has risen 85 basis points.

The market-to-book value of a bank's stock is the best gauge of market perception of bank performance. This ratio measures the ability of a bank to create or destroy wealth for its shareholders. Mathematically, the ratio is a function of the bank's return on equity capital adjusted for inflationary expectations.

When a bank's ROE exceeds market requirements, the market price of a stock generally rises above its book value. The market-to-book ratio exceeds 100%, creating shareholder wealth. A ratio of 200%, for example, means that

Data are from **Cates Consulting Analysts, New York, Quarterly Performance Report** and are compiled by **American Banker.** Bank holding companies are ranked by their return on average assets; return on average equity; and percentage gain in earnings per share. For definitions and methodology used to compile this listing, see page 18. (†)— Includes gain on sale of mortgage subsidiaries. Without this gain, R.O.A. would have been 1.19% and R.O.E. 16.45%. **Dashes (—)** in the 1985 rank column indicate that a company was not in this peer group panel in 1985, because its assets were less than $10 billion on Dec. 31, 1985. (‡)— The 1985 mean and median were calculated for the 30 banks comprising the panel that year. **N.A.**— Not Applicable.

Data are from **Cates Consulting Analysts, New York, Quarterly Performance Report** and are compiled by **American Banker**. Bank holding companie's are ranked by their return on average assets; return on average equity; and percentage gain in earnings per share. For definitions and methodology used to compile this listing, see page 18. **(a)**— Data are for Union Bank. **Dashes (--)** in the 1985 rank columns indicate that these companies were not in this peer group panel last year, because their 1985 assets were either greater than $10 billion or less than $5 billion on Dec. 31, 1985. **N.A.**— Not Applicable. **(‡)**— The 1985 mean and median were calculated for the 39 banks comprising the panel that year.

Data are from **Cates Consulting Analysts, New York, Quarterly Performance Report** and are compiled by **American Banker**. Bank holding companies are ranked by the ratio of the market value of the firm's stock to its book value. For definitions and methodology used to compile this listing, see page 18. **Dashes (--)** in the 1985 rank columns indicate that these companies were not in this peer group panel last year. **(‡)**— The 1985 mean and median were calculated for the 30 banks comprising the panel that year. **(†)**— The 1985 mean and median were calculated for the 39 banks comprising the panel that year.

Bank Collects Racehorses in Lieu of Owner's Debt

Special to the American Banker

LOUISVILLE, Ky. — A Louisville bank, almost by accident, has gotten into the horse-racing business in a big way.

The Citizens Fidelity Bank & Trust Co. has been given possession of 11 thoroughbred horses formerly owned by a bankrupt Lexington, Ky., businessman. The horses, awarded to Citizens Fidelity on June 2 by Federal Judge Joe Lee, are part of a settlement for $14.4 million in loans owed by Tom Gentry, an internationally known horse breeder.

The best-known of the horses is War, a 3-year-old that finished 13th in the Kentucky Derby in May. The horse raced again on June 13 in the Ohio Derby in Cleveland and finished sixth.

A bank public relations official said that Citizens Fidelity is making arrangements to secure a new trainer for War, stabled at Arlington Park, Ill., near Chicago.

Mr. Gentry, while fighting to keep assets in the wake of a divorce settlement last year, filed for Chapter 11 reorganization under the Federal Bankruptcy Code to seek protection from his creditors after Citizens Fidelity and other banks called in loans.

Mr. Gentry had been under a court order to sell the horses, but he preferred to allow them to be given to the bank instead because he believed that he could not get fair market value for them at auction under the circumstances. ■

Morgan . . .

➸ Continued from Page 19

a bank has a formula for taking one dollar from its shareholders and turning it into two dollars.

Conversely, when a bank's ROE falls below the level required by the marketplace, the value of its stock generally will be less than its book value. The ratio falls below 100%, destroying shareholder wealth. A ratio of 50%, for example, means that a firm is taking $1 from its shareholders and converting it into half a dollar.

The long-term Aa-rated corporate bond rate is used as the measure of inflationary expectations. Last year, that rate fell 160 basis points, from 10.46% to 8.86%. Other things being equal, a decline in interest rates is sufficient to cause the market-to-book ratio to rise, because a decline in rates lowers the required ROE.

The money center banks' median market-to-book ratio was 95.23 in 1986, up from 95.02 in 1985 and 65.39 in 1982.

The large regional banks' median market-to-book ratio rose to 134.44 last year, from 117.77 in 1985 and 72.37 in 1982. The median market-to-book ratio of the small regional firms rose to 134.20 last year, from 132.78 in 1985 and 72.29 in 1982. ■

Uccel Plans 1988 Conference

DALLAS — Uccel Corp., vendor of systems software and bank applications software, plans to hold its 1988 financial systems conference for users next April 10 to 13 at the Hyatt Regency Embarcadero, San Francisco. ■

NEW ENGLAND

Massachusetts Banks Gear Up Efforts To Grab Bigger Piece of Retail Market

By MICHAEL WEINSTEIN

New England Bureau

BOSTON — A battle is brewing over the retail banking market in Massachusetts.

The acknowledged market leader, BayBanks Inc., Boston, has used technology and savvy marketing to become the most popular bank among young professionals in and around Boston.

But the state's leading banks have teamed up to form a huge automated teller machine network that will rival the proprietary system developed by BayBanks.

And one of those banks, Bank of New England Corp., Boston, the state's second biggest banking company, is also lurking in the wings with a stepped up retail banking effort, which it began after merging with Connecticut Bank and Trust Co. in 1985.

Lenders Continue Shift to US Firms

By KENNETH J. HICKS

NEW YORK — The banking industry is continuing to refocus its business lending to domestic firms, particularly to middle-market companies, according to an *American Banker* survey.

Domestic business lending at the top 10 banks was up 10% last year and rose 11% at the top 100 institutions, according to the *American Banker's* seventh annual survey of the top 300 commercial bank lenders to business.

But when loans to international firms are included, total commercial and industrial lending was down almost 3% at the top 10 banks last year and up 3% for the top 100.

Survey findings also show that Citibank maintained its No. 1 ranking as the top lender to domestic and international business, with $35.6 billion in loans, down 1%

Action Urged To Reduce Clearing Risk

Global Trading Increases Exposure: Morgan Chief

By JOHN J. DUFFY

HAMBURG, West Germany — Settlement and clearing risks in international securities trading have risen dramatically over the past decade, and steps must be taken to manage these risks more effectively, Dennis Weatherstone, president of Morgan Guaranty Trust Co., said Tuesday.

Speaking to a group of senior bankers here at the International Monetary Conference, Mr. Weatherstone said the explosion of international securities trading and the intricate linking of transactions across borders have created a new series of risks that current settlement and clearing systems are not equipped to handle.

"We now have a huge, complex interlocking system of national and global markets, operating 24 hours a day, with settlement procedures for both cash and securities varying widely among markets, and provisions for managing risks — and containing problems in the system if they do occur — still in their infancy," he said.

Steps that can be taken to reduce the risks posed by global trading, Mr. Weatherstone said, include:

- More active management of cashflow positions to reduce intraday overdrafts on the Federal Reserve's Fedwire system and on the Clearing House Interbank Payments System (Chips). This could mean making Chips payments final, as on Fedwire, or instituting a system of special charges on banks that run large intraday overdrafts.
- A system of regional clearing mechanisms that could settle dollar transactions in Europe and in the Far

Lenders Continue Shift to Domestic Companies

Continued from Page 1

from the previous year. (The survey tables begin on page 13.)

The nation's largest bank also pushed into the No. 2 position in domestic business loans, reporting $12.2 billion, an increase of 14% from $10.7 billion in 1985, when it ranked third.

Chase Manhattan Bank passed Bank of America as holder of second place by virtue of a slower rate of decrease. Chase had $25.1 billion in commercial and industrial lending in 1986, down 9.7%. Bank of America, which slid down to third, reported $24 billion, off 17.5%.

Manufacturers Hanover Trust Co. was No. 4 with $21.8 billion, a slight increase of 1.6%. Manufacturers was the top bank in domestic lending with $13 billion, up 6% from a year earlier.

Larry Cohn, vice president and banking analyst with Merrill Lynch Capital Markets, said one of the reasons for the change in emphasis from international lending is that "international business lending has not been attractive, either politically or economically. Politically, you don't want to lend to the Third World."

Considerably narrower spreads in Europe he made further international lending less profitable.

Mr. Cohn also said the spreads for "jumbo corporate lending" have become less profitable for commercial banks. The resurgence in middle-market lending, has further been fueled by alternative financing available to the larger national customers. In 1986, corporations issued about $318 billion in the money markets, compared with $171 billion in 1985.

On the other hand, middle-market corporate clients, which do not have the same access to the credit markets, have had strong demand for loans over the past two years.

"The regionals have had good loan demand in the retail, real estate, and middle-market sectors," said Frank Barkocy, a vice president of Merrill Lynch Capital Markets. "Along with the leveraged buyouts from some of their larger customers, the regional banks are still experiencing loan demand."

That could help explain the higher loan growth experienced by banks ranked after the top 10 and in the second 100.

Another reason for the downturn in total C&I lending among the top 10 banks is securitization of loans. Many large banks have been selling participations in business loans to foreign banks' U.S. branches and agencies and commercial bank subsidiaries, to other domestically owned banks ranked among the top 300, and to thrift institutions. These sales have reduced the amount of loans remaining on their books.

"There is no doubt that securitization has moved loans off the banks' books," said Mr. Cohn.

Securitization by banks involves the pooling of loans into a securities instrument that is sold to investors. Until recently, residential mortgage loans were the primary source for securitized loan issues.

Data Sources, Methods Used in the Survey

The *American Banker*'s survey of the top 300 commercial banks in domestic and foreign commercial and industrial lending is based on the federal regulatory reports of condition and income, or call reports, for Dec. 31, 1986, and Dec. 31, 1985; they were provided by ADP Data Services Division, New York.

The call report data include outstanding business loans to U.S. and foreign businesses and are consolidated to include loans booked in banks' domestic and foreign offices. Lease financing receivables are excluded.

This year, the *American Banker* also shows the domestic portion of commercial and industrial lending of the top 100 commercial banks. Ranked by total commercial and industrial loans, the table compares 1986 domestic lending with totals for 1985.

The table also shows: the percentage of domestic to total business loans, bad or nonperforming business loans and as a percentage of total domestic commercial and industrial loans, and gross interest income. Data are presented for 1985 and 1986.

Other loan assets held by banks — car loans, credit card receivables, lease receivables, and commercial real estate loans — have become more widely used to back debt issues as banks seek ways to compete for available investment dollars. Securitization has become an attractive way for banks to increase liquidity and diversify their risks.

The effects of securitization can be seen in a comparison of market share by the top 10 banks in 1986 and 1981. Last year, those banks, with $185.6 billion in outstanding commercial and industrial loans, accounted for 32.7% of all commercial loans. Conversely, in 1981, those 10 banks accounted for 46.4% of all business loans with $197.3 billion.

Figures from the Office of the Comptroller of the Currency showed that large banks totaled $70 billion in loan sales during the fourth quarter of 1986, compared with $30 billion in the last quarter of 1984. Most of the sales were made to other banks.

Though domestic business lending increased 11.4% among the top 100 banks, however, loans classified as bad (loans 90 or more days past due and loans placed on a nonaccrual basis) were up almost 20%.

"The economy has been stumbling along," Mr. Cohn explained. "There has been some growth, but not a lot. The increase [in bad business loans] could be the aftermath of disinflation. A lot of these loans were collateralized — whether it be oil or steel — and the value for that collateral has fallen."

Other Survey Findings

- Citibank (Delaware), New Castle, Del., had the highest percentage increase in business lending, with a 185% jump to $629.7 million. The bank ranked 128 overall. Rounding out the top five percentage gainers are: Tokai Bank of California, Los Angeles, with a 157% increase to $93.1 million and ranking 160th; United Bank & Trust Co., Hartford, Conn., up 105% to place 203rd with $329.6 million; Bankers Trust (Delaware), Wilmington, Del., ranked 86th, had a 101% rise to $1 billion; and Union Planters National Bank, Memphis, came in 158th

All data were provided to American Banker by **ADP Data Services Division, New York,** from their data base of the Federal regulatory Report of Condition (RC). ADP restates its 1985 data on a pro forma basis for mergers in 1986. **Business Loans** are commercial and industrial loans, and are taken from Schedule RC-C of the Report of Condition. Data are consolidated to include both domestic and foreign offices. Loans to both domestic and foreign businesses are included. The appropriate line reference numbers on Schedule RC-C are: Column A item 4.a. (commercial and industrial loans to U.S. addressees) and item 4.b. (commercial and industrial loans to non-U.S. addressees). **Total Loans** are loans and leases, net of unearned income and are from RC-Balance Sheet, line 4.a. **Total Assets** are total consolidated assets from RC-Balance Sheet, line 12. **(†)**— The 1985 data have been restated by ADP to reflect merger activity in 1986. However, the 1985 ranks for these banks are based on their actual business loans outstanding on Dec. 31, 1985, and have not been adjusted to reflect 1986 mergers.

Top 300 Banks in Business Lending

Dec. 31, 1986 Compared with Dec. 31, 1985 (Thousands of Dollars)

All data were provided to American Banker by **ADP Data Services Division, New York,** from their data base of the Federal regulatory Report of Condition (RC). ADP restates its 1985 data on a pro forma basis for mergers in 1986. **Business Loans** are commercial and industrial loans, and are taken from Schedule RC-C of the Report of Condition. Data are consolidated to include both domestic and foreign offices. Loans to both domestic and foreign businesses are included. The appropriate line reference numbers on Schedule RC-C are: Column A item 4.a. (commercial and industrial loans to U.S. addressees) and item 4.b. (commercial and industrial loans to non-U.S. addressees). **Total Loans** are loans and leases, net of unearned income and are from RC-Balance Sheet, line 4.a. **Total Assets** are total consolidated assets from RC-Balance Sheet, line 12. **(†)**— The 1985 data have been restated by ADP to reflect merger activity in 1986. However, the 1985 ranks for these banks are based on their actual business loans outstanding on Dec. 31, 1985, and have not been adjusted to reflect 1986 mergers.

Top 300 Banks in Business Lending

Dec. 31, 1986 Compared with Dec. 31, 1985 (Thousands of Dollars)

All data were provided to American Banker by **ADP Data Services Division, New York,** from their data base of the Federal regulatory Report of Condition (RC). ADP restates its 1985 data on a pro forma basis for mergers in 1986. **Business Loans** are commercial and industrial loans, and are taken from Schedule RC-C of the Report of Condition. Data are consolidated to include both domestic and foreign offices. Loans to both domestic and foreign businesses are included. The appropriate line reference numbers on Schedule RC-C are: Column A item 4.a. (commercial and industrial loans to U.S. addressees) and item 4.b. (commercial and industrial loans to non-U.S. addressees). **Total Loans** are loans and leases, net of unearned income and are from RC-Balance Sheet, line 4.a. **Total Assets** are total consolidated assets from RC-Balance Sheet, line 12. **(†)**— The 1985 data have been restated by ADP to reflect merger activity in 1986. However, the 1985 ranks for these banks are based on their actual business loans outstanding on Dec. 31, 1985, and have not been adjusted to reflect 1986 mergers.

All data were provided to American Banker by **ADP Data Services Division, New York,** from their data base of the Federal regulatory Report of Condition (RC) and Report of Income (RI). ADP restates the 1985 data on a pro forma basis for mergers in 1986. **Domestic Business Loans** are business loans to both domestic and foreign customers that were booked in the domestic offices of the bank. These data are from RC-Schedule C, Column B (Domestic offices), items 4.a. plus 4.b.

Bad Business Loans are domestically-booked business loans that are 90 or more days past due plus domestically-booked business loans placed on a nonaccrual basis. Data are from Schedule RC-N, item 1b plus item 1C. **Gross Interest Income** is gross interest and fee income on business loans booked in domestic offices. Data are from Schedule RI, item 1.a.(1).(d).

FROM THE REGIONS

NEW ENGLAND

Continued from Page 1

These developments come at a time when many bankers, disillusioned with the slim margins of commercial lending, are looking for more profits from consumer banking.

Rooted in the suburbs, BayBanks was formed outside Boston in 1928 by Bank of Boston executives who wanted an out-of-town distribution network at a time when the bank was not permitted to open branches there.

Then came a long series of acquisitions, primarily in the suburbs around Boston. BayBanks' branch network, which now rings the city in the affluent suburbs of Middlesex and Norfolk counties, is the envy of Massachusetts bankers.

BayBanks did not move into Boston until 1978, when it chartered BayBank Boston. Since then, BayBanks has poured tens of millions of dollars into its ATM network, which now amounts to some 700 teller machines.

With the biggest teller machine network of any bank in the state, BayBanks established a firm hold on the area's young professionals. And the convenience of its ATM network has allowed BayBanks to charge higher-than-average fees for some services.

But last year, BayBanks' major competitors got together and agreed to form a joint, or shared, ATM network, by joining an existing network present in other New England states, Yankee 24. They invited BayBanks to join, but the company declined.

The new members of Yankee 24 include Bank of Boston, Bank of New England, and Shawmut Bank — all based in Boston, all active in the retail market, and all bigger than the $7.6 billion-asset BayBanks.

Yankee 24 expects to be operational in Massachusetts within a few weeks. It hopes to have some 700 ATMs in the state by the end of the summer, said Janet L. Pruitt, a vice president at Shawmut Bank in Boston.

Yankee 24 is also marketing the network to other banks around the state.

"The Yankee 24 is really going to level the playing field," said Linda Kanner, who runs retail banking in Massachusetts for Bank of Boston.

The emergence of Yankee 24 has caused a ruckus. BayBanks is fighting the new network in court and in the state house.

BayBanks has filed suit against the network in U.S. District Court in Boston charging unfair competitive practices regarding the fees structure of Yankee 24, said William T. Sandalls Jr., a vice chairman at BayBanks.

About 70 institutions have installed some 100 teller machines in BayBank's network, and these institutions are also eligible to join Yankee 24.

The Joint Committee on Banks and Banking of the Massachusetts legislature is considering a bill that would force Yankee 24 to change its fee structure.

"You've got six big bullies behind this rival network," Mr. Sandalls said. "That's a fairly formidable array of banking power."

Even if Yankee 24 begins running as planned, BayBanks executives said they will maintain an ATM advantage.

BayBanks has visually distinguished all its branches and teller machines with bright green and blue stripes, and the firm's competitors credit BayBanks with creating a readily identifiable image for Massachusetts consumers.

"They are true retailers," said Bank of Boston's Ms. Kanner.

Bank of Boston, which has attracted an older, more affluent clientele than BayBanks, is considering revamping its 129 branches in Massachusetts and boosting its marketing budget, Ms. Kanner said.

"I'm right in the middle of the project," she said. "We have not done what BayBanks has done so terrifically."

Meanwhile, Bank of New England recently completed its acquisition of Conifer Group Inc., which has roughly doubled the bank's branches and deposits in the state.

"It extends our presence importantly in almost all the markets in Massachusetts," said Richard D. Driscoll, president of Bank of New England. The bank now has about 250 branches around the state.

Bank of New England, traditionally known as a strong wholesale bank, has become more active in the retail market since its merger with Connecticut Bank and Trust, which runs an aggressive retail banking operation.

"When you combine CBT's retail experience with Bank of New England's distribution network, you now present a potential competitive threat to BayBanks," said Mike Turillo, a Boston based partner with Peat Marwick Main & Co.

A few months ago, Bank of New England hired away BayBanks' advertising agency, Hill Holliday Connors Cosmopulos Inc., after using another agency for about 30 years.

Separately, Hartford National Corp., which concentrates on retail banking in its home market of Connecticut, has acquired a handful of institutions around Boston that have total assets of about $4 billion. But so far, Hartford National has made few changes at those institutions.

BayBanks has already gone through the difficult and often disruptive process of consolidating its different banks. The company now has an integrated data processing system that links all its 240 branches. ■

Retail Banking in Massachusetts

	Total assets at March 31, 1987 (In billions)	NOW account market share[1]	Number of branches in state
Bank of Boston Corp.	$32.2	8.2%	129
Bank of New England Corp.[2]	25.8	13.0	250
Shawmut Corp.	9.9	11.6	168
BayBanks Inc.	7.3	12.3	240

COMMENT

Lower Spreads, Higher Stock Prices

By SANFORD ROSE

The objective of bank management should be to serve the shareholder's interest, not necessarily by increasing the amount of return, but rather by enlarging the amount of return per unit of risk. A bank can actually reduce nominal returns while still improving shareholder welfare.

If the riskiness of the loan portfolio falls by a greater magnitude than do nominal returns, then return per unit of risk self-evidently rises. The stream of prospective earnings may be smaller than before, but the rate used to discount that stream to its present value will be lower still. As a result, the stock price should rise.

The riskiness of the loan portfolio is measured by the standard deviation of losses. The standard deviation is a measure of dispersion or scatter. It is the extent by which a variable can diverge from its ex-

J.P. Morgan Bumps Citicorp to Take First Place as Leading Trust Manager

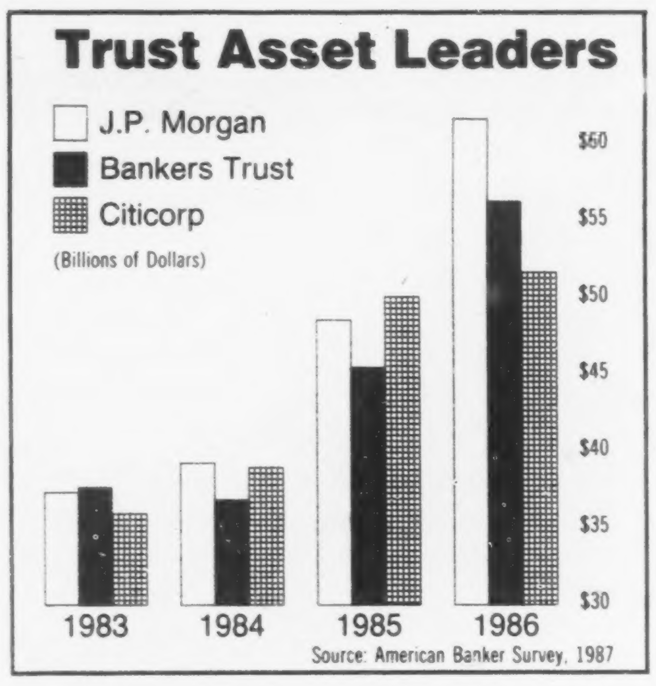
By L. MICHAEL CACACE

NEW YORK — J.P. Morgan & Co. has surpassed Citicorp as the top banking company in terms of assets managed by its trust department, according to the *American Banker's* 19th annual survey of the top 100 firms rated by trust assets and income.

Morgan's trust assets rose 27.1% in 1986, to $61.7 billion, while Citicorp's discretionary assets rose by only 3.2%, to $51.7 billion, causing it to fall to third place in the trust field.

Moving into second place was Bankers Trust New York Corp., which ranked third behind Citicorp and Morgan in 1985. Bankers Trust had $56.3 billion in assets under management in 1986, up 23.8% from the year before.

Morgan was the top firm in managed trust assets from 1978 to 1982. Since 1983, however, it has battled Citicorp and Bankers Trust for the title.



Source: American Banker Survey, 1987

In 1983, Bankers Trust ended Morgan's five-year reign as the top firm in trust size. Morgan regained the top

4 More States Open Doors to Regional Deals

Focus of Interstate Activity Is in Washington State

By DON MUNRO

NEW YORK — Wednesday is D-Day for interstate banking in several states.

The laws taking effect will create or expand regional, reciprocal pacts in Alabama, California, Louisiana, and Maryland, and expand an existing pact in Washington State to nationwide banking.

AN **American Banker** SPECIAL REPORT

The most activity is in Washington, where banks from California, Oregon, and New York have applied to expand their presence in the Pacific Northwest.

Regulators in the other states, however, report a marked absence of applications from out-of-state banks to buy or merge with their institutions.

Among the banks on file in Washington are:

- Portland, Ore.-based U.S. Bancorp's bids for the Peoples Bancorp., Seattle, the Old National Bancorp., Spokane, and the Heritage Bank, Camas.
- An application by the Union Bancorp, Los Angeles, to buy the Western Bank Holding Co., Bellevue, Wash.
- Bids by the Albany, N.Y.-based

Morgan Replaces Citicorp as Top Trust Manager

Continued from Page 1

ranking in 1984, lost to Citicorp in 1985, and recaptured the title in 1986.

Managed trust assets are assets of accounts for which a trust banking firm is authorized to make investment decisions. Also included are assets in accounts for which the firm recommends, but does not make, investments. Assets of accounts in which the firm shares investment power also are included. Managed assets are called discretionary assets.

The *American Banker* — conforming with changes made by federal bank regulators — began to use discretionary assets as its measure of trust department size in 1978.

The slow growth in Citicorp's managed assets last year was attributable to the loss of three major accounts with combined assets of more than $10 billion. In early October, trustees for the New York City police pension fund removed $1.7 billion from Citicorp accounts, in part because the company's lead bank, Citibank NA, refused to cash paychecks for numerous patrolmen.

In late October, the New York City pension system removed $5.3 billion in trust assets managed by a Citicorp trust subsidiary, Citicorp Investment Management Inc. The removal followed a restructuring of the city's entire pension system portfolio.

The assets from these two accounts were distributed among 19 companies, including seven among the top 100.

The seven include the second-ranked Bankers Trust New York Corp.; fourth-ranked Wells Fargo & Co., San Francisco, which had managed assets totaling $45.3 billion in 1986; sixth-ranked Chase Manhattan Corp., New York, which had $33.5 billion in managed assets; and eighth-ranked Mellon Bank Corp., Pittsburgh, which had $27.8 billion in trust assets.

The others are ninth-ranked State Street Boston Corp., North Quincy, Mass., with $26.1 billion in trust assets; 10th-ranked Manufacturers Hanover Corp., with $25.8 billion in trust assets; and 19th-ranked Fiduciary Trust Co., New York, with $14.5 billion in trust assets.

In addition, Citicorp lost about $3.5 billion in managed assets when the State of California's Public Employees Retirement System restructured its equity portfolio last year. Citicorp had been the sole manager of the retirement system's $4 billion portfolio.

The restructuring divided the portfolio among nine managers, including Citicorp, which retained about $500 million.

Despite these losses, Citicorp's gross trust revenues rose 32.9%, to $233.9 million, in 1986, from $176 million in 1985. The gain enabled Citicorp to supplant Bankers Trust as the third largest company in gross trust revenues. Morgan is first in gross trust income, and Chase ranks second.

Other Findings

The *American Banker* surveyed about 150 companies to obtain listings for the top 100 companies in trust assets and income. These are some of the more important findings:

- Discretionary assets rose 21.2% at the top 100 companies last year, to $998.9 billion on Dec. 31, from $824.0 billion a year earlier. In 1985, trust assets were up a record 23%.
- The sharp rise in stock and bond prices was the main reason for the sizable gains in discretionary assets in both 1985 and 1986. A rise in securities prices is reflected in a higher value of discretionary assets.

From December 1985 to December 1986, stock prices rose 20%, as measured by Standard & Poor's Corp. 500 index. In the same period, bond prices rose more than 14%, as measured by the Shearson Lehman Brothers Inc. Long Treasury Bond Index.

From December 1984 to December 1985, the Standard and Poor's index was up 26%, and the Shearson Lehman Brothers index was up 18.6%.

- Among the top 10 companies in managed assets, ninth-ranked State Street Boston Corp. posted the largest percentage gain in assets. Its managed assets rose 68.4% in 1986, to $26.1 billion, from $15.5 billion in 1985, when it ranked 12th.

A company spokesman said that institutional trust assets, which account for 90% of State Street's total, increased 79% last year. This growth was attributable to new business, additional products, funding by existing clients, and asset appreciation.

- Gross trust income for the top 100 banks and trust companies in the field rose a record 24.4%, to $5.69 billion in 1986 from $4.58 billion in 1985. The previous record gain was 18.7% in 1985.

The main reasons for the record gain in 1986 were higher prices for trust services and the rise in securities prices. In 1985, the rise in securities prices was the main reason for the sharp rise in trust income. Trust revenues are dependent on the value of assets under management and a variety of fee-based products, such as securities lending, stock transfer work, and custodial work.

- For the 19th consecutive year, or since the *American Banker* began keeping track of gross trust income, Morgan was the top company in the field. Its gross trust income totaled $398.4 million in 1986, up 29.6% from $307.3 million in 1985. According to Morgan's annual report, the increase was attributable "primarily to higher income from securities-related operational services and higher investment management fees."

The Chase Manhattan Corp. again was second in gross trust income with $265.6 million, up 37.4% from $193.3 million in 1985. As mentioned above, Citicorp ranked third in gross trust income with $233.9 million.

Bankers Trust moved down one notch to fourth place, despite a 24.9% rise in 1986 trust income to $222.4 million. According to the firm's annual report, the gain was the result of a "higher volume of business and improved pricing."

The Bank of New York Co. remained in fifth place in trust income with $205.6 million, up 21.4% from $169.3 million in 1985.

Pricing and Profitability

Cates Consulting Analysts Inc., New York, in its annual survey of trust departments, known as Trustcompare, found that the prices of trust services — which had remained virtually unchanged since 1984 — firmed up in all product areas except personal trusts in 1986.

In addition, the survey found that overall trust profitability — as measured by pretax operating profit — had risen to 32.75% in 1986 from 29.54% in 1985. This is pretax net operating income as a percentage of total income.

The Cates survey also measured the importance of trust operations to the profitability of banks. For the 126 banks participating in the Cates survey this year, trust operations contributed five basis points to these banks' mean return on average assets of 0.90%.

For banks with gross trust revenues in excess of $25 million last year, trust operations contributed six basis points to their mean ROA of 0.87%. And for banks with gross trust revenues of $15 million to $25 million, trust operations contributed nine basis points to their mean ROA of 0.94%. ■

More Banks Forming Advisory Units

NEW YORK — This survey of trust department income and assets finds that at least 27 of the top 100 firms now have affiliated investment advisory subsidiaries to manage the trust department assets of the firm.

Banking firms have formed, or are forming, investment adviser subsidiaries to manage the investments for some or all of the trust accounts of their subsidiary banks and to offer investment management and advice to outside clients.

There are several major reasons why banks are forming these units:

- Many bankers said that in the past, bank trust departments had a bad performance reputation as well as an unfavorable public image.

Banks have responded with investment adviser subsidiaries. The institutions have removed the trust management and advisement function from the trust department and placed it in a separate, specialized unit.

According to a Federal Reserve Board trust specialist, these units permit banks to look at the flip side of the image coin. "They are using these subsidiaries as positive marketing tools to aggressively pursue new institutional clients," the specialist said.

- In the past several years, banks have attempted to identify and isolate their profit centers more accurately. Investment adviser subsidiaries fit into this strategy.
- Deregulation has spurred the formation of investment adviser subsidiaries. Banks are entering areas of the financial services industry previously prohibited to them — such as brokerage, securities underwriting, and mutual funds. According to a Federal Reserve analyst, "Banks see the laws developing as follows: You can do it if you form a separate subsidiary."

This year, for the first time, the *American Banker* asked the top 100 firms in trust assets whether they had investment adviser subsidiaries. Of the 65 top 100 firms that responded to the question, 27 firms, or 42%, reported that they do have such a subsidiary.

According to preliminary figures from the Federal Deposit Insurance Corp., 84 banks have investment adviser subsidiaries that manage trust assets for 136 of their affiliated banks. These units manage $378.3 billion in trust accounts, $219.4 billion of which is for their own affiliates' accounts. They handle the other $158.9 billion for outside accounts.

— L. Michael Cacace

Fuji Bank Names Economist

NEW YORK — Fuji Bank Ltd., Tokyo, has named Hisaharu Kamiya as senior economist of its research division in New York.

Mr. Kamiya, 34, succeeds Masaru Takagi who is returning to Japan July 1 as a deputy general manager of the research division in the Tokyo headquarters.

As senior economist, Mr. Kamiya will follow U.S. financial markets and macroeconomic trends.

Prior to his New York assignment, Mr. Kamiya served as manager of the international division, Europe, and the Middle East. ■

Fed's Heller Supports Idea Of Huge Banks

By BARBARA A. REHM
Washington Bureau

WASHINGTON — H. Robert Heller, a Federal Reserve Board member, favors the idea of a few big banks. In fact, he believes four or five huge banks would be good for the banking industry, consumers, and the country.

Geographic barriers and service restrictions must be removed if U.S. banks are to compete with other domestic financial companies and with international institutions, Mr. Heller said.

"Banking reform is too important to languish much longer," Mr. Heller said in a June 26 speech before the Forecasters Club of New York. "We cannot afford to wait much longer to adopt laws that address the realities of today's financial markets."

If banks are allowed to expand into new areas and new services, the banking system in the U.S. may more closely resemble systems in other major industrial countries, Mr. Heller said. With nationwide branches, four to five large banks might evolve as they have in Canada, France, Great Britain, Japan, and West Germany. The assets of the largest banks in these countries range up to 10% or 20% of gross national product, he said.

If large banks were allowed to develop in the United States, the top five might have an assets-to-GNP ratio averaging about 4% to 5%, Mr. Heller predicted. Total assets at these institutions could be expected to average $175 billion, he said.

Based on experiences in other countries, "the fears of some observers that a few giant superbanks might dominate the entire U.S. banking scene are, therefore, probably unjustified,"Mr. Heller said. The $175 billion institutions would not be "all that different from the current size of our largest banking organization," he said.

Citicorp, the nation's biggest bank holding company, had total assets of $196 billion at the end of 1986. However, the second, third, and fourth largest banks in the United States had total assets of $104 billion (BankAmerica Corp.), $94.8 billion (Chase Manhattan Corp.), and $76 billion (J.P. Morgan & Co.) in 1986.

Mr. Heller questioned why U.S. banks are not allowed to offer the same services at home as abroad. "U.S. banking organizations are able to engage in securities activities overseas without encountering unmanageable risks or conflicts of interest," he said. "Why, then, should they not be permitted to engage in the same activities in the United States?

"The concept of a bank holding company with greatly expanded powers has much to commend itself," he said. "Bank, thrift, insurance, investment, securities, and real estate subsidiaries could coexist under the umbrella of a single holding company."

Mr. Heller would place restraints on banks to ensure that their federally insured deposits were not used recklessly. For example, Mr. Heller would require securities activities be conducted by a subsidiary of the holding company, not the bank. In addition, tight limits would be placed on the amount of credit the bank could extend to associated subsidiaries, he said. All transactions would have to be made at arm's length, too.

Mr. Heller said he approves of commercial companies owning banks. But assistance could flow only from the parent company to the bank, not the reverse, he said. ■

	TOTALS FOR THE TOP 100 FIRMS‡	**998,892,716,016**	**824,019,255,292**	**+21.2%**			

Discretionary assets: assets of accounts over which a firm is authorized to make investment decisions. Also included are assets in accounts for which the firm recommends, but does not make, investments. Assets of accounts where the firm shares investment power are also included. **Type of institution**— A footnote, appearing after the name of each firm, describes its type: **(B)**— Commercial bank; **(M)**— Multibank holding company; **(O)**— One-bank holding company; **(T)**— Nondeposit trust. **(c)**— Includes Rhode Island Hospital Trust National Bank, Providence. **(u)**— Does not include Rhode Island Hospital Trust National Bank. The bank had $2.93 billion in discretionary trust assets in 1985. **(†)**— Asset rank of the holding company as of 12/31/86. **(‡)**— The 1985 data are for the top 100 firms that year. **(r)**— Revised since publication on 6/30/86. **N.A.**— Not available. **Please note:** Irving Bank Corp., New York, which ranked 29th in discretionary assets with $8.95 billion in 1985, did not participate in the survey.

Top 100 Institutions in Trust Income

Ranked by Size of Trust Department's 1986 Gross Operating Revenues

Compiled by American Banker Copyright 1987

Japan Firms Outstrip US Rivals in Market Capital

Rise of Yen a Key Factor; Fear of Third World Debt Hurts American Companies

By JOHN P. FORDE

NEW YORK — The market values of the largest Japanese banks and securities firms far exceed those of their competitors in other countries, including the U.S., according to a survey by Morgan Stanley & Co., the investment banking firm.

Analysts attributed the disparity largely to the recent rise in the yen against other foreign currencies.

The list of the 50 largest publicly traded financial companies in the world included nine from the United States. (Tables summarizing the survey's findings appear on page 8.)

The market capitalizations of U.S. firms shrank from yearend 1986 to March 31 because of continued worries about Third World debt. These concerns were spurred especially by news that Brazil had announced a moratorium on payments on its foreign debt during the period.

Market capitalization is an important measure of the attractiveness of an individual company's stock to large institutional investors. It is figured by multiplying the number of a company's total outstanding shares by their quoted price.

Banks in the United States traditionally had small market capitalizations compared with other types of companies. Because of this, only the largest banking firms — those which had substantial amounts of actively traded shares outstanding — were considered suitable for the investment goals of major investors such as pension funds.

This has changed recently, however, as deregulation and the foreign loan problems faced by money center banks made regionals look better by comparison. These factors have brought regionals higher stock prices for their shares while acquisitions have increased the amount of stock issued by these firms.

The difference in how U.S. banks and banks in other countries have reserved against debt to less-developed countries has not been lost on investors. For example, German banks are 70% reserved against Third World

Rate of Failures Grows, but Concern Doesn't

Midyear Toll of 96 Banks Up from 66 a Year Ago

By JAY ROSENSTEIN
Washington Bureau

WASHINGTON — Some facts about bank failures in 1987:

- Through midyear, the Federal Deposit Insurance Corp. handled 96 bank failures. In addition, four troubled banks were given assistance to remain open, and "preliminary" assistance packages were worked out for the BancTexas Group Inc. in February and for two troubled Alaska bank holding companies in June.
- The failure rate is well ahead of last year's pace. At mid-1986, 66 FDIC-in-

EUROWEEK

Japanese Houses Jump Ahead As Eurobond Financing Slows

By JOHN J. DUFFY
London Bureau

LONDON — Shifting patterns in international borrowing produced dramatic changes among the major players in the Eurobond market for the first half of 1987.

Eurobond financing volume totaled $89.59 billion in the six months ended June 30, down from $94.10 billion for the same period last year, according to the *International Financing Review,* a weekly Euromarkets magazine. Behind the moderate decline, however, was a reshuffling of the currency mix of new Eurobond issues and a shift in the standing of Eurobond houses.

The major story was the rise of the Japanese houses — attributed to the increasing popularity of the yen in international markets — and the fall of some long-dominant U.S. and European competitors. Japanese houses captured five of the top 10 spots in the underwriter rankings for the first half of the year, up from two top 10 rankings for the same period last year.

Nomura Securities, in particular, staged a savage assault on front-runner Credit Suisse First Boston, London, capturing 13.43% of the market and knocking Credit Suisse into third place with a 5.41% share.

The growth of Japanese banks and securities firms drove major U.S. players including Merrill Lynch International, Shearson Lehman Brothers, and Goldman Sachs International out of the top 20 underwriters. The major U.S. bank competitor, Morgan Guaranty Ltd., held its own, slipping only three spots to seventh place from its 1986 ranking.

AN **American Banker** WEEKLY FEATURE

The shifts in rankings are tied directly to shifts in the market shares of the major currencies. The market share of the U.S. dollar, which has been eroding in value since February 1985, dropped to 38% in the first half of 1987, compared with 63% in all of 1986. The Japanese yen's market share in Eurobond financings nearly doubled in the first half to 18.7%, compared with 9.9% in all of 1986.

U.S. corporations avoided dollar financings in Europe in the first half of the year because of the currency's extreme volatility. According to Salomon Brothers Inc., U.S. issuers raised $12.5 billion in Europe in the first half of 1987, a 43% drop from the same period a year earlier.

Floating-Rate Notes Collapse

The collapse of the market for floating-rate notes contributed to the decline in dollar financing volume, market analysts said. Since 1984, floaters have accounted for the largest amount of new issues in dollars.

Because of the crisis in perpetual floating-rate notes last year, liquidity in the notes generally has dried up, and issuers — mostly banks — have avoided the sector. Many banks now raise floating-rate money by issuing fixed-rate bonds in Australian dollars and other currencies and swapping the proceeds into floating-rate dollars.

INTERNATIONAL BRIEFING

Citibank Brandishes Gold Citicard To Charge into Japan's Retail Front

TOKYO — Faced with intense competition for corporate business in cash-rich Japan, the Tokyo branch of the U.S.-based Citibank has launched a major effort into the retail market. The bank hopes to increase its overall profit by using its own credit card to take advantage of a new era in Japanese consumer credit.

With assets of about $4 billion, Citibank, a subsidiary of Citicorp, is the largest foreign bank in Japan. A solid base of money market and foreign exchange volume has enabled Citibank to keep its return on assets well above the dismal foreign bank average. For fiscal 1987 the bank's pretax return-on-assets estimate is between .5% to .7%, up from .3% in 1986.

To boost returns on assets to even higher levels in a saturated banking market, Citibank will have to be innovative. That is one reason why the bank wants to be the first foreigner in the Japanese retail market.

Yet, with only six branches in the country — two in Tokyo, and single outlets in Yokohama, Nagoya, Osaka, and Kobe — Citibank will be hard-pressed to compete with the huge multibranch networks of Japan's commercial banks. To counter that disadvantage, the bank will rely on the Gold Citicard to solicit business from the Japanese market.

"Our branch network is too small to be a successful mass consumer vehicle," said James Collins, North Asia division head for Citibank. "We cannot use a broad scale product delivery plan, so we will reach consumers through specialized services. Our plan is to leverage off Citicard to literally reach out to hundreds of thousands of Japanese consumers and foreign residents. That will be the basis of our retail strategy for Japan in the 1990s."

Bank Aims to Establish Cheap, Stable Source of Funds

Citibank managers believe there are customers who want to deal with an international retail bank. By tapping that target market, one of the bank's primary aims is to set up a stable and relatively cheap source of funds. To do this, Citibank has created a consumer group, which consists of one-third of the institution's 1000 Japanese employees.

"Japan has a population of 120 million, and the credit card market is wide open," said Mr. Collins. "The U.S. has an average of three cards per person while Japan has only .7. If this country increases its ratio to 1.7 cards per person, then another 120 million cards have to be issued. There is no reason why Citicard could not take 1% of that increment."

To enter this potentially attractive market, Citibank became the first foreign financial services company — beside American Express Co. — to establish its own card. The Gold Citicard launch was in March, and the bank projects a base of 20,000 users within a year. By the third year, the company hopes to reach its medium-term goal of 100,000 cardholders.

Citicorp Card Services was established in the United States in October 1986 and opened a Tokyo branch in December. As the largest issuer of bank cards in the United States, with 15 million Visa and MasterCards in use at year's end, Citibank will issue its Far Eastern version in conjunction with Union Credit Card Company of Japan and MasterCard International.

Presently, a Gold Citicard membership costs about $80, with a $40 cost per additional card. Japanese members will be able to use their cards in about 520,000 Union Credit Card establishments, at about 2,000 cash dispensers, and throughout the MasterCard network.

Citibank will allow clients to withdraw up to $1,400 in cash and use the card to facilitate approval of loans up to $35,000. With the "Citishopping" system cardholders accumulate "Citipoints," which allow them to purchase select products at special prices.

"It's going to be a wonderful battle for the card market. We will go after the same upscale consumer as Amex and Diner's Club [run by Fuji Bank] but add middle class users," said Mr. Collins. "Gold Citicard will be much broader than these two competitors. As the law permits, we will become much more than a plain charge card. We want to be already in position on the day banks are allowed to extend revolving credit lines to consumers."

Citibank will not only compete by offering revolving credit lines, but when interest rate deregulation reaches the consumer level, the bank also expects to make use of rate structures to attract new business.

Using the card as a consumer link, Citibank will try to attract savings and certificate of deposit money, while using direct mail to sell a series of other products.

Ministry of Finance Expected To Approve Revolving Credit Lines

Given the present circumstances in Japan, Citibank may not have to wait too long to put its credit card plans into effect. Currently, the Japanese government is considering increasing domestic demand by deregulating the consumer finance business. In the near future, the Ministry of Finance is also expected to allow commercial banks more leeway in the area of consumer loans by extending the right to offer revolving credit lines.

The consumer finance business is now dominated by bank-affiliated credit card companies and large credit sales firms. Commercial banks started to compete with credit companies only in 1985, yet the combined balance of the 12 leading banks' consumer loan portfolios is estimated at around $7 billion, up 70% from a year ago.

That figure is small, however, compared with total consumer finance business of $275 billion. The leading credit company, Nippon Shimpan has yearly turnover estimated at $19 billion, and rival Orient Finance, affiliated with Dai Ichi Kangyo Bank, has turnover of about $18 billion.

The Ministry of Finance hopes the new competition will lower the average interest rate charge on loans and decrease the overall cost of money. Citibank is in favor of both these legislative moves.

Proof of Prudence or Sheep Mentality?

By PHILIP T. SUDO

NEW YORK — T. Joseph Semrod, chairman and president of United Jersey Banks in Newark, has occasionally noted that "the sheep syndrome seems to permeate the banking industry."

Recent moves by banks to raise their loan-loss reserves would do nothing to change his mind, although they may put the market at greater ease.

To date, 50 bank holding companies have followed Citicorp's dramatic lead and announced a special, one-time provision to protect themselves against losses to borrowers in lesser developed countries. Companies with an LDC portfolio of as little as $2 million have announced special provisions.

As a result of those actions, 35 have said they will report losses for the second quarter, and 12 have indicated they will show losses for the entire year.

On May 19, Citicorp said it would add $3 billion to its reserve to cover potential losses on $14.8 billion in Third World outstandings.

Through July 1, six more of the nation's top 10 bank holding companies have taken actions similar to Citicorp's. The exceptions are J.P. Morgan & Co. and Bankers Trust New York Corp., two firms already highly capitalized, and Wells Fargo Corp., which has a relatively small LDC exposure.

Some banks have announced special provisions of as little as $4 million.

When asked whether banks were prompted by true balance-sheet concerns or simply the herd instinct, Ronald Mandle, bank analyst for PaineWebber Inc., said, "It's a combination of both. Once Citi moved, the others were likely to follow, because a lot of them have the same loans."

But as for whether any of them would have acted had Citicorp not taken its step first, he said, "Probably not that many would have." ■

Special Provisions for Third World Debt

Banking institutions increasing reserves against loans to lesser developed countries

EXECUTIVE CHANGES

Robert Kemper Joins Consultants

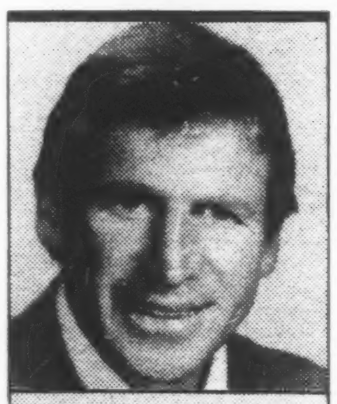
Robert L. Kemper, a director of the National Center on Financial Services at the University of California at Berkeley, has joined **Edgar, Dunn & Conover Inc.,** management consultants based in San Francisco. Mr. Kemper, 58, was formerly president and chief executive officer of BankWire, a New York-based data communications cooperative owned by the nation's largest banks. From 1978 to 1983, he served as vice chairman at Wells Fargo Bank. Mr. Kemper is past president of the Bank Administration Institute, the California Bankers Association, and the Western States Bankcard Association. He retains his post at the National Center on Financial Services.

BANCOHIO NATIONAL BANK, Cleveland, announces the election of **Stephen B. McLane** as executive vice president of its board of directors. Mr. McLane joined BancOhio in 1986 as manager of the metro/multinational division, and currently heads the corporate banking group. Also elected assistant vice presidents were: **Lynn Vadini Armbrust** and **Thomas L. Mercer,** information systems division; **Scott E. Bennett,** Marion area; **Jeffrey S. Chapman,** investments division; **Linda M. Kight** and **Gerald P. Walker,** secured credit division; and **Gretchen Lynn Yates,** corporate services division. BancOhio is a member of National City Corp., Cleveland, a bank holding company with $13.9 billion in assets.

BEACH FEDERAL SAVINGS AND LOAN ASSOCIATION, Boynton Beach, Fla., has appointed **Alvin A. Hirsch** senior executive vice president and chief operating officer, responsible for accounting and treasury operations. He is also chief financial officer and treasurer.

THE VERMONT BANKERS ASSOCIATION has elected **Jean A. Hubner** president. The president-elect is vice president of Vermont National Bank. **Chester D. Andrews,** president of Factory Point National Bank was elected first vice president, and **Kendrick F. Bellows Jr.,** president of Bank of Vermont, was elected second vice president.

OLD STONE CORP., Providence, R.I., the parent of Old Stone Bank, appointed **Robert M. Doyle** executive vice president of Old Stone Development Corp. Mr. Doyle had served since 1983 as senior vice president of Old Stone Development, responsible for initiating new investment opportunities. Mr. Doyle joined Old Stone, as vice president of the bank and the development corporation, in 1983.



Robert M. Doyle

THE FEDERAL HOME LOAN BANK OF SAN FRANCISCO has named **William K. Black** senior vice president and general counsel-corporate secretary. Mr. Black will provide legal advice on thrift policy proposals submitted to the Federal Home Loan Bank Board. Mr. Black was formerly a deputy director for the Federal Savings and Loan Insurance Corp.

FIRST CITY NATIONAL BANK OF HOUSTON has elected **Charles W. Patterson** as executive vice president. He joined First City in 1973, became a group manager in the energy division, was promoted to department manager of the special loans group in 1985, and division manager in 1986.

BankLink Inc. Offers Stop-Payment Service

Special to the American Banker

NEW YORK — BankLink Inc., a licenser of cash management services, has announced a new stop-payment service.

The service allows corporate cash managers to electronically send stop-payment requests to their banks' processing locations. Confirmations are also received electronically.

BankLink is offering the service, on a pilot basis, throughout the summer. It has not yet scheduled a formal release date.

The stop-payment service eliminates the need for cash managers to spend time telephoning their banks to order and confirm stop payments. It also makes typed confirmations unnecessary.

Decentralized as well as centralized bank operations can use the service, the company said, because requests can be routed to one of several locations within a bank.

According to Jonathan Butterfield, the company's managing director, the idea came after BankLink studied corporate cash management needs. "Stop payments consistently came up as the service corporations were most interested in," he said.

The BankLink system, part of Chemical Technologies Corp., is licensed to 87 financial institutions worldwide. Chemical Technologies, a distributor of electronic financial information services, is a subsidiary of Chemical New York Corp. ■

MEMORY BANK

Following are the answers to the Memory Bank Quiz on page 16.

1. False. Robbers took ATM cards only 6% of the time. (In 1986, there was a rate of one violent criminal incident per 3.2 million ATM transactions.) **June 29, page 15 : column 1.**
2. B) 50%. **June 30, 2:1.**
3. First Chicago Corp. **June 30, 2:4.**
4. Certificates of deposit. **June 30, 2:3.**
5. H. Robert Heller. **June 30, 8:4.**
6. False. As the 200th anniversary of the U.S. Constitution approaches, the Billy Buttons are part of a campaign to raise funds to restore a statue of William Penn in Philadelphia. **June 30, 12:1.**
7. Marshall & Ilsley Corp., Milwaukee. **June 30, 31:1.**
8. International Business Machines. **July 1, 10:1.**
9. Land. Sun State expects to sell 740 acres in affluent Scottsdale, Ariz. **July 3, 5:2.**
10. Ernst & Whinney. **July 3, 2:1.** ■

Retirement . . .

➽ Continued from Back Page

the services.

Along with the survey results, the association has published a new National Financial Planning Index showing how much consumers can expect to pay for such basics as a college education, a new car, and a weeklong family vacation. The prices were obtained from national providers of goods and services.

The index suggested that a family of three with an annual gross household income of $75,000 would have to spend $40,440 a year to cover the cost of an upscale home, funding a retirement plan, a four-year private college education, a new car, a one-week family vacation, and a $500,000 life insurance policy. ■

EUROWEEK

➽ Continued from Page 2

This year's decline in dollar fixed-rate and floating-rate issues has been accompanied by an astounding rise in another type of dollar financing — bonds with equity-purchase warrants.

Unfortunately for U.S. and European houses, however, these bonds have been issued almost entirely by Japanese companies and floated by Japanese securities firms or banks.

So far this year, Japanese borrowers have issued more than $11 billion of bonds with equity-purchase warrants, compared with $12 billion in all of 1986 and $1.6 billion in 1985. In July alone, underwriters expect to sell$4 billion of the bonds.

The equity-purchase warrants grant investors the right to buy Japanese shares at a fixed price, representing an inexpensive way to play the Tokyo stock market.

With Tokyo stocks up an average of 40% this year in dollar terms, companies have been able to sell the bonds with warrants at interest rates of about 1%. For example, a recent $800 million warrants deal for Toyota, the largest such issue to date, offered a coupon of only 1¼%.

Such low interest rates have Japanese companies clamoring to sell the issues, and companies including Nomura and Daiwa have been more than accommodating. Underwriting the issues does not yield much profit, but it can help enormously with league table rankings, which are important to the Japanese.

The outlook for U.S. banks and securities firms is not much brighter for the second half of the year, analysts said. A major reason is the termination last week of the U.S. tax treaty with the Netherlands Antilles.

Unitl 1984, U.S. corporations issued Eurobonds through subsidiaries in the Netherlands Antilles to avoid the 30% withholding tax on foreign investment in U.S. securities. With the demise of the tax treaty, U.S. bonds became subject to the tax, and prices fell sharply.

Although the U.S. Treasury said late last week that it would propose legislation to exempt most of the pre-1984 bonds from the tax, the episode has left European investors highly suspicious. Most importantly, the change in the tax structure made it possible for U.S. issuers to call for early redemption of more than $30 billion of U.S. bonds issued during the high-interest-rate period of the early 1980s. European investors now face the loss of millions in interest income because of the early redemptions.

"I think it will be a long time before investors here ever trust a U.S. issuer again," said one money manager based in Switzerland. "U.S. corporations are going to face a lot of hostility here for some time to come." ■

Study Says Europeans Lag in Financial Services

By JOHN J. DUFFY
London Bureau

LONDON — A vast potential market for payment cards and related financial services in Europe is not being served adequately by European banks, according to a study released here this week by MasterCard International Inc.

It concluded that European banks have been too preoccupied with keeping U.S. financial services giants like American Express Co. out of their national markets. In the process, they have failed to develop significant payment products of their own and are in danger of losing their best customers to such large, international competitors, the study warned.

MasterCard, the international bank card association based in New York, underwrote preparation of the study by Lafferty Business Research, a London-based publishing and research firm.

"The European banks have been preoccupied with building a new Maginot Line against an imagined invasion by their American payment systems rivals," the report said.

"As a result, they have skimped on creating better European alternatives. They have created only two cross-border payment products with a specific European identity: Eurocheque, which is limited in its application and potential, and Eurocard, which has turned out to be a feeble attempt to rival American Express."

Lafferty Business Research queried about 6,000 consumers in Britain, France, the Netherlands, Spain, Sweden, and West Germany.

It found that 40% of credit card holders would go to a bank other than their own if it offered lower fees or lower credit card interest rates. Most consumers would prefer to deal with U.S. banks rather than European banks, the survey also showed.

"The conclusion is that the potential for internationalization of payment and credit services is substantial, and the European banks should not take customers for granted," the study said.

Other findings included the following:

- While European consumers' interest in credit cards is growing, a relatively small percentage of European consumers actually possess an internationally recognized credit card. Only 17% of those surveyed had Visa cards, 9% MasterCards, 2% American Express cards, and only 1% Diners Club cards.
- Seventy-four percent said they were worried about using bank payment cards or credit cards, unless they have built-in spending limits, because they think cards make it too easy to overspend.
- Name recognition of international payment cards is high. For example, 70% of consumers recognized the American Express name.
- Forty-four percent of those who have a bank payment or credit card are using it more frequently than they used to.
- Twenty-seven percent said they are interested in home banking. Of these, 41% would be willing to pay a monthly fee.
- Twenty-nine percent were interested in cashless shopping or electronic funds transfer at the point of sale.

Overall, the study established that European banks have done little in the way of market segmentation. While Europeans exhibit a high degree of loyalty to their local banks, this may be because there is little to choose from among institutions, the study said. ■

Visa Executive Starts Collection Firm

➽ Continued from Back Page

been charged off," he said. "I have been analyzing the market very closely while at First Interstate and at Visa, and ours will be the only outfit focusing entirely on bank card receivables."

As his interest grew in tackling the collection problem, "it became clear that there wasn't an appropriate place for something like this within Visa," he said.

Chargeoffs are "high and going higher," Mr. Johnson said. He estimated the bank card industry would charge off $2.5 billion this year, equal to at least 4% of card loans outstanding. Card-issuing banks could improve their earnings by recovering some of those chargeoffs.

By focusing on the problems of credit card issuers as opposed to other types of creditors, Credit Sciences will have a competitive advantage over collection companies that are "not in sync with the strategic objectives of the banking industry," he said.

Once the collection business is in place, Mr. Johnson said he will branch out into risk management consulting and "play more of an educational role in the industry."

Mr. Johnson has also obtained a consulting contract to help a major financial institution — which he declined to identify — establish a credit card bank in Georgia. The state recently enacted a law to attract such institutions and the accompanying jobs. ■

Rate of Failures Grows, but Public Concern Doesn't

Continued from Page 1

sured institutions had failed. The 96th closing last year did not occur until August 21.

- At the current rate, about 200 banks will fail this year, well above the total of 138 in 1986, the worst year since the Great Depression. There were also seven cases of open-bank assistance last year. Until 1982, the typical number of closings in a year was 10 or fewer, and assistance to open banks was almost unthinkable.
- During the first quarter of 1987, 54 banks insured by the FDIC were closed or given aid to keep them from failing. That is more than in any other three-month period since 1933.
- Before the year is out, more FDIC-insured banks will have failed or been propped up within six years than had been in the previous 48 years of the FDIC's activities. According to the agency, from 1934 through 1981, 581 insured commercial banks and savings banks were closed or given assistance to remain open. From 1982 through the first half of this year, 535 banks were closed or given aid.

The total of failures for 1987 does not include four assistance transactions. The total of failures for 1986 does not include seven assistance transactions.

Nonchalant Attitude

Sounds like a lot of doom and gloom — on paper. But despite those statistics, bankers and the public seem almost nonchalant about the rash of bank failures in the United States.

"If we talked five years ago about 200 banks failing, there would have been panic in the streets," said a banking industry observer.

Ever since Oklahoma's Penn Square Bank failed in 1982, beginning a new era of bank closings, the FDIC through fancy footwork has been successful in protecting the banking system, its depositors, and the federal insurance fund.

Said William Bosies, a lawyer for the American Bankers Association, "We feel the FDIC has been doing an excellent job of handling bank failures, minimizing the impact of those failures on the local communities in which those banks are located, and trying to innovate in finding new ways to handle bank failures."

Last year, the FDIC came up with innovations intended largely to overcome an inability or reluctance of healthy institutions to bid on failed banks.

For instance, the agency began a program in which an acquiring institution was given a "note receivable" at a high interest rate as an alternative to cash assistance to a bidder who didn't want the cash up front.

Also, the FDIC last year introduced the "negative premium," in which it would pay the acquiring institution to take over a failed bank, instead of usual practice of the institution paying a premium to the FDIC.

In 1986, the FDIC and other regulators made use of capital forbearance for well-managed institutions facing tough times. There also was the first intensive use by the FDIC of open-bank assistance, in which the agency gave aid to ailing institutions to keep them from closing.

Changes in Disposing of Assets

Last year, the FDIC also found ways to minimize the cost and burden of disposing of failed banks' assets. They included reselling assets in bulk packages and developing a computerized asset marketing system, in which the agency tries to match potential investors with assets in the FDIC portfolio.

According to the FDIC, the asset marketing program has identified about 1,500 potential purchasers of loan packages and helped close about 200 sales, ranging in size from a 10-loan package to another of 90,000 insurance accounts. These sales have involved about 129,000 loans with an aggregate book value of $342 million.

"We are realizing major benefits from the program now that it is fully operational," said Stephen Katsanos, an FDIC spokesman.

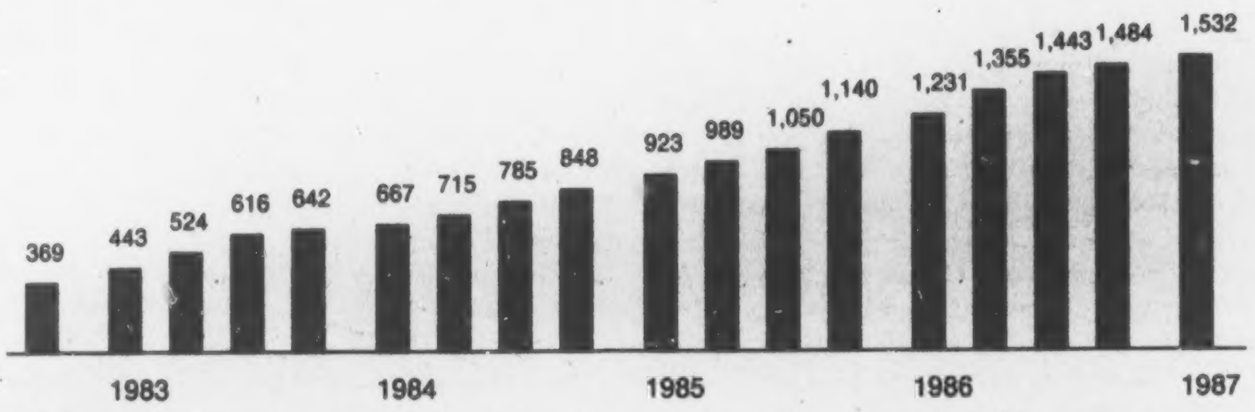
Much of the FDIC's work this year can be characterized as expanding on and tinkering with last year's programs. On the drawing board is a major expansion of the capital forbearance program. Instead of only farm and energy banks being eligible for leniency on capital standards, all FDIC-insured banks would be eligible.

The FDIC also is trying to shorten the interval between on-site examinations of both healthy and problem institutions. "During 1986, the FDIC added about one bank a day to the problem list," Mr. Katsanos said. "By the end of the year, we had almost one problem bank for every examiner on the staff.

"So if we're going to focus our efforts on just problem banks, we're not going to be getting into institutions that were rated as healthy ones at their last examination. We don't see that as an acceptable proposition."

Problem List Still Growing

Banks under federal supervision are examined by the Camel system, which rates banks from 1 (good) to 5 (bad) based on the quality of capital, assets, management, earnings, and liquidity, plus a composite rating. 'Problem' banks supervised by the Federal Deposit Insurance Corp. consist of 4- and 5-rated institutions.



Each bar represents the nummber of banks on the FDIC's problem list at the end of a quarter.

Source: Federal Deposit Insurance Corp.

There has been one major innovation so far this year. The FDIC now can offer a bidder funds up front to take over an entire institution, rather than having the agency assume the bulk of the problem loans.

"We want to keep all the credit in the private sector," FDIC chairman L. William Seidman said. "The value of assets goes down when we get hold of them."

FDIC officials also say this arrangement has the potential to bring more bidders to the table for failed banks, to be less disruptive to a failed institution's borrowers and other customers, and to ease the agency's liquidation workload.

The "whole bank" purchase plan was first used in April, when the $13.6 million-deposit Deer Lodge Bank and Trust Co. of Deer Lodge, Mont., was closed. Six of these deals were arranged in the first half of the year.

Problem List at All-Time High

The agency will have its hands full for the rest of the year. The problem list of institutions requiring special supervisory attention is still at an all-time high. It stood at 1,532 at the end of the first quarter, and Mr. Katsanos said there are about 1,600 on the problem list now.

The FDIC spokesman said last week that while bank failures have been increasing at a faster pace than in the past, the problem list has shown a more modest growth rate. "We're thinking that over the next 12-month period we might see some stabilizing in the rate of failures," he said.

The relatively good news recently has come from the Midwest and from agricultural banks. Agency officials say that in the past year farm prices have stabilized and some of the pressure on lenders in the agricultural economy seems to have eased. The bad news, though, continues to come from the southwestern states that are heavily dependent on oil and mineral exploration.

Kansas, a farm state, had 14 bank failures and two assistance deals last year. During the first half of this year, three Kansas banks failed. While six banks failed in Nebraska last year, there were no failures in the first half of this year.

But the oil state of Texas alone accounted for 31 of the 96 FDIC-insured banks actually shut down in the first half of 1987. Those 31 failures already exceed the 26 shut down there in 1986. And more failures in Texas may have been averted in February of this year when the FDIC and the Hallwood Group of New York participated in an assistance program for the financially troubled BancTexas Group. Several of the 11 banks in the BancTexas family were considered to be on the brink of failure.

The agency's future problems could depend on what happens to sectors of the economy and to interest rates. But the FDIC could become more efficient in responding to problem banks due, in part, to decisions in Congress.

Late last month, House and Senate negotiators adopted the "bridge bank" concept, which will enable the FDIC to take over a failed bank, keep it in business, and take whatever time it needs to find a buyer. The lawmakers also agreed to permit large problem banks to be acquired by out-of-state institutions before they are closed. This also should give the FDIC more time to find buyers for institutions.

In the past, there often has been a mad scramble to find a buyer in the hectic days before an institution is closed, and a rush by potential buyers to analyze the problem bank. This has reduced the number of bidders and perhaps the size of their offers.

"If we have an opportunity to open the doors of the failing bank to potential buyers, we think it will be a much better process for marketing the bank," said Mr. Katsanos of the FDIC. "It removes a good deal of the uncertainty." ■

Toll for 2d Half of '87 Begins: 2 More Failures

WASHINGTON — Two banks in Texas were closed late last week, bringing the number of failures to 98 for the year.

The Bank of Brazoria, Brazoria, Tex., was closed last Thursday. Moulton State Bank, Moulton, Tex., assumed $24.2 million of the Bank of Brazoria's deposits.

The failed bank's sole office is scheduled to reopen today as a branch of Moulton State Bank, which agreed to pay the Federal Deposit Insurance Corp. a $260,000 purchase premium.

The acquiring bank will purchase $13.5 million worth of the Bank of Brazoria's assets, and the FDIC will retain assets with a book value of $11.7 million. The FDIC advanced Moulton State Bank $10.4 million. This was the 32d Texas bank to fail this year.

Citizens Bank of Bryan, Texas, was also closed July 2. Deposits of $36.3 million at the failed bank were assumed by UnitedBank-College Station, College Station, Texas. ■

FDIC-Insured Banks that Have Failed or Been Rescued in 1987

Washington Bureau

WASHINGTON — The following is a list of U.S. banks insured by the Federal Deposit Insurance Corp. that have failed or to which the FDIC has given financial assistance because they were deemed in danger of failing in the first half of 1987.

A bullet (•) denotes a collapsed agricultural bank, defined by the FDIC as having agricultural loans exceeding 25% of its total loans.

The number of insolvent banks that have been either liquidated or merged into other companies is 96. Four others, listed here after the bank failures, received financial help from the FDIC to keep them from failing. Thirty-one of the failing banks were agricultural banks.

The total number of bank closings in 1986 was 138. Fifty-nine were agricultural banks. Seven others received financial help from the FDIC to keep them from failing.

□

1. **Bowie National Bank**, Bowie, Tex. Closed Jan. 8. Deposits of $12.6 million assumed by Bowie State Bank, a newly chartered subsidiary of Montague Bancshares Inc., Weatherford, Tex.

2. **The Security National Bank & Trust Co. of Norman**, Norman, Okla., closed Jan. 8. Deposits of $174.4 million assumed by a newly chartered bank of the same name, owned in equal parts by First Commercial Corp., Little Rock, Ark., and Northwest Arkansas Bancshares Inc., Bentonville, Ark.

3. **American National Bank of Grand Junction,** Grand Junction, Colo., closed Jan. 8. All but $2,000 of the total of $7.1 million in deposits were within the federal deposit insurance limit. Insured deposits transferred to Intrawest Bank of Grand Junction.

• 4. **State Bank of Cuba,** Cuba, Ill., closed Jan. 9. Deposits of $17.6 million assumed by National Bank of Canton, Canton, Ill.

• 5. **Latimer Bank and Trust**, Latimer, Iowa, closed Jan. 15. Deposits of $21.9 million assumed by the First National Bank of Clarion, Clarion, Iowa.

• 6. **The First National Bank of Rush Springs,** Rush Springs, Okla., closed Jan. 15. Deposits of $12.5 million assumed by First National Bank of Maysville, Maysville, Okla.

7. **First Charter Bank,** Denver, closed Jan. 15. Deposits of $9 million assumed by Century Bank and Trust, Denver.

8. **The First National Bank of Skiatook**, Skiatook, Okla., closed Jan. 15. Deposits of $13.8 million assumed by American Exchange Bank, Collinsville, Okla.

• 9. **National Bank of Frederick**, Frederick, Okla., closed Jan. 22. Insured deposits transferred to First National Bank and Trust Company, Frederick. All but $260,000 out of total deposits of $23.3 million were within the federal insurance limit.

10. **The First National Bank of Marlborough,** Marlborough, Mass., closed Jan. 23. Insured deposits transferred to Worcester County Institution of Savings, Worcester, Mass. About $1.5 million out of total deposits of $47.2 million were within the federal insurance limit.

11. **First Sierra Bank,** Bishop, Calif., closed Jan. 23. Insured deposits transferred to Security Pacific National Bank, Los Angeles. All but $673,000 out of total deposits of $23 million were within the federal insurance limit.

• 12. **The Farmers National Bank of Remington,** Remington, Ind., closed Jan. 29. Deposits of $33.6 million assumed by Lafayette National Bank, Lafayette, Ind.

• 13. **First State Bank of Pattonsburg,** Pattonsburg, Mo., closed Jan. 29. Deposit payoff. Deposits totaled $5.5 million, all within the federal insurance limit.

14. **Peoples Bank and Trust Co.,** Holdenville, Okla., closed Jan. 29. Deposits of $19.3 million assumed by The Bank, McAlester, Okla.

• 15. **The La Pryor State Bank,** La Pryor, Tex., closed Jan. 29. Deposits of $5 million assumed by Zavala County Bank, Crystal City, Tex.

16. **Montgomery County Bank NA,** in The Woodlands, Tex., closed Jan. 29. Deposits of $44.3 million assumed by Texas Commerce Bank NA, Houston.

17. **Bear Creek National Bank,** Bear Creek, Tex., closed Jan 29. Deposits of $25.6 million assumed by Jersey Village Bank, Houston.

18. **Boulevard State Bank,** Wichita, Kan., closed Feb. 5. Deposits of $84.9 million assumed by Union Boulevard National Bank, Wichita, a newly chartered subsidiary of Union Bancshares Inc., Wichita.

• 19. **State Bank of Allison,** Allison, Iowa, closed Feb. 5. Deposits of $16.7 million assumed by Lincoln Savings Bank, Reinbeck, Iowa.

20. **Sunbelt National Bank,** Dallas, closed Feb. 5. Deposit payoff. All but $32,000 of total deposits of $11.1 million were within the federal insurance limit.

21. **Market National Bank**, Denver, closed Feb. 5. Insured deposits transferred to Women's Bank NA, Denver. All but $110,000 of total deposits of $8.9 million were within the federal insurance limit.

22. **Community Bank**, Seiling, Okla., closed Feb. 11. Deposits of $5.4 million assumed by First National Bank of Seiling.

23. **Federated National Bank,** Live Oak, Tex., closed Feb. 11. Deposit payoff. All but $127,000 of total deposits of $11.4 million were within the federal insurance limit.

24. **Security National Bank,** Midland, Tex., closed Feb. 12. Deposit payoff. All but $41,000 of total deposits of $7.7 million were within the federal insurance limit.

25. **First City Bank of Atoka,** Atoka, Okla., closed Feb. 13. Deposits of $12.4 million assumed by the Atoka State Bank, Atoka.

• 26. **First State Bank of King City, Missouri,** King City, Mo., closed Feb. 13. Deposits of $13.8 million assumed by Citizens Bank and Trust Co., Chillicothe, Mo.

27. **The County Bank, Manatee County,** Palmetto, Fla., closed Feb. 13. Deposits of $163.2 million assumed by NCNB National Bank of Florida, Tampa.

28. **First State Bank of Atmore,** Atmore, Ala., closed Feb. 19. Deposits of $11.4 million assumed by First National Bank of Atmore.

29. **Hub City Bank and Trust Co.,** Lafayette, La., closed Feb. 20. Deposits of $37.5 million assumed by the Hibernia National Bank, New Orleans.

30. **The First National Bank of Weslaco**, Weslaco, Tex., closed Feb. 20. Deposit payoff. All but about $366,000 of total deposits of $69.2 million were within the federal insurance limit.

31. **First National Bank of Crosby,** Crosby, Tex., closed Feb. 26. Deposits of $8.2 million assumed by a newly chartered national bank subsidiary of Central Bancshares of the South Inc., Birmingham, Ala. The new institution retained the name of the failed bank.

• 32. **Farmers State Bank,** Hart, Tex., closed Feb. 26. Deposits of $9 million assumed by Hale County State Bank, Plainview, Tex.

• 33. **The Lewistown Bank,** Lewistown, Ill., closed Feb. 27. Deposits of $14 million assumed by the National Bank of Canton, Canton, Ill.

• 34. **The First State Bank,** Rockford, Iowa, closed March 4. Deposits of $14.6 million assumed by First Security Bank and Trust Co., Charles City, Iowa.

35. **Liberty Bank**, Houston, closed March 5. Deposits of $50.5 million assumed by Central Bank of Houston.

36. **Sealy National Bank**, Sealy, Tex., closed March 5. Deposits of $7.8 million assumed by Austin County State Bank, Bellville, Tex.

• 37. **First National Bank in West Concord,** West Concord, Minn., closed March 5. Insured deposits of $8.8 million transferred to Farmers State Bank, West Concord.

. 38. **First National Bank of Sapulpa,** Sapulpa, Okla., closed March 5. Deposits of $7.5 million assumed by American National Bank and Trust Co., Sapulpa.

39. **Western Bank,** El Paso, closed March 12. Deposits of $39 million assumed by MBank El Paso NA, El Paso.

40. **Plaza National Bank,** Del Rio, Tex., closed March 12. Deposit payoff. All but about $38,000 of the total of $30.4 million were within the insurance limit.

41. **Expressway Bank,** Oklahoma City, closed March 12. Deposits of $17.6 million assumed by First Interstate Bank of Oklahoma NA, Oklahoma City.

• 42. **The First National Bank of Olney,** Olney, Tex., closed March 12. Deposits of $13.4 million assumed by First National Bank of Olney, a newly chartered subsidiary of Olney Bancshares Inc.

• 43. **Beaver Creek State Bank**, Beaver Creek, Minn., closed March 13. Deposits of $7.3 million transferred to Citizens State Bank of Silver Lake, Silver Lake, Minn.

44. **United Oklahoma Bank**, Oklahoma City, closed March 17. Deposits of $94.1 million assumed by United Bank of Oklahoma, a newly chartered subsidiary of United Bankshares Inc., Oklahoma City.

45. **Red River National Bank in Clarksville**, Clarksville, Tex., closed March 19. Deposits of $22.5 million assumed by State Bank of DeKalb, DeKalb, Tex.

46. **Sweeney Bank,** Sweeney, Tex., closed March 19. Deposits of $17.6 million assumed by the First State Bank of Louise, Louise, Tex.

47. **Clarks Fork National Bank,** Fromberg, Mont., closed March 19. Deposits of $7.8 million assumed by Yellowstone Bank, Laurel, Mont.

• 48. **Morocco State Bank**, Morocco, Ind., closed March 20. Deposits of $14.1 million assumed by DeMotte State Bank, DeMotte, Ind.

49. **The Madill Bank and Trust Co.,** Madill, Okla., closed March 20. Deposits of $36.8 million assumed by First American National Bank, Tishomingo, Okla.

50. **New City Bank,** Orange, Calif., closed March 27. Deposits of $20.3 million assumed by Colonial Bank NA, a newly chartered national bank.

• 51. **The First State Bank of Billings,** Billings, Okla., closed March 26. Deposits of $9.4 million assumed by First National Bank and Trust Co., Perry, Oklahoma.

52. **Tallulah State Bank & Trust Co.,** Tallulah, La., closed March 27. Deposits of $30.2 million assumed by Bank of St. Joseph, St. Joseph, La.

• 53. **The First National Bank of Herington,** Herington, Kan., closed April 2. Deposits of $19.9 million assumed by the Bank of Herington, Herington.

54. **The Southwestern Bank NA**, Houston, closed April 9. Deposits of $14.3 million assumed by Omnibanc North Belt NA, Houston.

• 55. **First National Bank of Braman,** Braman, Okla., closed April 9. Deposits of $11.9 million assumed by Community Bank, Shidler, Okla.

56. **Commonwealth Bank**, Glendale, Colo., closed April 9. Deposits of $5.9 million assumed by Prudential Bank, Denver.

57. **Deer Lodge Bank and Trust Co.**, Deer Lodge, Mont., closed April 9. Deposits of $13.6 million assumed by Peoples Bank of Deer Lodge NA, Deer Lodge.

• 58. **The Citizens State Bank,** Brownstown, Ind., closed April 10. Insured deposits transferred to Monroe County Bank, Bloomington, Ind. All but $560,000 of total deposits of $28.1 million were within the federal insurance limit.

59. **Bank of Iron County**, Parowan, Utah., closed April 10. Deposits of $19.9 million assumed by Dixie State Bank, St. George, Utah.

60. **First Bank of Saginaw**, Saginaw, Tex., closed April 16. Deposits of $30 million assumed by Southwest Bank of Fort Worth.

• 61. **First State Bank of Forest City,** Forest City, Mo., closed April 16. Deposit payoff. Deposits totaled $6.6 million, all within the federal insurance limit.

62. **First Commercial Bank of Texas NA,** Houston, closed April 16. Deposits of $4.7 million assumed by Omnibanc North Belt NA, Houston.

63. **Bank of North Mississippi**, Oakland, Miss., closed April 22. Deposits of $13.7 million assumed by Bank of Mississippi, Tupelo, Miss.

64. **The Peoples Bank,** Collinsville, Ala., closed April 22. Deposits of $12 million assumed by Bank of Geraldine, Geraldine, Ala.

65. **North Central National Bank,** Austin, Tex. closed April 23. Deposits of $22.2 million assumed by Greater Texas Bank North, Austin, Tex.

• 66. **Osceola State Bank & Trust Co.,** Osceola, Iowa, closed April 23. Deposits of $8.4 million assumed by American State Bank, Osceola, a newly chartered subsidiary of Osceola Bancorp., Osceola, Iowa.

67. **Heritage Bank & Trust**, Salt Lake City, closed April 29. Deposits transferred to First Interstate Bank of Utah, Salt Lake City.

68. **UnitedBank-Houston,** Houston, closed April 30. Assets of $217.9 million. Deposits of $161.1 million in 13,400 accounts assumed by American Bank, Houston. Deposits also included about $3.1 million in 470 accounts that exceeded the federal insurance limit. The failed bank's five offices did not reopen. Customers can obtain funds at American Bank's office in Houston.

• 69. **Peoples State Bank,** Turkey, Tex., closed April 30. Assets of $6.0 million. Deposits of $5.9 million in 1,150 accounts assumed by Memphis State Bank, Memphis, Tex. Failed bank's one branch reopened May 1 as a branch of Memphis.

70. **American Bank of Commerce,** Denver, closed May 6. Assets of $25.3 million. Deposits of $22.2 million assumed by the Professional Bank of Colorado, Englewood, Colo.

71. **North American National Bank,** Littleton, Colo., closed May 7. Deposits of $8.9 million. One office closed, assets of $10.3 million transferred to FirstBank of Colorado NA, Littleton, Colo.

• 72. **First State Bank of Sisseton,** Sisseton, S.D., closed May 7. Assets of $21.2 million. Deposits of $19.7 million. Two branches reopened as branches of Farmers & Merchants Bank and Trust Co., Aberdeen, S.D.

• 73. **Moreauville State Bank,** Moreauville, La., closed May 8. Assets of $16.8 million. Deposits of $16.9 million. Two branches reopened as branches of Mansura State Bank, Mansura, La.

• 74. **Farmers State Bank,** Maddock, N.D., closed May 8. Assets of $11.8 million. Deposits totaled $11.6 million. Two branches reopened as branches of the Ramsey National Bank and Trust Co. of Devils Lake, Devils Lake, N.D.

• 75. **Marlin National Bank,** Marlin, Tex., closed May 14. Assets of $44.3 million. Deposits of $42.5 million assumed by Bank of Longview NA, Longview, Tex. One branch reopened next day as a branch of Bank of Longview.

• 76. **Todd County State Bank,** Long Prairie, Minn., closed May 14. Assets of $14.3 million. Deposits of $14.1 million in 4,600 accounts assumed by First National Bank of Long Prairie. Of two branches, one shut down. The other reopened May 15 as a branch of First National.

77. **United Bank,** Libby, Mont., closed May 14. Assets of $15.8 million. Deposits of $14.5 million in 4,900 accounts assumed by First National Bank in Libby, Libby. United's one office reopened May 15 as a branch of First National.

• 78. **First National Bank of Elbow Lake,** Elbow Lake, Minn., closed may 14. Assets of $17.5 million. Deposits of $16.2 million in 2,750 deposit accounts assumed by First National Bank of Fergus Falls, Fergus Falls, Minn. Elbow Lake's one office reopened May 15 as a branch of Fergus Falls.

79. **Bank of Oak Grove,** Oak Grove, La., closed May 21. Assets of $23.3 million. Deposits of $22.9 million in 4,800 deposit accounts assumed by West Carroll National Bank of Oak Grove. Failed bank's two offices reopened May 22 as branches of West Carroll.

80. **Lake Austin National Bank,** Austin, Tex., closed May 21. Assets of $42.5 million. Deposits of $37 million in 4,300 deposit accounts assumed by Greater Texas Bank Southwest NA, Austin. Failed bank's one branch reopened May 22 as a branch of Greater Texas.

81. **Texas Investment Bank NA,** Houston, closed May 21. Assets of $15.1 million, including about $54,000 in 17 accounts that exceeded FDIC insurance limit. Deposits of $13.4 million. Failed bank's one office will not reopen. This is an insured deposit transfer. Texas Investment customers will have access to their funds at River Oaks Bank, Houston, on May 22.

82. **Texas National Bank-Westheimer,** Houston, closed May 28. Assets of $27.5 million, deposits of $26.7 million in 1,200 accounts including $327,000 in 32 accounts that exceeded FDIC insurance limits. Failed bank's one office will not reopen. This is an insured deposit transfer to Texas Capital Bank-Westwood NA, Houston.

• 83. **First National Bank of Wilmont,** Wilmont, Minn., closed May 29. An insured transfer of $10 million of First National's $11.6 million of deposits was made to Farmers State Bank of Mountain Lake, Mountain Lake, Minn. First National reopened as a branch of Farmers State June 1.

84. **United Bank of Texas,** Austin, Tex., closed June 4. Insured deposits were transferred to MBank Austin NA, Austin. All but $1.7 million of the total deposits of $163.1 million were within the federal insurance limit.

85. **The First State Bank,** Frisco, Tex., closed June 4. Insured deposits of $39.3 million assumed by Promenade National Bank, Richardson, Tex.

86. **The Benton State Bank,** Benton, Kan., closed June 11. Transfer of $8.4 million in assets to First National Bank & Trust Co., El Dorado, Kan.

87. **First State Bank,** Milford, Tex., closed June 11. Assets of $6.4 million assumed by Ellis County State Bank, Milford. Ellis County is a newly chartered bank.

88. **Northwest Commercial Bank NA,** Houston, closed June 11. Jersey Village Bank, also of Houston, acquired $12.1 million in assets.

89. **Hamilton County State Bank,** Lockland, Ohio, closed June 12. The Provident Bank, Cincinnati, assumed $7.3 million of the failed bank's $8.7 million assets.

90. **Whittier Thrift and Loan,** Whittier, Calif., an industrial bank closed June 12. Assets of $14.8 million were transferred to Liberty Thrift and Loan, Orange, Calif.

91. **Eighty Niner Bank of Coyle,** Coyle, Okla., closed June 25. Deposits of $5.4 million were assumed by the Oklahoma State Bank of Mulhall.

92. **South Denver National Bank**, Glendale, Colo., closed June 25. Deposits of $47.7 million assumed by First National Bank of Southeast Denver, Denver.

93. **Liberty Bank & Trust Co.,** Greenwood, La., closed June 26. Deposits of $11.5 million assumed by Peoples State Bank, Many, La.

• 94. **Lanesboro State Bank,** Lanesboro, Minn., closed June 6. Deposits of $10.7 million assumed by the Goodhue County National Bank, Red Wing, Minn.

95. **First Midwest Bank,** Maryville, Mo., closed June 18. Deposits of $25.1 million assumed by the newly chartered First Bank of Maryville, a subsidiary of Citizens Bancshares Co., Clillicothe, Mo.

96. **Pelican State Bank,** Mansfield, La., closed June 24. Deposits of $6.8 million assumed by Peoples State Bank, Many, La.

□

These banks, which have not failed, did require financial assistance from the FDIC in order to stay open.

1. **American National Bank,** Durant, Okla. The FDIC granted financial assistance Feb. 25 to prevent a failure of the $9.1 million-deposit bank. As a result of the transaction, American National Bank merged with First National Bank of Johnston County, Tishomingo, Okla. The combined bank was named First American Bank, Tishomingo, with the Durant office operated as a branch.

2. **Central Bank and Trust Co.,** Glenmora, La. The FDIC granted financial assistance Feb. 26 to prevent failure of the $28 million-deposit bank. The assistance facilitated the merger of Central Bank and Trust with Peoples Bank and Trust Co., Natchitoches, La.

3. **Syracuse Savings Bank,** Syracuse. The FDIC granted financial assistance May 13 to prevent a failure of the $1.1 billion-deposit bank. The assistance facilitated the merger of Syracuse Savings with Norstar Bancorp, Albany, N.Y.

4. **Security Bank of Rich Hill,** Rich Hill, Mo., received $225,000 in open-bank assistance from the FDIC on June 5. The FDIC also bought $542,000 of Security Bank's assets. The failed bank has $12.9 million in assets. Deposits total $12.7 million. ■

Retirement Planning Tops List of Financial Worries

By LYNN BRENNER

NEW YORK — Americans worry more about retirement than any other long-term financial problem, according to a recent survey designed to explore consumers' financial hopes and fears.

The survey, conducted for the International Association for Financial Planning by Reichman Research Inc., also showed that about 34% of the population believes it would be beneficial to have their financial affairs managed by a professional.

Most respondents said they would select a financial planner for the job. Very few consumers could see bankers and insurance agents in the role, and upper-income consumers took a particularly dim view of bankers' money management skills.

The survey consisted of telephone interviews with 759 consumers representative of the U.S. population and with 255 consumers representative of households earning at least $50,000 a year.

Among its findings:

Both upper-income consumers and the general public rank saving for education among their top financial goals. The only goal both groups ranked higher is saving for retirement.

Americans are generally upbeat about their current financial situation, but they are considerably less optimistic about long-term prospects — and women are markedly less optimistic than men.

Some Money Left Over

Most people said that, at the moment, they're doing pretty well. Fifty-four percent of the general public and 83% of the higher-income group said it is relatively easy to pay their expenses and have something left over.

But 42% of the general public and 43% of the upper-income group said the next generation will have fewer financial opportunities.

Future generations will be worse off, 46% of the women said, compared with 39% of the men. Likewise, 27% of the women, compared with 20% of the men, said it is harder to pay bills and have money left over now than it was last year. Higher-income women are 50% more likely than higher-income men to say 1987 will be harder economically than 1986.

Charles B. Lefkowitz, chairman of the International Association for Financial Planning, said he isn't surprised that women have a less rosy view than men.

As a financial planner, Mr. Lefkowitz said he finds women in general to be more realistic than men and more ready to question optimistic assumptions — perhaps because they're under less social pressure to appear confident and knowledgeable about finances.

Americans are worried about the future, the survey suggests. And they're articulate about their fears. When asked to identify a few of their longer-term economic concerns, both groups of respondents cited unemployment, the U.S. budget deficit, the trade deficit, and inflation as major worries.

The survey also asked respondents their opinion of financial planners.

Consumers who have used financial planning services were asked what types of professionals they chose. Thirty-four percent said they had selected a financial planner, 30% a stockbroker, 23% an accountant, 16% a life insurance agent, and 11% a banker.

Only 22% of the high-income households and only 13% of the general public said they had used the services of a financial planner. But the potential market for financial planning is clearly larger.

For example, 43% of the upper-income group and 34% of the public in general agreed with the statement that it would be beneficial to have their financial affairs managed by a professional planner.

Among consumers who said they've used a planner, 73% said it was beneficial.

Respondents who said it would be beneficial to have their finances managed were then asked which of several types of professionals is most qualified for the job.

Financial Planners Preferred

The respondents chose financial planners by a wide margin.

Forty-eight percent of the public said a financial planner would be most qualified to manage their affairs — over an accountant (36%), a banker (17%), a stockbroker (14%), an attorney (13%), and an insurance agent (7%).

Among upper-income consumers, 57% said a financial planner is most qualified — over an accountant (39%), an attorney (17%), a stockbroker (12%), a banker (7%), and an insurance agent (5%).

These results help explain why many stockbrokers and life insurance agents have begun calling themselves financial planners in the past few years.

Not all of them would meet the association's definition of financial planning, which includes giving advice on budgeting, taxes, insurance, investments, retirement, and estate planning.

The good financial planner, Mr. Lefkowitz said, will gather all the data necessary to show the client's present situation, and then he will help identify the client's goals and obstacles that may stand in the way.

The recommendations should be offered in writing and include alternative ideas, Mr. Lefkowitz said. The planner is then expected to coordinate the implementation — making an appointment with a lawyer who could draw up the client's will, for example.

"And the planner must periodically review and update the financial plan," Mr. Lefkowitz concluded.

This comprehensive definition of financial planning was read to survey respondents who have used planners.

A surprising number, 47%, said it described their experience "very well," and 40% said it described their experience "fairly well."

Customers Report Satisfaction

Of those who had used financial planners, 64% were "very satisfied" and 24% "somewhat satisfied" with

Executive Leaves Visa to Start Credit Card Collection Company

By JEFFREY KUTLER

NEW YORK — A. Wayne Johnson, who might have become the next president of Visa U.S.A., has left the bank card organization to start his own company.

Mr. Johnson resigned as executive vice president of Visa on Wednesday, only seven months after his arrival fueled speculation that he eventually would succeed Charles T. Russell, chief executive officer of both Visa U.S.A. and Visa International.

Mr. Johnson's new company, Credit Sciences Inc., will provide loan collection and workout assistance to bank card issuers. Credit Sciences will open offices in Atlanta and Southern California later this month.

Mr. Johnson said his decision was in part personal, reflecting his and his wife's desire to return to their native Georgia. As a high-level strategist and assistant to Mr. Russell, he had moved to the San Francisco area.

When Mr. Johnson joined Visa, after more than a year as chief executive of First Interstate Bancorp's credit card subsidiary, he was the first outsider in Visa's 17-year history to join the top management circle.

Others had been promoted from within, including two other executive vice presidents: Roger Peirce, who runs Visa's global computer and communications networks; and B. Ray Traweek, who is responsible for products including the international automated teller machine network and the joint Visa-MasterCard debit card program known as Entree.

Mr. Johnson, 35, is a former management consultant with a strong bank card background. Industry observers regarded him as a likely successor to Mr. Russell, one of only two people to serve as president of the 19,000-bank Visa association.

Mr. Russell has headed the worldwide Visa corporation and its largest regional constituent, Visa U.S.A., since the retirement of D.W. Hock in 1984. Mr. Russell, 57, has not publicly discussed retirement plans.

Mr. Russell did not deny that Mr. Johnson, whom he recruited in a search for a different management perspective, was in the running for his post.

Open competition remains among Mr. Peirce; Mr. Traweek; Carl Pascarella, chief general manager of the Tokyo-based Asia/Pacific region; and perhaps others.

In a telephone interview last week, Mr. Johnson said he departed Visa on amiable terms. He said his new venture resulted from knowledge gained over the last two years about the growing problem of credit card loan losses and better ways to manage the risk.

"There is an absolute, unequivocal need for someone to help the industry collect receivables that have

US-British Capital Plan Worries Mortgage Bankers

Industry Predicts Proposal Would Boost Rates on Home Loans, Hurt Servicers

By JIM McTAGUE
Washington Bureau

WASHINGTON — The mortgage banking industry has warned regulators that a proposal to tie capital requirements to the riskiness of a bank's assets would boost mortgage rates and disrupt the home-lending market.

The plan, jointly proposed by U.S. and British regulators and expected to be approved, could also drive some commercial banks out of the mortgage-servicing business by preventing them from counting newly purchased servicing portfolios as assets in determining their capital levels, according to comments filed with the Federal Reserve Board.

Some observers contended that the risk-based capital guidelines would favor mortgage-backed securities issued by the Government National Mortgage Association (Ginnie Mae) because those issues are explicitly guaranteed by the government. That might prompt banks to sell off their holdings of securities issued by the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corp. (Freddie Mac), leading to an increase in mortgage rates, the observers maintained.

However, Federal Reserve Board chairman Paul A. Volcker has played down the mortgage industry's concerns.

Under the plan, Ginnie Mae securities would be considered twice as safe as similar issues of Fannie Mae and Freddie Mac because those securities are not explicitly guaranteed by the federal government.

Thus, if the new rules were to go into effect, a bank would require less capital to invest in a Ginnie Mae portfolio than it would to invest in an identical portfolio of Freddie Mac and Fannie Mae securities.

"One of our main concerns is that bankers may begin to unload Freddie Mac and Fannie Mae securities because of the plan," Michael Taliefero, director of financial affiliates for the Mortgage Bankers Association of America, said in an interview.

Financial Companies Changed Names At a Record Pace in First Half of Year

By JEFFREY KUTLER

NEW YORK — More corporations changed their names in the first half of 1987 than in any prior six-month period, and almost a third of the name changers were financial service companies.

Anspach Grossman Portugal Inc., the consulting firm that compiled the data, said that mergers and acquisitions, divestitures, and deregulation spurred the statistic to new heights. These trends are especially pronounced in the banking industry.

"The rate of increase is so great as to be almost epidemic," said Russell Anspach, a principal of Anspach Grossman Portugal, which monitors the market as part of its corporate identity consulting business.

The New York-based company's semiannual survey turned up 919 new identities, 272 of which were for financial institutions. These consisted of 120 commercial banks, 65 thrift institutions, and 87 other financial service organizations.

The commercial banking total was 58% higher than the 76 bank name changes in the first half of 1986. The banks kept pace with the 59% increase for all corporations, but thrift institutions (23%) and other financial institutions (10%) did not.

A majority of the changes, in financial services and other industries, were prompted by mergers or acquisitions. Of the new commercial bank names, 102, or 85%, were brought about by such transactions. Fifty-six of them were voluntary, and 46 were assisted by the Federal Deposit Insurance Corp.

Only six bank name changes were

Wall Names Five To Key Positions With Bank Board

By JIM McTAGUE
Washington Bureau

WASHINGTON — M. Danny Wall, the new chairman of the Federal Home Loan Bank Board, announced five major staff changes at the agency on Wednesday.

It was his first official action since taking office July 1. Mr. Wall also established an executive committee designed to accommodate a 50% increase in the Bank Board staff. Congress authorized the Bank Board earlier this year to budget 400 new positions.

Mr. Wall named James E. Boland Jr. executive director of the Bank Board. This position was previously held by Shannon Ann Fairbanks, an appointee of former Bank Board chairman Edwin J. Gray.

Mr. Boland had served as general counsel to the Senate Banking Committee's Republican staff. Mr. Wall had been Republican chief of staff on the same committee. Since July 1, Mr. Boland has been coordinating the Bank Board's transition from Mr. Gray's leadership to that of Mr. Wall.

Mr. Wall also named Jordan Luke to the general counsel's post, which had been occupied on an acting basis by Harry Quillian. Mr. Luke comes to the Bank Board from the Office of the Comptroller of the Currency, where he has been a deputy chief counsel since 1984.

Karl T. Hoyle was named director of public affairs, a post now held by Patrick McKelvey.

Mr. Hoyle had been executive vice president of government affairs for the Credit Union National Association, a trade group. Earlier, he was a lobbyist for the Independent Bankers Association of America.

Mr. Wall named S.G. Frank Haas 3d the executive director of policy, a position formerly held by Robert Sahadi, who has joined the Federal National Mortgage Association.

Between 1983 and 1985, Mr. Boland was a deputy comptroller for industry and public affairs at the Office of the

Loans Sour Fleet Earnings

PROVIDENCE, R.I — Fleet Financial Group Inc. said second-quarter net earnings totaled $19.2 million, or 35 cents per fully diluted share, down from $32.8 million, or 60 cents per share, during the same period last year. Fleet said the earnings reflect a charge related to an increase in loan-loss reserves of $40 million at Fleet National Bank. Fleet's Latin American loan-loss reserves total $57.5 million, or 50% of its $115 million in loans to the region.

Utility Hikes Bank Stake

TUCSON, Ariz. — Tucson Electric Power Co. said it increased its stake in Union Planters Corp. of Memphis to 16.4%. Tuscon Electric, which acquired 600,000 shares of Union Planters in January, said it bought an additional 400,000 shares for $35.125 per share. The company had said it intended to buy up to 1.4 million shares. The company also owns 9.5% of the stock of Citadel Holding Corp., a savings and loan holding company, and 24.1% of Foothill Group Inc., a financial services company.

Peru to Resume Payments

LIMA, Peru — The government of Peru plans to resume debt payments to the World Bank and to take other measures to lure foreign investment, including payment of debt in goods, rather than cash, said Prime Minister Guillermo Larco Cox. Peru owes about $14.7 billion to foreign creditors, many of them American banks. The World Bank halted disbursements to Peru on $460 million worth of proposed projects May 5 after the country fell behind on $55 million in interest payments. Peru is now negotiating for reduced payments.

SunTrust Earnings Up

ATLANTA — SunTrust Banks Inc. said it posted second-quarter net income of $70.8 million, or 54 cents a share, compared with $66.1 million, or 50 cents a share, for the same period last year. SunTrust said it sold to investors $28 million of its Latin American loans during the quarter, reducing its total Latin loans outstanding to $130.7 million

Violence Plagues Banks

PANAMA CITY — Foreign bankers here boarded up their windows in anticipation of violent clashes between government and anti-government forces. The violence began in early June after the military government objected to opposition demands that strongman Gen. Manuel Antonio Noriega step down. The U.S. has accused Mr. Noriega's of election fraud and of ordering the 1985 murder of a key government critic. Windows of American businesses, like the Bank of America, were broken last week, and paint was thrown on at least two other U.S. banks.

Contel in Satellite Deal

ATLANTA — Contel Corp., an independent phone company based here, said its Contel ASC unit plans to acquire Equatorial Communications Co., a provider of satellite network services. Contel ASC will pay $4 cash for each Equatorial share. Martin Marietta Corp. owns about 24% of the 14.9 million Equatorial shares. Contel provides digital communication services to businesses and government.

Study Shows Insider Loans May Signal Failure

Research Finds Many Loans to Bank Officials, Stockholders Portend Trouble

By JOHN P. FORDE

NEW YORK — Too many loans to insiders — including officers, directors, and major stockholders — are a major warning sign that a bank may eventually fail, a just-released study indicates.

The study of 9,080 banks was done by three University of Missouri professors. It found that institutions that lent to insiders amounts equal to more than 25% of their own financial base had a failure rate nearly four times higher than that of all banks.

Also, the five banks that had the highest insider loan ratios — meaning insider loans as a percentage of total equity at the end of 1986 — have all failed.

The study, which focused on banks with less than $1 billion in assets, was done by Edward C. Lawrence, Donald R. Kummer, and Nasser Arshadi of the University of Missouri's St. Louis School of Business Administration. The professors based their research on call reports submitted by banks to the Federal Deposit Insurance Corp.

There were 31 failures in the first half of 1987 among the 1,171 banks in the study that reported loans to insiders equal to more than 25% of equity last year, the survey said. This would work out to a 5.2% annual failure rate, which is about 3.9 times higher than the failure rate for all banks in that asset category. The regions that posted the highest insider borrowings were Alaska and the District of Columbia.

The study described high numbers of insider loans more as an important sign of poor management than as an actual cause of failure. In most cases, the study found that banks with high insider borrowings have lower return on equity, greater risk, higher expenses, larger loan losses, and lower dividend payouts than banks that have lent less to insiders.

The authors of the report said that the lower dividend payout to shareholders could result from one of two factors, neither of which it directly endorsed.

One rationale was that the smaller institutions with high insider borrowing might have rather limited access to additional capital, so they hang onto their earnings.

The more cynical possibility was that insiders might avoid paying dividends to outside minority stockholders in favor of "low interest, unsecured loans to themselves along with higher salaries and more elaborate facilities" than are available at other banks, the study said.

Whatever the reason for the bank's management practice, the study concluded that "insider borrowing activity will be one of the primary predictors of continued bank failures and abuses," said Mr. Kummer in a press release.

The study cautioned that there is nothing inherently wrong with a bank lending to its own officers and directors. A bank will often place long-term customers on its board of directors to promote future business development. Also, top managers can be enticed to stay with a bank by fringe benefits that include loans.

However, it warned, lending more than 25% of a bank's equity base "can cause problems in managing assets." Traces of this management problem can be seen on both the asset and liability sides of the balance sheet.

On the asset side, according to the study, these banks "have shifted funds out of Treasury and municipal securities into higher yielding loans (especially commercial loans)." While the institutions expect higher payoffs for this shift, they are also taking on higher credit risk with the loans than they would face with investment securities.

The effects of this increased credit risk on banks' earnings are worsened by funding pressures. The study found that the institutions lack a stable core

Former Chairman of Bohemian Savings Indicted

Special to the American Banker

ST. LOUIS — John V. Capozzi, former chairman of Bohemian Savings and Loan Association here, was indicted this week on charges that he arranged a complex financing scheme to buy Bohemian with its own money.

Mr. Capozzi, who lives in Pembroke Pines, Fla., was indicted on 15 counts of conspiracy, wire fraud, mail fraud, and conflict of interest.

He said after the indictments were unsealed Monday that the charges are "false and unfounded." He is free on $25,000 bond.

Mr. Capozzi bought Bohemian, which was insolvent, in 1983 with $2.5 million in cash assistance from the Federal Savings and Loan Insurance Corp. In addition, the FSLIC loaned Bohemian $5.4 million.

Last year, the FSLIC again declared Bohemian insolvent, and put the thrift in its management-consignment program.

The indictment alleges that when he purchased Bohemian, Mr. Capozzi arranged for the thrift to buy properties from him at inflated values. When Bohemian bought an undeveloped tract in Miramar, Fla., for $2.64 million in 1984, Mr. Capozzi made a profit of more than $2.1 million.

He is accused of conspiring to conceal his ownership of the property from federal regulators.

Another count of the indictment accuses Mr. Capozzi of receiving, in the form of a kickback, $198,000 of a $200,000 commission that Bohemian paid to buy an apartment complex in Hollywood, Fla.

Prosecutors claim Mr. Capozzi used the alleged kickback and the profits on property sales to help finance his purchase of Bohemian.

The Federal Home Loan Bank Board removed Mr. Capozzi as chairman in 1985. The FSLIC has filed a suit seeking to recover $75 million allegedly misappropriated by Mr. Capozzi and other officers of Bohemian.

Bohemian, with assets of about $200 million, remains open. It is currently being run by Farm & Home Savings Association, under the management-consignment program. ■

Financial Firms Changed Names at Record Pace

➸ Continued from Page 1

"straight or elective," which usually signals a new strategy or corrects a negative impression, according to Tony Spaeth, an Anspach Grossman Portugal principal.

These included minor alterations such as Barnett Banks of Florida Inc. dropping the words "of Florida" from its title; and well-publicized image enhancements such as Maryland National Corp.'s change to MNC Financial Inc., and United Virginia Bankshares Inc.'s change to Crestar Financial Corp.

Across all industries, straight name changes rose by 27% to 150 and included American Can Co.'s conversion to Primerica Inc. and UAL Inc.'s controversial move to Allegis Corp.

Corporate divestitures — now in the offing for Allegis and many other companies — have become increasingly common as a reason for name changing. Divestiture was cited in 68 cases so far this year, up from 18 in the first half of 1986.

"The combined total of name changes reflecting divestitures, sales of assets, or spin-offs increased 127% to 152, from 67," Mr. Anspach said. "A lot of corporate simplifying, clarifying, and cleaning house is taking place."

These reasons were less important in bank name changes. Only two were ascribed to divestitures, two to asset sales, one to a change in holding company status, and seven to "other changes in legal status," Mr. Spaeth said.

The financial industry as a whole — including banks, thrifts, and nonbank providers — have led all others in the Anspach Grossman Portugal standing for 13 years, but manufacturing and industrial companies closed the gap in 1987.

Some Financial Industry Name Changes

During First Half of 1987

From...	To...
American Can Co.	Primerica Corp.
AZP Group Inc.	Pinnacle West Capital Corp.
Barnett Banks of Florida Inc.	Barnett Banks Inc.
Brockton (Mass.) Savings Bank	Southstate Bank for Savings

Maryland National Corp.	MNC Financial Inc.
RepublicBank Corp.	First RepublicBank Corp.
United Virginia Bankshares Inc.	Crestar Financial Corp.
Zions Utah Bancorp.	Zions Bancorp.

Source: Anspach Grossman Portugal

The manufacturing sector registered 253 name changes between January and June, 19 fewer than in banking and financial services. The gap was four times as wide in the first half of 1986 when financial companies led by 208 to 131.

Also in the first six months of this year, 66 communications firms, 54 technology companies, and 51 in the food and restaurant industry changed their names. No other industry classification had more than 50 name changes, according to Anspach Grossman Portugal.

The 919 name changes nationwide over six months equaled two-thirds of the 1,382 that the firm counted in all of 1986. The financial industry's six-month total of 272 was 63% of its 433 last year.

Mr. Anspach expressed surprise at the continuing rush to change corporate names. "We thought this trend might have peaked in 1986, but clearly that isn't so. Name changes for the first half of 1987 alone are greater than the 871 changes for the entire year of 1984," he pointed out.

Although he makes his living helping corporations change their names and images, Mr. Anspach warned that the practice may be getting out of hand. "There are so many changes that any one change now might lose its impact. You have to ask whether some companies want to do it just to be copycats.

"Some firms may be better off if they didn't change their name but revised their identity system to overcome its

Financial: Page 11 ➸

Many Insider Loans Can Signal Failure

➸ Continued from Page 3

of deposits to support their aggressive investments.

Because of this, these institutions appear to be dependent on volatile and relatively expensive purchased liabilities to fund their assets. The study pointed out that large negotiable certificates of deposit represent almost 16% of deposits for the high lending groups but only 10% of deposits for the banks with lower insider borrowing ratios.

The study concluded that while banks that have relatively high insider borrowing have adequate capitalization — they averaged total capital equal to 7.4% of their assets — they probably could not "absorb large losses in an economic downturn."

The study concluded that more public scrutiny should be focused on the problems of insider borrowing. It said, however, that the "challenging task is to determine what set of conditions would be required before a particular case becomes abusive."

The authors also laid a groundwork of some proposals upon which regulations might be built. They suggested, for example, that restricting insider loans to between 5% to 10% might be suitable. Closer scrutiny by examiners and stockholders of insider loans was also suggested, and the study said that those abusers of insider borrowing should be subject to fines and jail sentences. ■

Strategic Dates

Jan. 1, 1991

CALIFORNIA TRIGGER: Full interstate banking in California is scheduled to go into effect on this date.

American Changed Image for Regional Market

By JEFFREY KUTLER

NEW YORK — The recently announced interstate acquisition of Delaware Trust Co. might have been out of character for American Bank and Trust Co. of Pennsylvania in Reading, but it was right on target for Meridian Bancorp.

Meridian Bancorp is, in fact, American Bank and Trust Co., but with a revamped image that reflects an ambitious growth strategy.

Along with hundreds of banks and other corporations — more than 900 in the first six months of 1987 — Meridian decided to drop a locally prominent name in 1983 to redefine itself in a broader marketplace.

The old name, American Bank, was too common for an institution that sought to distinguish itself as a fast-growing regional bank. At least 30 other banks in the country have American in their name.

Even before American merged with Philadelphia-based Central Penn National Bank in 1983, management realized something should be done about the name and what it communicated to customers, employees, and shareholders.

"At the time, we were a $2 billion country holding company acquiring a $1 billion bank in a major city," recalled Samuel A. McCullough, president and chief executive officer. "The company name was a critical aspect of our negotiations in 1982 and 1983."

Meridian Bancorp added the First National Bank of Allentown, Pa., in 1984. By the time it agreed to buy Delaware Trust Co., the new identity was so well ensconced it needed no further explanation.

At the end of 1986, Meridian had $6.8 billion in assets, making it the 72d largest holding company in the nation. Assets of $1.1 billion are to be added with the Delaware Trust deal.

Meridian's 1986 return on average assets was 1.09%, its return on shareholders' equity 15.57%. Both ratios were among the best in its peer group.

"We think we can grow to assets of $10 billion to $12 billion, just in the territory we are in, without major acquisitions," Mr. McCullough said before he closed the Delaware Trust agreement in May.

To people removed from the mid-Atlantic banking scene, Meridian's quiet rise to prominence and profitability was barely noticed. To those who know the region, which includes such top performers as PNC Financial Corp. of Pittsburgh and CoreStates Financial Corp. of Philadelphia, Meridian's new identity and marketing programs appear to be a natural progression.

That quiet evolution is exactly what Edwin F. Lefkowith, the bank's corporate identity consultant, sought. Mr. Lefkowith heads Lefkowith Inc., New York, which recently helped convert United Virginia Bankshares Inc. into Crestar Financial Corp.

"The change to Meridian was meant to be evolutionary," he said recently, "not revolutionary in the sense that it might be too jarring."

Although they unveiled the Meridian name and logo when the Central Penn merger took effect in 1983, each bank retained its own name and did not fully raise the Meridian banner for three years. They gradually changed the color scheme, put a common name on 130 automated teller machines (Meridian Card Centers), and finally put Meridian signs on all 150 branch offices and subsidiaries by 1986.

Mr. Lefkowith began working with Mr. McCullough and his management team in 1981, anticipating statewide banking in Pennsylvania and the reciprocal interstate expansion laws that were to follow. Mr. Lefkowith said Meridian's name change was so successful because it had top management's unqualified backing and it was integrated into well-conceived corporate goals and marketing strategies.

"You need the enthusiasm and support of the chief executive officer," Mr. Lefkowith said. "But to have his direct involvement, as we had with Sam McCullough, is a big plus, and that is rare.

"Too many corporate communication programs are implemented after the fact, after a decision is made," the consultant added. "This was one of the few programs of its type that was planned ahead. It is much more efficient that way."

Fashioning an Image

Mr. McCullough, who has been at the helm since 1978, got personally involved in the image change. He helped weed out potential names — from a pool of 1,000 possibilities — and is appearing in Meridian's print, radio, and television advertising.

The tag line — "professionals with the personal touch" — comes directly from Mr. McCullough.

"I have always thought strongly about the image of a company and its people," he explained in an interview. "Professional is the word that we have tried hardest to sell inside, to our people, so it works outside."

The transformation of image has paid off handsomely, he reports. "Market research shows that recognition of us and our name, ad recall, institutional awareness, and intentions to purchase our services have moved up dramatically," Mr. McCullough said.

"People I meet want to talk about our ad campaigns. They are singing the jingles. I like to hear talk like that."

Like others involved in corporate identity changes, Mr. Lefkowith says little about the selection process or the alternatives that were rejected. Meridian, which is geographically open-ended, filled the bill.

"If you have to explain what it means," Mr. Lefkowith said, "it ain't working." ■

Wells Fargo Targets Southern California

CEO Suggests Bank May Consider Moving Headquarters

By MICHAEL A. ROBINSON
West Coast Bureau

SAN FRANCISCO — Southern California has become such an essential market that Wells Fargo & Co. may eventually move its headquarters there, Carl E. Reichardt, the firm's chairman and chief executive officer, said in a wide-ranging interview.

The 55-year-old executive also indicated there is some substance to speculation that he is interested in a position on the Federal Reserve Board.

"I have always been interested in the workings of the central bank," he said. "I don't know that I really have any aspirations. But I don't know that I want to spend the rest of my life doing what I am doing. The Federal Reserve is something that has interested me."

Mr. Reichardt reiterated earlier statements that he is willing to watch from the sidelines as his competitors buy banks outside California. Wells Fargo can make more by keeping a close eye on its home turf, particularly the populous southern region, he said.

"Southern California is the best banking market in the state," Mr. Reichardt said. "If you would start a bank today, you would probably start in southern California. Having said that, we are 20 feet from where this company was founded 134 years ago," he said in the interview last week at the bank's headquarters in downtown San Francisco. "It would be a wrenching thing to move. I don't think we would do that in the short term."

But, Mr. Reichardt continued, "over the longer term, I think the company has to look at that possibility. I could not put a time frame on it. One would have to be naive if one did

Special Report

284 Banks, Thrifts, and Credit Unions Opened Doors in 1986, Survey Finds

By KENNETH J. HICKS

NEW YORK — The second half of 1986 saw 145 banks, thrifts, and credit unions open their doors, bringing the total for the year to 284. A third are located in southern and southeastern states.

This is one of the findings of the *American Banker's* survey of new financial institutions, published today.

The 284 institutions listed include thrifts, state and federally chartered commercial banks, trust companies, and federal credit unions. The institutions are listed alphabetically by state. Where the information was available, the date the institution opened, its initial capitalization, mailing address, top officer, and telephone number are shown.

The *American Banker* compiled the information from several sources, including the Office of the Comptroller of the Currency, the Federal Reserve Board, the National Credit Union Administration, state banking and savings and loan departments, and press releases.

The Comptroller's office did not have a figure for the total number of

Regulators Test Computer Filing Of Call Reports

By BARBARA A. REHM
Washington Bureau

WASHINGTON — A pilot program will use computers to speed the transmission of bank call report information to federal regulators.

The Federal Financial Institutions Examination Council said on Tuesday that Compuserve Inc., a computer time-sharing company headquartered in Columbus, Ohio, has been selected to collect reports of condition and income from commercial and savings banks. Compuserve will then make this information available through computers to federal regulators. The council members are federal regulators from the five agencies overseeing banks, thrifts, and credit unions.

Electronic transmission of the information is expected to reduce the reporting burden on banks while also making the data more timely and accurate, said Keith Todd, the council's assistant executive secretary.

William J. Bosies, federal administrative counsel at the American Bankers Association, said that over the long run banks will be able to send call report data more efficiently via electronics. He added that it will take approximately a year to adjust to the new reporting system.

Compuserve expects to begin accepting computer versions of call reports by yearend. The system will be fully operational by first quarter 1988, the council said.

About 2,000 banks currently use software programs to produce call reports. These are printed out by the banks and then mailed to the regulators — the Federal Reserve Board, the Federal Deposit Insurance Corp., or the Office of the Comptroller of the Currency. These banks will probably be the first to use the electronic transmission system, Mr. Todd said.

Regulators: Page 7 ➸

Would you feel more secure with a credit card program that offers very little risk?

If you have some good reasons to have a credit card program and also some good reasons not to want the full risk of running one, talk to Franklinton Financial Services.

Franklinton offers the perfect solution, and takes on the responsibility for conducting the program from beginning to end. Or, if you have a program now and want to convert, Franklinton may be interested in purchasing your portfolio. What could be easier? You benefit, and have the advantage of security, too.

It's just another way Franklinton takes a personal interest in your needs. And another reason why Franklinton is one of America's most popular credit card processors.

Call Joette Kuharic at 614/863-8222 for more information. You'll find her very helpful.

Talk to Franklinton... America's personal favorite.

Survey Shows 284 Financial Firms Opened in '86

Continued from Page 1

national commercial banks that opened in 1986 at press time. According to the Federal Reserve Board, if failed banks reopened under a new charter were included in the list, the total number of federally chartered commercial banks would be 307.

In 1985, almost 400 financial institutions opened. Since that year, financial institution start-ups have declined, primarily due to a slowdown in commercial bank openings. The drop in the number of new openings has been attributed to a policy by the Comptroller's office calling for proposed banks to have a chief executive officer in place before an application can be approved.

The Comptroller's office contends that such a requirement makes it easier to judge the bank's chances for success. Opponents, however, say the change makes it more difficult to organize a bank because few chief executive officer candidates are willing to commit themselves to an uncertain venture.

Another reason for the slowdown is market saturation. The banking industry has been undergoing consolidation that is expected to continue. Many new banks, in order to compete, are aiming at a particular community or market segment. Such banks do not consider the large financial institutions to be their main competition, but they compete against community- and segment-oriented banks or thrifts.

Another problem in opening a new bank also is affecting all of banking: recruiting qualified board members, and the costs of liability insurance for directors and officers. According to a study conducted by Korn/Ferry International, an executive search firm, 67% of the respondents believe that there is a problem filling outside directorships, and 79% believe the problem has not diminished since 1985.

In terms of liability insurance, 85% of those with coverage saw their insurance premiums increase compared with 78% in 1985. Those increases were also considerably higher in 1986. Last year, increases in director and officer liability insurance premiums jumped an average of 462%, versus 271% in 1985. Furthermore, 63% of the financial institutions experienced a decrease in total dollar coverage that fell an average of 42%, from $38 million to $22 million, the survey said.

A total of 29 federal credit unions opened in 1986, 18 in the second half of the year. Nine of those credit unions indicated a woman was the presiding officer, slightly more than the national average of 26%. Among the credit unions opening in the second half of the year is the Artists Community Federal Credit Union, in New York City. With approximately 350 members, it is open to artists of all disciplines — including architects, musicians, writers, and graphic artists — who are members of the New York-based Foundation for the Community of Artists Inc., a nationwide organization.

Make Personal Loans to Artists

The credit union states that one of its main purposes is to make personal loans to artists. According to a press release, "Traditional financial institutions often find it difficult to evaluate the untraditional needs and income sources of the arts community." Four of the five members of the institution's loan committee are artists, "which will insure an understanding of the needs of artists."

In addition to personal loans, the credit union management plans to begin a financial referral service to direct its members to "a variety of financial experts in the areas of taxes, debt management, financial planning, and investment."

Another survey finding is that Florida was among the top states in new financial services firm openings. Forty-five financial institutions opened their doors in Florida during 1986, identified as one of the main U.S. growth states. Though the Florida market has been an extremely attractive area for many of the big banks, the new institutions stress personalized service that the giants may find difficult to extend to all their customers. Among the new Florida banks is Sovereign Savings Bank, Palm Harbor, a state-chartered, full-service thrift located approximately 20 miles northwest of Tampa, on Florida's west coast. Paul W. Kremer, president and chief executive officer of the savings bank, once served as president and chief executive of Manufacturers Hanover Trust Co./Capitol Region, Albany, N.Y. He described Sovereign as an institution appealing to all savers.

"Banking is, more than ever, a people business, and Sovereign Savings Bank's most important product is the satisfied customer." Mr. Kremer is quoted as saying in the thrift's intro-

Survey: Page 15

Women Lead 12 of the New Firms

Of the 284 new financial institutions opened in 1986, 12 reported that women were the presidents or presiding officers. Nine are credit unions and three are commercial banks, according to a survey conducted by the *American Banker*. The National Association of Bank Women, a Chicago-based group formed to help women advance in the financial services field, feels that women heading new banks is a growing trend.

Further, a survey conducted by the executive search firm Korn/Ferry International, New York, found that banks and other financial institutions have taken the lead in the recruitment of women and minorities for management and directorships.

Larry Quinn, editor of *Executive Financial Woman*, the association's trade magazine, said that there "has been a definite trend towards woman heading new financial institutions." He added that "financial institutions have always been more receptive to women, particularly banks, insurance companies and credit unions."

Mr. Quinn attributes part of the upswing in women running new banks to a direct response to merger activity and bank consolidation. Competitive/cost cutting measures have caused more layoffs, and consolidation often leaves fewer areas where a person can attempt to move up through the hierarchy. As a consequence, or benefit, a new institution "offers women a more immediate chance to head a bank."

[illegible] Mr. Quinn said a [illegible] is not the only means for a woman to [illegible] services firm. "There are more opportu- [illegible] women — in the banking field. Especially [illegible] getting the chance to start and head new [illegible] gives them the management experience [illegible] to shine."

BankAmerica Slips to 3rd Largest in US

Rate Rise Blamed In FCA's Big Loss

By NINA EASTON
West Coast Bureau

LOS ANGELES — Rising interest rates in the second quarter took their toll on the troubled Financial Corporation of America, owner of the nation's largest savings and loan association.

On Thursday, the Irvine, Calif.-based company reported a loss of $176.8 million, or $5.01 a share, for the second quarter of this year. The company had announced earlier that it expected to post a loss in the $150 million to $200 million range. The second-quarter loss brings to $167.6 million the company's total loss for the first half of the year.

Texas American, MCorp Slip Again

By DAVID LaGESSE
Southwest Bureau

DALLAS — Two Texas banking firms that want to remain independent were weakened by continued operating losses in the second quarter.

MCorp, based here, reported a surprisingly large loss of $114.9 million, or $2.79 per share — compared with a year-ago profit of $21.7 million, or 44 cents per share. For the six months, MCorp lost $125 million, or $3.12 per share.

In Fort Worth, Texas American Bancshares Inc. reported a $6.5 million loss, or 59 cents per share, in the second quarter. In the period last year, the

Two Sides Remain Polarized As Fed Nears Reg E Decision

By JEFFREY KUTLER

NEW YORK — The longer the Federal Reserve Board delays ruling on a controversial consumer protection regulation, the more restive opponents of the measure become.

The proposal, an amendment to the Fed's electronic funds transfer rule known as Regulation E, would make it easier for nonfinancial companies such as retail stores to provide automated teller machines and point-of-sale payment services to consumers.

More than seven months have passed since the Federal Reserve's staff began the deliberations that will lead to eventual acceptance, rejection, or modification by the Board of Governors. No date has yet been set for final consideration.

The Fed is caught in the middle of a dispute that has divided bankers along retail and wholesale lines. The central bank will not please everyone no matter how it comes down on the Reg E proposal.

If adopted, the change would allow nonbanks such as supermarkets to operate automated payment devices without having to deliver monthly statements to users. Banks, meanwhile, would continue to be bound by Reg E's statement-rendering requirement.

Consumer bankers oppose the change because they want to forestall competition against the likes of Sears, Roebuck and Co. and American Express Co. The Consumer Bankers Asso-

Fed May Relax Rule on Bank Firms And Ailing S&Ls

By BARBARA A. REHM
Washington Bureau

WASHINGTON — The Federal Reserve Board in its open meeting today is scheduled to consider a relaxation of the so-called "tandem restrictions," which limit a holding company and its affiliates from interacting with failing thrifts that have been acquired.

Lowering the regulatory barriers could revitalize a buyer's market for failing thrifts, especially since banking firms remain stymied to expand by current restrictions on nonbank banks, according to industry observers. Any renewed interest in purchasing thrifts also would aid a troubled thrift industry in need of new capital and the insolvent Federal Savings and Loan Insurance Corp.

As the Fed's Regulation Y stands now, a bank holding company is restricted from joint marketing and cross-advertising of services or products with any acquired thrift.

"No question that they'll relax some of the rules, but how far they'll go is uncertain," one attorney familiar with the case said, adding that there is "a lot of housecleaning going on at the Fed" before Chairman Paul A. Volcker leaves some time next month.

Also at its meeting today, the Fed is scheduled to consider changes to its risk-control program for large dollar payment systems.

On May 19, 1986, the Fed proposed dropping tandem restrictions between certain affiliates of bank holding companies. If they are dropped, then a bank holding company's subsidiaries and an affiliate thrift will be allowed to promote each other's products and services. Displaying advertisements in lobbies also will be permitted. Thrifts acquired by bank holding companies also could refer business to holding company affiliates, and affiliates could send customers to the thrifts.

Not all limitations that accompany thrift acquisitions are expected to be

Citicorp Homeowners Inc. Leads in Mortgage Loan Originations

Top 166 Firms Originated $134.3 Billion in Residential Mortgages, 72% of Mortgage Company Loans in 1986

By L. MICHAEL CACACE

NEW YORK — Citicorp Homeowners Inc., St. Louis, was the top mortgage company in originating residential mortgage loans in 1986, according to an *American Banker* survey.

Citicorp Homeowners, a subsidiary of New York's Citicorp, originated approximately $6 billion in residential mortgages last year. This accounted for 3.2% of the $186.3 billion in mortgage loans originated by all mortgage companies, based on aggregate figures from the U.S. Department of Housing and Urban Development.

Table of Top Mortgage Loan Originators
Page 12

Mortgage companies originate first mortgages with their own or borrowed funds and then sell these loans to investors. In addition, for a fee, they will continue to service the mortgages they sell to investors. Commercial banks, thrifts, life insurance companies, and other institutions also originate residential loans, but are not classified as mortgage companies.

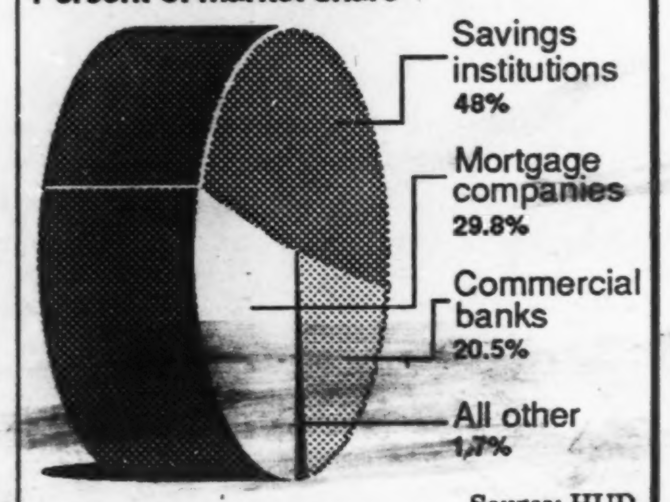
All the individual company data for the survey — except those for Citicorp Homeowners — were obtained by *American Banker* from the institutions directly. *American Banker* estimated the Citicorp Homeowners originations total with the help of several mortgage bankers and mortgage-banking analysts.

Residential mortgage loan originations — as defined by *American Banker* — are residential permanent mortgages originated for sale. Loans that were closed by the mortgage company, or loans where the mortgage company actually did most of the paperwork for closing, are included. In addition, both in-house production and purchased production — for example, loans purchased from brokers and correspondents — are included.

From 1985 to 1986, there was a tremendous surge in residential mortgage loan originations by mortgage companies, as well as by thrifts and banks. According to the Department of Housing and Urban Development, in-house mortgage loan originations on one-to-four-family residential properties rose 79% in 1986 to $442.3 billion, and loan purchases rose 94% to $427.1 billion. The housing department reports originations and loan purchase separately.

Residential Mortgage Loans Originated During 1986

Percent of market share



Source: HUD

According to the report, mortgage companies originated $131.6 billion in residential mortgage loans in 1986, up 107% from 1985, and purchased $54.7 billion in residential mortgage loans, up 175% from 1985. The total of this activity was $186.3 million.

Mortgage companies accounted for 29.8% of the $442.3 billion in residential mortgages originated by all the market's participants in 1986, up from 25.6% in 1985, the federal figures show. Commercial banks — which originated $90.7 billion in residential mortgages in 1986 — accounted for 20.5% of the market, down from a 20.9% share in 1985. Savings institutions — which originated $212.3 billion — had 48% of the market in 1986, down from 51% in 1985. All other institutions — which include life insurance companies — originated $7.7 billion, or 1.7% of the 1986 total, compared with 2.5% a year earlier.

While last year was a period of dynamic growth, analysts say that growth came to a screeching halt in the first third of this year, with the upsurge in mortgage rates.

According to Lawrence J. Trautman, a senior vice president and director of

Second-Home Financing Market Varies from Region to Region

By LINDA ELLIS

NEW YORK — From the mountains to the prairies to the oceans white with foam, the second-home market is a mixed bag.

Some ski-slope resorts are going south financially. Waterfront is generally attractive, but at various sites in the Southeast demand is at low tide. Nationwide, there is concern about Congress fiddling with the deductibility of mortgage interest.

Financing a cabin in the woods or an A-frame near the beach is a healthy seasonal segment of the lending picture at some thrifts, a sore spot in the portfolio for others.

Take Colorado, for example, where an Aspen thrift chooses to put 90% of its loan portfolio out in vacation-home financing for ski lodges. A mere 25 miles away, however, in Crested Butte, overbuilding has knocked the forces of supply and demand for a loop and lenders are getting bruised.

Soaring property values at the New Jersey shore make that a hot spot for lenders, but on Cape Cod in Massachusetts, it's the same ocean but the values have flattened.

Concern over the tax status of interest on second homes has slowed the supply of funds from lenders for vacation homes in the Chicago area, a leading thrift executive said, and the market in South Carolina is spotty.

Full deductibility of second-home mortgage interest was retained in the Tax Act of 1986, but there are now five proposals before the House Ways and Means Committee that could affect residential loan interest deductions:

- Limit deductions to purchase-price amount plus improvements.
- Limit deduction for home-equity loans to $10,000 over deduction allowed for medical and educational uses.
- Disallow deductions on open-ended home-equity loans.
- Cap amount of total debt eligible for first- and second-home interest deduction at $1 million; and
- Not allow boats and mobile homes to qualify as second homes for interest-deduction purposes.

Last Monday the House committee began drawing up a revenue-raising bill which, the housing industry fears, could include one or more of those proposals, said Thomas C. Franks of the American Resórt and Residential Development Association in Washington.

David Gothard

"Lenders don't like uncertainty and whenever there are doubts, a lender becomes much more conservative," said Thomas F. Greuling, executive vice president, Talman Home Federal Savings & Loan Association, Chicago. "No one knows what the long-term effect of tax changes [on home financing] will be. There are some misty areas and now the potential for more changes that would impact the interest deduction for home mortgages, both first and second homes."

Borrowers Weigh Tax Implications

Mr. Greuling said borrowers, too, weigh the tax implications of buying a second home and uncertainty puts a damper on their plans as well.

"We can see that the value of condo units in the Sunbelt and in ski-resort areas has suffered in that people aren't as eager to get involved in that kind of financing right now."

Malcolm E. Collier Jr., president and chief executive of First Federal Savings Bank in Lakewood, Colo., a Denver suburb, said the ski-area housing market needs a lift.

"That market has not been good for the last three or four years," Mr. Collier said. "The slow economy here and the fact that the people buying those condos are from the oil states and the Midwest affect the market a lot. Plus there's been a lot of overbuilding, and prices are down. But the story in Aspen is different from the story in Steamboat Spring or Crested Butte."

It sure is different at Aspen Savings & Loan Association, where all but 10% of the portfolio is out in second-home financing and where $200,000 for a one-bedroom condo is the norm.

"The market here in Aspen is very strong, even though inflation in real estate prices has slowed," said Elizabeth Newman, a vice president. "Overbuilding is not a problem as it is in some other ski areas. Aspen has very strict growth control, so it can't happen."

"Our market grew soft in the mid-1980s like everyone else's, but because of controls on spec building here, there wasn't a lot of new product when the slowdown came," said Randy Gold, a real estate appraiser with James J. Mollica Co. in Aspen. "We're in great shape."

His sentiments exactly, said Shannon Faries, vice president, residential lending, Universal Savings & Loan Association, Kingman, Ariz.

"It's running between 108 degrees and 110 degrees and steamy in Phoenix now. People like to get away. They have cabins in the White Mountains, in northern Arizona, and Lake Havasu" said Mr. Faries. "The second-home market is a big deal here."

Mr. Faries said Universal makes loans for a range of getaway sites.

"There are a lot of cabins about 1,500 square feet that would range betweeen $65,000 and $75,000 including the lot. But there's a big subdivision we're lending on now where the house and lot will be about $300,000. For most of our borrowers, tax deductibility is not the deciding issue. It's the climate that motivates our customers. The busier and more bustling Phoenix gets, the stronger the second-home market becomes."

Financing for Homes on Jersey Coast

At Jersey Shore Savings & Loan Association, Toms River, N.J., 40% of home financing is for second homes along the central and southern Jersey coast. No downturn in the market there, said Peter Secovanovic, vice president and treasurer.

"The Northeast is atypical of the [housing] market in general, I think, with our real estate values staying well above the national average. We don't see any slackening in performance, in demand. We could use more supply, that's for sure," Mr. Secovanovic said.

Market: Page 8 ➞

Citicorp Unit Leads in Mortgage Originations

Continued from Page 6

mortgage industry practice at Donaldson, Lufkin & Jenrette Inc., New York, "Both the residential real estate lending industry as well as Wall Street are focusing on loan origination capabilities as never before. Compounding the situation is the March/April uptick in rates which all but closed down originations for certain types of mortgages.

"In 1986, many of the loan originators and Wall Street houses invested heavily in the machinery necessary to handle and securitize record-breaking mortgage origination levels. These heightened levels of fixed costs are still in place causing the lending and investment banking communities to scour the land in search of quality product." Mr. Trautman adds, "This is occurring while each sector is faced with the serious problem of adjusting overhead to reflect currently reduced levels of origination."

The *American Banker* survey shows that ICA Mortgage Corp., San Diego, ranked second, behind Citicorp Homeowners, in residential loan originations last year with $4.3 billion. ICA Mortgage is a subsidiary of Imperial Savings Association, San Diego, and a portion of the loans originated by ICA Mortgage were closed in conjunction with

Citicorp Homeowners: Page 19

How the Survey Was Conducted

This is the *American Banker's* first attempt to obtain loan origination numbers.

Much of the information is not in the public domain and difficult to obtain. For example, some companies, such as Citicorp, do not provide data on originations for their mortgage banking subsidiaries. Rather, they report a consolidated figure for all subsidiaries — banks, thrifts, and mortgage companies. In addition, companies have various definitions of originations, making comparisons difficult.

To overcome these problems, the *American Banker* has limited its study to residential loans originated by mortgage companies. Commercial banks and savings institutions have been excluded. Multifamily originations and commercial loan originations also have been excluded.

In general, the origination of a residential loan puts the mortgage company's money at risk, while loans on other properties usually does not. A mortgage company uses its money to make a residential loan and holds it until it is sold in a pool of loans to investors. In most commercial deals, however, the mortgage company acts as a broker, arranging the financing needs of the developer for a fee.

Underwriting requirements on residential properties also differ from those of multifamily and commercial properties. Underwriting determines the creditworthiness of the borrower.

With residential properties, the mortgage company examines the creditworthiness of the applicant. For other properties, the company simply tries to determine how much revenue the property will generate.

In defining originations, the *American Banker* includes both in-house production and purchased production. The resulting figure gives a clearer picture of a firm's ability to feed the mortgage-servicing engine. Some firms have extensive branch networks; their in-house production would be substantial and their purchased loans relatively small in comparison. On the other hand, some firms may have a limited branch network but a substantial correspondent network. In this case, purchased loans would be sizable compared with in-house production.

Market Is Mixed For Second Homes

Continued from Page 6

"Everywhere you look in our area, you see construction, but it's snapped up fast. On Long Beach Island, for example, the prices climb about 20% a season, but demand stays high. Waterfront is finite."

"The condo second-home market seems to be skewed toward oversupply at this time, but that's temporary " said Frank Cunningham, a vice president, Palmetto Federal Savings Bank of South Carolina in Aiken.

Palmetto's man at the coast, Mark Brittman, is watching a market on Hilton Head, Fripp and other resort islands that shows flat or, in some cases, declining property values. Mr. Brittman, vice president and mortgage production center manager in Beaufort for Palmetto Federal, said there are too many condos on resort islands at the moment.

"We've seen somewhat of a decline in the value of condos, although not in single-family homes," Mr. Brittman said. "A lot of clients are attempting to refinance and we've been surprised by the appraisals coming in, some lower compared to purchase prices four or five years ago. We've had to make principal reductions on mortgages so the owner could handle the refinance. But from a buyer's perspective it's a great market.

"As a lender, sure, I have some concerns. Some people see a second-home investment as they do a stock and they seem ready to unload it if there's a downturn in the price. Some borrowers up north tell us they're going to default and they have done just that. On purchases for investment we require private mortgage insurance. On refinancing, we've almost gotten to the point where we don't permit cashing out [taking cash out of the property to refinance it]. It's those kinds of investment properties, condos, where demand is so soft."

The market in second homes and real estate in general is quiet on Cape Cod as well, said Elliott Carr, president and chief executive officer, Cape Cod Five Cents Savings Bank, Orleans, Mass.

"We had a number of real boom years here, all over New England really, and prices just got out in front of themselves a bit. We consider the second-home market to include a planned

GIANTS OF THE MORTGAGE INDUSTRY:

--'86 RESULTS
--NEW PLANS & STRATEGIES
--RESHAPING THE INDUSTRY

A New SMR Research Corporation Study

In 1986, the nation's Top 25 residential mortgage originators grabbed an astonishing 24% of the market. In 1987, the consolidation of the industry into fewer hands will accelerate dramatically.

These are among the prime conclusions of a new, landmark study of the mortgage business. More than 135 pages, this study offers some of the most unique data ever compiled in the industry, including:

--**The Top 25 Residential Mortgage Originators,** in rank order, with dollar volumes, covering all institutional types of players.
--**Profit data on large mortgage operations.**
--**Tables of company-specific geographic and office expansions.**
--**State-by-State origination data** showing which states are hurt worst and which respond quickest in a recession/recovery cycle.

The research features new strategy studies of key players, economic analysis, and the progress of combined mortgage/realty brokerage operatons. It covers companies of all kinds: the big thrifts, mortgage companies, banks, and also the nontraditional mortgage giants, from GMAC to Metropolitan Life.

There's much more--all described in a free Prospectus. To get one, simply call or write Mark S. Kamm, SMR Research Corporation, 382 Route 46, Budd Lake, NJ 07828. (201) 691-1255.

65 Thrifts Change Names in First Half

By JEFFREY KUTLER

NEW YORK — Of 272 financial services firms that changed their names in the first half of 1987, 65 were savings institutions, according to Anspach Grossman Portugal Inc., which monitors corporate name changes.

Mergers and acquisitions created 44 of the 65 thrift industry changes. Of these 65, 25 were voluntary and 19 were assisted by the Federal Savings and Loan Insurance Corp.

Another 16 thrifts associated a name change with formation of a holding company, conversion from mutual ownership to stock form, or a change from a savings and loan charter to a savings bank charter.

Because of the thrift industry's rampant restructuring, thrifts have contributed to an equally strong corporate name-changing movement in recent years. Russell Anspach, a principal of the Anspach Grossman Portugal, said last week that the trend has reached "almost epidemic" proportions.

However, thrifts have been changing names at a slower rate than commercial banks. Anspach Grossman Portugal said 120 commercial banks changed their names in the first six months of this year, 58% more than the 76 in the first half of 1986. The banks' growth rate was almost as high as the 59% for all industries tracked by the New York-based identity consulting firm.

Thrift name changes grew only 23% during the same period. As of June 30, the thrift industry was already 72% of the way toward matching the 90 name changes it registered in all of 1986.

Among the thrifts that projected new identities during the first half were: AmFed Financial Corp. in Colorado (formerly American Federal Savings & Loan Association); BankWorcester Corp. in Massachusetts (Worcester County Institution for Savings); GermaniaBank in Alton, Ill. (Germania Savings & Loan Association); and Great Western Bank in California (Great Western Savings). ■

Data taken from American Banker's survey of the top 200 mortgage companies in servicing and loan origination. American Banker defines mortgage loan originations to include permanent residential mortgages (1-to-4 family mortgages) originated for sale, or the intention to sell, over the period Jan. 1, 1986 to Dec. 31, 1986. Included are loans closed by the mortgage company and loans where the mortgage company actually did most of the paperwork for closing. Both in-house production and purchased production— such as loans purchased from brokers and correspondents— are included. (‡)— Estimated by American Banker from several sources. Data were not avialable from Citicorp Homeowners Inc., or its parent, Citicorp, New York. (a) — A subsidiary of Imperial Savings Assn., San Diego. ICA Mortgage closed a portion of these loans in conjunction with Imperial Savings.

ternational loans. The loss for the first six months of 1987 totaled $1.07 billion, or $7.08 a share.

In addition, the corporation disclosed that it had established a special reserve of $23 million to cover the costs associated with conversion in March to a new computerized trust accounting and reporting system called MasterNet.

Problems with MasterNet, including late account statements, frequent computer crashes, and a backlog of securities trades, were detailed last week in an *American Banker* report. The report showed that MasterNet, which took five years and $20 million to complete, went on line despite warnings that it was not ready for service.

Frank N. Newman, vice chairman and chief financial officer, said in an interview that the $23 million MasterNet reserve would be used to cover the costs associated with hiring outside consultants, expected loss of fees, and compensation claims for any late delivery of securities.

Struggling to rebound from enormous losses, the San Francisco-based bank holding company said it continued to cut assets in the second quarter as part of a recovery plan aimed at restoring profits through a more streamlined approach to banking.

The company said it is placing greater emphasis on generating income based on fees — rather than relying on interest — at its main subsidiary, Bank of America, and at Seattle-based Seafirst Corp. Additional assets sales are likely, the company said.

Total assets at BankAmerica were $97 billion at June 30, down 17% from $117 billion a year earlier. Current standings place BankAmerica third behind Chase Manhattan Corp., with assets of $98.9 billion, and seemingly out of reach of first-place Citicorp, with total assets of $194.4 billion.

"The name of the game really is profits, not size," observed Mr. Newman. "We think we are headed in the right direction. We will undoubtedly be doing some more divestitures, but we don't have any major ones planned. We operate in a strong and growing economy and expect the company to be growing."

A.W. "Tom" Clausen, chairman and chief executive officer, noted improvement in the quality of BankAmerica's loan portfolio, adding that credit losses declined for the third consecutive quarter and that nonaccrual loans also had dropped in the second quarter from the period ending March 31.

"Our results, like those of other major U.S. banking institutions, reflect the impact of significant increases in the allowance for credit losses related to developing-country debt," said Mr. Clausen in a prepared statement. "Raising our allowance for credit losses this quarter should not affect BankAmerica's fundamental recovery."

Without the additional provision BankAmerica would have nearly broken even on operations, analysts said. Joseph Arsenio, an analyst with Birr Wilson & Co., San Francisco, said BankAmerica would have lost $3 million on operations in the period.

"BofA is more of a buy than a sell today," Mr. Arsenio said. "The bank has probably been saved. The question is, 'Can this bank that has been saved be turned into one that makes money?' That is not entirely clear."

Net credit losses were $237 million for the second quarter of 1987, down 38.9% from $388 million for the similar period a year ago. For the first six months, net credit losses were $552 million, down 14% from $645 million for the first half of 1986.

Total nonperforming assets, including other real estate owned, jumped sharply from a year ago. At June 30, 1987, total nonperformers registered $5.943 billion, up 19.4% from $4.988 billion at June 30, 1986.

Although BankAmerica has said it expects to lose an unspecified sum for the full year, the company stands behind earlier assertions that it will begin making money on operations in the second half.

This will be the third year in a row for losses at BankAmerica. It lost a combined $855 million in 1985 and 1986. But its six-month deficit this year is in line with mammoth losses at other money center banks, which also increased reserves to cover loans to Third World debtor nations.

BankAmerica entered the 1980s with a growth drive following 18 consecutive years of full-year earnings gains.

In 1980, it lost its status as the nation's largest bank, based on assets, to Citicorp. It took back the lead in 1982 with total assets of $122.4 billion.

As it turned out, 1982 was the peak year for BankAmerica's glory. Citicorp surpassed it in 1983 in total assets and has stretched its lead since then. Both Citicorp and BankAmerica were displaced in world rankings by giant Japanese institutions in the mid-1980s.

Meanwhile, BankAmerica's Seafirst subsidiary, which operates the State of Washington's largest bank, said a $60 million provision for nonperforming Latin American loans resulted in a loss of $46.7 million in the second quarter.

That compared with profits of $8.2 million a year earlier. Excluding the special provision, Seafirst said earnings would have increased 28% to $10.5 million. In the first half, Seafirst lost $36.6 million, against profits of $13 million a year earlier.

With assets of $10.1 billion, Seafirst accounted for $41.1 million of BankAmerica's loss in the first half. Seafirst said nonperforming assets rose to $574.7 million, including $157.6 million in Brazilian loans. That compares with $520.3 million a year earlier. ■

Rate Rise Blamed In FCA's Big Loss

➔ **Continued from Page 1**

Much of that second-quarter loss came when the company's gains on sales of loans and mortgage-backed securities plummeted from $109 million in the first quarter to $18.3 million in the second quarter because of rising interest rates. Gains on these types of sales have constituted the bulk of Financial Corp.'s earnings during the past two years.

Financial Corp., with $33 billion in assets, owns American Savings and Loan Association, which operates 178 branches in California.

While Financial Corp.'s total profit outlook worsened, its operating loss narrowed to $9.7 million in the second quarter, against $17.3 million in the first three-month period. In addition, scheduled items — including nonperforming and delinquent loans — dropped to $1.38 billion, or 4.07% of assets, from $1.68 billion, or 4.96% of assets, at March 31.

"The improvement in scheduled items and the brisk foreclosed real estate sales are a bright spot in our achievements this quarter in spite of the loss," said William J. Popejoy, Financial Corp.'s chairman and chief executive officer.

The company continued to build its already hefty loan-loss reserve in the second quarter, adding $165.5 million and bringing reserves to a total of $973.6 million at June 30.

The thrift holding company's loss included a $22.7 million writeoff of its investment in the bankrupt secondary reserve fund of the Federal Savings and Loan Insurance Corp. Other thrifts have refused to write off that investment, arguing that Congress is solving the issue in its legislation to recapitalize the FSLIC. ■

Texas American . .

➔ **Continued from Page 18**

Real estate credits hit Texas American hard in the second quarter, with the company classifying several large loans as nonperforming. This helped boost nonperforming loans to $391 million at June 30, compared with $325 million at March 31.

Nonperforming assets at Texas American now equal 9.12% of total loans, which totaled $4.2 billion at midyear 1987.

During the second quarter, the company set aside $13.9 million for loan losses, compared with $15.4 million a year earlier. Net chargeoffs for the quarter were $15.1 million, compared with $22.3 million a year earlier.

Primary capital at Texas American was 6.57% of assets on June 30, compared with 6.93% a year earlier. ■

Old Stone . . .

➔ **Continued from Page 13**

of the deposits of Life Savings of America FSB in northern Illinois also contributed to the second-quarter loss, Mr. Cooper said. In addition, the Minnesota thrift booked trading account losses of $733,000 in the quarter.

John T. Morgan, chairman and chief executive officer at American Savings, cited a higher level of net interest income as a key reason for the 40% earnings rise, at $13.1 million for the quarter, up from $9.35 million for the comparable 1986 period. Earnings per share were $1.51, up from $1.09. ■

Citicorp . . .

➔ **Continued from Page 8**

Imperial Savings. Imperial Savings is the 18th-largest thrift institution in the nation with deposits of $5.5 billion on Dec. 31, 1986.

Goldome Realty Credit Corp., Buffalo, N.Y.— a subsidiary of the $11 billion-deposit Goldome FSB, the nation's eighth-largest thrift — ranked third with $3.8 billion.

First Union Mortgage Corp., Charlotte, N.C., formerly known as Cameron-Brown, was fourth with $3.6 billion. The company is a subsidiary of First Union Corp., Charlotte.

GMAC Mortgage Co., Philadelphia, the nation's top mortgage company in mortgage servicing with a servicing portfolio of $22.9 billion at yearend 1986, ranked fifth in originations with $3.3 billion.

The housing department data show that all mortgage companies had in-house originations of $131.6 billion and purchased loans of $54.7 billion for an origination total of $186.3 billion last year.

American Banker surveyed over 200 mortgage companies and found that 166 had $100 million or more in residential mortgage loan originations last year. These 166 firms originated $134.3 billion in residential mortgages.

Thus, *American Banker* finds that the top 166 firms in the field accounted for 72.1% of total residential mortgage loans originated and purchased by mortgage companies last year. ■

Japanese Push US Banks Out of Top 10

Citibank Finishes 17th in Deposits

By KENNETH J. HICKS

NEW YORK — For the first time in 30 years, no bank from the United States ranked among the world's top 10 banks in deposits in 1986. And only one U.S. bank — Citibank, New York — made the top 25.

A year earlier, one U.S. representative made the top 10, and two made the top 25. Citibank ranked eighth in 1985, and Bank of America ranked 12th. In 1986, Bank of America fell to 29th place.

Also in 1986, the number of U.S. banks among the top 500 fell to 102 — from 110 in 1985.

In contrast to the declines posted by U.S. banks, Japanese banks recorded sharp gains. The seven largest deposit-taking institutions in the world now are Japanese, as are 16 of the 25 largest banks. In comparison, Japanese banks held only the top four positions in 1985, and 14 of the top 25 slots.

Also for the first time, Japan supplanted the U.S. as the country with the most banks in the top 500. In 1986, 108 Japanese banks were among the world's 500 largest, compared with 96 in 1985. These 108 banks had combined deposits of $3.3 trillion last year, or more than one-third of the $9.2 trillion deposit total for the top 500 banks.

Since 1981, 31 Japanese banks have moved into the top 500 group. Their share of the top 500's deposit total has grown to 36% from 27% in 1981.

These are some of the findings of the *American Banker's* 31st annual world banking survey. The main listing presents the top 500 commercial and savings banks in the world, ranked by total

Baker Pitches Compromise Bill to Avert Veto

By ROBERT M. GARSSON
Washington Bureau

WASHINGTON — Treasury Secretary James A. Baker 3d, after working out a compromise with congressional leaders on sweeping financial industry legislation, presented the package to the White House on Wednesday in hopes of averting a threatened presidential veto.

Presidential spokesman Marlin Fitzwater would not comment on Mr. Baker's efforts to forestall a veto, but on Wednesday morning he said that President Reagan's opposition to the bill had not changed.

"If there are significant changes, we'll take a look at them," he said. "But as it stands now, we still think it's worthy of a veto."

Meanwhile, the U.S. League of Savings Institutions, which earlier this year took on the House leadership and won, said it is prepared to fight the compromise that proposes a $10.8 billion rescue of the Federal Savings and Loan Insurance Corp.

The compromise, part of the agreement that Mr. Baker reached with the leadership of the House and Senate banking committees, seems to assure enactment of the most sweeping financial industry legislation in seven years.

In addition to the increased borrowing authority for the thrift industry insurance fund — $2.3 billion more than was set in talks between the House and Senate — the agreement would permit commercial and nonbank financial companies to acquire failing thrifts with assets of more than $500 million.

Restrictions on cross-marketing and tandem sales by acquired thrifts and

Quote

Banks are a logical source of insurance. The incredible reaction of insurance agents against bank entry is due in the main to their inefficiency and high cost.

J. Robert Hunter, president of the National Insurance Consumer Organization, speaking at the Senate Banking Committee hearing [Page 2]

(a)— Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. (c)— Latest figures are for a different date than previous year. (d)— Or date one year prior to latest figures unless otherwise noted after name of bank. (e)— Data are for 9/30/86. (f)— Data are for 6/30/86. (g)— Latest data are prior to 6/30/86. (h)— A subsidiary of Compagnie Financiere de Credit Industriel et Commercial. (n)— New York cable rate for same date as bank's figures. (p)— See currency table for key to currency abbreviations. (q)— A subsidiary Compagnie Financiere de Paribas, Paris, a financial holding company. (s)— Consolidated data. (t)— Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. (u)— Data are not consolidated for affiliates more than 50% owned. (v)— Based on revised (w)— Member of the Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. (x)— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated deposits of $15.6 billion and consolidated assets of $17.5 billion. (†)— Rank based on revised deposit total for 1985. (‡)— The 1985 data were not available last year. Rank bank would have had, if it had been included in the listing. **N.A.**— Not available.

The Top 500 Banks in the World

U.S. and Overseas Banks Ranked by Deposits on Dec. 31, 1986 or Nearest Fiscal Yearend

Compiled by American Banker Copyright 1987

(a)— Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. (c)— Latest figures are for a different date than previous year (d)— Or date one year prior to latest figures unless otherwise noted after name of bank. (e)— Data are for 9/30/86. (f)— Data are for 6/30/86. (g)— Latest data are prior to 6/30/86. (h)— A subsidiary of Compagnie Financiere de Credit Industriel et Commercial. (n)— New York cable rate for same date as bank's figures. (p)— See currency table for key to currency abbreviations. (q)— A subsidiary Compagnie Financiere de Paribas, Paris, a financial holding company. (s)— Consolidated data. (t)— Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. (u)— Data are not consolidated for affiliates more than 50% owned. (v)— Based on revised (w)— Member of the Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. (x)— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated deposits of $15.6 billion and consolidated assets of $17.5 billion. (†)— Rank based on revised deposit total for 1985. (‡)— The 1985 data were not available last year. Rank bank would have had, if it had been included in the listing. N.A.— Not available.

The Top 500 Banks in the World

U.S. and Overseas Banks Ranked by Deposits on Dec. 31, 1986 or Nearest Fiscal Yearend

Compiled by American Banker Copyright 1987

(a)— Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. (c)— Latest figures are for a different date than previous year. (d)— Or date one year prior to latest figures unless otherwise noted after name of bank. (e)— Data are for 9/30/86. (f)— Data are for 6/30/86. (g)— Latest data are prior to 6/30/86. (h)— A subsidiary of Compagnie Financiere de Credit Industriel et Commercial. (n)— New York cable rate for same date as bank's figures. (p)— See currency table for key to currency abbreviations. (q)— A subsidiary Compagnie Financiere de Paribas, Paris, a financial holding company. (s)— Consolidated data. (t)— Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. (u)— Data are not consolidated for affiliates more than 50% owned. (v)— Based on revised (w)— Member of the Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. (x)— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated deposits of $15.6 billion and consolidated assets of $17.5 billion. (†)— Rank based on revised deposit total for 1985. (‡)— The 1985 data were not available last year. Rank bank would have had, if it had been included in the listing. N.A.— Not available.

The Top 500 Banks in the World

U.S. and Overseas Banks Ranked by Deposits on Dec. 31, 1986 or Nearest Fiscal Yearend

(a)— Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. (c)— Latest figures are for a different date than previous year. (d)— Or date one year prior to latest figures unless otherwise noted after name of bank. (e)— Data are for 9/30/86. (f)— Data are for 6/30/86. (g)— Latest data are prior to 6/30/86. (h)— A subsidiary of Compagnie Financiere de Credit Industriel et Commercial. (n)— New York cable rate for same date as bank's figures. (p)— See currency table for key to currency abbreviations. (q)— A subsidiary Compagnie Financiere de Paribas, Paris, a financial holding company. (s)— Consolidated data. (t)— Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. (u)— Data are not consolidated for affiliates more than 50% owned. (v)— Based on revised (w)— Member of the Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. (x)— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated deposits of $15.6 billion and consolidated assets of $17.5 billion. (†)— Rank based on revised deposit total for 1985. (‡)— The 1985 data were not available last year. Rank bank would have had, if it had been included in the listing. N.A.— Not available.

The Top 500 Banks in the World

U.S. and Overseas Banks Ranked by Deposits on Dec. 31, 1986 or Nearest Fiscal Yearend

(a)— Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. (c)— Latest figures are for a different date than previous year. (d)— Or date one year prior to latest figures unless otherwise noted after name of bank. (e)— Data are for 9/30/86. (f)— Data are for 6/30/86. (g)— Latest data are prior to 6/30/86. (h)— A subsidiary of Compagnie Financiere de Credit Industriel et Commercial. (n)— New York cable rate for same date as bank's figures. (p)— See currency table for key to currency abbreviations. (q)— A subsidiary Compagnie Financiere de Paribas, Paris, a financial holding company. (s)— Consolidated data. (t)— Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. (u)— Data are not consolidated for affiliates more than 50% owned. (v)— Based on revised (w)— Member of the Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. (x)— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated deposits of $15.6 billion and consolidated assets of $17.5 billion. (†)— Rank based on revised deposit total for 1985. (‡)— The 1985 data were not available last year. Rank bank would have had, if it had been included in the listing. N.A.— Not available.

Banks Ranked After the First 500

(a) — Figures shown are the dollar values per unit of foreign currency. The currencies are converted into dollars using the New York cable rate for the date shown. (b) — On June 15, 1985, a new monetary unit was introduced. It is called the "austral". One austral is worth 1,000 old pesos. (c) — The date comparisons are 10/31/86 to 10/31/85. (d) — Banks in country are dollar-denominated. (e) — The date comparisons are 9/30/86 to 9/30/85. (f) — The date comparisons are 6/30/86 to 6/30/85. (g)— The date comparisons are 3/20/87 to 3/20/86. (h) — Banks in country use Swiss francs. (i) — The date comparisons are 3/31/87 to 3/31/86. (j) — At yearend 1985, the new Israel shekel (NIS) replaced the old shekel. One new Israel shekel is worth 1,000 old shekels. The exchange rate for 12/31/85 is for the old shekel. (k) — The data comparisons are 6/30/86 to 12/31/85. (l) — On Feb. 28, 1986, a new monetary unit was introduced. It is called the "cruzado". One cruzado is worth 1,000 old cruzieros.

Lincoln Savings Drops Bank Board Suit

➸ **Continued from Page 3**

In addition, Mr. Keating hired lobbyists in 1985 and 1986 to challenge Mr. Gray's crusade to curb the types of business activities Lincoln so ardently chose to pursue. Even economist Alan Greenspan was hired to defend the institution's direct investment strategy. Mr. Greenspan is expected to succeed Paul A. Volcker as chairman of the Federal Reserve Board next month.

Gray Found Investments Risky

Mr. Gray maintained the investments were too risky to be funded by federally insured deposits.

Lincoln, according to the suit, also had petitioned the Bank Board to disqualify Mr. Gray, while he was agency chairman, from participating in any deliberations relating to the thrift.

Mr. Fishbein said the leaks were an attempt by the Bank Board to coerce the institution into making traditional home loans.

Confidential information appeared in three stories over the past seven months, the suit alleges, including pieces last December in *The Wall Street Journal* and the *Mesa* (Ariz.) *Tribune.* Lincoln officials had not seen some of the confidential reports prior to publication, according to the suit.

But the most grievous disclosure, according to the suit, was the release of about 300 pages of audit reports, which appeared in part in the July issue of *Regardie's*, a Washington magazine.

Lincoln's lawyers claim that the article's headlines inaccurately depicted Lincoln on the verge of bankruptcy, which could threaten its business dealings. In addition, elements of the S&L's business plan were disclosed to competitors, and the company is unable to pursue these strategies, the suit said.

The magazine was not sued, because Mr. Fishbein said the First Amendment makes such actions difficult to win.

Lincoln said it first detected Bank Board leaks in August 1986, when William Coleman of Salomon Brothers Inc. mentioned that an officer of the securities firm had gotten wind of a $15 million foreclosure by the thrift in New Orleans.

The securities firm officer, Paul Hart, refused to identify his source, other than to say it was an executive at a competing California S&L, according to the suit. Lincoln's lawyers wrote the Bank Board, advising them of the leak and requesting an investigation. According to the suit, the S&L's directors were unaware of whether the Bank Board acted on the request. ■

Management Team Named for Freedom Savings

➸ **Continued from Page 69**

30, 1986, and named prominent Tampa businessman George H. Gage Jr. to replace him.

Freedom had been operating under a supervisory agreement with the Federal Home Loan Bank Board, one that severely restricted its lending ability. The frustrated Mr. Gage said the agreement was blocking any real chance of turning the thrift around. But he was unable to develop a plan to salvage Freedom.

The FSLIC notified Freedom's attorney that it would be taking over the thrift, and Mr. Gage resigned the morning that action was taken.

The insolvent thrift had a negative net worth of $80 million as of March 31, according to the latest earnings report it filed. It suffered serious runoffs in deposits, dropping from $1.8 billion as of yearend 1986 to $1.4 million as of March 31. Freedom has not yet issued a report for the period ending June 30.

Shareholders do not expect to recover anything on their stock. Even if the regulators were able to obtain a buyer who would pay enough to cover the negative net worth, there would still be millions of dollars in fees associated with the FSLIC action.

"They're finished," Mr. Perkins said of the shareholders.

One of these, the estate of Harold Vernon, held more than $5 million worth of Freedom stock it could not sell. Mr. Handy, the former chairman, and his group calculate their losses at about $4.5 million. ■

Correction

It was incorrectly reported in the July 9, page 1 article, "Wall Names Five Top Key Positions With Bank Board," that Patrick McKelvey was replaced as director of communications at the Federal Home Loan Bank Board by Karl T. Hoyle. Mr. Hoyle was appointed to a new, senior-level post of executive director of public affairs. Mr. McKelvey reports to Mr. Hoyle. ■

In A Solid Position to Help

Keeping pace with the growth of Taiwan's dynamic economy, we have built up a solid position in all major sectors of banking and finance in this country. A glance at our annual financial report (as at December 31, 1986) demonstrates that we are a leading Taiwan bank you can count on.

Total assets	US$15,655,702,990
Total deposits	12,900,637,489
Deposits by other banks	2,250,550,070
Deposits with other banks	1,595,627,644
Capital and reserves	489,788,434
Net interest income	155,994,358
Pre-tax profits	132,778,561

Whatever your banking requirements, our branches in every Taiwan population center and 2,200 correspondents worldwide stand ready to meet them. Get in touch with us for details.

Citibank Drops Out of Top 10; Japanese Nab 7 Highest Slots

➸ **Continued from Page 1**

deposits in U.S. dollars on Dec. 31, 1986. Deposits as of Sept. 30, 1986, are used for all Japanese banks.

Other listings include the banks ranked 501 through 1,000 by deposits and an alphabetical listing of the top 500. Summary tables show the largest deposit gainers and the losers; the 10 countries with the most banks in the top 500; and, for the first time, a comparison of the top 25 world banks in 1986 with those in 1971 and 1966.

The survey is presented in two parts. Today, the banks are ranked by deposits. Part two of the survey, which will appear Friday, lists the top 500 banks in the world by assets.

The number of U.S. banks ranking among the top 25 in deposits has declined substantially since 1956, when the *American Banker* began keeping track of the international deposit ranking of banks. In that year, 15 U.S. banks ranked among the top 25, including the three largest banks in the world; and five U.S. banks appeared among the top 10.

Ten years later, 10 U.S. banks were among the top 25; however, among the top 10, seven were U.S. banks. By 1971, only six U.S. banks were among the top 25, but the top three were still U.S. banks.

Last year, Bank of America fell out of the top 25, and Citibank dropped out of the top 10. Citibank, at 17th place with deposits of $102.9 billion, is now the only U.S. bank in the top 25.

Part of the reason for the continued dominance of Japanese banks is the appreciation of the yen against the dollar. From September 1985 to September 1986, the Japanese yen appreciated 40.1% against the dollar. From September 1984 to September 1986, the yen appreciated 59.8% against the dollar.

Thus, while the yen-denominated deposits of the 16 Japanese banks in the top 25 increased by only 8.5% last year, to 310.5 trillion yen, these deposits, as denominated in dollars, soared 52% to $2 trillion. For the 108 Japanese banks in the top 500, deposits were up 53.8% in 1986 from a year earlier.

Dai-Ichi Kangyo Bank Ltd., Tokyo, was the largest bank in the world for the third consecutive year, with $186 billion in deposits. Deposits increased 49.2% from the year-earlier period. In yen-denominated deposits, Dai-Ichi reported a 6.7% increase to 28.7 trillion yen.

The following three bank positions remained unchanged from a year ago: Fuji Bank Ltd., Tokyo, with deposits of $166.5 billion, up 51.8% (8.4% yen-denominated); Sumitomo Bank Ltd., Osaka, $164.5 billion, an increase of 51.6% (8.2%); and Mitsubishi Bank Ltd., Tokyo, with $158.7 billion, a jump of 54.3% (10.2%).

Rounding out the top five was Sanwa Bank Ltd., Osaka, with deposits of $151.9 billion, a 53.3% increase. In yen, Sanwa's deposits were up 9.5%.

The other Japanese banks in the top 10 are Norinchukin Bank and Industrial Bank of Japan Ltd., both of Tokyo, with $144.2 billion and $137.4 billion in deposits, respectively.

The largest non-Japanese bank was Credit Agricole Mutuel, Paris, which ranked eighth. Credit Agricole reported deposits of $133.4 billion, up 57.2%. The franc appreciated 18% against the dollar in 1986. Franc-denominated deposits increased 33.3% to 850.2 billion francs.

Total deposits at the top 500 world banks were $9.2 trillion, a 31.3% increase over the previous year. In 1985, deposits of the top 500 grew 19.9%. Deposits at the 102 U.S. banks increased 7% to $1.1 trillion. At non-U.S. banks, deposits were up 36.4% to $8.1 trillion.

Other Survey Findings

- The largest deposit gainer in the top 500 was Sanwa Bank California, San Francisco, the U.S. commercial bank subsidiary of fifth-ranked Sanwa Bank. The bank, formerly known as Golden State Sanwa Bank, had a deposit gain of 191.4% to $3.9 billion last year. The deposit increase was attributed to its acquisition of Lloyds Bank of California, Los Angeles, a former subsidiary of Lloyds Bank PLC, London.

  Sanwa was followed by International Commercial Bank of China, Taipei, Taiwan, whose deposits rose 162.6% to $6.5 billion, and Boston Safe Deposit & Trust Co., which reported an increase of 127.1% to $6.8 billion.
- Among the world's top 1,000 banks, the biggest deposit loser was First Bank of Nigeria Ltd., Lagos, whose deposits dropped 71.3% to $1.2 billion. The naira, the nation's currency, fell more than 63% against the dollar in 1986. Other big losers were Westfalenbank, Bochum, West Germany, which reported deposits of $3 billion, off 66.9% from the previous year; and Banca Serfin, Mexico City, which registered a 52.9% drop to $1.6 billion.
- Of the 55 currencies represented by the top 500 banks, 26 appreciated against the dollar, 22 depreciated, and seven were unchanged. Of the recognized major world currencies — the British pound; Canadian dollar; Dutch guilder; Italian lira; Japanese yen; Swedish krona; West German mark; and French, Belgian and Swiss franc — only the Canadian dollar did not appreciate against the U.S. dollar. ■

Dear Reader, How Are We Doing?

The *American Banker* wants to make sure its survey of the world's top 500 banks, ranked by deposits, meets your information needs. So would you spend a moment to give us some feedback? Please clip out this questionnaire and return to: William Zimmerman, Editor, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-5712.

Japanese Banks Get Asset Boost From Yen's Rise Against Dollar

By L. MICHAEL CACACE

NEW YORK — Japan is now the home of the world's seven largest banks in terms of assets and deposits.

Helped by the sharp appreciation of the yen against the dollar, three Japanese banks each posted more than 50% gains in dollar-denominated assets to vault into fifth, sixth, and seventh positions. The three banks are Sanwa Bank Ltd., Osaka; Norinchukin Bank, Tokyo; and Industrial Bank of Japan Ltd., Tokyo.

Sanwa Bank posted a 55% gain in assets for the year ended Sept. 30, 1986, to $191.4 billion,moving up three places to fifth; Norinchukin Bank had a 52% gain, to $161.6 billion, to advance four places to sixth; and Industrial Bank's assets rose 56%, to $160.8 billion, to advance five places to seventh.

These three banks join four other Japanese institutions that have ranked as the largest in total assets since 1984: Dai-Ichi Kangyo Bank Ltd., Tokyo, the world's largest bank with assets of $239.6 billion on Sept. 30, 1986, up 51% from $158.3 billion a year earlier; Fuji Bank Ltd., Tokyo, the second largest bank with assets of $212.4 billion, up 49%; Sumitomo Bank Ltd., Osaka, the third largest bank with $205.1 billion in assets, up 51%; and Mitsubishi Bank Ltd., Tokyo, the fourth largest bank with $203.8 billion in assets, up 53%.

The yen surged 40.1% against the dollar from Sept. 30, 1985, to Sept. 30, 1986, up from $0.004626 per yen to $0.006479 per yen. Because the assets of Japanese banks are converted into dollars, a rise in the yen against the dollar increases these banks' dollar-denominated assets.

Assets on Sept. 30, 1986, are used for all Japanese banks in the *American Banker's* world bank rankings. These assets are compared with the Dec. 31, 1986, assets of U.S. banks and most other foreign banks in the survey.

Citibank, New York; Banque National de Paris; and Credit Agricole Mutuel, Paris, were the banks supplanted by the Japanese banks. Citibank fell four places to ninth position with total assets of $145.9 billion on Dec. 31; Banque Nationale de Paris also dropped four places to 10th position with $143.7 billion in assets; and Credit Agricole moved down one notch to eighth position with $156.4 billion.

These are some of the findings of part two of the *American Banker's* 31st annual world banking survey. Part one of the survey, published Thursday, listed the top 500 banks in deposits. The

Veto Avoided, Banking Bill Nears Passage

US League Acquiesces On Compromise Measure

By ROBERT M. GARSSON
Washington Bureau

WASHINGTON — With the deadlock between Congress and the White House finally broken, House Speaker Jim Wright, D-Tex., said Thursday that major financial services industry legislation was likely to go to the floor on Monday for a final vote.

Senate action would follow later in the week, clearing the way for President Reagan to sign into law the most sweeping banking legislation in seven years. Opposition planned by the thrift industry's major trade group, to thwart passage of the compromise bill, appears to have been dropped.

Wednesday evening, a House-Senate conference committee unexpectedly reconvened for 45 minutes to incorporate into the bill a compromise worked out the previous day with Treasury Secretary James A. Baker 3d. The unusual session was called after Mr. Baker told the two banking committees that President Reagan had agreed to sign the bill if the compromise was incorporated.

As part of the compromise, the omnibus financial institutions bill authorizes a $10.8 billion recapitalization of the Federal Savings and Loan Insurance Corp., $2.3 billion more than was originally approved. In addition, provisions requiring the Federal Home Loan Bank Board to give troubled institutions time to work out their problems will expire when the FSLIC capitalization is exhausted, in three years at the latest.

The bill also permits securities firms and companies owning nonbank banks to purchase failing thrifts with assets of

(a) — Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Assets exclude contra accounts and contingent liabilities and, for foreign banks, are converted at New York cable rate prevailing on date of bank's figures. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. (c) — Latest figures are for a different date than previous year. (d) — Or date one year prior to latest figures unless otherwise noted after name of bank. (e) — Data are for 9/30/86. (f) — Data are for 6/30/86. (g) — Latest data are prior to 6/30/86. (h) — A subsidiary of the $44.0 billion-asset Compagnie Financiere de Credit Industriel et Commercial. (q) — A subsidiary the $94.4 billion-asset Compagnie Financiere de Paribas, Paris, a financial holding company. (s) — Consolidated data. (t) — Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. (u) — Data are not consolidated for affiliates more than 50% owned. (w) — Member of the $12.5 billion-asset Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. (x)— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated assets of $17.5 billion. (#) — Includes representative offices. (‡) — Data are for First Chicago Corp., the bank's parent holding company. N.A. — Not available.

The Top 500 Banks in the World

U.S. and Overseas Banks Ranked by Assets on Dec. 31, 1986 or Nearest Fiscal Yearend

(a) — Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Assets exclude contra accounts and contingent liabilities and, for foreign banks, are converted at New York cable rate prevailing on date of bank's figures. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. **(c)** — Latest figures are for a different date than previous year. **(d)** — Or date one year prior to latest figures unless otherwise noted after name of bank. **(e)** — Data are for 9/30/86. **(f)** — Data are for 6/30/86. **(g)** — Latest data are prior to 6/30/86. **(h)** — A subsidiary of the $44.0 billion-asset Compagnie Financiere de Credit Industriel et Commercial. **(q)** — A subsidiary the $94.4 billion-asset Compagnie Financiere de Paribas, Paris, a financial holding company. **(s)** — Consolidated data. **(t)** — Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. **(u)** — Data are not consolidated for affiliates more than 50% owned. **(w)** — Member of the $12.5 billion-asset Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. **(x)**— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated assets of $17.5 billion. **(‡)** — Data are for Mellon Bank Corp., the bank's parent holding company. **N.A.** — Not available.

The Top 500 Banks in the World

(a) — Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Assets exclude contra accounts and contingent liabilities and, for foreign banks, are converted at New York cable rate prevailing on date of bank's figures. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. **(c)** — Latest figures are for a different date than previous year. **(d)** — Or date one year prior to latest figures unless otherwise noted after name of bank. **(e)** — Data are for 9/30/86. **(f)** — Data are for 6/30/86. **(g)** — Latest data are prior to 6/30/86. **(h)** — A subsidiary of the $44.0 billion-asset Compagnie Financiere de Credit Industriel et Commercial. **(k)** — Acquired by Sumitomo Bank Ltd., Osaka, 10/1/86. **(q)** — A subsidiary the $94.4 billion-asset Compagnie Financiere de Paribas, Paris, a financial holding company. **(s)** — Consolidated data. **(t)** — Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. **(u)** — Data are not consolidated for affiliates more than 50% owned. **(w)** — Member of the $12.5 billion-asset Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. **(x)**— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated assets of $17.5 billion. **(‡)** — Data are for Fidelcor, Inc., Philadelphia, the bank's parent holding company. **N.A.** — Not available.

The Top 500 Banks in the World

U.S. and Overseas Banks Ranked by Assets on Dec. 31, 1986 or Nearest Fiscal Yearend

(a) — Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Assets exclude contra accounts and contingent liabilities and, for foreign banks, are converted at New York cable rate prevailing on date of bank's figures. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. **(c)** — Latest figures are for a different date than previous year. **(d)** — Or date one year prior to latest figures unless otherwise noted after name of bank. **(e)** — Data are for 9/30/86. **(f)** — Data are for 6/30/86. **(g)** — Latest data are prior to 6/30/86. **(h)** — A subsidiary of the $44.0 billion-asset Compagnie Financiere de Credit Industriel et Commercial. **(q)** — A subsidiary the $94.4 billion-asset Compagnie Financiere de Paribas, Paris, a financial holding company. **(s)** — Consolidated data. **(t)** — Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. **(u)** — Data are not consolidated for affiliates more than 50% owned. **(w)** — Member of the $12.5 billion-asset Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. **(x)**— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated assets of $17.5 billion. **(†)** — Rank based on revised data. **(‡)** — Data are for US Bancorp, the bank's parent holding company. **N.A.** — Not available.

The Top 500 Banks in the World

U.S. and Overseas Banks Ranked by Assets on Dec. 31, 1986 or Nearest Fiscal Yearend

(a) — Consolidated data, if available, are used for all banks that own over 50% of other banks. The consolidation includes only those affiliates in which ownership exceeds 50%. Assets exclude contra accounts and contingent liabilities and, for foreign banks, are converted at New York cable rate prevailing on date of bank's figures. Unless otherwise noted after the name of the bank, all figures are for fiscal year after 9/30/86. **(c)** — Latest figures are for a different date than previous year. **(d)** — Or date one year prior to latest figures unless otherwise noted after name of bank. **(e)** — Data are for 9/30/86. **(f)** — Data are for 6/30/86. **(g)** — Latest data are prior to 6/30/86. **(h)** — A subsidiary of the $44.0 billion-asset Compagnie Financiere de Credit Industriel et Commercial. **(k)** — On, 12/4/86, BankAmerica Corp. announced the sale of this bank to Deutsche Bank, Frankfurt for $603 million. **(q)** — A subsidiary the $94.4 billion-asset Compagnie Financiere de Paribas, Paris, a financial holding company. **(s)** — Consolidated data. **(t)** — Figures are included in the consolidated figures of parent bank. For that reason, the data for the bank are not included in the aggregate data totals for the Top 500 Banks. **(u)** — Data are not consolidated for affiliates more than 50% owned. **(w)** — Member of the $12.5 billion-asset Al UBAF Banking Group, Neuilly, France, under whose name the seven UBAF banks operate in the international financial markets. **(x)**— A subsidiary of BCCI Holdings (Luxembourg) SA, a holding company with consolidated assets of $17.5 billion. **N.A.** — Not available.

Included in this listing are bank holding companies, commercial banks, and savings banks with total assets— excluding contra accounts and contingent liabilities— of $25 billion or more on Dec. 31, 1986, or nearest fiscal yearend. Excluded are the subsidiary banks of the holding companies and banks in the listing. The total assets of foreign banks are converted into dollars using the New York cable rate prevailing on Dec. 31, 1986, or date of figures. Unless otherwise noted after the name of the country the data are consolidated to include subsidiaries more than 50% owned and are for fiscal year ending after 9/30/86. **(a)** — Holding companies are excluded from the listings of the top world banks. For the holding companies in this listing, the ranks shown are for their respective lead banks. For non-U.S. banks that own U.S. banks, the ranks shown are for their top U.S. bank subsidiary that was ranked among the top banks in the world. **(b)** — Also known as Generale Banque. Formerly called Societe Generale de Banque. **(c)** — Latest figures are for a different date than previous year. **(e)** — Data are for Sept. 30, 1986. **(s)** — The 1985 data were consolidated to include subsidiaries more than 50% owned, but 1986 data were unconsolidated. **(t)** — The 1986 data were consolidated to include subsidiaries more then 50% owned, but 1985 data were unconsolidated. **(u)** — All data for both 1986 and 1985 were not consoliated to include subsidiaries more than 50% owned. **(†)** —Includes contra accounts. **(‡)**— Bank was sold to Bank of New York in Feb. 1987.

Yen's Rise Against Dollar Gives Japanese Banks Top 7 Rankings

Continued from Page 1

seven largest banks occupied the same positions in deposit rankings as they did in asset rankings.

Two major listings appear in today's edition. The first gives the top 500 commercial and savings banks in total assets less contra accounts and contingent liabilities on Dec. 31, 1986. In this listing, holding companies are excluded. The second listing identifies the 118 banking firms that had assets of $25 billion or more last year. This listing includes bank holding companies, commercial banks, and savings banks.

In the latter listing, the top five Japanese banks also rank as the top five banking firms in the world. All five surpassed last year's top-ranked banking firm, Citicorp, New York. Citicorp fell to sixth place in this year's listing with assets of $191.4 billion at yearend 1986, up 14.5% from $167.2 billion on Dec. 31, 1985.

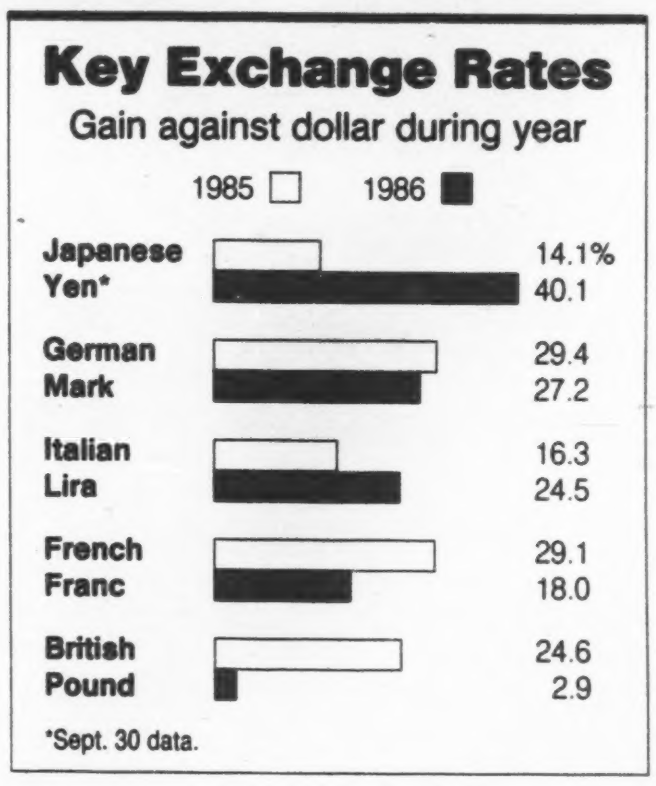
As reported in the *American Banker* on July 30, 1986, Dai-Ichi Kangyo Bank supplanted Citicorp as the top banking firm on March 31, 1986, when Dai-Ichi Kangyo's assets totaled $207 billion, compared with $176 billion for Citicorp.

Other Survey Findings

- The total assets of the top 500 banks rose 30.9% to $11.3 trillion, from $8.7 trillion in 1985. The assets of the top 500 banks rose 21.7% in 1985.
- There were 385 foreign banks among the top 500 for 1986. They had $9.8 trillion in assets, up 35% from $7.3 trillion for the 386 foreign banks ranked among the top 500 a year earlier.
- The 115 U.S. banks in the top 500 had $1.51 trillion in assets, up 8.6% from $1.39 trillion for the 114 U.S. banks ranked among the top 500 for 1985.
- The five countries with the most banks in the listing were the United States with 115, Japan with 98, Germany with 38, Italy with 31, and France with 22.
- The 98 Japanese banks had the most assets with $3.95 trillion, up 53.1% from $2.58 trillion for the 93 Japanese banks ranked among the top 500 a year earlier. Japanese banks accounted for 34.5% of the total assets of the top 500 banks last year, up from 29.7% in 1985.

US Banks' Assets Total $1.51 Trillion

- After Japan, the top four countries in assets were the U.S. with $1.51 trillion in assets at its top 500 banks; Germany with $1.01 trillion; France with $792 billion; and Italy with $678 billion.
- Last year, the top five countries had 304 of the top 500 banks, and these banks accounted for 70% of the total assets of the top 500. In 1985, 299 banks from these five countries were among the top 500 and accounted for 68% of the assets held by the top 500 banks.



Key Exchange Rates

Gain against dollar during year

*Sept. 30 data.

- Among the top 500 banks, Barclays de Zoete Wedd Ltd., London, an investment bank subsidiary of Barclays PLC, had the largest percentage gain in assets. Its assets were up 249.5% to $6.96 billion at yearend to rank as the 348th largest bank. A year earlier, assets totaled $1.99 billion and it ranked as the 772d largest in assets. According to the Barclays PLC annual report, the gain is attributable to the merger of the former Barclays Merchant Bank Group into the bank.
- Among the 1,000 largest banks, 908th-ranked Philippine National Bank, Manila, had the biggest drop in assets. Its assets fell 57.1% to $1.73 billion on Dec. 31, from $4.04 billion a year earlier, when it ranked 470th.

The drop was attributable to a sharp increase in nonperforming assets. These included loans to government companies that failed because of mismanagement and foreclosures on loans made to close associates of former president Ferdinand Marcos.

Although foreign banks are surveyed directly for the top 500 listings of banks by deposits and assets, data for some savings banks have been difficult to obtain. Two savings bank associations have provided the *American Banker* with the bulk of the data for the savings banks in their respective countries.

They are the Association of Swiss Cantonal Banks, Basel, Switzerland, and the Confederacion Espanola de Cajas de Ahorros, Madrid. In addition, the Institute for Financial Affairs Inc., Tokyo, has been an invaluable source of data for Japanese savings ("sogo") banks. ■

Bank of California Plans To Broaden Market Reach Into Puget Sound Area

Special to the American Banker

SEATTLE — The Bank of California, after more than 80 years in Seattle, is broadening its reach in Washington State by expanding into the fast-growing Seattle suburb of Bellevue, across Lake Washington.

Its new office in Puget Sound's high-technology area will aim to provide financial services to well-heeled professionals, including doctors and lawyers. The new branch will epitomize Bank of California's focus on what it terms private banking.

Located in a new high-rise office building, the branch will occupy the seventh floor, rather than the traditional street-level space. Bank officials said they are not interested in walk-in retail customers, but they will aggressively solicit what they perceive to be quality business.

Although the branch will be located in an area known for high-technology industry, it does not plan to make loans to any of the many small start-up companies that flourish in the suburbs on the east side of Lake Washington, including Bellevue.

The branch, due to open in October, will be managed by M. Dean Pollock, who has spent his 23-year business career with the bank.

The Bank of California's Pacific Northwest operations will be managed by senior vice president Dale L. Jansen, who has been managing the bank's branch in Portland, Ore. Mr. Jansen replaces Nicholas Hayes, who moves to San Francisco to head the bank's national corporate division. ■

Chicago Options Exchange Develops Interest Rate Contracts

➻ Continued from Page 2

government securities themselves — if the option is exercised.

An option gives an investor the right, but not the obligation, to buy or sell a contract within a fixed period of time. The person who sells the option receives a premium for agreeing to buy or sell the contract.

"We assume that because the new contracts are the first to be cash-settled and are yield-driven, they would be much more attractive to individuals" than to instiutions, said Mitchell Hirsch, manager of marketing communications at the Chicago Board Options Exchange.

Some interest rate products already exist, but most are traded on futures exchanges. They can be sold only by brokers who have commodities licenses to customers with futures accounts. The number of licensed equity brokers far outweighs those who can sell commodities.

The options exchanges are eager to draw bond business away from the Chicago Board of Trade, whose Treasury bond future is the most successful product traded in noncash markets. Many institutional investors also use the futures contract to hedge their fixed-income portfolios.

Professional traders, however, were skeptical as to the value of the composite interest rate options.

"The T-bill rate is not a real good indicator of the cost of funds for most people," said one salesman with the Discount Corporation of New York, speaking of the short-term contract. Eurodollar futures more accurately reflect liability costs, he said.

The long-term composite, he said, is "a menagerie, an average of an average of an average." The mix of durations — the average income stream from interest and principal payments on the securities — range from 5.4 years on the current 7-year note to 10.9 years on the long bond, he said.

An exchange spokesman said the long-term composite "will not provide a point-for-point indication of the yield for the bonds." However, exchange officials believe the mix more accurately reflects the long-term yield curve than just the 30-year bond, he said.

The Chicago exchange has won one battle already, gaining a step on some options exchange competitors.

The American Stock Exchange is working on an alternative interest rate option product, said one source. Instead of an index, the New York mart expects to trade seven option contracts on short-term and long-term Treasury instruments themselves.

The exchange is lining up at least one primary dealer to create a market for the contracts.

The Chicago Board of Trade, which trades a Treasury note future, also is working on an intermediate-term government securities contract, sources said. The New York Cotton Exchange recently introduced a five-year Treasury note future, and the Chicago Mercantile Exchange trades a Treasury bill contract as well as Eurodollar futures. ■

Japan Banks Issue Equity, Bonds In Push to Boost Capital Ratios

By JAMES R. KRAUS

NEW YORK — Top Japanese commercial banks have begun issuing large amounts of new equity and convertible bonds as part of a drive to boost their capital-to-asset ratios.

Recent moves by the Long-Term Credit Bank of Japan Ltd., Sumitomo Bank Ltd., and Mitsubishi Bank Ltd. are expected to be followed other major banks, according to press reports from Japan.

According to *Nihon Keizai Shimbun,* one of the country's leading daily financial and business newspapers, Sanwa Bank Ltd., Mitsubishi Bank Ltd., Dai-Ichi Kangyo Bank Ltd., Fuji Bank Ltd., and Sumitomo Bank Ltd. will issue a combined 680 billion yen, about $4.53 billion, worth of equity and subordinated debt before the end of the year.

Japanese banking sources in New York said that the convertible bond issues will be considered as part of capital. But the sources declined to comment on reported pending issues by other banks, in the absence of official confirmation from Japan. The Japanese bankers cited concerns over rating as well as pressures to align capital-to-asset ratios with U.S. and British banks as among the reasons for the new issues.

Japanese Prepare to Sell LDC Debt

Top British Banks Lose $1.2 Billion In First Half After Loan Provisions

By *JOHN J. DUFFY*

London Bureau

LONDON — The four major British banks all reported major setbacks in their mid-year profit reports from adding $4.42 billion to specific provisions against loans to third world countries.

The four — National Westminster Bank PLC, Barclays Bank PLC, Lloyds Bank PLC, and Midland Bank PLC — lost a combined $1.2 billion over the first six months.

The loss was modest, however, compared with the $5.7 billion loss reported by the four largest U.S. banks for the same period and triggered by similar loan provisions.

Even allowing for some creative accounting by Midland, the loss was still far less severe than those in the United States, analysts said.

For the British banks, a comparatively lower level of exposure to Third World debt and unexpectedly robust profits from domestic banking operations helped take some of the sting out of the housecleaning. All of the four reported higher sovereign debt reserve percentages than the major U.S. banks and two of the four are expected to post overall profits for the year.

With the addition to provisions, however, only two of the four major clearing banks were able to retain their reputations as global institutions.

Fidelity Merger Is Biggest Ever At $1.34 Billion

PNC Financial Signs Deal With Central Bancorp.

By GORDON MATTHEWS

NEWARK, N.J. — First Fidelity Bancorp. plans to acquire Fidelcor Inc., Philadelphia, in a $1.34 billion transaction that ranks as the largest banking merger yet. It will create a new superregional banking organization that would have ranked as the nation's 19th largest in assets at midyear.

Interstate Banking

In announcing the move at a news conference, Robert R. Ferguson Jr., president and chief executive officer of the Newark-based First Fidelity called it "as close to a merger of equals as you can get — closer than anything similar done up to now in the United States."

Investors appeared to think otherwise. In Friday afternoon trading, First Fidelity's stock dropped about 4 points from a previous close of 43¾ to 39⅝,

Borrowers Emphasize Caliber of Banker

Survey Shows Financial Health Tops Criteria for Lenders

By PHILIP T. SUDO

NEW YORK — Nearly nine in 10 corporate executives say the financial health of the lender is the most important criterion they use to evaluate their banking relationships, according to a new survey by Greenwich Associates.

The study, "Commercial Banking 1987," queried corporate financial executives at more than 5,000 companies with annual sales of $5 million to $50 million nationwide. The responses offer a wide-ranging view of how borrowers view their banks, as well an insight into the needs they feel are not being met.

The Greenwich, Conn., research firm found that 86% of those surveyed considered the lender's financial health as the major factor in evaluating their banking relationship. Eleven percent of those responding said they dropped their bank during the past year due to its poor financial condition.

Competitive loan pricing was only the fourth highest consideration, 73%; trailing the need for a reliable source of credit and a high caliber of banking official, both 83%.

Other criteria evaluated were the quality of financial advice, 61%; the offering of innovative service alternatives, 51%; and the availability of cash management and operations services, 46%.

In order for a bank to become more important to companies, the study said, 34% of the respondents put a priority on a greater willingness to lend; 29% wanted more attention from the account officer; 23% wanted more attention from top management; and 23% wanted low credit pricing.

In evaluating account officers, borrowers said it was most important for these officers to follow up promptly and effectively on requests, 89%; convince the bank to meet the company's credit needs, 80%; and to make good use of time during visits, 75%.

On average, the senior financial executive at each company surveyed was visited 3.5 times during the past year by his or her lead banker. One in 10 said he was not visited in his offices during the past 12 months, while one in 20 said he was visited at least 12 times.

More than 40% of the companies surveyed were visited by at least two banks in the past 12 months. The largest companies, with annual sales of $20 million to $50 million, were visited by 3.5 banks. The smallest, with sales of $5 million to $9 million, had visits from 1.9 banks in the past year.

For selecting a new bank, 86% said the lender's financial condition was the major factor, followed by accuracy of operations services, 84%; quality of account officers, 83%; the willingness to lend, 81%; low credit pricing, 72%; and convenient location, 60%.

Some 41% of the respondents said they rely on only one bank for their financial needs. Twenty-five percent said they use a bank headquartered outside their state.

Another 25% said they have relationships with at least one of 10 major nonbank financial firms. Another 16% said they have no nonbanking relationships, but were solicited for business by a nonbank bank during the past year.

More than 30% said they referred a bank to another company during the year. The most important factor in referral, cited by 70% of the sample, is the reputation of a bank's business capabilities.

The survey found that the proportion of companies using secured credit services has declined since 1984, to 70% from 80%. Conversely, 64% use one or more of eight unsecured credit services, up from 52% in 1984.

The typical commercial company pays 94 basis points above its bank's prime rate, a slight decline from 1986, when the spread was 99 basis points. ■

Evaluating Account Officers

Percent of executives that consider characteristic essential/very important

Following up promptly and effectively on requests	89%
Ability to persuade bank to meet credit needs	80
Making good use of time during visits	75
Knowledge of overall business, financial, and economic conditions	63
Ability to advise on complex financing problems	60

Knowledge of bank's international banking services	26

CREDIT LINES

Allegheny Enters into New Credit Agreement

NEW YORK — **Allegheny International Inc.** said it has entered into a credit agreement for funding of up to $239 million.

The secured, revolving facility is with a consortium of banks for which Mellon Bank is agent. Lengthy negotiations for the agreement required Allegheny to get an extension on its previous credit line, which expired July 22.

The new line allows Allegheny to borrow up to $239 million at any one time, in accordance with various stipulations.

On Aug. 31, the maximum borrowing level under the new credit agreement must be reduced by $50 million. That amount would continue to be available, but under a separate receivables purchase agreement that the consortium is expected to enter into by Aug. 31.

In addition, the credit agreement, combined with funds provided by the receivables agreement, calls for certain mandatory reductions. Allegheny may have no more than $250 million in aggregate funds available on Sept. 30, $215 million on Nov. 30, and $125 million on Dec. 31.

The credit and receivables agreements both expire Jan. 29, 1988.

The credit agreement prohibits the payment of dividends by Allegheny. It also requires the company to maintain certain levels of tangible net worth and working capital, among other things, and to meet various working capital ratios and a minimum operating earnings amount.

Allegheny posted a net loss of $29.4 million for the second quarter of 1987, compared with a $1.8 million loss for the quarter last year.

□

Bank officials had no comment on **Emery Air Freight Corp.'s** disclosure that it may not be able to pay the interest it owes on $253 million in debt connected with the acquisition of Purolator Courier Corp.

The disclosure, contained in a proxy amendment filed with the Securities and Exchange Commission, said operating losses at both Emery and Purolator will hamper the ability of the merged company to repay its loans. The merger is scheduled to be completed this month.

Emery, based in Wilton, Conn., acquired Purolator in August for $253 million in cash. Chemical Bank, Bankers Trust Co., and Morgan Guaranty Trust Co. supplied a $126 million bridge loan with the remainder supplied by Salomon Brothers Holding Co.

Emery said it currently is not in compliance with the terms of its borrowing agreements.

□

Pantera's Corp., a Dallas-based restaurant system, announced on Thursday the completion of its acquisition of Pizza Inn Inc.

AN **American Banker** WEEKLY FEATURE

To finance the merger, Pantera's has entered into a $35 million credit agreement with Lloyd's Bank PLC and Kleinwort Benson Ltd., consisting of a term loan of up to $27 million and an $8 million revolving credit facility.

The term loan matures in stages from 1988 through 1994.

□

Nashville-based PoFolks Inc. has reached an agreement in principle to sell **DavCo Food Inc.**, its food business unit, for approximately $17.5 million in cash to a group lead by DavCo management.

The deal will be financed by Citicorp Industrial Credit Inc.

DavCo operates 141 Wendy's Old Fashioned Hamburger restaurants in Baltimore, St. Louis, and Washington.

PoFolks also said it is working on an agreement with its banks to extend the maturity of an $8 million revolving credit loan until the DavCo sale is completed.

□

Citicorp Industrial Credit Inc. has sued the Moroccan mission to the United Nations for $11,700.71, claiming the mission has failed to pay for its lease of computer equipment.

The suit, which also seeks return of the equipment, was filed in U.S. District Court for the Southern District of New York by the Citicorp subsidiary.

According to an agreement accompanying the suit, IBM Credit Corp. agreed to lease IBM personal computer equipment and software to the mission for $9,988, to be paid over 36 months at $354.50 a month. No sales tax was charged because sales to the mission are tax-exempt.

The suit said the mission paid three installments, then halted payments. In March 1986, the lease was turned over to the Citicorp subsidiary.

The suit claims Citicorp Industrial is entitled to late charges of 10 cents per dollar on each payment more than 30 days overdue.

— Philip T. Sudo

Carper . . .

➻ Continued from Page 15

Its chairman, Rep. John D. Dingell, D-Mich., has been widely viewed as a staunch opponent of new powers, but has indicated some willingness this year to change his mind on the powers issue. Although Mr. Carper's bill was assigned to the Banking Committee for hearings, the Energy and Commerce panel will also have the opportunity to examine the legislation, Mr. Carper said.

House Banking Committee Chairman Fernand J. St Germain, D-R.I., has blocked hearings on new bank powers in the past, although he has promised hearings this year on the issue.

In the Senate, opposition to new bank powers was so strong that Mr. Proxmire's effort to include new securities powers in a banking bill was quickly converted into a freeze on new activities.

Still, Mr. Proxmire has already begun hearings on restructuring the financial services industry and Mr. Carper is scheduled to testify on his bill this week before the Senate panel. Mr. Proxmire is thought to be leaning toward an approach that would favor state participation in the deregulation process.

"States' rights is a time-honored concept in American politics," said Karen Shaw, executive vice president of the Institute for Strategy Development and one of a number of Washington bank lobbyists and analysts who contributed ideas for the Carper bill. ■

Freddie Mac Plans Linked Guarantees

By PHIL ROOSEVELT

SAN FRANCISCO — The Federal Home Loan Mortgage Corp. plans to offer lenders guaranteed mortgage-backed securities in exchange for adjustable-rate mortgages linked to U.S. Treasury rates.

The program, unveiled here Wednesday at the California League of Savings Institutions' western secondary-mortgage-market conference, comes as adjustable-rate mortgages are commanding an increasingly greater share of mortgage originations.

Under the so-called ARM guarantor plan, Freddie Mac — as the corporation is called — will accept Treasury-indexed ARMs with annual rate caps of either 1% or 2%, in pools of at least 500,000. In return, lenders will receive Freddie Mac-guaranteed pass-through securities representing interests in the same mortgages. The program is slated to begin Oct. 1.

Currently, Freddie Mac buys Treasury-indexed ARMs with 2% annual caps, in exchange for cash.

The Federal National Mortgage Association — Fannie Mae — has no formal program for swapping ARMs for securities. On a case-by-case basis, however, Fannie Mae offers securities in exchange for larger pools of seasoned ARMs.

Robert Levin, a senior vice president at Fannie Mae, said the company has no immediate plans to start a program similar to Freddie Mac's. "We'll have to see how successul it is," he said.

About one third of all recent mortgage closings involved ARMs, up from one fifth just a few months ago, Freddie Mac officials said. They said consumers have been lured by short-term interest rates which have risen less sharply than long-term rates. ARMs are based on the short-term rates. ■

Credit Cards

CHICAGO — MasterCard International is trying to spur credit card and travelers check growth and increase its market share by offering millions of dollars in financial rewards to member banks.

In the most comprehensive incentive pricing system ever instituted by a bank card association, MasterCard said it will give its most productive members a portion of the new revenue they generate during the next two years.

To be eligible for the rebates, a financial institution must increase its credit card volume by more than 10% a year.

MasterCard to Spend on Social Issues
Page 6

Many MasterCard banks would have qualified for rebates if the incentive program were in place last year, when worldwide MasterCard volume grew 24.6%.

A bank that increases its MasterCard sales this year by 15%, to $100 million from $85 million, will get a rebate of between $1,900 and $6,600, depending on its size — a relative drop in the bucket.

But if that bank doubled its MasterCard volume, to $100 million from $50 million, the rebate would climb to between $25,200 and $87,300. This would be a significant reduction in the $95,000 fee that a $100 million bank

Citicorp Dropping Choice Credit Card And Will Merge It into Visa Progam

Special to the American Banker

BALTIMORE — Citicorp has given up on its private credit card, called Choice, and will give customers Visa cards instead.

Some three million consumers with Choice cards will be able to use them at any of 5.5 million retailing locations around the world that take Visa cards — a far wider acceptability than Citicorp was able to achieve on its own.

The seven-year-old Choice card was envisioned as a multipurpose financial services card with a credit line and additional loan, deposit, and investment services.

It competed directly against MasterCard and Visa services, which Citicorp also offers, in several parts of the country. Some card industry analysts saw it as a potential competitor of Sears, Roebuck and Co.'s Discover card.

"Unlike most things Citicorp tries, this one did not work," said Spencer Nilson, publisher of *The Nilson Report,* a newsletter covering the nation's credit card industry. "It was a good try, but they found out that there is not much demand for a financial services card. Citicorp is now admitting the card wasn't a valid proposition."

From its headquarters in Towson, Md., Choice has been mailing letters to merchants saying that, as of Sept. 1, any purchase made with the Choice card should be treated as a Visa purchase. This means that all Choice charges may be sent to the same bank that processes the merchant's Visa transactions.

Banks to Withhold Interest Of Depositors Who Owe IRS

By DAVID LAWRENCE

WASHINGTON — The nation's financial institutions will soon be playing tax collector for the federal government.

The Internal Revenue Service said last week it will require banks, corporations, and other institutions to withhold 20% from payments to depositors or investors who failed to pay the required taxes on interest and dividends in 1984 and 1985.

Banks were notified of the requirement, a provision of the Income Dividend and Compliance Act, in May.

"It's not going to make the savings institutions or the banks real popular," said Joan Pinkerton, speaking for the U.S. League of Savings Institutions.

Congress passed the Income Dividend and Compliance Act as a replacement for the Tax Equity and Fiscal Reform Act of 1982. Congress repealed the latter act before it went into effect after a massive protest organized by the banking industry. The repealed act had required banks to withhold 10% of interest and dividends for all depositors except senior citizens and those with low incomes.

The revised act applies to taxpayers who failed to report their interest and dividends or who failed to disclose their Social Security numbers to their financial institutions.

The order will affect some 150,000 savers and stockholders. At least four warnings have been sent to the delinquent taxpayers, the IRS said.

Banks will have to alter their computer software in order to comply with the act, said Fritz Elmendorf, director of communications for the Consumer Bankers Association.

"The problem is in designing or modifying software to nick out the 20% interest to forward to the IRS," he said.

"Even though it will be a small minority of customers, it will require a substantial modification in software," Mr. Elmendorf said.

"The cost of administering these things are not cheap," said James Christian, chief economist at the U.S. League. "It's unpleasant, you get to play the bad guy — but it's the law."

Mr. Lawrence writes for the Medill News Service.

Reagan . . .

➜ **Continued from Page 1**

regulators to give troubled thrifts time to work out their problems.

In a statement at the White House, the President spoke against those provisions that could limit the ability of the FSLIC to make a recovery, that hampered what he called the consumer benefits of the services of consumer banks, and that placed a freeze on banking industry expansion.

"My willingness to sign this bill is based in part upon its statement on congressional intent not to renew or extend the moratorium on the granting of needed new authorities for banks beyond March 1, 1988, whether or not subsequent legislation is passed by the Congress," the President said.

He also voiced dissatisfaction with restrictions on cross-selling of services between a parent company and its nonbank affiliate and on the growth of limited-service banks. The legislation permits nonbank banks to grow unrestricted for one year after the bill is signed. Thereafter, growth is limited to 7% annually. ■

Corrections

In the listings of world's largest banks, published July 30 and July 31, the wrong exchange rate was used to calculate the dollar-denominated deposits and assets of Hokkaido Takushoku Bank Ltd., Sapporo, Japan. As a result, the bank's dollar-denominated deposits and assets were understated.

As of Sept. 30, 1986, the bank had total deposits of $41,438,375,242 and total assets of $51,297,236,298, making it the world's 64th largest bank in deposits and the 65th largest bank in assets. In addition, among banks, bank holding companies, and savings banks, it ranks as the world's 71st largest banking firm in assets.

□

A story in the Aug. 6 *American Banker* ("US Regulations on Securities Need Revision," p. 2) quoted Rep. Jim Cooper, D-Tenn., as saying during a congressional hearing that Sumitomo Trust and Banking Co. was given acquisition rights not afforded to domestic banking firms when it was allowed to acquire a 12.5% interest in Goldman, Sachs & Co. The story failed to report that Mr. Cooper later reversed himself and acknowledged that domestic banking firms also were permitted to make a similar investment. ■

INTERNATIONAL BRIEFING

Peru's Move Toward Nationalization Of Banks Makes Foreigners Wary

LIMA — Peru's move to take over locally owned banks and other private financial institutions has reinforced the already deep skepticism of foreign bankers toward the government of President Alan Garcia.

In a major policy address on July 28, Mr. Garcia announced his intention to nationalize 10 private banks, 6 finance companies, and 17 insurance firms.

Pending the Peruvian Congress' approval of a takeover law, the institutions had been formally put under state control, with government-appointed committees replacing boards of directors. The intervention order was rescinded following a court challenge, but Peru's populist president vowed to press ahead.

Saying he wanted to break the grip of a small financial elite, Mr. Garcia argued in his speech that banks under state control could lend more money to the rural poor.

The government's main objective is the country's largest bank, Banco de Credito del Peru. With 25.7% of commercial bank deposits, Banco de Credito is almost three times the size of its nearest private competitor.

Foreign branch banks were exempted from the intervention decree, and out-of-country bankers believe their operations are secure for the time being.

Nevertheless, some foreign bankers are so negative about doing business in Peru that they jokingly say it's a shame the government isn't taking them over.

Citibank, Bank of America, Lloyds Bank of London, the Bank of Tokyo, and Banco Central de Madrid have branches in Lima. Chase Manhattan sold off its Peru branch earlier this year. Banco Exterior de Espana runs the commercial bank Extebandes — the only private bank not taken over — as an offshore operation.

President Garcia Reassures Foreign Banks

In remarks to foreign reporters, the 38-year-old Mr. Garcia characterized foreign banks as very important.

Government officials "are smart enough to realize that they gain nothing by touching us," said one foreign banker.

Nevertheless, foreign bankers are unnerved by the text of proposed nationalization law that declares banking, finance, and insurance "of social interest . . . the exercise of which is reserved for the state."

Mr. Garcia's announcement stunned rumor-prone Peru. Nonbanking business groups, which have maintained reasonably good relations with the administration, joined local bankers and middle-class political parties in expressions of outrage.

The Peruvian chief executive promised to "democratize" credit, using vintage populist rhetoric to explain his decision. Bank owners, he said, are part of "financial circuits . . . that are the backbone of economic power and inequality."

Mr. Garcia's left-of-center Apra party has a two-person majority in the Senate, but some ruling-party members have expressed doubts about the nationalization plan. Analysts say the bill could get watered down, or it could be strengthened if the ruling party enters into talks with the more radical left.

Commentators here generally agree that Mr. Garcia's motives are more political than economic. The state already owns the second, third, and fourth largest commercial banks, and controls about half of bank deposits. When state development banks are considered, the government directly manages 75% to 80% of credit in the financial system.

What many find worrisome is that the government apparently lacks a concrete idea of what to do with the banking system once it assumes full control. "There is no plan," said one Lima banker.

Officials have spoken vaguely of "rationalization" of the system — meaning mergers and consolidations — but have been unable to provide details when pressed. Nor have they offered anything except generalities on how they intend to allocate credit.

Meanwhile, the nationalization proposal is undergoing revision as the government considers less than full state ownership of some smaller banks.

Even before the latest move, foreign banks were reevaluating their local operations. "Over the last year, during our budget reviews, 30% of our time has been spent considering whether to leave Peru," said one banker.

Foreign bankers say they are not permitted to compete on an equal footing with locals. For example, foreign branches may not offer savings accounts.

Complaints About Forced Dollar Lending

Their most bitter complaint concerns forced dollar lending to the Peruvian government. Especially onerous is a compulsory credit line equal to the growth of deposits over a 1970 base. For every increase in local currency deposits, foreign banks must lend the government an equivalent sum in dollars.

As a result, American, British, and Japanese banks are scaling back their operations in Peru.

Citibank has reduced its staff from 170 to 120, and cut deposits and lending by more than 50%. The bank lost close to $1 million in Peru last year.

Bank of America cut its work force from about 80 to 60. The Bank of Tokyo has not replaced a general manager wounded in a terrorist attack earlier this year. In recent weeks, the Bank of London halted an aggressive consumer advertising campaign.

And, though Chase officially described its departure as part of a worldwide retrenchment, compulsory lending reportedly was a major factor in the its decision.

To keep deposits from growing, which would force loans to the government, foreign branches find themselves in the bizarre position of refusing to take money from customers who are nervous about keeping their funds in banks targeted for nationalization.

There may be a silver lining for foreign banks, however. Private banks are losing credit lines as overseas lenders balk at providing money to institutions that will belong to the Peruvian government. Importers may thus be forced to go to foreign banks for credit. Said one foreign banker: "The irony is that all this might increase the trade financing business of foreign branches." ■

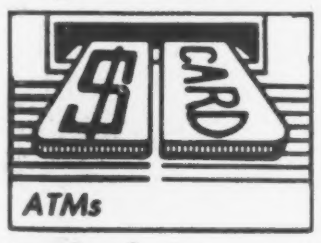
Visa Reports Its ATM Network Is Largest Bank-Owned System

By JEFFREY KUTLER



NEW YORK — Visa International said this week that its automated teller machine network has grown to 19,023 machines in 21 countries, making it the largest bank-owned ATM network in the world.

In terms of "live ATMs" — those currently connected together — Visa is larger than MasterCard International's MasterTeller system and the Plus and Cirrus interchange networks in the United States.

But American Express Co., New York, reported that 23,795 machines are in its Express Cash network, making it bigger than Visa's global ATM system. American Express owns only 135 of the machines; the rest are operated by banks that have interchange agreements with the financial services conglomerate.

American Express' network, which spans 20 countries, offers emergency cash to the 25 million owners of American Express cards. Visa's cash machine network is available to 150 million cardholders, MasterCard's to 130 million.

Cirrus System Inc., Downers Grove, Ill., advertises about 17,300 ATMs in the United States and Canada; Plus System Inc., Denver, claims 14,000 in the United States, Canada, and Puerto Rico; and MasterTeller has 9,462 online worldwide with 12,160 more committed to join, which would bring it to 21,622 in 11 countries.

A VIEW FROM OUTSIDE

MARTIN MAYER

Doing Good by Stealth

THE nastiest political satirist who ever wrote in English sent an open letter to Lord Bute upon the occasion of his appointment as prime minister to King George III. "You have done good," Junius wrote, "by stealth. The rest is upon record."

Looking at the bill that bails out the Federal Savings and Loan Insurance Corp. and the ornaments hung upon it, I have some of the feeling Junius had when contemplating Lord Bute. Almost everything that has drawn major public attention strikes me as unfortunate or worse.

The money found for the S&Ls is in the form of a bond issue that cannot be serviced by the means that will be specified in the indenture (George Kaufman's and George Venston's shadow regulatory committee has already labeled this paper "federal junk bonds").

The intent in using these bonds is to make sure that a Congress that once accepted the annual surplus of the FSLIC as a reduction of the budget deficit now will not have to take its losses as an increase in that deficit.

Despite the unchallenged evidence that the cost to the insurance fund invariably rises proportionately with the delay between the discovery of insolvency and the closure of a savings and loan, the Federal Home Loan Bank Board's use of whatever money can be raised by the junk bonds has been curtailed by restrictions that have the purpose (not just the effect, but the purpose) of protecting crooks who happen

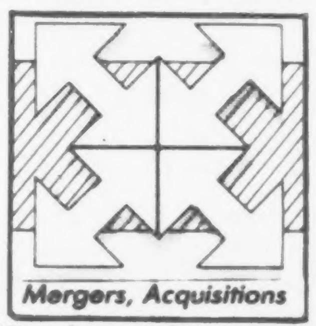
Security Pacific Seeking to Buy Ethnic Bank

Chinese-Controlled Firm In San Francisco Sought

By PAMELA LEVEN



LOS ANGELES — Security Pacific Corp. is negotiating to buy Chinese-controlled American Asian Bank, San Francisco, as part of a strategy to broaden its Pacific Rim business.

Officials at both banks confirmed Wednesday that they have been holding talks but have yet to reach a formal agreement.

American Asian Bank, with assets of $240 million, is California's only statewide Chinese ethnic bank concentrating on Pacific Rim trade. It operates four branches around San Francisco and four in the Los Angeles area.

The San Francisco bank is owned by members of the family that controls the C.H. Tung Group, a Hong Kong company primarily involved in the shipping business. The Tung Group recently completed a $3 billion debt restructuring and plans to concentrate its resources on its main business.

"The phenomenal growth of our market has outstripped our ability to generate capital to keep up," explained Robb Evans, American Asian president and chief executive officer.

He noted that of the several financial alternatives available to the bank, including sources outside California, "Security Pacific represents an attractive candidate."

American Asian earned $357,000 in the first half of the year, up 76% from the 1986 first half. Last year, it earned $425,000.

First Nationwide Leads in Consumer Lending

Auto Loan Growth Accounted for Almost All Gains at the Ford Motor Subsidiary

By L. MICHAEL CACACE

New York

FIRST Nationwide Bank FSB, San Francisco, is the top thrift in consumer lending, with $1.77 billion in consumer loans at yearend 1986. A subsidiary of Ford Motor Co. with $11.1 billion in deposits, the nation's seventh largest thrift saw consumer loans grow 242% from $518 million a year earlier.

More than 70% of First Nationwide's consumer loans, or $1.24 billion, were auto loans, making it the top thrift in auto loans last year. In 1985, First Nationwide made only $1.6 million in such loans. Thus, auto loan growth accounted for more than 99% of the growth in consumer loans at First Nationwide last year.

First Nationwide also had the largest percentage gain in gross interest income from consumer lending operations of the top 100 thrifts in the field. Gross interest income rose 345% to $127.9 million in 1986 from $28.7 million in 1985.

Source of Data: Federal Home Loan Bank Board's Quarterly Report Aggregates for FSLIC-Insured

Top 100 Thrifts in Consumer Loans
Table on Page 8

These are some of the findings of an *American Banker* survey of the top 100 thrifts in consumer lending. Survey data were provided to the *American Banker* by ADP Data Services Division, New York, from their data base of the Federal Home Loan Bank Board's quarterly financial report for institutions insured by the Federal Savings and Loan Insurance Corp.

According to the Bank Board report, total consumer loans consist of seven different types — auto loans, credit card loans and other open-ended credit, education loans, deposit-secured loans, home improvement loans, retail mobile home loans, and all other closed-end consumer loans.

• The $11 billion-deposit Goldome FSB, Buffalo — the nation's eighth largest thrift — was the second largest consumer lender, with $1.37 billion in loans outstanding on Dec. 31, 1986, up 6.4% from the year before. And the $3.8 billion-deposit Western Savings and Loan Association, Phoenix, the nation's 32d largest thrift, was third, with $1.05 billion in consumer loans, up almost 33%.

Midwest Federal Savings and Loan Association, Minneapolis, ranks fourth, with $980.9 million, and California Federal Savings and Loan Association, Los Angeles, ranks fifth, with $902 million.

If the consumer lending portfolios of affiliated thrift institutions in the listing were combined, however, the top five ranks would change significantly. Citicorp, New York, would rank second, with $1.67 billion in consumer loans at its three affiliate thrifts, and Empire of America FSB, Buffalo, would rank fourth, with $1.2 billion at its two thrift units.

Citicorp Savings, San Francisco, had $898.1 million in consumer loans outstanding at yearend 1986, to rank sixth. Citicorp Savings of Illinois, Chicago, ranked 19th with $409.5 million, and Citicorp Savings of Florida, Miami, ranked 23d, with $364.6 million.

Empire of America FSB, Buffalo, had $602.5 million in consumer loans, placing it 12th in the listing, and Empire of America FSB, DeLand, Fla., had $554.2 million, to rank 13th.

The top thrift in credit card loans last year was Atlantic Financial Federal, Bala Cynwyd, Pa., with $462.4 million outstanding on Dec. 31, 1986, up 214%.

Other Survey Findings

• At yearend 1986, FSLIC-insured institutions combined had $50.6 billion in consumer loans outstanding, up

Neworld Clears a Path for Merger-of-Equals Trend

By PAMELA J. PODGER

Boston

NEWORLD Bank for Savings, once troubled by bad commercial loans, has cleaned up its portfolio and is following a more focused strategy. And now, Neworld is leading the way to what may be a growing trend among New England thrifts: so-called mergers of equals, paying no premiums to stockholders.

Since Neworld and the Boston Five Cents Savings Bank announced their proposed merger of equals earlier this year, another similar deal has surfaced, and analysts said more may follow.

Last month, United Savers Bancorp Inc., Manchester, N.H., and Peoples Heritage Savings Bank, Portland, Maine, announced a similar deal.

Industry observers credit James M. Oates, Neworld's president and chief executive officer, for the thrift's turnaround. Mr. Oates joined Neworld in 1984 as executive vice president and became president later that year.

Analysts said that Mr. Oates' conservative lending policies restored Neworld to profitability after losing $10 million in 1984.

Last year, the thrift earned $9.3 million for a return on average assets of 0.8%; it now has $1.3 billion in assets.

For the first half of 1987, Neworld had net income of $4.5 million, about the same as the year-earlier period, which included $1.8 million in one-time tax credits.

Mr. Oates initially scaled back Neworld's corporate lending.

"Oates is running a more conservative thrift than his predecessor did," said James E. Moynihan Jr., senior vice president of Moseley Securities Corp. in Boston.

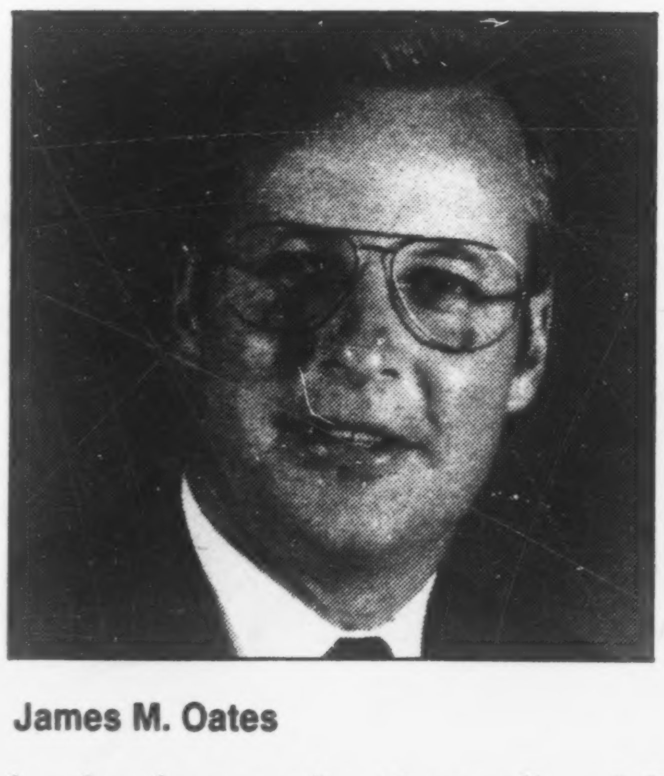
In 1985, Mr. Oates brought in William E. Diercks from Brown Brothers Harriman and Co. in Boston to serve as executive vice president of the commercial division. "Diercks was handcuffed until they could figure out why their commercial loans weren't performing well,' Mr. Moynihan said.

New management and more careful underwriting have improved Neworld's results.

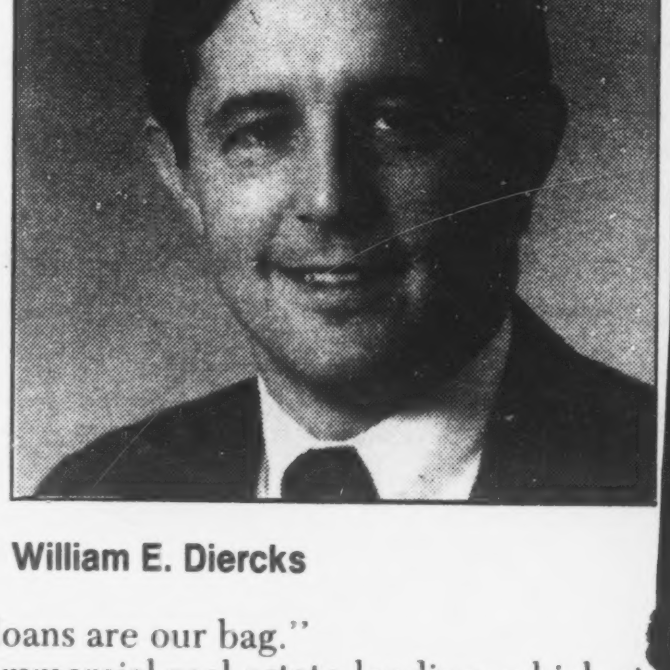
Mr. Diercks, who played hockey with Mr. Oates at Harvard University, said he now wants to boost the thrift's lending to small and medium-size New England companies, which currently amounts to about $53 million, or 5% of the thrift's loan portfolio.

"I'll know we've really made it when our corporate loan officers are sitting on the boards of New England companies," Mr. Diercks said

"Our competitors all claim to be a bank for the middle market, but they're like the big elephant that has to bend down," Mr. Oates said. "We don't have to do any bending because the $5-10 million dollar loans are our bag."



James M. Oates



William E. Diercks

Neworld already has a major stake in commercial real estate lending, which at June 30 amounted to $390 million or 37.5% of the thrift's loan portfolio. Mr. Diercks is projecting that business and commercial real estate loans will total $500 million by yearend.

Mr. Oates and Mr. Diercks concur that corporate middle-market lending is more attractive than consumer banking because of intensifying competition in retail lending.

So Mr. Oates has also cut back the scope of Neworld's retail banking. Neworld now focuses on three products: deposits, home equity loans, and adjustable-rate mortgages.

For home equity loans, which are second mortgages in the form of a revolving line of credit, Neworld boasts about its competitive pricing and free application process. This "costly strategy" is a worthwhile sacrifice to keep these long-life loans, Mr. Oates said.

Neworld's home equity lines have a 50% activation rate. While Neworld will grant a line of up to $1 million, the average line is $50,000.

Consumer loans are the sum of seven types of loans to consumers: (1) loans on deposits; (2) home improvement loans; (3) education loans; (4) auto loans; (5) other closed-end consumer loans; (6) credit card and other open-end credit extended to consumers; and (7) retail mobile home loans. **Auto loans** include all closed-end auto loans made to consumers and loans to individuals for pickup or panel trucks primarily used for personal use. **Credit card loans** include credit extended in connection with credit cards plus overdrafts on NOW accounts plus any other open-ended credit extended to consumers. **Gross interest income on consumer lending** is the gross interest earned on consumer loans for the entire year, calculated by summing the interest earned in each of the four calendar quarters of the year. Data are provided to American Banker by **ADP Data Services Division, New York,** from their data base of the Federal Home Loan Bank Board's Quarterly Financial Report for FSLIC-insured institutions.

Top 50 Thrifts in Auto Loans

December 31, 1986 Compared with December 31, 1985 (In Thousands of Dollars)

Auto loans include all closed-end auto loans made to consumers and loans to individuals for pickup or panel trucks primarily used for personal use. Data are provided to American Banker by **ADP Data Services Division, New York,** from their data base of the Federal Home Loan Bank Board's Quarterly Financial Report for FSLIC-insured institutions.

Survey of the Nation's Top 100 Thrifts in Consumer Lending

Continued from Page 6

12.5% from $44.9 billion a year earlier. Consumer loans accounted for 4.35% of the total assets of these institutions, up from 4.2%.

• Auto loans were the largest component of consumer loans, accounting for $11.8 billion, or 23.3% of the total. All other closed-end loans were the second largest component, accounting for $11 billion, or 21.7%. Retail mobile home loans accounted for $7.5 billion, or 14.9%; credit card loans for $7.2 billion, or 14.2%; home improvement loans for $4.9 billion, or 9.7%; education loans for $4.2 billion, or 8.4%; and loans on deposits for $3.9 billion, or 7.8%.

• Credit card and auto loans were the two fastest-growing components of consumer lending last year at thrifts. Credit card lending jumped 41.3% last year, and auto loans grew 28%.

• For the top 100 FSLIC-insured thrifts in consumer lending, total consumer loans totaled $29.7 billion at yearend 1986, up 21.6% from 1985. Credit card loans grew by more than 50% to $5.4 billion, and auto loans rose 44.8% to $7.4 billion.

• The top 100 thrifts in consumer lending accounted for 58.8% of all consumer loans outstanding at FSLIC-insured thrifts last year, up from 54.4% in 1985. In addition, they accounted for 75% of credit card loans and 62.7% of auto loans made by all thrifts last year.

• According to data from the Federal Reserve Board, total consumer loans outstanding at all institutions — commercial banks, finance companies, credit unions, retailers, savings institutions, and gasoline companies — totaled $577.8 billion on Dec. 31, 1986, up 10.5% from a year earlier. FSLIC-insured thrifts accounted for 8.8% of this total last year and 8.6% of the 1985 total.

• Savings institutions are the fourth largest provider of consumer credit. Commercial banks are first, providing about 45%. Finance companies are second, withabout 24%, and credit unions are third, with about 13.5%. ■

Mortgage Company Update On 1986 Loan Originations

On July 24, the American Banker published a listing of mortgage companies ranked by outstanding residential loan originations for 1986. Since then the American Banker has learned that the following four companies should have been included:

Rank		Mortgage Loans Originated in 1986
28	Commonwealth Mortgage Co., Wellesley Hills, Mass. (a)	$1,200,000,000
91	Dominion Mortgage Funding Corp., Falls Church, Va. (b)	500,000,000
97	SW Mortgage Inc., San Diego (c)	455,683,778
127	Huntington Mortgage Co., Columbus, Ohio (d)	269,925,698

Includes permanent residential mortgages originated for sale, or the intention to sell, over the period Jan. 1, 1986, to Dec. 31, 1986. Includes loans closed by the mortgage company and loans where the mortgage company actually did most of the paperwork for closing. Includes in-house production and purchased production. **(a)**— Data provided by Nicholas Trombetta, senior vice president. **(b)**— Data provided by David B. Lauhon, president. **(c)**— Data provided by Michael A. Riley, chairman. **(d)**— Data provided by Dorothy R. Brownley, director of corporate relations, Huntington Bancshares Inc.

GIANTS OF THE MORTGAGE INDUSTRY:

--'86 RESULTS

--NEW PLANS & STRATEGIES

--RESHAPING THE INDUSTRY

A New SMR Research Corporation Study

In 1986, the nation's Top 25 residential mortgage originators grabbed an astonishing 24% of the market. In 1987, the consolidation of the industry into fewer hands will accelerate dramatically.

These are among the prime conclusions of a new, landmark study of the mortgage business. More than 135 pages, this study offers some of the most unique data ever compiled in the industry, including:

--**The Top 25 Residential Mortgage Originators,** in rank order, with dollar volumes, covering all institutional types of players.

--**Profit data on large mortgage operations.**

--**Tables of company-specific geographic and office expansions.**

--**State-by-State origination data** showing which states are hurt worst and which respond quickest in a recession/recovery cycle.

The research features new strategy studies of key players, economic analysis, and the progress of combined mortgage/realty brokerage operatons. It covers companies of all kinds: the big thrifts, mortgage companies, banks, and also the nontraditional mortgage giants, from GMAC to Metropolitan Life.

There's much more--all described in a free Prospectus. To get one, simply call or write Mark S. Kamm, SMR Research Corporation, 382 Route 46, Budd Lake, NJ 07828. (201) 691-1255.

Neworld Bank for Savings Clears Path For Mergers of Equals in New England

Continued from Page 6

Potential abuse of home equity lines by consumers could ultimately jeopardize banks that have issued credit unwisely, analysts said.

"Home equity loans could be a hazard for the bank if all of the lines were put into play at once," said Mr. Moynihan of Moseley Securities. "It could cause a liquidity problem."

But Mr. Oates defended the bank's strict underwriting standards.

"I have no worries about this institution because of our underwriting and our candor about turning down loans," he said. "How do you put safeguards on this product? I don't have the answer on to how to control people who abuse credit."

Like most institutions, Neworld charges a variable rate on its home equity credit lines. Consumers also absorb the interest rate risk in Neworld's bread-and-butter product — adjustable-rate mortgages.

Emphasis on these retail products lessens Neworld's sensitivity to fluctuating interest rates.

Neworld has 23 offices in eastern Massachusetts and a major stronghold on Cape Cod, where seven offices have $300 million in assets.

While analysts generally agree that Neworld is now a healthier institution, the proposed merger with the Boston Five has stirred up controversy.

"The merger looks like a good marriage, but stockholders are shrieking because most of them are speculators who want to make a quick profit," said Robert Chaut, vice president at Salomon Brothers in New York.

A new holding company, The Boston Five Bancorp, would be formed, and its stock will be issued to Neworld and Boston Five shareholders. Initially, the book value of Neworld shares would be reduced.

The new institution, to be called the Boston Five Bank, would have of $3.1 billion in assets, making it the biggest thrift in Massachusetts.

Last year, 60 New England thrifts have converted to stock form, bloating their balance sheets with excess capital. And analysts are predicting an inevitable consolidation in the industry.

"We're all too expensive to buy each other, so mergers of equals seems to be the best strategy right now," Mr. Oates said. "The merger says one plus one equals three. Both banks will benefit from the economies of scale, sale of one of the headquarters, and staff trimming in overlapping areas."

Mr. Oates hopes that regulatory and stockholder approval of the merger is completed by October.

Some analysts expect the Boston Five-Neworld merger, if approved, to be a prototype for no-premium mergers in New England. ■

Visa Says It Has Largest ATM System in World

Continued from Page 1

Visa this year became a part owner of Plus System Inc., and the addition of Plus machines is expected to help the Visa network grow to 24,000 ATMs by yearend.

The New York-based MasterCard association is reportedly close to a merger agreement with Cirrus System Inc. that would give it a similar boost.

Win Derman, the vice president in charge of Visa's global ATM program, said its recent growth spurt — by 5,997 machines, or 46%, since the end of 1986 — was the result of both domestic expansion and an increase in the number of countries on the network.

The Visa-Plus affiliation was a factor, Mr. Derman said. Prior to the agreement last February that gave Visa seven of Plus System Inc.'s 21 board seats and an option to take the Plus logo worldwide, 3,000 machines were already in both networks. Another 2,000 ATMs will have dual Visa and Plus connections by the end of this year, Mr. Derman said.

US Has Most Visa Machines

Of the 19,203 machines linking Visa banks worldwide, 8,467 (45%) are in 40 of the United States. Another 6,736 (35%) are in the Europe/Middle East/Africa operating region. Canada has 3,209 Visa ATMs, the Asia-Pacific region 389, and Latin America 222.

Mr. Derman said the Visa ATM network has "blanket coverage" in such countries as Canada, England, France, and Spain. The network includes all Canadian ATMs except those of the Bank of Montreal, which is a Cirrus member, and 1,200 machines of London-based Barclays Bank PLC.

He said that Visa is making a bigger impact than the ATM network being assembled by Eurocheque, a payment system owned by European banks. Currently low in the international ATM standing, with 2,500 machines, Eurocheque may tie its fortunes more closely to MasterTeller. MasterCard is preparing to buy a 15% stake in Eurocard International, a European credit card association, which intends to use MasterCard computers to process Eurocard and Eurocheque transactions.

Visa began organizing its ATM network in 1983, a year after many U.S. banks lined up behind the Plus or Cirrus networks, which were designed to handle bank-issued ATM cards or debit cards.

Visa saw ATMs as extensions of its credit card cash advance service, which allows cardholders to obtain cash at the offices of Visa member banks. By 1986, all Visa banks issued personal identification numbers to credit card customers, permitting them to use the machines.

Their network had 1,507 machines at the end of 1984, 5,241 at the end of 1985, 13,026 at the end of 1986, and has 19,023 today. Mr. Derman projected that there will be 24,000 ATMs in 24 countries by yearend.

"This achievement demonstrates the commitment of our membership to creating the most powerful payment device available to consumers," Mr. Derman said from Visa's headquarters in San Mateo, Calif.

ATM interchange — the service that allows consumers to get cash at machines away from their own banks' premises — began as a local and regional phenomenon in the 1970s.

ATM sharing went national with Plus, Cirrus, and bilateral interchanges between networks such as the one announced recently by Pulse in Texas and Star System in California and nearby states. Together they will have 8,000 ATMs and point-of-sale terminals in 11 states.

There is some movement within the Shared Networks Executive Association, a forum for regional networks, such as Pulse, Star, Honor in Florida, and Tyme in Wisconsin, to create technical and marketing standards that would tie them together into one supernetwork, combining the majority of the 67,000 ATMs in the United States.

Automatic Data Processing Inc., Clifton, N.J., put together the Exchange ATM network as an outgrowth of its bank data processing business. The Exchange currently has 4,500 ATMs in 36 states and Canada open to 8.4 million eligible cardholders. ■

International ATM Interchanges

Network	Location	Eligible Cards[1] (Millions)	Live ATMs
Express Cash (American Express)	20 countries	25	23,795
Visa	21 countries	150	19,203
Cirrus System	U.S., Canada	62	17,300
Plus System	U.S., Canada	70	14,000
MasterTeller (MasterCard)	6 countries	130	9,462
ADP Exchange	U.S., Canada	8	4,500
Eurocheque	Europe, Middle East	31	2,500

[1] Represents the number of cardholders who can use each system, not the smaller number who have used or activated their cards. The Express Cash figure includes only American Express cardmembers and not customers of banks that participate in Express Cash.

Decline in Rate of ATM Use Prompts Talk of Saturation

By JEFFREY KUTLER

NEW YORK — Evidence is mounting that the United States' automated teller machine market is approaching the saturation point.

Despite consumers' growing awareness of ATMs, the number of transactions per machine is falling.

In other words, ATM networks are growing faster than consumers' appetite for their services — and have been for several years.

US Leads in ATMs, but Japan Closing In
Page 24

Whether this represents a temporary lull or a permanent reversal, the downturn has forced financial institutions to rethink their strategies on retail electronic funds transfer and look elsewhere — notably to point-of-sale debit networks — for growth.

Companies that manufacture ATMs are in the midst of a similar reassessment, as bankers have cut back on machine purchases.

The latest indication of a change in the ATM market comes from Speer & Associates, the Atlanta-based consulting firm, in its semiannual survey of regional automated teller machine networks.

Speer found that while a healthy consumer demand continues for ATM services, the average machine was getting less use in December 1986 than six months earlier.

The reduction in per-machine activity helps explain why annual shipments from ATM manufacturers have declined to about 8,000 units from a peak of 14,000 in 1983.

Speer's data pertain only to interchange volume — the transactions that flow between financial institutions in a given ATM network. But interchange volume is a key measure of success for the ATM industry. At least 80% of ATMs are connected to at least one shared network, and bankers use network affiliations as a selling point with retail customers.

The interchange statistics confirm a broader, downward movement that Linda Fenner Zimmer, an ATM indus-

BankAmerica Nearing Deal With Japanese

Tokyo Group Amenable To $350 Million Offering

Special to the American Banker

TOKYO — After weeks of talks, leading Japanese bankers have agreed in principle to provide troubled BankAmerica Corp. with a capital infusion, industry sources here said.

The agreement to subscribe to $350 million in BankAmerica securities came at a meeting Monday of nine major Japanese banks. Final terms of the deal still must be negotiated.

"As far as the terms are concerned, we have reached a general consensus that they are favorable to us," said one senior banker, who added that the remaining negotiations could drag on for several weeks. The next meeting is scheduled for Tuesday.

The nine banks are Mitsui Bank, Dai-Ichi Kangyo Bank, Fuji Bank, Sumitomo Bank, Mitsubishi Bank, Sanwa Bank, Bank of Tokyo Ltd., the Industrial Bank of Japan, and Yasuda Trust & Banking Co. Mitsui, which has the closest relationship with BankAmerica, coordinates the meetings and negotiations. The bank is expected to be the lead manager for the securities, which will consist of notes and preferred stock.

As they have for several weeks, BankAmerica officials in San Francisco declined to comment on the Tokyo talks.

More troublesome for the Japanese than the issuing terms, bankers said, is the uncertainty over U.S. regulatory rules on subordinated capital notes, which are likely to be redefined shortly.

"We haven't even received the prospectus," said one complaining banker. "I am worried that if we go ahead with

Speer Survey Shows Transactions per ATM Are on the Decline

➡ **Continued from Page 1**

try researcher, has been tracking since 1982.

Between 1982 and 1986, as ATMs in use in the United States nearly doubled to 67,000 from 36,000, transactions per machine fell to about 5,000 per month from 7,200, Mrs. Zimmer said.

Meanwhile, interbank ATM transactions fell at yearend 1986 to 972 per machine per month, down 11.5% from 1,099 at the average network-connected ATM in mid-1986, Speer & Associates said.

The decline was even more pronounced among the eight biggest regional networks, an elite group that includes the Mac system in the Mid-Atlantic states and the Pulse system in the Southwest. The average number of monthly interchange transactions at the top eight shared networks fell 13.5% to 1,514 per machine at Dec. 31, 1986, from 1,750 at June 30, 1986.

To many ATM industry observers, fewer transactions per machine is tantamount to saturation — a chilling notion to teller machine manufacturers, because it suggests the end is near for what seemed a boundless growth market only five years ago.

Profitability at Diebold Inc., the leading U.S. ATM vendor with 40% to 45% of the machines installed, has suffered because of reductions in bank capital expenditures.

Diebold, which experienced a 35% drop in per-share net income during the first quarter of 1987 from a year earlier, is more susceptible to the ATM slowdown than its major competitors, which have more diversified sources of income. Those competitors include International Business Machines Corp., NCR Corp., and the U.S. subsidiaries of the Japanese computer giants Fujitsu Ltd. and Omron Tateisi Electronics Ltd.

Security analysts who follow Diebold take a relatively optimistic view of the company, but not because of any rebound in the traditional, financially related ATM business. Diebold has a good lock on the ATM service and maintenance business, which will be around as long as there are ATMs.

For growth, the company is adapting ATM technology to dispense tickets in train stations and airports, coupons in supermarkets, and videocassettes in convenience stores.

The saturation talk is misplaced, said Robert Mahoney, president of Diebold Inc. in a recent interview. The real cause of the slowdown, he said, is the failure of most financial institutions to do the necessary marketing and promotion of ATMs.

Market research by Diebold and others has shown that about half of all U.S. bank customers have been given ATM cards, but only a third of these have become frequent ATM users. Bankers who have been unable to win more customers over to ATMs call that limit the "33% wall."

Mr. Mahoney said a few exceptions, notably Citibank in New York, have cracked the wall with aggressive marketing and persuasion.

By issuing cards to everyone with a checking account and integrating the cards into the delivery of virtually all retail services, Citibank claims that 80% of its customers use ATMs. Interestingly, Citibank's more than 600 ATMs in the New York market, soon to be expanded to 900, are almost all on branch premises and are not connected to any shared network.

Most of Citibank's local competitors have joined the New York Cash Exchange, which ranks ninth on Speer & Associates' list in interbank ATM volume.

Fear of Helping Competitors

Mrs. Zimmer, who monitors the ATM industry from her home in Marlborough, Conn., also scoffs at the idea of saturation and blames poor bank marketing.

Many banks that belong to shared networks such as NYCE are reluctant to promote the service to the utmost, Mrs. Zimmer said, "because they are afraid that they will help their competitors in the process."

The growing custom of charging fees, typically between 50 cents and $1, when a customer gets cash from another bank's machine is discouraging added volume, she said. And this is the very interchange volume that Speer & Associates is measuring.

"We are talking about bankers who did a great job on the operations and technical side to bring these networks about, but who didn't exert a parallel effort on the marketing side," Mrs. Zimmer said.

"We have a situation where the same number of ATM-using customers are running around as before, but with the growth in networks they have a greater number of available ATMs to choose from.

"I see no reason why we can't get to an average of 10,000 transactions per machine per month," she said. "But the promotions just aren't there. I know some bankers are pleading poverty, that their marketing budgets have been cut back. But there is a lot of room for creativity, and I don't see enough of it."

Richard N. Speer Jr., president of Speer & Associates, called it a case of "over-ATMing" by the financial institutions that belong to the networks included in his company's study. Many are also Speer clients.

At the end of last year, the top 20 networks had 29,960 ATMs among them, up 17% in six months. These machines were handling 37.4 million transactions per month, up only 4% from Speer's first survey.

"Quite simply, ATM installations [attributed to] the addition of new network members, and deployment of new machines by existing members are rising faster than card bases or usage per card," Mr. Speer said.

Growth Anticipated in 1987

Respondents to the yearend 1986 questionnaire projected a 24% increase in interchange transactions for the first six months of 1987, on top of a 9% rise in the machine total. Mr. Speer said those rates of growth could be caused by fewer new ATM installations or by the fact that new network members tend to be smaller banks with relatively few machines.

"If it is the former," Mr. Speer said, "then ATM sharing may finally have slowed the deployment of ATMs with their high fixed costs. Such a trend would lead to increased volume levels and lower transaction costs."

The eight largest shared networks, each with at least 1.9 million transactions per month, outperformed all others in terms of interchange transactions per machine — 1,514, compared with the industry average of 972 — and annualized interchange transactions per debit card — 10.3 versus 7.2.

By contrast, nine smaller networks in the range of 500,000 to 999,999 monthly interchange transactions registered below-average use, 789 transactions per machine and 3.6 per debit card.

Speer & Associates said the big networks have an advantage "in terms of sheer geographical coverage and the greater awareness that larger networks typically create with signage and more intense marketing campaigns."

As in Speer's first survey, the industry leader in ATM interchange transactions was Mac, the five-state, 2,000-machine network operated by Philadelphia National Bank. Its monthly interchange volume of 5.6 million transactions was down from 6.4 million, which topped the June 1986 standings.

Pulse, based in Houston and serving five southwestern states, was second with 3 million monthly interchange transactions but first in total ATMs at 4,353. Pulse edged out the Exchange network in the Pacific Northwest by 17,000 interchange transactions.

The 3 million interchange transactions in Pulse equaled only 18% of that network's total transactions, with intra-institution items included. The comparable percentages for Mac and Exchange were 52% and 53%, respectively.

Mpact Fourth, Honor Fifth

After the top three, which were unchanged from mid-1986, came Mpact, another Texas-based network, at 2.7 million interchanges per month, followed by the Honor System in Florida, with 2.2 million interchanges. Interchange transactions accounted for 33% of Mpact's total volume and 18% of Honor's.

Honor's fifth-place standing did not change. Mpact, owned by MTech Corp., Dallas, was not among the 47 networks that contributed data to the initial 1986 survey, so this is its first appearance on the Speer list.

Fourth in the original survey was the ATM network of Publix Super Markets Inc., Lakeland, Fla. Publix dropped to 11th at yearend with 1.5 million interchange transactions per month.

For the yearend Speer report, 56 of the top 100 networks participated.

Most networks in the top 20 — ranging from Mac with 5.6 million transactions per month down to Service Card System with 700,000 transactions in Kansas, Missouri, and Oklahoma — corresponded to the top 20 in monthly switch volume as published in December by *Bank Network News*, a Chicago-based newsletter. However, the order was quite different.

The *Bank Network News* listing comes from an industry survey that is more complete than Speer's. The switch volume includes both interchange volume and transactions originating at ATMs connected to a network's central hub (rather than to a bank). Some in the latter category were omitted in Speer's calculations.

As a result, the two listings are not directly comparable, though *Bank Network News* also placed Mac at the top. Mpact was second in total switch volume, followed by BayBanks Inc.'s XPress-24 network in New England, Mellon Bank's CashStream in Pennsyvania and surrounding states, and Exchange in the Northwest.

The Speer survey does not include debit card networks such as Interlink in California and the Cactus Switch in Arizona. Although their transaction volumes are worthy of Speer's top 20, they were excluded because they consist entirely of point-of-sale terminals and have no ATMs.

Nineteen of the 56 respondents to the Speer survey supported point-of-sale operations at yearend 1986, most of them just getting started. During the entire year, the 19 networks handled 2.7 million direct debit transactions through almost 22,000 POS terminals. The network switches, however, were driving less than 3,000 terminals, with the remainder operated by financial institutions or retail stores. ■

MCorp Auction-Rate Preferred Stock Fails a Second Time to Attract Buyers

➡ **Continued from Page 2**

ferred stock in 1985, it was a double-A rated company. Since then, MCorp has encountered earnings problems stemming primarily from oil loans. The company's debt rating now stands at B, well below investment grade.

"MCorp's problem was its very steep and unexpected decline in ratings," said Mr. Chambliss, "not the auction-rate preferred instrument."

The failed auctions were not unexpected, said Paul Baeri, a managing director at L.F. Rothschild & Co. Investors had opportunities in several past auctions to divest MCorp's auction-rate preferred shares.

Rising Dividend Was a Red Flag

Mr. Baeri pointed out that the dividend rate on the shares had been rising steadily in recent auctions, a red flag that could warn of a failed auction in the future.

Mr. Baeri added, however, that the failed auctions have caused some underwriters to place higher ceiling rates on new issues, such as 200% of the double-A commercial paper rate.

Also, some issuers have suggested allowing investors to sell their shares back to the issuer in case of a failed auction. This idea, however, might not pass regulatory muster.

The Internal Revenue Service, sources say, would consider any preferred stock with a "put" option to be debt and would therefore remove the 85% dividend tax exclusion it offers investors. This tax preference is a primary reason for investing in the shares and allows issuers to keep rates down.

Investment bankers also believe that the Federal Reserve Board probably would not allow shares to be counted as primary capital if they could be sold back to the issuer precisely when the company was in trouble, which is when an auction would fail. ■

US Has Largest Number of ATMs, But Lead Is Slipping

Japan Closes in with Most Machines per Person; Sweden Tops List in Efficiency

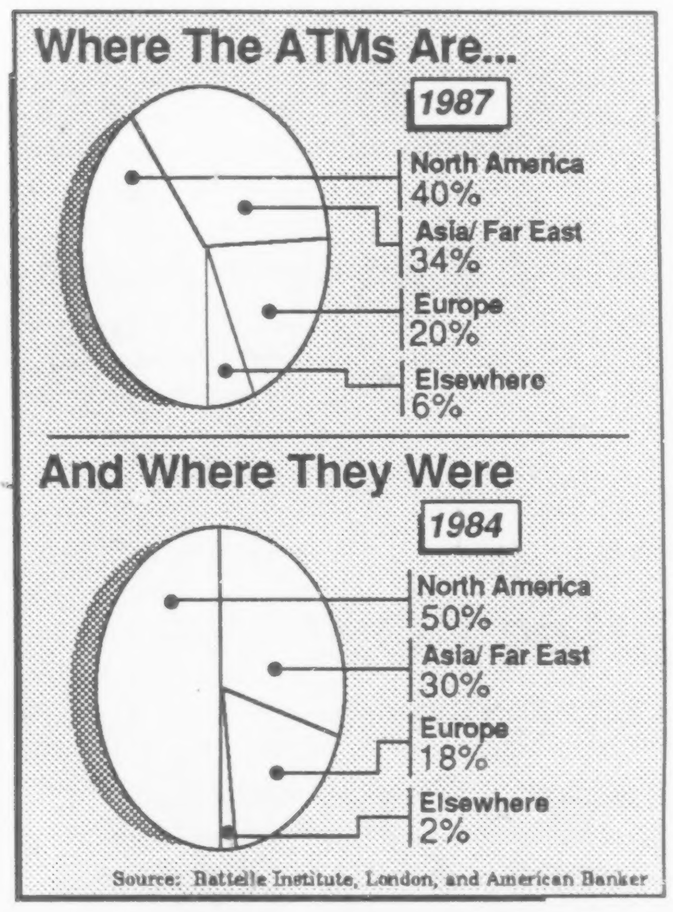
By JEFFREY KUTLER

NEW YORK — Chubb Ltd. and De La Rue Ltd., two British companies, invented automated teller machines in the 1960s, but the United States led the world into massive ATM deployment in the 1970s and early 1980s.

Now that growth has slackened in the U.S. ATM industry, the United States is no longer the dominant force it once was.

As recently as 1984, U.S. financial institutions had installed almost a majority of the world's self-service banking machines. By early 1987, their share had declined to 38%.

ATM growth rates also have fallen in Europe, but not nearly as much. The other pillars of the industrialized world are taking up where the U.S. ATM boom left off, and Japan is closing in on the ATM lead.



Source: Battelle Institute, London, and American Banker

Japan has the most ATMs per citizen. Sweden leads in ATM efficiency, with Canada close behind. Efficiency is measured in terms of transaction volume per machine.

With 67,000 ATMs in place, the United States still leads Japan by 12,000 machines, according to statistics gathered early this year by the Battelle Banking Research Group in London, a part of Battelle Memorial Institute, Columbus, Ohio.

The United States and Japan have the most well-developed ATM networks and the most intricate arrangements for sharing those networks among large numbers of banks. No other country is in the same class.

Britain is third with 10,800 ATMs, and France is fourth with 9,500. Spain, in fifth place, has less than half of France's total.

Europe as a whole, however, accounts for 20% of the 175,000 worldwide ATM installations, compared with 34% in the Japanese-led Far East, 40% in North America, and 6% elsewhere.

Calculating Density

The ATM business varies greatly between countries and continents, and raw numbers of machines do not tell the whole story, said Peter Hirsch, Battelle's London-based research manager.

Recent data gathered by Battelle show Japan leads in machine density — the number of ATMs and cash dispensers per person. (Battelle's statistics include both multiple-function ATMs and single-function cash dispensers.)

Japan's banks have installed 470 machines to serve each one million inhabitants, nearly double the U.S. ratio of one machine per 282 per million people.

"In Europe, the density is at most only about one-third of that found in Japan," Mr. Hirsch said recently. "France and Britain top the list [in Europe], and it can be seen clearly by this measure how far Germany lags behind most other large, developed countries."

West Germany's ATM density of 55 per million is lower than in all major European countries except Italy, which is at 44 per million.

Sweden and Canada excel in the key measure of cash withdrawals per machine per month, at 7,700 and 7,000, respectively. In third place, at 5,000, is the United States. The U.S. number has been declining for several years, but Sweden and Canada demonstrate improvement is possible.

Sweden's success in marketing ATM and cash-dispensing services can be traced back to the late 1960s when its banks shortened their hours and provided 24-hour banking machines to compensate. Now an entire generation of bank customers have become familiar with the country's all-inclusive commercial bank and savings bank networks.

ATM and Cash Dispenser Usage In 11 Industrialized Nations

Country	Number of Machines	Machines per Million People	Cash Withdrawals Per Machine Per Month
United States	**67,000**	282	5,000
Japan	55,000	**470**	NA
Britain	10,800	190	4,200
France	9,500	174	3,100
Spain	4,400	113	2,500
Australia	3,600	237	NA
West Germany	3,400	55	3,900
Canada	3,241	130	7,000
Italy	2,500	44	1,000
Sweden	1,227	147	**7,700**
Belgium	703	71	4,700

Source: Battelle Institute, London, and *American Banker*

Canada began to make major ATM strides only in this decade. Its banks operate about 3,200 ATMs, an 18% gain in a year. Transaction volume has begun to soar over the past two years with the advent of Interac, a nationwide shared ATM network connecting all the major financial institutions.

Canada's single nationwide ATM system is less confusing to consumers than the half-dozen national networks and 200 regional networks being promoted in the United States.

Typical of the Canadian experience is the nation's largest commercial bank, the Royal Bank of Canada, which owns almost 1,300 of the machines. Its average ATM handles 11,939 transactions per month, 60% of them cash withdrawals, said Michael Carle, a spokesman for Royal Bank.

Both Sweden and Canada have populations that are smaller, more socioeconomically homogeneous, and more uniformly educated than in the United States, which may help explain their ability to sell automation.

Sweden, with a land area larger than that of California, has 8.3 million residents, one-third of California's population.

Canada's population of 25 million is about the same as California's. While Canada's is spread across the width of the North American continent, a majority of Canadians live within 100 miles of the U.S. border and have long been accustomed to getting cash in bank branches other than their own.

ATM manufacturing companies find European and North American markets to be very different, Battelle Institute said. Diebold has placed 45% of U.S. ATMs, but it and its marketing partner, Philips NV of the Netherlands, control only 4% of the European market.

IBM Corp., second in the United States with a 21% market share, leads Europe at 27%.

NCR Corp. is second in Europe at 26% and third in the United States at 15%. European-owned vendors such as Olivetti of Italy and Dassault of France have gotten 34% of the business on their own continent and 15% in America. Most of the remaining 3% in the United States, and a similar percentage in Europe, belongs to the Japanese.

It seems universally true that bankers do not know all about managing ATM technology, and that they have made some mistakes.

"Large numbers of machines and networks have proved expensive and uneconomic for banks to operate," said Mr. Hirsch of Battelle. "Even for the most successful networks, the result of operating ATMs is not to make a great profit but to absorb increases in transaction volumes, achieve some worthwhile productivity increases, and make some relatively modest cost savings."■

New Chief of the Cleveland Fed Is True Believer in Free Markets

Special to the American Banker

PITTSBURGH — W. Lee Hoskins, the newly appointed president of the Federal Reserve Bank of Cleveland, puts his faith in free enterprise.

W. Lee Hoskins

Whether it is in setting monetary policy or regulating financial institutions, Mr. Hoskins believes that government's role is a lot less important than many people make it out to be.

"You could identify me as a classical economist, though I might identify myself more as a free-market economist," he said Monday, shortly after his appointment was announced. "I believe you should allow the market to allocate resources."

The Cleveland Fed oversees the Fourth Federal Reserve District, which includes Ohio, western Pennsylvania, the northern panhandle of West Virginia, and eastern Kentucky. It has 1,400 employees, branches in Pittsburgh and Cincinnati, and a check-clearing center in Columbus.

Mr. Hoskins, 46, will assume his duties on Sept. 21, after spending seven years as chief economist at PNC Financial Corp. and its lead bank, Pittsburgh National Bank. He will succeed Karen N. Horn, who resigned in early April to become chairman and chief executive officer of Bank One, Cleveland.

One of Mr. Hoskins' key jobs will be to help set monetary policy as a member of the Federal Open Market Committee. The Cleveland Fed president has served on the committee every other year, rotating with the president of the Chicago Fed.

Mr. Hoskins' name has been mentioned for several government posts in recent years, including a seat on the Federal Reserve Board in 1985. He never pursued any of those opportunities until now.

"For the 17 years of my professional life, I've either been researching monetary policy or reacting to it," he said. "I think it's about time I had a chance to make monetary policy."

Mr. Hoskins' first term on the committee will start in March. He said he is looking forward to serving because of the group's power to influence inflation, a problem that still worries him.

But he also counsels against believing that the committee can have a major impact on the growth of the economy.

"The primary role of the Federal Reserve is to provide stability in the financial system. And that includes price stability," he said.

"The Federal Reserve cannot make for real growth. There are fundamental [economic] factors that do that. We can only affect the price level."

That is also the philosophy Mr. Hoskins expects to see from the new Federal Reserve chairman, Alan Greenspan.

"I see his monetary policy as one of recognizing its limits," Mr. Hoskins said. "It cannot stimulate real growth in the economy forever."

When it comes to bank regulation, Mr. Hoskins sees the free-market system applying on two fronts.

He favors continued deregulation of the banking industry. It is the only way American banks will be able to compete with their counterparts in other countries, he said.

Mr. Hoskins said it is premature to comment on specific changes he would like to see. But he made it clear that he believes government should not have to lead the way.

Asked what his regulatory philosophy is, Mr. Hoskins said: "The general thrust is that bank managers would be responsible for the management of their resources. Regulators should not be telling banks how to use these resources. They should depend on the marketplace to determine that."

Before joining PNC, Mr. Hoskins spent 11 years at the Federal Reserve Bank of Philadelphia. When he left in 1980, he was vice president and director of research. ■

Boston Safe Continues Deposit Boom

Morgan Guaranty Now Ranks 4th

By L. MICHAEL CACACE

NEW YORK — Boston Safe Deposit Trust Co. continues its six-year climb to become one of the nation's top deposit-taking institutions. The bank now ranks as the nation's 25th largest in deposits, after posting the largest nonmerger-related gain in the first half of 1987 by a bank ranked among the top 100.

Sovran Bank, Richmond, Va., scored the second highest gain in deposits among the top 100 banks, to move into 20th place.

Among the nation's 10 largest banks, Morgan Guaranty Trust Co., New York, ended Manufacturers Hanover Trust Co.'s 26-year tenure as the nation's fourth largest commercial bank in deposits.

Five Largest Banks

June 30 deposits (billions of dollars)

1	Citibank	$101.3
2	Bank of America	72.4
3	Chase Manhattan Bank	62.4
4	Morgan Guaranty Trust	47.2
5	Manufacturers Hanover Trust	44.8

And among the top 300 banks in the U.S., the largest nonmerger-related growth was scored by Sears, Roebuck and Co.'s special-purpose bank, Greenwood Trust Co., New Castle, Del.

These are the major findings of the *American Banker's* annual survey of the top 300 banks, published today. The banks are listed in order of their total deposits at June 30, 1987.

Boston Safe Deposit Trust Co.— a special-purpose bank subsidiary of Shearson Lehman Brothers — had $8.99 billion in deposits at June 30, up 31.6% from $6.83 billion at Dec. 31, 1986. The sharp deposit gain enabled the bank to jump 12 places in rank to 25th position at midyear.

According to data from the bank's federal regulatory report of condition, 95% of the deposit growth was centered in two deposit categories — money market deposit accounts and large-denomination certificates of deposits. Money market accounts were up 52.3%, to $3.30 billion at June 30 from $2.17 billion at Dec. 31, 1986. And large CDs rose 26.5% to $4.4 billion at June 30 from $3.5 billion six months earlier.

Among the top 300 banks, Boston Safe Deposit has been the fastest growing over the last six years. From year-end 1981 to midyear 1987, the bank's deposits increased more than 23 times. This sharp rise coincides with the acquisition of the bank's parent, the Boston Co., by Shearson/American Ex-

BIG DEALS

Banking Field Records Biggest Month For Mergers and Acquisitions in July

By GORDON MATTHEWS

NEW YORK — The imminent opening of New Jersey to national reciprocal interstate banking and a quickening pace of banking consolidation in the Midwest helped make July the biggest month so far this year for banking industry mergers and acquisitions.

At nearly $3.4 billion, the aggregate price of deals reported last month was more than twice the total registered during the previous busiest month, February. Measured by price, July accounted for nearly a third of the $9.9 billion of merger activity announced so far this year.

Bankers and industry analysts expect more of such activity in the months ahead. They cite a relative scarcity of desirable acquisition targets within New Jersey and this has spurred fast action. They also note that the Midwest may be on the brink of a major period of banking consolidation.

New Jersey's decision to move from regional to national reciprocity as the basis for interstate banking Jan. 1 — the first northeastern industrial state other than New York to do so — quickly prompted a pair of deals between banks there and in Pennsylvania during July.

In the highest priced banking deal yet seen, First Fidelity Corp., Newark, proposed to acquire Fidelcor Inc., parent of Philadelphia's largest bank, for

Aetna, Northern Offer New Options To Cautious Public

By LYNN BRENNER

NEW YORK — Aetna Life Insurance & Annuity Co. and Northern Trust Co. introduced products Wednesday that are the latest entrants into a competition to appeal to consumers eager to benefit from a soaring stock market, but fearful of losing their principal.

Aetna's product is a new mutual fund investment available, among several other options, to buyers of the company's variable annuities.

The insurer says it will guarantee the annuitant's initial investment in the fund, called Aetna Guaranteed Equity Trust, after a five-year period. Investors who transfer or withdraw their investment from the fund before the five years are up will receive its market value.

Northern Trust Co., meanwhile, announced the Northern Stock Index Account, a savings account with principal guaranteed up to $100,000 by the Federal Deposit Insurance Corp., and earnings linked to stock market performance.

A similar product called the Market Index Investment was introduced by Chase Manhattan Bank early this year. Another similar product was quietly test marketed by Citibank two months ago. Both Chase and Citibank introduced time deposit accounts rather than savings accounts.

Chase, Northern Trust, and Citibank all linked potential earnings of their products to fluctuations in the Standard & Poor's 500 Composite Stock Index, which registers daily per-share prices of 500 common stocks.

Chase shelved the bear-market version of its Market Index Investment last month, after preliminary sales failed to win much response from institutional investors.

"A bear-market product is more difficult to sell, even to sophisticated investors," said J. Terrence Murray, senior vice president of personal financial services at Northern Trust.

Data Sources: American Banker questionnaire and **R.L. Polk & Co., Nashville, Tenn.** The data requested are consolidated— for the bank and its domestic and foreign subsidiaries— and as reported on the federal regulatory Report of Condition, whenever possible. Data may not be comparable with other periods because of mergers, changes in accounting practices, etc. In the case of mergers, the bank— under whose charter the merger took place— is considered the surviving bank. **(a)**— Acquired Long Island Trust Co. NA, Garden City, N.Y., 2/87. **(b)**— Formerly RepublicBank Dallas NA. Changed title after merging InterFirst Bank Dallas NA, 6/87. **(c)**— Acquired 25 affiliated banks on 6/15/87. **(d)**— A subsidiary of Michigan National Corp. Acquired 15 of its parent's affiliated banks, 3/87. **(e)**— Formerly Bank of Virginia. Changed title 3/87. **(f)**— Merged 14 banks and changed title from Citizens & Southern National Bank 1/87. **(g)**— Acquired 5 banks 1/87. **(h)**— Formerly Citibank (New York State) NA, Rochester. Changed charter (from national to state) and location 5/87. **(†)**— Totals for 6/30/86 and 12/31/86 are for the top 100 banks on those respective dates.

Data Sources: American Banker questionnaire and **R.L. Polk & Co., Nashville, Tenn.** The data requested are consolidated— for the bank and its domestic and foreign subsidiaries— and as reported on the federal regulatory Report of Condition, whenever possible. Data may not be comparable with other periods because of mergers, changes in accounting practices, etc. In the case of mergers, the bank— under whose charter the merger took place— is considered the surviving bank. **(a)**— Merged Peconic Bank, Riverhead, under the latter's charter, 3/87. **(b)**— Merged 11 banks 6/87. **(c)**— Acquired 3 banks 3/87. **(d)**— Acquired 5 banks 3/87. **(e)**— ReublicBank Austin merged with InterFirst Bank Austin NA under latter's charter and new title 6/87. **(f)**— Changed title from Banco de Santander-Puerto Rico, 2/87. **(g)**— Changed to state charter 7/87. **(h)**— Merged 6 affiliated banks 3/87. **(i)**— Changed title and charter from Citizens DeKalb Bank, Clarkston, 4/86. Acquired First Georgia Bank, Atlanta, and changed location, 2/87. Acquired Georgia State Bank, Mableton, 5/87. **(†)** — Totals for 6/30/86 and 12/31/86 are for the banks ranked 201-300 on those respective dates and for the top 300 banks on those respective dates.

Boston Safe Deposit Continues Rapid Growth

➻ Continued from Page 1

press in 1981.

Deposits increased 166%, to $377.6 million, in 1981, moving Boston Safe up 547 places in rank to 416th. A 205% deposit gain in 1983, to $1.31 billion, gave Boston Safe a No. 163 ranking. After continued growth in 1984 and 1985, the bank moved up 51 places in rank last year, to No. 37, as deposits increased 127%, to $6.8 billion at Dec. 31.

The bank began offering money market deposit accounts for Shearson/-American Express clients in 1983. That year it also began an expansion of high-net-worth personal loans, including mortgage loans, to the company's trust clients and to potential customers in the New England area.

Since its loan expansion program began, total loans have soared by more than 1,300% from $269 million at June 30, 1984, to $3.9 billion at June 30, 1987. Loans more than doubled last year, to $3.2 billion at Dec. 31, 1986. Over the past six months, loans were up another 20.6%.

Most of the growth was in loans secured by real estate. These loans grew by more than 103% in 1986, to $2.4 billion, and they were up another 26%, to $3.0 billion, at midyear 1987.

Boston Safe again was highly profitable over the first half of 1987, earning $63.7 million. At its current rate, net income for 1987 will be more than 8% higher than the $117.8 million earned in 1986, when the bank ranked as the 34th most profitable banking firm in the country. Over the first half of 1987, the bank's return on average assets, as calculated by *American Banker*, was 1.38%, down from 2.06% for the full year 1986.

Sovran Bank's Gains

Sovran Bank — the lead bank for Sovran Financial Corp., Norfolk, Va. — moved up six places in rank to reach the 20th spot. Sovran's deposits jumped 18%, to $9.86 billion at midyear from $8.35 billion at yearend 1986.

A bank spokesman attributed the gain to three factors: "First, we had sizable growth in core deposits from operating in a good market area. Second, we had an employee incentive program for bringing in new deposits. And third, there was growth in the issuance of large-denomination certificates of deposit, which was part of our asset-liability management program."

Formerly Virginia National Bank, Norfolk, Sovran Bank was formed in December 1983 when the bank merged with First Merchants National Bank, Richmond. At yearend 1983, it had $5.58 billion in deposits to rank as the nation's 32d largest bank. Each year from 1984 to 1986 the bank advanced two places in rank. At yearend 1984, it ranked 30th with $6.25 billion in deposits. At yearend 1985 it ranked 28th with $7.23 billion, and at yearend 1986 it ranked 26th with $8.35 million.

Manufacturers Hanover Trust Co. had a 2.8% decline in deposits over the first half of 1987, to $44.8 billion from $46.1 billion at Dec. 31, to move down one notch in the rankings to fifth position.

Morgan Guaranty Trust Co.'s deposits were up 5.1% in the six-month period, to $47.2 billion. Over the past 20 years, Morgan had ranked as the nation's fifth largest commercial bank in deposits.

Big Growth at Greenwood

From yearend 1986 to midyear 1987, the deposits of Greenwood Trust Co. rose 74%, to $1.82 billion from $1.05 billion, enabling the bank to move up 103 places in rank to 172d position.

Greenwood Trust Co. was acquired by Dean Witter Financial Services Group, another Sears subsidiary, on Feb. 12, 1985. The bank, which is a direct subsidiary of Dean Witter, handles Sears' Discover credit card operations. Greenwood Trust's deposits rose 38 times in 1986, to $1.05 billion from $27.4 million. This growth is attributable to a Discover card option that offers a savings account at Greenwood Trust. In 1986, the average balance on a Greenwood Trust savings account was $13,000, and savings accounts comprised 99% of total deposits.

Special-purpose banks, such as Greenwood and Boston Safe, have a commercial bank charter but make few or no commercial loans. In most cases, the banks are used by their parent companies to handle particular functions, such as credit card operations, and to take advantage of higher usury ceilings and tax benefits.

Other Survey Findings

The *American Banker*, working in conjunction with R.L. Polk & Co., a Nashville-based publisher of banking directories, surveyed the nation's top 1,000 banks in deposits to rank the top 300 banks today. Listed below are some of the more important findings of this survey:

- The Bank of New York, a subsidiary of the Bank of New York Co., posted a 9.1% deposit gain in the first half of 1987, to move from 16th to 15th position, with deposits totaling $16.33 billion, up from $14.97 billion at Dec. 31, 1986. Late last year, the bank's parent acquired the $1.6 billion-deposit Long Island Trust Co., Garden City, N.Y., from Banca Commerciale Italiana, Milan. In February of this year, Long Island Trust was merged into the Bank of New York.

- Many of the top banks in Texas took advantage of that state's new limited branching law to consolidate their operations. The law, which went into effect last Dec. 1, allows up to three new branches within a county for each chartered bank. Also, the current subsidiaries of bank holding companies can be consolidated as branches of one charter in a county.

For example, Texas Commerce Bank, Houston, merged 25 of its parent's affiliated banks on June 15. As a result, the bank's deposits rose 16% from yearend 1986, to $6.5 billion from $5.6 billion, and the bank moved up 11 places in rank to 39th position.

- The largest deposit gain posted by a bank in the top 300 was scored by 40th-ranked Michigan National Bank, Farmington Hills. Its deposits increased 120-fold over the first half of the year to $6.29 billion. The bank, a subsidiary of Michigan National Corp., merged 15 of its parent's affiliated banks, including the $1.9 billion-deposit Michigan National Bank, Detroit, and the $1.4 billion-deposit Michigan National Bank, Lansing.

- Total deposits of the top 300 banks were $1,392 billion at June 30, up 0.2% from $1,388 billion at Dec. 31, but down 2.2% from $1,423 billion at June 30, 1986. ■

Norwest Closes Chicago Office

CHICAGO — Norwest Investment Securities closed its bond trading office here this month and is consolidating the bond underwriting and sales activities into its Minneapolis headquarters. A spokesman for the unit of Norwest Financial Corp. said the closing in "no way should be construed as a slowdown of business." ■

First Eastern Corp. Agrees to Acquire Municipal Firm

By A. JOSEPH NEWMAN JR.

WILKES-BARRE, Pa. — The $1.7 billion-asset First Eastern Corp., parent of First Eastern Bank here, announced on Wednesday that it has agreed in principle to acquire Dolphin & Bradbury Inc., a Philadelphia-based municipal bond firm, for $3.4 million in stock.

Subject to definitive documentation and Federal Reserve approval, First Eastern would exchange about 100,000 shares of stock, with a current market value of about $34 a share, for all the stock of Dolphin & Bradbury. The bond firm is owned by its three principals, John L. Dolphin, Robert J. Bradbury, and Stephen R. Moynahan.

The investment firm managed or comanaged 65 Pennsylvania tax-exempt issues, with a par value of $480 million, in 1986. Revenues totaled $4.6 million.

Edward L. Vergari, an executive vice president at First Eastern, said about 90% of Dolphin & Bradbury's offerings, since they are general obligation bonds, are eligible for underwriting by commercial banks and bank holding companies. Mr. Vergari said that as a First Eastern subsidiary, the firm would have to stop underwriting some municipal revenue bonds, but could act as an agent in their sale.

William K. Mainwaring, president of First Eastern Bank, said the acquisition, which is expected to be completed late this year, would complement First Eastern's Capital Markets Group. In addition to other retail and institutional activities, the group managed or comanaged $210 million in par value of tax-exempts in 1985 and $50 million in 1986.

Mr. Dolphin, president of Dolphin & Bradbury, said the First Eastern affiliation would bring additional resources to the firm and help broaden its services and market area.

First Eastern's pending merger with $70 million-asset Liberty Bancorp of Carbondale, parent of Liberty Discount and Savings Bank there, would bring the number of First Eastern branches to 45 in six counties of northeast Pennsylvania. It is expected to be completed in October. ■

sions these companies must make, Mr. Weiant said, just like the decision to bolster reserves in the second quarter or to cut back on international banking businesses. "If you're restructuring your business for the 1990s, you have to do it," he said.

Citicorp's shares sold early Wednesday for 62⅝ after opening the day at 62. News of the stock offering late Tuesday forced the price of the shares down overnight after they closed trading at 65⅝.

The sale of 17 million shares, based on recent market prices, would add about $1 billion to Citicorp's common and total equity. This is less than half the $2.7 billion decline that occurred in Citicorp's common stockholders' equity after the second quarter loss provision. Citicorp also estimated that the new shares would dilute its earnings per share in 1988 by about 7%.

Citicorp approved a 100% common stock dividend, equivalent to a 2-for-1 stock split, to take effect after the new stock offering is completed. Citicorp will also allow underwriters of the new stock offering to purchase up to an additional 15% of the offering to cover overallotments.

Citicorp said proceeds from its common stock offering will strengthen its

Fed May Speed Date for Check Hold Rule

Strict Limits May Take Effect Before September 1990

By BARBARA A. REHM
Washington Bureau

WASHINGTON — The Federal Reserve Board may move up the date when banks and thrifts must begin processing local checks in one day and nonlocal checks in four days, according to a Fed official.

the Banking Bill
what's ahead

Depository institutions, under the Competitive Equality Banking Act signed by President Reagan on Aug. 10, must meet these check-clearing timetables by Sept. 1, 1990. A temporary schedule in force from Sept. 1, 1988, through the 1990 kick-in date, allows banks and thrifts a maximum of two days to make funds available for local checks and six days for nonlocal checks.

But the Fed hopes to oblige a request from Congress by asking the central bank to implement the permanent schedule as quickly as possible, Elliott C. McEntee, associate director of the Fed's bank operations division, said in an interview.

"We certainly see some advantage in accelerating the schedule, and we're going to look at it seriously," he said.

Currently, there is no federal law on how quickly banks and thrifts must make checking deposits available for withdrawal. Banks and thrifts claim that without some technological breakthrough or major changes in the check processing system, they will be making money available to customers before the institution is sure the check is good.

Under the new law:

- Depository institutions will be required to make funds available the following business day for cash deposits and wire transfers, government checks, checks deposited in one branch of an institution and drawn from another branch, certified checks, teller's checks, and cashier's checks.
- Banks and thrifts must make available the first $100 of any deposit for cash withdrawal at the opening of business the day following deposit; the next $400 of the deposit must be available no later than 5 p.m. the next day, and the bal-

Analysts Foresee Unfriendly Trend in Mergers

By RICHARD RINGER
Midwest Bureau

CHICAGO — Midwest bankers no longer can count on friendly bank mergers, according to analysts.

While mutually negotiated acquisitions remain preferable for bankers — and are, by far, the most prevalent — a number of analysts say unfriendly and unsolicited takeovers will become more common.

Regulatory hurdles to hostile takeovers are no longer perceived to be as insurmountable as they once were, the analysts say. Moreover, commercial bankers, faced with slow loan demand and increased competition from nonbanks, are now more willing to attempt unfriendly takeovers.

An indication of the changing environment is that bank consultants and law firms with banking practices are offering advice and preparing reports on how to complete or, if need be, ward off hostile takeovers.

"You will see [hostile] takeover attempts," said Joseph Stieven, a banking analyst with Stifel, Nicolaus & Co. Inc., St. Louis. "People were naive if they thought unfriendly deals wouldn't happen."

One such attempt was originated last October by Exchange International Corp., with assets at the time of $1.5 billion. The parent of Exchange National Bank, Chicago's fifth largest bank, made an uninvited tender offer for the $163 million-asset Madison Financial Corp. A. Andrew Boemi, chairman and chief executive officer of Madison, called Exchange's $35-per-share unsolicited offer a raid and set out to defeat it. Madison operates three banks in downtown and suburban Chicago.

Moody's Downgrades Ratings On Debt of 4 Japanese Banks

By JOHN P. FORDE

NEW YORK — Citing the effects of deregulation in the Japanese financial system, Moody's Investors Service downgraded its investment opinion on the debt of four Japanese banks.

Moody's changed the debt ratings for Bank of Tokyo, Long-Term Credit Bank of Japan, Mitsubishi Trust and Banking Corp., and Sanwa Bank.

The rating agency said on Tuesday that the downgrades reflect its view that "a broad set of emerging risks — associated with changes occurring in the Japanese financial system — will have a modestly unfavorable impact on the banks' credit quality."

U.S. securities issuers might feel repercussions from Moody's decision. Japanese banks have become major players in "structured finance" deals, which include the Japanese banks' issuance of letters of credit to back up U.S. securities issues.

Moody's placed the banks' ratings under review in June. Donald E. Noe, a vice president and associate director at Moody's, said expectations that the ratings would be downgraded had a negative effect on the market for structured finance transactions "until investors realized there wouldn't be a free-fall in the ratings."

In fact, the downgrades could be good for market development. "Over time, the ratings will contribute to some pricing efficiencies," Mr. Noe said in a phone interview on Tuesday.

Market Might Expand Further

The variety of ratings, and the differences in pricing among them, could cause "deepening in a market which was huge to begin with." He said, for example, that domestic banks with less than an Aaa rating on their own debt are issuing letters of credit to back securities issues.

Moody's downgraded the long-term debt ratings and ratings for long-term deposits of Bank of Tokyo from Aa1 to Aa2; for the Long-Term Credit Bank, from Aaa to Aa2; for Mitsubishi, from Aaa to Aa1; and for Sanwa Bank, from Aaa to Aa1. The banks' ratings on all structured finance issues, including obligations backed by letters of credit from these banks, were also downgraded.

The rating on medium-term notes of Sanwa Business Credit Corp., a wholly owned subsidiary of Sanwa Bank, was also reduced, from Aaa to Aa1. The four banks' ratings for short-term deposit obligations — all Prime-1 — and Sanwa Business' Prime-1 rating for commercial paper, were not placed under review and are unchanged.

Moody's also confirmed its Aaa ratings for four Japanese banks — Fuji Bank, Mitsubishi Bank, the Norinchukin Bank, and Sumitomo Bank — and its Aa2 rating for Tokai Bank.

Moody's said these confirmations "recognized the banks' relative ability to adjust to shifting pressures resulting from deregulation of the Japanese financial system."

3 Banks Under Review

Moody's is reviewing for possible downgrade the long-term debt ratings and the ratings for long-term deposit obligations of three more Aaa-rated institutions: Dai-Ichi Kangyo Bank, the Industrial Bank of Japan, Sumitomo Trust and Banking Co., as well as Mitsui Trust and Banking Co., which is rated Aa1. The review will also include the ratings on all structured finance issues, including obligations backed by letters of credit from these banks. The four banks' ratings for short-term deposit obligations, all Prime-1, are not being reviewed.

The reasons for the changes in ratings for Japanese banks, such as the increasing risk attendant in new businesses being entered by the institutions, are similar to those cited by Moody's in a major review of the ratings of U.S. banks earlier this year.

Moody's said intensifying competition in Bank of Tokyo's core international wholesale banking franchise, and the potential for erosion of this franchise through the continued development of globalized capital markets, was the major reason behind its downgrade of the company's long-term debt.

Also, the rating agency believes the bank does not have a broad domestic network that would help it compete with its peers in some domestic financial sectors that are likely to be growth areas in the future.

The rating agency believes Mitsubishi Trust "will continue to be a significant participant in the financial services sector." However, Moody's predicted that intensifying competition will reduce the disproportionate share of the profits in this market that the trust banks currently enjoy.

Mitsubishi's domestic branch network is smaller than the networks of Japanese city banks, a fact that may hold it back from getting a significant share of the small and medium-size corporate and consumer markets. Also, Moody's said, Mitsubishi will face greater than average risk because of its expansion into international financial markets and its greater involvement with securities business.

Like Mitsubishi, the Long Term Credit Bank has a smaller domestic branch network than the major Japanese city banks. This will slow the institution's penetration into the retail and middle markets, although its relatively low cost structure affords opportunities for its transformation into a provider of broadly based financial services.■

Corrections

An article on Aug. 21 ("Chase Names Boyle to Head Global Bank," page 2) incorrectly reported the new position of Richard J. Boyle. He is vice chairman and global bank executive at Chase Manhattan Corp. Frank Terracciano, whom Mr. Boyle replaced, left Chase to become president of Mellon Bank Corp., Pittsburgh. His new position was incorrectly reported.

□

An article on Aug. 21 ("Consultants Who Help Banks Collect," page 3) misstated the name of a consulting firm, Schaer Associates Inc. Its founder is Alfred E. Schaer.

□

A table on Aug. 14 ("International ATM Interchanges, page 15) should have qualified the listing of American Express Co.'s Express Cash network as the largest automated teller machine interchange in the world. More than 6,000 of the network's 23,795 ATMs are available only to cardholders in Japan. Therefore, except for Japanese cardholders, the Express Cash network is smaller than the Visa network of 19,203 machines. Also, the table did not include 37 ATMs in Japan that have been connected to the Plus System through the Bank of Hawaii.

□

An article on Aug. 11 ("MasterCard Bets on Charity as a Way to Get to Customers," page 6) omitted the name of one organization participating in MasterCard's cause-related marketing campaign this fall. It is the American Heart Association, Dallas. ■

INTERNATIONAL BRIEFING

Chase's Relationships in Japan May Be Foundation for Expansion

TOKYO — Chase Manhattan is one of the best-known foreign banks here. After four decades in this country, Chase has built a network of relationships that encompasses most major financial institutions and corporations.

Maintaining relationships is very important to Chase as it completes the restructuring of its Tokyo operations. Led by capital market specialist Robert Binney, Chase is distancing itself from a history of commercial banking.

With operations centered on private placements, swaps, trust banking, leveraged leasing, and the underwriting of Euromarket issues, Chase is increasing fee-based income while moving into new frontiers such as securities trading and mergers and acquisitions.

"Chase has more relationships than any other foreign bank in Japan, and that's key when you are trying to launch new products in this marketplace," said Mr. Binney, Tokyo general manager of Chase Manhattan Bank. "We don't have to sell ourselves — they already know who we are. Our job is to sell products that aren't normally associated with Chase."

Perhaps the biggest step Chase has taken in its quest for greater market share is the establishment of a securities representative office in Tokyo. Though many European banks in Japan have achieved universal banking status — meaning they can deal in securities — no U.S. bank has been able to enter the market without going in through the back door. Chase was no exception.

To date, only two other U.S. banks have managed to enter that market: Citicorp, by purchasing Vickers da Costa, and Security Pacific, with Hoare Govett providing the beachhead.

How Chase Created Securities Operation

Ever since Japanese regulators allowed Vickers da Costa to continue Tokyo operations after Citicorp purchased it in 1984, Chase has wanted a Japanese securities operation. To fulfill that goal, the bank bought the London-based broker Laurie, Milbank & Co., renaming it Chase Manhattan Securities.

Prior to the purchase of Laurie Milbank, Chase had been refused entrance to the securities market many times by the Japanese Ministry of Finance. Under the new setup, Chase received regulatory approval to create LM Securities, a Channel Islands subsidiary 50% owned by Chase and 50% by private individuals.

"Chase can now perform exactly the same functions that the powerful and wealthy Japanese brokers perform," said Mr. Binney. "We finally managed to work around Article 65 [the Japanese version of the Glass-Steagall Act] to receive a license to trade and distribute debt and equities in Japan. That puts us in limited company. The next step for LM Securities is to secure a seat on the Tokyo Stock Exchange."

Competition for domestic securities business in Japan is fierce, but Chase believes it has potential for huge growth and profits. Brokers such as Nomura, Daiwa, Yamaichi, and Nikko have taken advantage of high commission structures to be among the most profitable financial concerns in the world. Though the Japanese have tended to capture foreign market share by cutting spreads, Chase will try to attract business by offering superior service.

Valuable Licenses

With its new securities operation in the works, Chase has three valuable licenses under its belt. Besides commercial banking and securities, Chase has a much desired trust banking license. No Japanese institution has all of these licenses, and only four foreign banks have the same capability. By connecting these three areas, Chase will build its future Japanese operation.

Entering the lucrative pension fund management business was a coup for Chase. Only eight other foreign banks are licensed to manage Japanese corporate liquidity and pension accounts. With average annual growth of 15% — which industry officials say is likely to continue — pension funds under management would rise from $140 billion to more than $600 billion by the turn of the century. Of new money coming under management, about $80 billion will be managed in foreign markets.

With a securities operation in place to boost its trust banking operation, gaining management responsibility for even a small share of this multibillion-dollar business would increase profits substantially. "Trust banking is a natural adjunct to our securities business," said Mr. Binney. "Judging from the reported profitability of the top four securities houses and the big eight trust banks, fund management may not be as profitable as securities trading, but there is a lot of business floating around out there."

Commercial Banking Still Important

Though Chase is busy setting up new trust headquarters and recruiting staff, the bank has not given up on segments of the commercial banking market. Yet, this sector has changed considerably from the days when the bank lent money to cash-starved Japanese corporations.

Now, Chase has to deal with corporate treasurers that are used to having their way in any of the globe's major capital markets.

The Chase commercial banking strategy is to add fee income to the books without putting more assets on the balance sheet. Acting as arranger rather than principal, the bank is de-emphasizing loan business in favor of the middleman position on major deals.

This capital market activity includes acting as lead or colead manager for Japanese issues, arranging the two sides of a private placement by using the bank's worldwide network, putting together currency and interest rate swaps, and arranging leveraged leases in which the equity stays in Japan, while the debt may be placed elsewhere.

Travelers Check Industry Rebounds

Surge in Tourism Provides Boost but Growth Remains Slow

By MICHAEL A. ROBINSON

Karl Malden was preparing for a weekend trip to San Diego recently, but he didn't want to leave the Los Angeles area without running one important errand. He had to go to the bank and buy $500 worth of travelers checks.

"It's true," says the true believer spokesman for American Express Co.'s Travelers Cheques. Mr. Malden never strays far from home without carrying some of the products he has been pushing for the past 15 years.

"If you take cash, it is so easy to lose it. Or if someone takes your wallet, they can take out the cash and throw the wallet away," explains Mr. Malden. "But it's just a little harder to get rid of a travelers check."

Pickpockets and purse snatchers are not the only ones who sometimes find it difficult to dispose of travelers checks. Last year, the $40 billion industry stagnated as Americans, concerned about terrorism and the fallout from the Chernobyl nuclear accident, stayed closer to home and purchased fewer travelers checks.

Now, with the crucial summer selling season drawing to a close on Labor Day, the industry seems to be rebounding. It has been fueled by a recovery in overseas travel and an influx of foreign visitors who are taking advantage of the weak dollar.

"We have seen an upswing in the travelers check market," says Vincent La Paglia, vice president director of paper products at Visa U.S.A. Inc., San

An American Banker Special Report

Employee Stock Plans Playing A Bigger Role in Buyout Deals

By DAVID NEUSTADT

Second in a Series

NEW YORK — In the last few months, employee stock ownership plans have finally hit the corporate finance big time.

ESOPs, which until now have played a minor role in the leveraged buyout movement, are part of two multibillion-dollar deals — the $2 billion sale of Avis Inc. by Wesray Capital Corp., and the $1.9 billion sale of 104 hospitals by the Hospital Corporation of America to HealthTrust Inc.

The ESOP Boom

There are likely to be more such transactions. The Air Line Pilots Association, the union representing pilots at United Airlines, has proposed a $5 billion ESOP-financed buyout of 80% of the airline. A group of railroad employee unions has hired Drexel Burnham Lambert to help work on a plan to buy Southern Pacific Railroad from Santa Fe Southern Pacific Corp.

Drexel, the investment banker in the Hospital Corp. deal, and Goldman, Sachs & Co. say they plan to get more involved in transactions involving employee stock ownership plans.

ESOPs have been used to buy companies before, but in most cases they were small, closely held companies. These deals were driven by the tax benefits to the seller; taxes on the profits from the sale of stock to an ESOP can be deferred if the money is invested in other stocks and bonds. And when an estate sells to a stock ownership plan, 50% of the profits are tax exempt.

The new, large deals are driven by the tax advantages for the buyer — the ESOP. Employee stock ownership plans can borrow at a lower rate because lenders get a 50% tax deduction on interest income.

Payments of both principal and interest on stock ownership plan loans are tax deductible, as are dividends paid on shares held by an ESOP trust that have not yet been allocated to employees. Also, the usual limits on using net operating-loss carryforwards when a company changes hands don't apply if an ESOP purchases at least 50% of a company. In addition, employees sometimes make concessions in return for their stake in the company, and often improve productivity when they see themselves as owners.

The net result is that a stock ownership plan leveraged buyout will have a better cash flow, so an ESOP can afford to pay more than other potential buyers.

Despite that fact, until now most leveraged buyout firms have avoided using stock ownership plans for two reasons: They didn't want to share the equity, from which they get 35% to 45% or better annual returns, and they were afraid that the U.S. Department of Labor might block deals, as it did in one case involving an ESOP and other investors.

"The tax benefits from an ESOP are not enough to override the loss from sharing equity," says Jay Ahstrom, a vice president at First Boston Corp.

"The return on a straight leveraged buyout is higher than one with an ESOP, but the risk is also higher," says Malon Wilkus of American Capital Strategies, Bethesda, Md., an investment bank that is raising a $75 million fund to help unions put equity into ESOP-leveraged buyouts.

"If interest rates go up or there are other problems, the worker-owners are more likely to make changes to help solve problems than in a standard leveraged buyout," Mr. Wilkus says, "and that reduces the risk of default on the debt and reduces the risk for all investors."

Missouri Banks To Offer Advice, Underwrite Bonds

Special to the American Banker

ST. LOUIS — Missouri's state-chartered banks will get sweeping securities powers, including authorization to offer investment advice and underwrite corporate bonds, under a regulation announced Tuesday by the state Division of Finance.

But the banks cannot jump in until March 1, because of a moratorium imposed by Congress. "The moratorium will delay implementation of these powers, but we wanted to move forward to allow banks to plan for the future," said Thomas B. Fitzsimmons, the Missouri banking commissioner.

The state regulation goes beyond the categories of new business — also delayed by the moratorium — that the Federal Reserve Board has authorized

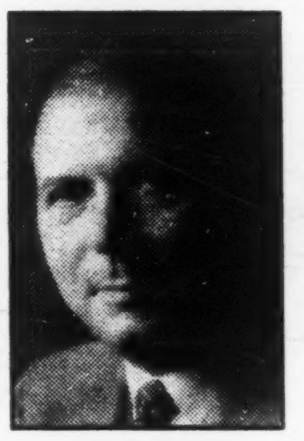
Strong Tourism Buoys Travelers Check Industry

➳ Continued from Page 1

Mateo, Calif. "It has increased as the travel market rebounded from last year's slump. All indications are this will be a good year for travelers check sales."



We have seen an upswing in the travelers check market. It has increased as the travel market rebounded from last year's slump. All indications are this will be a good year for travelers check sales.

— Vincent La Paglia
Vice President, Director of Paper Products
Visa U.S.A. Inc.

Despite the rebound in which sales are expected to rise by 5% to 10% this year, the industry as a whole faces the continued prospect of modest annual growth in both volume and profits, analysts and company executives say.

As a result, travelers check companies rely heavily on marketing, promotional gimmicks, and a steady stream of product enhancements as they scramble to snag domestic market share and step up the drive for overseas sales.

Number of Issuers Drops

Until 1980, only six major competitors shared the market. But the industry swelled with companies entering the field as interest rates soared in the early 1980s. At one point, the U.S. had nearly 40 issuers, but that number has dropped back to five major companies and a handful of smaller issuers, now that interest rates are once again stable and the value of float has diminished.

Last year, two major issuers admitted defeat and left the market altogether. Chase Manhattan Corp. sold its travelers check operations to Barclays Bank PLC, London; RepublicBank Corp., Dallas, turned its business over to BankAmerica Corp.

"People find it is not an easy business in which to make money," says Gordon M. de Lang, vice president worldwide marketing at BA Cheque Corp., a BankAmerica subsidiary. "When interest rates were high, people thought travelers checks provided a great funding opportunity. Now we have seen a shakeout."

The industry is divided into two main camps, firms that issue travelers checks and those that sell them. Issuers make money on float by investing the proceeds of travelers check sales until the consumers cash in the checks.

Sellers earn their money by charging consumers a commission, typically 1% of the value of the checks. Some high-volume sellers also share in part of the float from issuers.

Lower interest rates have reduced the value of float and made cost control a driving factor in the travelers check business, says T.R. Mock, BA Cheque's chief operating officer. Despite tough competition and a soft market, BA Cheque officials say, last year was the most profitable in the company's 60-year history. This was largely because the firm has cut costs by 20% in the last two years.

"The only way you can make money in this business is to be a low-cost provider of products and services," says Mr. Mock.

In July, BA Cheque unveiled several enhancements of its BankAmerica, MasterCard, and Visa checks. The improvements include free use of a travel information hotline and toll-free international telephone service for emergency refunds overseas.

The company also offered an optional travel protection and insurance plan called the WorldMoney SafeTravel Network, which cost $8.50 for 45 days of coverage. Services include embassy and consular referrals, passport replacement assistance, accidental death insurance, and emergency messages.

BankAmerica's announcement came just three weeks after American Express unwrapped new gift checks, which it will spend some $4 million to promote during the Christmas shopping season. American Express gift checks will be printed in $25, $50, and $100 denominations and will be sold through financial institutions that handle the company's travelers checks and all U.S. offices of American Express Travelers Services.

Although Visa and BankAmerica executives have dismissed the gift checks as little more than marketing razzle-dazzle surrounding what they call an old product, American Express officials say they expect to open a new niche.

"We are excited about the gift check," says Tom Cash, senior vice president for marketing at American Express travelers check division. "We think it will have a major impact in the marketplace. There is a $45 billion market in monetary gifts counting checks, cash, and gift certificates. That's not a small market."

Mr. Cash's enthusiasm for gift checks underscores American Express' upbeat outlook for the industry and the company's dominant position. American Express says travelers check sales in 1986 broke records worldwide, with total sales climbing 6.4% to $17.1 billion. Average checks outstanding climbed 12% to $3.3 billion.

The company says it took about $1 billion in business away from competitors each year from 1984 through 1986. Last year, American Express shifted its marketing theme to tell consumers to protect their vacation by buying its travelers checks rather than taking cash.

"If you look at travelers checks as a product, then the competition for travelers checks is cash," says Mr. Cash. "The growth of credit cards really has not had much of an impact on the travelers check market. People still take an awful lot of cash with them when they go on trips."

That provides travelers check companies with a prime marketing opportunity. Issuers, particularly American Express, frequently promote the safety and security of carrying traveler's checks instead of money.

If travelers checks are lost or stolen, advertisements frequently claim, they can be quickly replaced around the world. Although peace of mind may be important for people who have saved for a dream vacation, statistics show few customers lose their checks or have them stolen. Visa says only 0.3% of all customers file claims for checks.

Consider Mr. Malden, who as the spokesman for American Express has become the personification of its product. As an actor, Mr. Malden travels extensively, and he says he has never lost a travelers check or had one stolen.

"Now wouldn't that be terrible if I did?" he says.

But American Express won't have an easy time gaining market share. Both Visa and MasterCard have been in the market less than a decade but have become much tougher competitors, expanding their business at the expense of American Express. Together, they account for nearly a third of industry sales, observers say.

For instance, Visa entered the market in 1979 and within four years had total sales of $6.2 billion. But the company failed to live up to its own expectations. It had forecast sales of $8 billion by 1984, but two years later sales had reached only $7.5 billion.

Visa officials expect to get a major boost from their affiliation with the 1988 Olympic Games. The company spent millions to become an official sponsor of the games and in turn received the exclusive, worldwide rights to say its products are the official card, travelers check, and travel voucher of the Winter and Summer Games.

The company is releasing checks with Olympic rings in the center and expects to sell $10 million of them in the next year. The affiliation will be "very, very good for sales," says Visa's Mr. La Paglia.

But H. Spencer Nilson, publisher of *The Nilson Report,* an industry newsletter based in Santa Monica, Calif., says he doesn't think Visa's affiliation with the Olympics will help it take additional business from American Express.

"I don't think the Olympics will change it all that much," says Mr. Nilson. "Visa is already becoming well known. But it will take a long time before any body approaches American Express' dominant position."

BankAmerica's Mr. de Lang says that with the domestic market essentially saturated, his company is leaning more heavily on overseas sales, which account for nearly 60% of industry volume. Of particular interest is the Far East, which is experiencing a travel boom. Many countries there are relaxing foreign exchange restrictions.

Issuers often earn more money on overseas sales, says Mr. de Lang. That's because the longer the checks remain uncashed, the longer the issuer earns interest on the float. International travelers tend to hold onto their travelers checks longer, he says, which increases profit per unit.

"Perhaps there has been a bit of a decline in the United States," says Mr. de Lang, "but it has been offset by an increase overseas.

"Many people for a number of years have been predicting the demise of travelers checks. We haven't seen a lot of growth, but we haven't seen a lot of decline either. It is basically a stable business." ■

Longevity of Ad Role a Surprise to Malden

I spent 20 years in Los Angeles doing film. Now in the last 10 years I have become a commercial actor. I do commercials.

— Karl Malden

Even though he was a veteran of Broadway plays and Hollywood movies, Karl Malden says he was unprepared for what was to become the longest-running role of his celebrated career.

At a time when he was best known for the police series "The Streets of San Francisco," Mr. Malden performed in his first television commercial for American Express travelers checks.

"To be honest with you, I thought I was going to do it for a year and that was going to be the end of it," Mr. Malden recalls. "Here it is 15 years later. I am very comfortable doing what I am doing."

Mr. Malden began his professional acting career in 1938 with a supporting role in the play "Golden Boy." In 1951 he won an Oscar for "A Streetcar Named Desire." He also won an Emmy for the television production "Fatal Vision." But now he is best known as the spokesman for American Express.

"I spent 20 years in New York doing the theater," Mr. Malden says. "I spent 20 years in Los Angeles doing film. Now in the last 10 years I have become a commercial actor. I do commercials."

Mr. Malden says he isn't bitter that his acting roles have been overshadowed by the television commercials in which he delivers the famous line: "American Express travelers checks: Don't leave home without them."

"You come into people's homes two or three times a week and they think you are the establishment," he says. "I only advertise the travelers checks but people come up to me and say, 'I have my gold card, have you got your gold card?' I've been doing it so long I have become the voice of American Express."

And a particularly effective voice as well. In 1976, Mr. Malden became the first winner of *Advertising Age* magazine's Star Presenter of the Year award. He has received offers to represent other products but has declined, even though he does not have an exclusivity agreement with American Express.

Even in a casual conversation, Mr. Malden seems adept at delivering the American Express message. In a recent telephone interview with the *American Banker,* Mr. Malden turned the table on the reporter by demanding to know which brand of travelers check the reporter carries.

"Tell me the truth now," he demanded in a tone that Lieut. Mike Stone might have used to pry information out of a suspect on "The Streets of San Francisco."

"Karl Malden does a very good job as a spokesman for that company," says Vincent La Paglia, vice president and director of paper products at Visa U.S.A., San Mateo, Calif. "American Express is a good marketing company."

Mr. Malden says he doesn't own any stock in the company but faithfully uses its travelers checks on personal trips and when on location for motion pictures and television movies.

"It is the only one I use," he says. "I am honest about that."

Insurance Agents Will Market Thrift's Home Equity Accounts

By LYNN BRENNER

NEW YORK — Empire of America Federal Savings Bank will provide a home equity line of credit to Mutual Life Insurance Co. of New York, whose 5,000 agents will distribute the private-label product, the thrift announced Wednesday.

The agreement is a novel departure from typical joint ventures between banks and insurance companies. In most cases, the bank distributes the insurer's product in return for fee or commission income.

Buffalo-based Empire will pay Mutual Life, known as MONY, for marketing the home equity line of credit, called HELOC. The thrift's payments will be based on the amount of money customers actually borrow and how long the loan is on the thrift's books, said Joseph N. Pastwik, senior vice president of Empire.

"It must be on our books as a receivable for a certain amount of time before the contractual agreement kicks in," he said.

The credit line will be marketed by the insurer's captive agency force and by two of its subsidiaries, Atlanta-based Financial Services Corp., and Indianapolis-based Unified Management Co., said Richard Dunn, vice president of MONY Financial Services.

An American Banker Special Report

Lenders See ESOP Financing as Entry Into World of Investment Banking

By DAVID NEUSTADT

Third in a Series

NEW YORK — Lending to employee stock ownership plans is one of the few areas of commercial finance still dominated by banks. Bankers are trying to keep it that way by aggressively marketing ESOP loans, and by coming up with new products, such as securitized loans.

Congress lured banks into the market in 1984 by making the interest income on ESOP loans 50% tax exempt. Then in 1986, tax reform eliminated many other tax-advantaged investments, while making employee stock plans more attractive to both issuers and lenders.

The ESOP Boom

Most bankers active in ESOP lending say they became involved after the 1984 legislation. But they say that the tax incentives are not the only reason, or even the most important one. They see ESOP lending as a way to develop investment banking-type skills at a time when they are still subject to Glass-Steagall restrictions.

"We got involved because of the potential for growth and because of the complexity," says Kenneth Winslow, a Chemical Bank vice president. "The tax-exempt aspect has an appeal, but it is not as appealing as some of the learning we could be doing. For example, an ESOP is one of the few instruments we are involved in that of necessity has an equity component."

Cirrus Sale Could Propel Debit Cards

MasterCard Will Control Largest ATM Network

By YVETTE D. KANTROW

NEW YORK — MasterCard International's long-awaited agreement to purchase Cirrus Systems Inc., which was announced Thursday, could spur more growth in the debit card industry, particularly in the point-of-sale arena.

"MasterCard's other activities in POS will carry over to Cirrus, and it's very logical that it will lead to some sort of POS product development for Cirrus members," said William T. Sandalls, chairman of Cirrus, the nation's largest shared automated teller machine network.

"It's a very promising collaboration from the point of view that POS becomes a more viable service to offer consumers," he added. Mr. Sandalls is also vice chairman of BayBanks Inc., Boston, one of the ATM network's six owner-banks.

MasterCard and Cirrus agreed not to disclose the purchase price, and neither company's officials would confirm reports of a $38 million pricetag. Cirrus is owned by BayBanks; Bank of Montreal; First Interstate Bancorp, Los

Thrift Deposit Growth Outpaced Assets in First Half

More S&Ls Convert To Stock Form

By KENNETH J. HICKS

NEW YORK — Assets continued to grow at a substantially higher rate than deposits at thrift institutions in the first half of 1987.

Conversions and consolidation of the industry continued, as 13 more of the top 100 thrifts converted to stock ownership.

These are among the findings of the *American Banker's* midyear update of the top 100 thrift institutions in the United States, ranked by deposits. Also included in today's issue is a listing of the top 10 thrifts by deposits, showing deposit and asset growth since yearend 1986.

Deposit and Asset Growth at Top Thrifts

June 30 compared with Dec. 31, 1986 ($ billions)

	Deposits		Assets	
	6/30/87	12/31/86	6/30/87	12/31/86
1 Home Savings of America	$21.3	$21.8	$27.7	$27.8
2 Great Western Bank	18.3	18.1	28.3	27.4
3 American Savings & Loan	17.4	17.0	33.9	33.9
4 California Federal Savings & Loan	15.0	15.5	21.4	20.5
5 Meritor Savings Bank	12.8	12.7	20.2	18.4
6 Glendale Federal Savings & Loan	12.8	12.7	18.1	17.5
7 Goldome	10.8	11.0	14.7	14.7
8 First Nationwide Bank	10.5	11.1	15.4	15.0
9 Great American First Savings Bank	9.1	8.9	13.7	13.1
10 Home Federal Savings & Loan	9.1	8.6	12.8	12.1
Totals for Top 10	**$137.1**	**$137.4**	**$206.2**	**$200.4**
Percentage Change	**(−0.2%)**		**(+2.9%)**	

Conversion Approvals

Including supervisory conversions

1987 (Jan.-Aug.)	88
1986	113
1985	64
1984	105
1983	101
1982	34
Coversions since 1982	505
Conversions since 1975	627

For the top 100 thrift institutions, assets increased 6.4% from yearend 1986, to $644.2 billion. Deposits, on the other hand, were up a modest 2.9%, to $434.2 billion. At all institutions insured by the Federal Savings and Loan Insurance Corp., deposits increased 0.8% from yearend, to $897.9 billion. Assets were up 3.5%, to $1.2 trillion.

"A large number of institutions are finding it more cost effective to borrow funds" than to increase their deposit base, said Michael Wilson, vice president and associate director of research for the U.S. League of Savings Associations. "Interest expenses are more favorable for borrowings."

The FSLIC's assessments on thrifts also have put a damper on deposit growth, Mr. Wilson said. He pointed out that the FSLIC assessments amount to approximately "20 basis points for each dollar in deposits."

Advances from Bank Board

Federal Home Loan Bank advances and other borrowings by all thrifts climbed 16.0% to $228.3 billion at midyear. At yearend 1986, they totaled $196.9 billion.

Net new deposits — net deposits received, less deposits withdrawn — for the first six months of 1987 at all thrift institutions fell $15.5 billion. In the first half of 1986, net new deposits fell $1.8 billion.

Spurred by the strength of the stock markets, more thrift institutions have been converting from mutual to stock ownership. Lawrence J. White, a member of the Federal Home Loan Bank Board, expects conversions to continue at the same rate.

In the first half of 1987, the Bank Board issued 73 approvals for thrift institutions to convert to stock ownership. That compares with 28 conversion approvals in the first half of 1986. In the 12 months ended June 30, 1987, the Bank Board approved 158 conversions.

"At some point it [thrift conversions] has to slacken off," Mr. White said, "but for the next couple of years it should continue at a similar pace . . . It just makes a lot of sense for some of these mutual institutions to convert to stock."

The $10.8 billion-deposit Goldome, of Buffalo, formerly the largest mutual savings bank, changed its charter last month to become a state-chartered stock savings bank. Now, Peoples Bank, Bridgeport, Conn., is the largest mutual savings bank, with $4.6 billion in deposits as of June 30, an increase of 14.1% from a year ago.

That ranked the savings bank 25th in today's listing. The largest mutual savings and loan is First Federal Savings & Loan Association of Rochester, in New York. First Federal reported deposits of $3.1 billion to rank 46th. The thrift's deposits were off 4.3% from June 30 of last year.

Of the top 100 thrifts, there are 9 mutual savings banks, 33 stock savings banks, 11 mutual savings and loans, and 47 stock savings and loans. At the same time last year, 67 of the top 100 were stock institutions, compared with the 80 listed above.

Consolidation is a trend apparent throughout the financial services industry. At midyear 1987, the number of operating thrifts stood at 3,507, down from 3,533 at yearend and 3,576 at midyear 1986. Mr. Wilson and Mr. White say the consolidation is due to general economic conditions, acquisition of insolvent thrifts, increased competition, and technological improvements.

"Improved telecommunications and computerization allow thrifts to reach a larger market area," Mr. White said. "Thirty or even ten years ago the market area for each thrift was small and they didn't really compete with each other." This allowed many small thrifts to exist, serving limited market areas.

"I would say that it is likely that there will be under 3,000 thrifts," Mr. White said. But he could not say when.

Other Survey Findings

- The thrift that gained the most places from yearend was Far West Federal Bank, Portland, Ore. Its deposits increased more than 60%, to $2.4 billion. Far West jumped 64 places to rank 67th.

Leaping 54 spots to 45th place was Commercial Federal Savings & Loan Association, Omaha. Its deposits soared to $3.2 billion from $1.8 billion, an increase of 74.9%. Commercial Federal acquired the $2 billion-asset Empire Savings Building & Loan, Denver, on April 30 of this year.

Citicorp Savings, San Francisco, had the third largest gain in rank, jumping 24 spots, to 23d. Citicorp Savings, whose deposits increased 58.3%, to $4.9 billion, acquired 50 Sears Savings Bank branches in Southern California and now has 143 locations in that state.

- The thrifts with the highest net-worth-to-assets ratio in the top 100 were the two Citicorp-owned thrifts, Citicorp Savings of Illinois, Chicago, at 30.94%, and Citicorp Savings in San Francisco, 13.57%. These two thrifts were followed by Lincoln Savings & Loan Association, Irvine, Calif., with 9.84%; Rochester Community Savings Bank, of Rochester, N.Y., 9.31%; and Capitol Federal Savings & Loan Association, Topeka, Kan., 8.87%.

- The institutions with the lowest net worth ratios were Sunbelt Savings Assocation of Texas, Dallas, with −3.18%; Guaranty Federal Savings & Loan Assocation, Galveston, Tex., 0.42%; American Savings & Loan Association, Stockton, Calif., 1.13%; Horizon Financial FA, Southampton, Pa., 1.63%; and Lincoln Savings Bank FSB, New York, 1.64%. ■

CREDIT LINES

Investment Banking Angle Helps NCNB Net $40 Million Loan

By JOHN P. FORDE

NEW YORK — Ask investment bankers at major banks what they think of the commercial side of their institutions, and they will probably say that traditional commercial bank customers are ripe sources of new business.

These investment bankers have learned that corporate customers of their institutions often need fee-producing services such as private placements of securities.

However, bankers are also finding out that the flow of business can go the other way. Such was the case with an acquisition initiated by NCNB Investment Banking Co., Charlotte, N.C.

According to David C. Vorhoff, a vice president in the merger and acquisition group of NCNB, his firm was hired to assist in finding a potential buyer for Waccamaw Retail Group Inc. of Myrtle Beach, S.C. Waccamaw is a specialty merchandiser of housewares and home-decor items with 11 stores.

NCNB found Georgetown Industries Inc., a manufacturer of wire and reinforcement bars, right in the bank's home town of Charlotte. Georgetown wanted to diversify by entering a business not quite as susceptible as its existing lines to the cycles of the steel industry.

NCNB initiated the acquisition and served as financial adviser to Waccamaw. Mr. Vorhoff said the deal was one of many that the company has put together. He said the merger and acquisition group, which includes six professionals, put together about a dozen deals in 1986 and it is presently working on about 15 more.

While the sale was going through, Mr. Vorhoff said, Georgetown asked NCNB if it could help with financing needs of the new unit. Waccamaw, a retail company that deals frequently with overseas manufacturers, had a need for items such as letters of credit and seasonal credit lines.

AN American Banker WEEKLY FEATURE

According to Mr. Vorhoff, the business was referred to NCNB Corp.'s corporate side, which, after performing a credit review, agreed to assist Georgetown with its credit needs. The financing package did not include takeover financing, as Georgetown completed the deal using its own funds.

Roger R. Regelbrugge, president and chief executive officer of Georgetown, said the company's continuing credit needs were met by a $40 million loan agreement, which would allow Waccamaw to meet its short-term financing needs. Waccamaw had already been banking with NCNB, but the new form of the company demanded a new loan agreement.

The facility was meant to smooth the transfer of indebtedness from Waccamaw to its new parent company, he said in a phone interview Thursday. The agreement will take care of Waccamaw's needs through its busy Christmas season, after which Mr. Regelbrugge expects the pact to be renegotiated some time in the spring of 1988. He does not plan for the entire agreement to be drawn down.

Mr. Vorhoff was careful to point out that the commercial banking business was not the major reason that NCNB took on the Waccamaw investment banking job. "It was certainly at arm's length," he said, "but clearly our involvement didn't hurt their chances of getting the business."

☐

Other commercial financing business announced this week:

International Lease Finance Corp., Beverly Hills, Calif., signed a series of operating-lease agreements this week with nine U.S. and international airlines involving 22 jet aircraft, with a combined contract value of more than $1 billion. Operating leases are short-term agreements that leave the leasing company with an asset of high residual value after the leases expire.

☐

Tesoro Petroleum Corp., San Antonio, has entered into a new secured two-year $150 million revolving credit agreement with a consortium of banks, for which Manufacturers Hanover Trust Co., New York, acted as agent. The new agreement includes $30 million outstanding under an insurance company surety bond and $98.5 million in new bank credit, which is currently committed. ■

First City Recapitalized in FDIC Bailout

Agency, Investor Group Led by Abboud Rescue Texas Firm

By ROBERT TRIGAUX
Washington Bureau

WASHINGTON — Backed by nearly $1 billion in federal assistance and a $500 million new stock offering, an investor group led by former Chicago banker A. Robert Abboud has won control of troubled First City Bancorporation of Texas, it was announced Wednesday.

The bailout of the Houston banking firm by the Federal Deposit Insurance Corp. is second in size only to the FDIC's $4.5 billion 1984 rescue of Continental Illinois National Bank and Trust Co. of Chicago. First City is a $12 billion-asset institution with 62 banking subsidiaries.

On Wednesday, announcements of the takeover of First City were made simultaneously in Washington, by the FDIC, and in Houston, by First City and Mr. Abboud. The deal remains subject to shareholder approval, which is expected before Thanksgiving.

FDIC Chairman L. William Seidman on Wednesday said that if the FDIC had let First City fail and the agency had to liquidate its bank subsidiaries, it would have cost the FDIC up to $1.8 billion. The firm's lead bank, First City National Bank, Houston, with $2.8 billion in deposits as of June 30, was close to failing, according to the FDIC.

"This action was taken because it represents the lowest-cost alternative

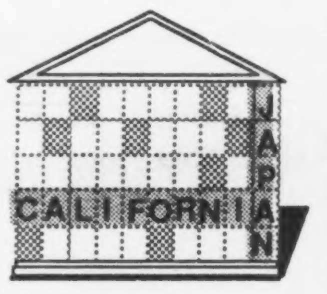
An American Banker Special Report

Japanese Banks Tackle California Middle Market

By ROBERT LUKE
First in a Series

LOS ANGELES — Japanese banks, having established a beachhead in California, now are mounting a full-scale attack on American competitors in the richest banking market in the United States.

From a negligible share a decade ago, Japanese-owned banks now command an estimated 12% to 13% of the California market.



"Within 5 to 10 years, Japanese banks will account for about 25% of [commercial bank] assets in the state," said Tsutomu Itoh, president of the Kyowa Bank of California and general manager of the Kyowa Bank Ltd.'s agency in Los Angeles.

"As many as three Japanese banks will be in the top five," he said. Currently, 4 of the top 10 are Japanese.

Mr. Itoh said much of the gain will come at the expense of California's four giant domestic banks, which now hold an estimated two-thirds of commercial bank assets in the state. They are Bank of America, First Interstate Bank of California, Security Pacific National Bank, and Wells Fargo Bank.

California has the largest economy in the United States and the sixth largest in the world. With 12% of the nation's population, the state commanded 15.9% of the nation's commercial bank and thrift assets in 1985.

Japanese funds are pouring into the state, not only in real estate and manufacturing investments, but in banking as well. The Sanwa Bank Ltd., for example, nearly quadrupled its California branch network last year with one acquisition — the $3 billion-asset California subsidiary of Lloyds Bank PLC.

"The Japanese have more interest in acquiring California banks than any other group of banks," said Gerry Findley, a banking consultant in Brea, Calif. "They are willing to pay a reasonable premium."

Japanese Banks Pursue Middle Market in California

➻ Continued from Page 1

Last year, Japanese bank assets in the Golden State jumped nearly 32% to $67.1 billion, including $44.2 billion housed in 23 agencies or branches and $22.9 billion in nine California bank subsidiaries.

The subsidiaries are California First Bank, which is owned by the Bank of Tokyo Ltd.; Sanwa Bank California, owned by the Sanwa Bank Ltd., Osaka; the Bank of California and the Mitsubishi Bank of California, owned by the Mitsubishi Bank Ltd., Tokyo; the Sumitomo Bank of California, owned by the Sumitomo Bank Ltd., Osaka; Mitsui Manufacturers Bank, owned by the Mitsui Bank Ltd., Tokyo; Tokai Bank of California, owned by the Tokai Bank Ltd., Nagoya; Dai-Ichi Kangyo Bank of California, owned by the Dai-Ichi Bank Ltd., Tokyo; and Kyowa Bank of California, owned by the Kyowa Bank Ltd., Tokyo.

> Japanese banks offer higher rates for deposits and lower rates on consumer loans.

Although American bankers say they don't underestimate the Japanese, many believe the Japanese don't offer much competition in the mother lodes of the California market — retail banking and the corporate middle market.

"The Japanese have not been real competitors," said Carl E. Reichardt, Wells Fargo's chairman and chief executive officer, in an October meeting with security analysts in San Francisco. "The only place we see them on anything like a recurring basis is in major corporate credits, particularly public utilities and municipalities. The spreads on this business are razor thin. And they're doing us a great favor by taking this stuff out of the market.

Kyowa's Mr. Itoh agreed that the Japanese haven't been that competitive, but added, "I think that will change."

Once content to serve a largely Japanese clientele with nearly invisible spreads between funding costs and loan rates, Japanese banks in California now are cultivating the overall American market.

The reasons are economic.

With 23 Japanese banks serving some 1,000 Japanese firms in the state, the market "certainly is overbanked," said Atsuo Hasegawa, president of the Tokai Bank of California and general manager of the Tokai Bank Ltd.'s agency in Los Angeles.

Stressing Returns from Subsidiaries

Moreover, bulking up on low-margin assets doesn't make sense if Japanese banks with overseas operations need to boost their capital ratios to 6% by 1991, analysts said. Current Japanese ratios are estimated at less than 2.7%.

As a result, "the parents are putting more emphasis on ROAs [return on assets] of subsidiaries," said Junji Hatano, executive vice president and chief operating officer of the Bank of California. "They didn't have specific expectations of ROAs before."

"There may be a little more pressure for earnings today than in the past," said Leonard Weil, retired president and chief executive officer of Mitsui Manufacturers Bank. "When the dollar was appreciating, it didn't really matter very much whether they were making any profit or not because they were gaining in the appreciation of the dollar. Now, it is much more important that they make some earnings."

Usually conservative Japanese bankers, however, express unease about tapping the riskier American middle market with the discount pricing they used in recent years to dominate the public finance market. Last year, Japanese banks, largely through agencies in the United States, issued $18 billion in letters of credit to underwrite municipal securities — or about 50% of the market.

California's Japanese-Owned Banks

Source: The Findley Reports, Brea, Calif.

"Profitability comes first, not market share," said Seishichi Itoh, president and chief executive officer of California First Bank. "However, I have to tell you, profitability has something to do with market share. It sounds contradictory, but if you want to enjoy the benefits of scale, you have to have market share in order to make money."

To increase market share, Japanese banks often price loans 25 to 50 basis points lower than their domestic California competitors, according to Kyowa's Mr. Itoh. He added, however, that the short-term cost of such aggressive pricing eventually can lead to more profitable long-term relationships.

He pointed to a Kyowa customer, an American electronics importer, that picked the bank to finance its employee stock ownership plan. Such loans can command 200 to 300 basis points over the prime rate, he said.

Undercutting the Competition

To attract retail customers, Japanese banks also offer higher rates for deposits and lower rates on consumer loans, such as those for automobiles and

Fed Proposes Rate Caps for Some Home Loans

➻ Continued from Page 3

problem: forced early repayment of a loan.

Without the caps, Mr. Angell's argument goes, a lender could raise the loan rate as interest rates in the economy increased. But with caps, the lender runs the risk of charging less for a loan than the prevailing interest rate.

Lenders are not going to turn their backs on their best customers and won't be terminating loans at will, said Craig Ulrich, general counsel at the Consumers Bankers Association.

"These are important customers, responsible family persons," he said, "about the absolute last group these financial institutions would want to Mickey Mouse around with."

Some banks won't reserve the right to call a loan if interest rates exceed the cap because they don't want to discourage customers, but other lenders will, Mr. Ulrich said.

Elena Hanggi, president of the Association of Community Organizations for Reform Now, or Acorn, commended Mr. Angell's stance, but said more consumer protection is necessary.

"I'm not sure I see enough consumer protection under Angell's proposal," she said in a phone interview. "We need to know what those conditions for a call-in would be." Ms. Hanggi stressed that she had not seen Mr. Angell's proposal.

The disclosure proposal does not establish a maximum interest rate, but merely states that "any adjustable-rate mortgage loan originated by a creditor shall include a limitation on the maximum interest rate that may apply during the term of the mortgage loan." ■

Gargalli Named Chief Executive at Equimark Corp.

➻ Continued from Page 2

Her management style, she said, will be the same: "You have to know which direction you're going in and be able to clearly communicate that to others. Make sure you let people know your expectations and whether their performance measures up.

"Do a lot of listening, and develop a team approach," she continued. "This is not a one-person business. You can't sit back and just tell others what to do; you've got to get in there and do it, too.

"And you've got to be tough when necessary — it's not the nicest part of the business, but it's as important as any other." ■

BACKPAGE

Looking for Gold in California

BANKCAL
THE BANK OF CALIFORNIA

Osamu Yamada
Chairman, President and CEO

Assets: $4.2 billion
Owner: The Mitsubishi Bank Ltd., Tokyo
Strategy: Wants to add five to 10 branches to current 22 in high-density, economic-growth areas. Emphasis on trust, private banking and corporate middle-market business. Retail banking an adjunct to those businesses.

Sanwa Bank
California

Yukihiro Fujiwara
President and CEO

Assets: $5 billion
Owner: The Sanwa Bank Ltd., Osaka
Strategy: The state's seventh-largest bank, also active in the retail and corporate middle-market, wants to double in size in five years. Last year's acquisition of Lloyds Bank California boosted branch network to 113 from 29.

CALIFORNIA FIRST BANK
1ST
Member FDIC

Seishichi Itoh
President and CEO

Assets: $6.1 billion
Owner: 77% owned by Bank of Tokyo Ltd.
Strategy: The state's sixth-largest bank wants to expand its retail and corporate middle-market business. Emphasis on technology driven products and services. Wants to boost branch network to 200 from 135 currently by 1990.

Sumitomo Bank
Sumitomo Bank of California
Member FDIC

Teruhisa Shimizu
President and CEO

Assets: $3.4 billion
Owner: 85% owned by The Sumitomo Bank Ltd., Osaka
Strategy: The bank models itself after Wells Fargo Bank. As a result, it concentrates on real-estate and middle-market lending. Beefing up sales orientation. Wants to build trust business; and add 10 branches to current 45.

TOKAI BANK
OF CALIFORNIA

Atsuo Hasegawa
President and *CEO*

Assets: $1 billion
Owner: Tokai Bank Ltd., Nagoya
Strategy: Seeking to grow internally, with emphasis on developing corporate finance, rather than of retail banking, business. Active in auto dealer financing. Wants more real-estate, corporate middle-market business.

Mitsui Manufacturers Bank

Yutaro Hayashi
President, CEO

Assets: $1.8 billion
Owner: The Mitsui Bank Ltd., Tokyo
Strategy: Rebounding from losses in 1986, the bank is seeking to reduce its reliance on real estate loans. Focus is on developing the corporate middle market, particularly hi-tech; and national and multinational accounts.

MBC
THE MITSUBISHI BANK OF CALIFORNIA

Yutaka Hasegawa
President, Chairman

Assets: $1.4 billion
Owner: The Mitsubishi Bank Ltd., Tokyo
Strategy: About 60% of loans are commercial real estate loans. Seeking to diversify with consumer installment loans and asset-based financing, among others. Prefers acquiring smaller banks to avoid duplicating branches.

DKB DAI-ICHI KANGYO BANK
OF CALIFORNIA

Hisao Kobayashi
President, Chairman

Assets: $250 million
Owner: The Dai-Ichi Kangyo Bank Ltd., Tokyo
Strategy: Virtually all of bank's functions are geared to serving customers of DKB's expanding agency, which has assets of $6 billion. Parent mulling possibility of expanding bank, or may leave it as adjunct of agency.

THE KYOWA BANK
OF CALIFORNIA

Tsutomu Itoh
President

Assets: $100 million
Owner: The Dai-Ichi Kangyo Bank Ltd., Tokyo
Strategy: Largely functions as adjunct of Kyowa's agency, which has $1.6 billion in assets. Majority of customers Japanese or Japanese-American. Seeks to develop real estate, middle-market business. Considering trust business.

Japanese Attempt to Broaden Base in Richest Banking Market

➸ Continued from Page 22

boats.

"Our auto loan rates are the lowest of all the larger banks," said Ronald Nakayama, vice president and deputy manger of loan administration at Sumitomo Bank of California.

Japanese bankers in California are confident they can capture a bigger share of the market with the help of talented American bankers, who frequently are assigned to develop relationships in the corporate middle market. To attract and retain talented personnel, Japanese banks are giving Americans more decision-making authority, particularly in subsidiaries.

"Advancement is not as limited as in a branch," said Mr. Hatano of the Bank of California.

An example of the use of a subsidiary as a vehicle for growth is the Tokai Bank of California, whose assets nearly doubled in 1986 to $1 billion, largely because of more than $500 million in auto dealer financing handled through a subsidiary headed by an American and staffed entirely by Americans.

Still, Japanese banks here seem more comfortable with transaction-oriented, rather than relationship-oriented, businesses. For example, most are keen on developing real estate loans.

"It's probably easier to get," Mr. Hatano said. "It's more transaction oriented. You don't have to have a long-term relationship. When it comes to big deals, you have to go to Tokyo for approval. Because of continuing appreciation of land prices in Japan, real estate deals are more favorably acted on."

Nevertheless, the Japanese are cautious.

"In real estate deals, for example, they tend to want a participant in the deal that is clearly knowledgeable," and that inevitably means an American bank, said Jim Grayson, an attorney with Morrison & Foerster in Los Angeles who works with Japanese banks.

"We want to pick and choose our markets," said Mr. Nakayama of Sumitomo Bank. "We don't want to concentrate on hotels and motels all the time."

That caution extends to commercial loans.

"When collateral is available for even commercial-type of loans, we like to have it backed by real estate," Mr. Nakayama said.

As a result, loan losses are low, compared with American-owned banks. For example, Sumitomo's net loan loss as a percent of beginning loans was 0.5% in 1986, according to Mr. Findley, the banking consultant.

"There is nothing magic about it," said Sumitomo's Mr. Nakayama. "You stick to the basics of good credit control, and you know your customers real well."

Mr. Weil, the former Mitsui executive, concluded: "Japanese banks will continue to increase in market share in California, whether it be by acquisition or internal growth. They will do it at the expense of less efficient operators."

Next: Sumitomo Bank of California focuses on improving profit margins and maintaining its Japanese heritage.

An American Banker Special Report

Sumitomo Bank of California Finds Niche in Asian Community

By MICHAEL A. ROBINSON

Second in a Series

CALIFORNIA
JAPAN

SAN FRANCISCO — Though less widely known — and perhaps less feared — than their counterparts in the auto industry, Japanese banking executives have earned a reputation for placing greater emphasis on growth and market share than on profits.

Of the four major Japanese banks in California, three are in the midst of major expansion drives designed to solidify their power in the Golden State. In addition, those same three banks also push their image as "American" companies rather than marketing themselves as subsidiaries of giant Japanese banks.

But Teruhisa Shimizu, the outgoing president and chief executive of Sumitomo Bank of California, is happily out of step with his competitors at the Bank of California, California First Bank, and Sanwa Bank California.

His bank, a unit of Sumitomo Bank Ltd. founded in 1953 as a state-chartered bank, is the smallest of the group and is concerned with improving profit margins and maintaining its Japanese heritage. The Osaka-based parent company, which owns 86% of the bank, announced this week that Mr. Shimizu will return to the head office in Japan. He will be replaced by Keizo Yoshida,

A VIEW FROM OUTSIDE

MARTIN MAYER

Seidman's Brave New World

IN my book, "The Fate of the Dollar," published eight years ago, I noted that one of the reasons the United States had done such a bad job in managing the exchange value of its currency was a confusion of roles in Washington.

From Eisenhower's time, the secretary of the Treasury (whose central task is to fund the government at the lowest price) assumed the role of safeguarding the currency — or, in the case of Michael Blumenthal, deliberately not safeguarding it.

Meanwhile the chairman of the Fed (to which Congress has delegated its exclusive constitutional responsibility for coining money) became instead the instigator of macroeconomic policy, looking at the presumed results wrought in the real economy by putative changes in the money supply, rather than at money itself.

Under Carter the undersecretary of state for economic affairs in the State Department, which is by nature the protector of stable relations with foreign countries, was an economist with a long history of advocacy of floating rates.

All the arguments, in other words, were made ineffectively because they came from quarters that should have been arguing other positions. Comparisons are possible with the Iran-Contra disaster, when, as the Tower Commission stressed, the people whose job it was to protect the President instead helped him climb out on a

Bailout Revives Controversy Over FDIC Role

St Germain Will Review Decision to Block Failure

By ROBERT TRIGAUX and DAVID LAGESSE

After committing nearly $1 billion to the bailout of the $12 billion-asset First City Bancorporation of Texas, the Federal Deposit Insurance Corp. is bracing for criticism that it again has endorsed a policy that large U.S. banks will not be permitted to fail.

The agency's chairman, L. William Seidman, denies this is an accepted policy.

A storm of protest arose in 1984 after the FDIC committed $4.5 billion to rescue the $33.6 billion-asset Continental Illinois National Bank and Trust Company of Chicago. The FDIC expects to lose $1.7 billion on the Continental deal.

Banks with assets of $10 million or less have been bailed out in similar fashion, Mr. Seidman said, when such actions prove less costly to the FDIC than paying off depositors or selling a closed bank. To further justify the FDIC action, he said First City of Houston will be taken over by a private investor group, unlike Continental.

Nevertheless, the First City deal is the second largest bank bailout by the U.S. government. It causes industry observers to question if smaller banks are being grouped in the category of "too large to fail."

At least one critic, House Banking Committee Chairman Fernand St Germain, D-R.I., wants proof from the agency that First City's new operators, led by former First Chicago Corp. chairman A. Robert Abboud, have not been handed a sweetheart deal.

Next week, FDIC staff members will go to Capitol Hill to explain details of

Slower Gains Seen in Executive Compensation

By JEFFREY MARSHALL

New York

POORER PERFORMANCE by publicly held thrifts last year was the chief reason for a lower average gain in top executives' compensation, according to a California consulting firm.

The average cash compensation — salary plus annual bonus — given to the five top officers at 220 public thrifts rose 7% in 1986. That was several notches above the inflation rate but just half of the 14% average gain in 1985, according to the study by MCS Associates, a management consulting firm based in Newport Beach, Calif. MCS conducted a similar survey last year.

Jon Rosenbaum, an MCS associate who oversaw the survey, said performance of the top publicly held thrifts fell off last year "largely due to an accumulation of bad assets. And since so many of these individual executives derive much of their compensation from incentive awards, this decline reflects badly on the companies' financial fortunes."

Mr. Rosenbaum said the percentage gains at the public thrifts still outpaced those given to Fortune 500 executives, but by a narrower margin than in 1985.

The survey, which divided the thrifts in five peer groups by asset size, found the single highest paid executive in four of the five groups was paid less than last year — in one case, 43% less.

Cash Compensation of Top Thrift Executives

1986 average for top two executives, by company assets

	Under $200 million	$200 million-$500 million	$500 million-$1 billion	$1 billion-$2.5 billion	More than $2.5 billion
Highest-paid	$96,213	$136,128	$179,153	$260,548	$520,975
Second highest-paid	72,763	94,346	113,110	169,497	302,523

Source: MCS Associates

Only in the $500 million-$999 million group did the highest paid executive make more than in 1985.

Of the 220 thrifts, 8% paid their top executive more than $500,000 in 1986, the same percentage as in 1985. Three companies paid the top person more than $1 million. Thirty-two percent paid the chief executive more than $250,000, down slightly from the year earlier.

Material for the MCS survey came from proxy statements, with additional information in some cases coming directly from the institutions.

More thrifts are tying executive compensation to company performance, a trend Mr. Rosenbaum called "a healthy change." Use of discretionary annual plans — compensation plans not based on profits or business objectives — dropped from 11% to 4% of all public thrifts between 1985 and 1986, while profit-related plans rose from 13% to 17% in the same period, MCS reported.

While thrifts take some cues from what peers pay executives, Mr. Rosenbaum says a more important determinant may be the company's philosophy or business plan.

"If a thrift is heavily involved in mortgage banking, you may find that the chief lending officer is paid a lot more than one at a more traditional thrift," he said.

More reporting thrifts are providing employment contracts for top executives, the study found. "That trend is slowing, but it's still significant," Mr. Rosenbaum said. "For thrifts that have converted, it's a different management ball game. The downside of conversion is that executives realize they must serve a different master" — the stockholder.

The increase in the survey base, from 160 companies last year to 220 this year, is largely a function of the rise in conversions, Mr. Rosenbaum said, though improved data collection also played a part.

Other Findings

- Incentive plans are in place at 96% of the surveyed thrifts. Long-term plans are in place at 88% of those surveyed, up 6% from 1985, compared with 56% for annual plans. Forty-nine percent had a combination of the two.
- Almost a third of annual incentive plans are based on just one major element, such as profitability, peer comparison, or business plan objectives. Combination annual plans were used by just 26% of all reporting thrifts, but by almost half (47%) of those with assets above $2.5 billion.
- Defined benefit plans, the foundation of most retirement programs, are used by 82% of reporting thrifts, up 4% from 1985. Also increasing in popularity were 401(k) salary-reduction plans, up 6% from 1985, and employee stock ownership plans, up 5%. ■

> The percentage gains at the public thrifts still outpaced those given to Fortune 500 executives, but by a narrower margin than in 1985.

United Savings of America Adds to Its Network

➸ Continued from Page 6

branch is $17,000, compared with $6,000 at United Savings' regular branch. The deposit base at the 23 K mart branches is $50 million, with each store bringing in about $250,000 a month in new deposits.

"We seem to be doing about what the California K marts are doing," Mr. Voss said. "A lot of people don't admit to shopping at K mart, but about 50% of the country walks through a K mart once a month."

Branches in the K mart stores are staffed with one employee and have an automated teller machine for customers to make deposits or withdrawals. United Savings is hoping to attract customers by introducing some novel products, such as its mortgage prequalification program.

By feeding some basic financial information into a personal computer, a customer will receive a plastic card describing what size mortgage he can get. The consumer then can take the card to a realtor. United Savings plans to begin offering the service Jan. 1.

When United Savings first outlined its regional, consumer-oriented strategy several years ago, the competition for the consumer market was not as fierce, Mr. Voss said. But now a number of Chicago-area banks and savings and loans also have stepped up their efforts. And while United Savings said it wants to attract Middle America consumers, Mr. Voss said it must be more specific about who it goes after and must alter its marketing thrust accordingly.

"You can't be a plain vanilla anything today," he said. "You have to segment the markets."

In its fourth quarter, which ended June 30, United Savings earned $1.8 million, up substantially from $412,449 in the period last year. Mr. Voss also said the quality of earnings is better, with a larger percentage coming from operating earnings rather than the sale of assets.

The improvements partly reflect efficiencies gained through consolidation, he said.

Net worth remains well above regulatory requirements, at about $53 million, or 5.1% of total liabilities. And Mr. Voss expects net worth to climb to about 5.5% of total liabilities by June 30, 1988. ■

Bethune Resigns As Thrift President

Special to the American Banker

LITTLE ROCK, Ark. — Ed Bethune, a former member of the House Banking Committee, has resigned as president of the $1.7 billion First Federal of Arkansas, the state's largest savings and loan association, to return to private law practice.

Mr. Bethune's resignation comes six months after he took the job and a month after First Federal, based in Little Rock, reported $60.5 million in second-quarter losses, primarily from energy loans.

Mr. Bethune served in the House from 1978 to 1983.

He also was chairman of the Federal Home Loan Bank of Little Rock from 1973 to 1977, when the headquarters of the Ninth District bank was moved to Dallas.

His is the second resignation of a top executive in as many months. Jim Coles, First Federal vice chairman and also a former president of the Federal Home Loan Bank of Little Rock, announced his resignation in August. Mr. Coles, who is scheduled to leave his post at the end of this month, said it had been his goal for a decade to retire at age 55 and return to his native California.

M.R. Godwin, chairman and chief executive officer of First Federal, expressed regret at Mr. Bethune's resignation and noted that he will continue as a member of the thrift's board of directors.

Mr. Bethune said he plans to be actively involved as a board member. "However, private law practice is my first love and it suits me better than corporate work," he said.

Mr. Bethune is also chairman of the Republican Party in Arkansas. ■

Offering Date Set For Bond Issue To Rescue FSLIC

By JIM McTAGUE
Washington Bureau

WASHINGTON — The first block of bonds designed to raise money for the insolvent Federal Savings and Loan Insurance Corp. will be issued Sept. 28, thrift regulators announced Wednesday.

A special unit, the Financing Corp., or Fico, will offer between $400 million and $600 million in bonds through underwriters for sale to institutional investors. Congress has empowered Fico to issue $10.8 billion in bonds for the FSLIC over the next three years.

Lawrence J. White, a member of the Federal Home Loan Bank Board, which oversees both the FSLIC and Fico, said Wednesday that the positive reception to the bonds from analysts at some of the bigger securities firms is encouraging.

The proceeds of the bond sales will be used to resolve about 400 problem thrift cases facing the FSLIC. As of year end, the agency was $6 billion in the red and unable to close or sell ailing institutions.

Mr. White, in a speech to 800 people at a conference on savings and loans sponsored by the American Institute of Certified Public Accountants, said the Bank Board has yet found the right candidate to become director of the FSLIC. Brian Newberger has been acting director since June 30, when Thurman C. Connell left to become president of the Federal Home Loan Bank of Des Moines. ■

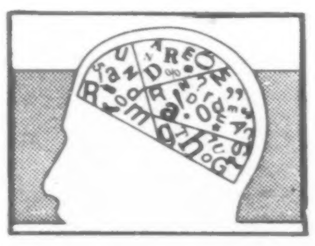
Random Thoughts



By SANFORD ROSE

There is an old adage that lucky men need no counsel and can even survive bad counsel. In the early to mid-'80s commercial bankers received a lot of counsel from investment bankers on capital and acquisition strategy. Much of this advice was bad, but because the commercial bankers got lucky, they ended up prospering from this bad advice. Next time they might not be so fortunate.

The investment bankers introduced their commercial-bank colleagues to the alleged benefits of preferred stock. They said: "Go out and raise preferred and you can lower your cost of capital, thereby raising the discounted value of future cash flows."

That advice seemed to be sound. Since preferred provides a tax shield to institutional investors who can exclude 85% of dividends from taxable income, it can be issued at relatively low rates. Of course, this tax advantage also applies to common stock, but given the undervalued state of bank stocks, the cost of issuing common seemed prohibitive. But banks could perhaps issue preferred at attractive

Prudential Will Market MasterCard To Policyholders Through Mailings

By LYNN BRENNER

NEW YORK — Prudential Insurance Co. said it will begin offering MasterCard credit cards to select life and property/casualty insurance policyholders.

The cards will be offered by Prudential Bank and Trust Co., the insurer's subsidiary based in Atlanta, through a special arrangement with Signet Bank of Richmond, Va. Signet will be responsible for servicing all accounts.

Prudential is the second major life insurer to introduce a credit card this year. A New Hampshire-based subsidiary of John Hancock Mutual Life Insurance Co., First Signature Bank & Trust Co., began marketing a Visa card on Jan. 1, primarily by mail and telephone. A John Hancock spokesman said the bank probably will have mailed 2.5 million card application by yearend.

John Hancock, based in Boston, declined to reveal the number of cards it has issued.

First Signature Bank & Trust Co. offers two Visa cards. The gold card may or may not carry an annual fee, depending on amounts charged; the classic card carries a $15 annual fee. Both have variable interest rates.

The Prudential MasterCard also carries a variable interest rate, initially set at 16.44%. An annual fee of $16 will be waived until January 1989, when the fee may be reduced if cardholders have purchased more than $2,500 in 1988. Cardholders will be eligible for lines of credit of up to $10,000.

Prudential, based in Newark, N.J., plans to mail card applications to 500,000 policyholders in 29 states and the District of Columbia.

The cards will be marketed by mail rather than through Prudential's insurance agents, said William Grau, manager of market development at Prudential. "Credit cards are a classic direct-mail product, and we'll go with the

Fed Accedes To State Rules On Subsidiaries

Holding Company Units Can Keep Broad Powers

By BARBARA A. REHM
Washington Bureau

WASHINGTON — The Federal Reserve Board has indicated it will not curb insurance and other nonbanking powers given by states to bank subsidiaries of bank holding companies.

In an order permitting two state-chartered bank subsidiaries of a holding company to sell insurance, the Fed explained that nonbank prohibitions outlined in the Bank Holding Company Act do not apply to state bank subsidiaries.

The Fed decision last Thursday appears to set some specific limits on how it will treat state-chartered bank subsidiaries — an issue in several pending cases before the Fed. The decision also helps strengthen the validity of state laws covering state-chartered banks.

The insurance industry plans to sue the Fed over the decision, an attorney representing five major insurance trade groups said Monday.

The Fed, which regulates bank holding companies, ruled last Thursday that Merchants National Corp. in Indianapolis could let two state bank subsidiaries, Anderson Banking Co., Anderson, Ind., and Mid State Bank of Hendricks County, Danville, Ind., resume certain insurance agency activities authorized for state banks under Indiana law.

Merchants National acquired both banks in October 1986 and suspended their insurance sales while the Fed decided whether they should be allowed.

The Fed's decision reflects the central bank's belief that the nonbanking prohibitions in Section 4 of the Bank Holding Company Act do not apply to bank subsidiaries of holding companies, say Fed observers.

Quote

Now that all the language that used to be in the book regarding redlining has been systematically removed, we think there needs to be some negotiations that take place.

Michael Shea, national campaign director for the consumer group Acorn, on talks with the financial industry regarding lending barriers [Page 2]

Discovering New Business

Awareness

Last year, half of the American public reported having seen, heard, or read about the new Discover card. But this year, more than eight out of ten people say they know about Discover.

Ownership

The number of Americans who say they have the new Sears Discover card has nearly doubled in just one year.

Consumers Give High Ranking To American Express Card

Opinion Survey Indicates Gain on Visa, MasterCard

By MICHAEL WEINSTEIN

Consumers rank the American Express card above or on a par with Visa and MasterCard for a wide range of features.

Industry observers say this high ranking reflects savvy marketing by American Express.

According to the *American Banker*'s annual opinion survey, consumers rate the American Express card as highly as the bank cards for widespread acceptance and even higher for inexpensiveness. These are generally considered to be some of the strongest features of bank cards.

Positive attitudes about American Express can only aid the financial conglomerate in generating business for its new Optima card, a revolving charge card introduced earlier this year.

The survey also shows that consumers believe American Express offers a significant advantage over bank cards in prestige, high credit limits, acceptance in restaurants, and use for entertainment and travel.

These are among the findings of the *American Banker*'s fourth annual survey of consumer attitudes about the changing financial services industry. The telephone poll was conducted this spring among 1,130 consumers by Trans Data Corp., a Salisbury, Md., research affiliate of this newspaper.

The survey based consumer attitudes toward credit cards on the responses of people who have both an American Express card and at least one of the bank cards. Responses from this group of 176 have a maximum sampling error of plus or minus seven percentage points. This is different from the sample used in the 1986 survey, so this year's results are not comparable with last year's.

Industry observers are surprised at the survey's finding that American Express, MasterCard, and Visa are considered about equal in the "accepted ev-

Sears Ad Blitz Pays Off for Discover Card

Consumer Awareness Doubles in Year's Time

By JAY ROSENSTEIN

Sears, Roebuck and Co.'s massive promotional campaign for its new Discover credit card — from expensive national TV ads to the tiny decals on store windows — seems to be paying off.

The latest nationwide opinion poll from the *American Banker* shows that the number of consumers saying they have Discover cards has doubled in only a year. The number who say they are aware of the card has also doubled.

Another 8% say they do not now have the card but plan to get one in the next year.

These are among the findings of the *American Banker*'s fourth annual survey of how American consumers view the changing financial services industry. The telephone survey of 1,130 people was conducted this spring by Trans Data Corp., a Salisbury, Md., research affiliate of this newspaper.

Sears introduced the Discover card nationally in early 1986. Bankers are watching it closely because it competes

AN **American Banker** SURVEY

Today the *American Banker* launches its fourth annual survey series, "How Consumer America Views the Changing Financial Services Industry." Additional articles will be published over the next four weeks. A magazine containing the entire survey will be sent to subscribers and distributed Oct. 18 at the American Bankers Association annual convention in Dallas.

Data are from the Federal regulatory Report of Condition for all insured commercial banks and were provided to American Banker by **ADP Data Services Division, New York.** ADP restates its 1985 data on a pro forma basis for mergers in 1986. **(a)**— On July 23, 1987, TSO Financial Corp., Willow Grove, Pa., parent of Colonial National Bank USA, announced that is has agreed to sell about $320 million in credit card receivables of the bank and rights to about 135,000 accounts to Valley National Bank. Valley National is a subsidiary of Household International Inc., Prospect Heights, Ill. TSO expects a net gain of about $15 million from the deal. **(b)**— In July 1987. First Chicago Corp. completed its purchase of Beneficial National Bank USA from Beneficial Corp. for about $250 million. The bank's name was then changed to FCC National Bank. **(†)**— The 1985 data have been restated for 1986 mergers. Rank bank would have had, if mergers had taken place in 1985. **(‡)**— Data for Puerto Rican banks were not available last year. Rank bank would have had, if data had been available. **N.A.**— Not available.

Commercial banks include "nonbank" banks and **thrifts** include FSLIC-insured savings institutions only. For banks, **credit card loans outstanding** are from Schedule RC-C, item 6a, of the Report of Condition and include all extentions of credit to individuals for household, family, and other personal expenditures arising from bank credit cards or special prearranged overdraft plans. For thrifts, credit card loans from the Federal Home Loan Bank Board's Quarterly Financial Report for FSLIC-insured institutions and include credit extended in connection with credit cards plus overdrafts on NOW accounts plus any other open-ended credit extended to consumers. Compiled by American Banker from data provided by **ADP Data Services Division, New York.** **(a)**— In July 1987, First Chicago Corp. completed its purchase of Beneficial National Bank USA from Beneficial Corp. for about $250 million. The bank's name was then changed to FCC National Bank. **(b)**— The 1985 data are the sum of credit card loans outstanding at Wells Fargo Bank NA and Crocker National Bank. The banks were merged into one bank in May, 1986. **(c)**— Includes Bank One Indianapolis NA— the former American Fletcher National Bank & Trust Co.— which was acquired in Jan. 1987. **(d)**— A direct subsidiary of Dean Witter Financial Services Group, which is in turn a subsidiary of Sears, Roebuck and Co. The bank handles Sears' "Discover" credit card operations. **(†)**— Bank acquired or established in 1986. **(‡)**— Bank acquired in Jan. 1987, but included in the BancOne Corp. totals for yearend 1986.

September 13-16 — Defense Credit Union Council: educational conference and annual meeting, Opryland Hotel, Nashville, Tenn., 202-828-4545.

September 13-18 — Credit Union Executives Society: executive marketing institute, Sheraton Hotel, St. Louis, Mo., 608-271-2664.

September 20-23 — National Association of State Credit Union Supervisors: annual conference, Camelback Inn, Scottsdale, Ariz., 703-821-2243.

September 22-26 — Washington Credit Union League: annual convention and meeting, Red Lion Inn, Seattle, Wash., 206-885-1121.

September 27-30 — Massachusetts Cooperative Bank League: 99th annual convention, the Balsams Hotel, Dixville Notch, N.H., 617-542-0515.

October

October 4-8 — Credit Union Executives Society: operations conference, Sheraton Scottsdale Resort, Scottsdale, Ariz., 608-271-2664

October 8-9 — Pennsylvania Credit Union League: credit union attorneys conference, Toftmees Resort, State College, Pa., 717-234-3156.

October 15-16 — Washington Credit Union League: Northwest mid-management and operations conference, SeaTac Hyatt, Seattle, Wash., 206-885-1121.

October 16-23 — Credit Union National Association: annual meeting, convention, and exposition: Sheraton, New Orleans, La., 608-231-4000.

October 24 — DC Credit Union League: credit committee, DC Credit League, Washington, DC, 202-554-7850.

November

November 11-12 — Washington Credit Union League: human resource management conference, Stouffer Madison, Seattle, Wash., 206-885-1121.

November 12-14 — Kentucky Credit Union League: annual meeting, Galt House, Louisville, Ky., 502-459-8023.

FINANCIAL PLANNING

September

September 10-11 — American Banker-Bond Buyer: new applications to asset and liability management; Waldorf-Astoria, New York, N.Y., 212-943-4305.

September 11 — College for Financial Planning: financial planning product selection and portfolio management seminar, Tampa, Fla., 303-755-7101.

September 16 — College for Financial Planning: financial planning product selection and portfolio management seminar, Washington, D.C., 303-755-7101.

September 21-22 — American Banker-Bond Buyer: new applications to asset and liability management; Fairmont Hotel, San Francisco, Calif., 212-943-4305.

September 23 — College for Financial Planning: financial planning product selection and portfolio management seminar, New York, N.Y., 303-755-7101.

September 29 - Oct. 1 — American Bankers Association: chief financial officers forum, Westin Hotel, Chicago, Ill., 202-663-5130.

October

October 2 — College for Financial Planning: financial planning product selection and portfolio management seminar, Chicago, Ill., 303-755-7101.

October 6-8 — Alabama Bankers Association: funds management conference, Lake Guntersville State Park, Guntersville, Ala., 205-834-1890.

October 7 — College for Financial Planning: financial planning product selection and portfolio management seminar, Dallas, Tex., 303-755-7101.

October 14 — College for Financial Planning: financial planning product selection and portfolio management seminar, Los Angeles, Calif., 303-755-7101.

November

November 4-6 — National Commercial Finance Association: 43rd annual convention asset based financial services industry, The Fairmont Hotel, San Francisco, Calif., 212-594-3490.

November 12 — U.S. League of Savings Institutions: operations workshop for small and medium-size institutions, New Orleans, La., 312-644-3100.

GENERAL

September

September 10-12 — Savings and Loan League of Colorado: annual convention, Colorado Springs, Colo., 312-644-3100.

September 10-12 — West Virginia Savings League: annual convention, White Sulphur Springs, W.Va., 312-644-3100.

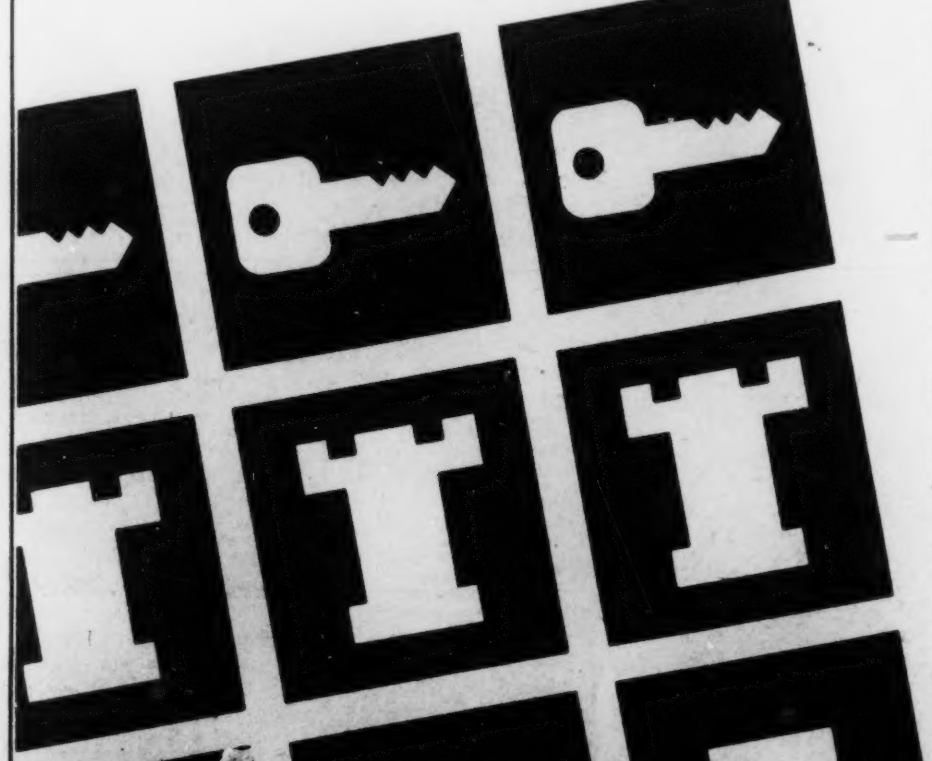
September 10-13 — New England League of Savings Institutions: annual convention, Danvers, Mass., 312-644-3100.

September 10 — College for Financial Planning: financial service firm selection process seminar, Tampa, Fla., 303-755-7101.

September 13-16 — Northwest Association of Affiliated Agencies: annual meeting, Nugget Hotel, Reno, Nev., 206-587-7077.

September 13-16 — Illinois League of Savings Institutions: annual meeting, Boca Raton, Fla., 312-644-3100.

September 13-16 — Oregon League of Financial Institutions and Washington Savings League: joint annual convention, Portland, Ore., 312-644-3100.



LEARN HOW TO EARN BIGGER PROFITS IN TODAY'S SMALL BUSINESS MARKET.

SMALL BUSINESS BANKING '87:
New Opportunities, New Strategies, New Products
November 12-13, 1987 • Atlanta

What do you need to succeed in small business banking? What new products should you promote? What steps can you take to enhance productivity? How can you compete effectively in this rapidly changing market?

You'll know all the answers when you attend *Small Business Banking '87.* You'll be exposed to the latest ideas, techniques and information. All presented by experts in banking, financial research, marketing and administration.

Thinking small has its rewards. So make plans to attend this profit-making program today.

For program and registration information, send in this coupon. Or call our Customer Service Center at:

Proxmire Views Banks in a New Light

Underwriting Risks Don't Loom as Large

By ROBERT M. GARSSON
Washington Bureau

William Proxmire

'A very large portion of mortgages and commercial loans are not made by banks anymore.'

WASHINGTON — Throughout his 30 years in the Senate, William Proxmire has staunchly believed that commercial banks should be barred from underwriting corporate equities and long-term corporate debt.

Now, as he nears retirement, the Senate Banking Committee chairman is suddenly questioning the views he has held for a lifetime.

In an interview with the *American Banker*, Mr. Proxmire, D-Wis., said it now appears to him that underwriting corporate equities may be far less risky than the traditional business of making commercial loans.

Underwriting, Mr. Proxmire said, places a firm at risk for less than a day.

"That's nothing like the risk of a loan that lasts for years and years," he said, acknowledging that he has now accepted the argument that banks have advanced, without success, for years on Capitol Hill.

That view, Mr. Proxmire added, argues strongly in favor of permitting banks to underwrite corporate securities, long-term corporate debt, and anything else that can be packaged and sold as a security.

Still, Mr. Proxmire, who turns 72 on Nov. 11, said he has not come to a final conclusion about what kind of bill he plans this fall to urge his committee to accept.

Mr. Proxmire's staff is working on the outline of a bill that would repeal sections 20 and 32 of the Glass-Steagall Act, the two provisions of law that prohibit affiliations between banks and securities firms, and their boards of directors.

Proxmire: Page 43 ➸

Insurance Company to Issue Visa Card In Joint Venture with Georgia Bank

By DAVID LaGESSE
Southwest Bureau

DALLAS — A.L. Williams Corp., an Atlanta insurance company, will begin issuing Visa cards in a joint venture with Fidelity National Bank, a small bank in Decatur, Ga.

A.L. Williams' sales force, which is largely part-time, will market the card to current and prospective policyholders, said Wayne L. King, executive vice president of the company.

The insurance company also plans to market mortgages through its agents, though details remain sketchy. The home mortgages are expected to be available by the first quarter of 1988, said Barbara King, an A.L. Williams spokeswoman. Ms. King is not related to Mr. King.

Primerica, the financial services conglomerate that grew out of the former American Can Co., owns about 20% of A.L. Williams. Primerica may participate in the home loan program through its mortgage banking subsidiary.

With about 150,000 representatives in the field, A.L. Williams expects to attract 500,000 Visa accounts within a year of the program's launch, Mr. King said. Applications have been printed and the first cards should be issued in November.

The predicted volume could transform Fidelity, which has about $140 million in assets, into a major credit card bank. The bank already has beefed up its staff for the expected wave of applications, though the bank

Key FDIC Link To Continental Expires Today

By LISABETH WEINER
Midwest Bureau

CHICAGO — Continental Illinois Corp. today celebrates another milestone on its slow but steady road to recovery.

After today, the company's principal banking subsidiary, Continental Illinois National Bank and Trust Company of Chicago, no longer will be able to transfer poor-quality loans to the Federal Deposit Insurance Corp. under terms of the government's 1984 bailout of the bank.

With the deadline passed, Continental will be left with a much cleaner loan portfolio and renewed hope that some-

Debt Ball Is In Private Sector's Court

Crisis provides fertile ground for new solutions.

By Maxwell Glen

ONE CAN GAUGE THE STATUS OF the international debt imbroglio with two observations: Debt-for-nature swaps are hot. The "Baker plan" is not. Conservationists have been abuzz since the Bolivian government agreed in mid-July to protect more than three million acres of endangered tropical lowlands in exchange for a reduction of its foreign debt.

Some U.S. bankers and policymakers heralded the unprecedented arrangement, in which a U.S.-based nonprofit group bought $650,000 of Bolivia's loans at a heavy discount in the secondary market, as one of several potentially fruitful techniques for reducing the debt burdens of lesser developed countries (LDC).

By contrast, the Baker plan has run aground. Two years ago its progenitor, Treasury Secretary James A. Baker 3d, called for debtor countries to reform their economic policies in exchange for increased lending by multilateral agencies and commercial banks.

OVERVIEW

By some estimations, the biggest blow to the Baker initiative came last May in the form of a decision by Citicorp chairman John S. Reed to set aside an additional $3 billion in reserves for anticipated losses in its foreign portfolio. Dozens of U.S. and foreign institutions have since followed suit, fueling long-standing fears that a writedown of its existing loans would almost terminally undermine a country's pursuit of new money from private sources.

Taken together, the debt-for-nature swap and Mr. Reed's bold and widely imitated maneuver illustrate the innovative extent to which debtors and creditors are trying to lick a crisis precipitated by Mexico's near-default five years ago.

They also underscore how the commercial and private sector have decided to take policy leadership into its own hands.

When the World Bank and International Monetary Fund convene at the annual joint meeting in Washington, the finance ministers and central bankers in attendance are as unlikely to reclaim international leadership of the issue as they are to resolve the debt problem overall. Most observers expect this year's gathering, like last year's, to end in a stalemate on key issues.

But some analysts contend that the debt crisis and the leadership void are linked inextricably. In short, there is a wide variety of partial or wholesale solutions to the debt crisis. What is lacking is the inclination in either the public or private spheres to pay for them.

It is not for want of incentive. According to the Institute of International Finance, a Washington-based research group underwritten primarily by international banks, the Baker plan's list of 15 key debtor countries owed $465 billion to foreign lenders at the end of 1986. The Baker plan countries, ten of which are in Latin America, are said to account for about half of all LDC external debt.

Baker country debts to commercial banks, at the end of last year, accounted for 61.9% of the total, while those to the IMF and multilateral development banks totaled 4.2% and 8.5%, respectively. About 17.4% was owed to official bilateral creditors such as the Export-Import Bank of the U.S. Other private suppliers accounted for 8%.

> ***"There is a power vacuum in need of being filled. If the World Bank and IMF wanted to, they could step in with an affirmative, creative posture."***

According to the Federal Reserve Board, the reported exposure of U.S.-based commercial banks in the Baker countries totaled $86.2 billion. This number reflects in part decisions of some institutions to write down on their own books loans that they are asking debtors to service at face value.

Ironically, IMF appears to be thriving under short-term, standby arrangements orchestrated during the early stages of the crisis. In June, continuing the 1986 trend, IMF actually received — mostly in repayments and service charges — $200 million more than it disbursed.

But commercial institutions and development banks have enjoyed no such luck. Most of the Baker plan's Latin American countries, where the commercial banks are mainly involved, are either way behind in their interest payments or not servicing their debt at all. Brazil, the developing world's biggest debtor, has not paid interest on its $67 billion in obligations to banks since February.

Servicing problems are inherent in the disparity between foreign debt and exports, some experts contend. In some cases, the ratio of total outstanding debt to annual exports ranges as high as 500%, according to Morgan Guaranty Trust Co. The United Nations Economic Commission for Latin America and the Caribbean reports that the ratio in 1986 of interest payments to exports was 37% for oil-producing members of the group and nearly 34% for non-oil producers.

William R. Cline, a senior fellow at the Institute for International Economics in Washington, argues that increased prices for commodities and an average growth rate in the industrial countries of as low as 2.5% per year may be enough to expand LDC export earnings, thereby forestalling the need for drastic measures. Yet some analysts reject Mr. Cline's optimism, adding that commodity price inflation, particularly in the energy sector, could prove a catalyst for another global recession.

Others contend that because of the inherent instability of commodity-based economies, the solution to the debt crisis simply lies in domestic policies that promote balanced industrial growth. But with only some exceptions, the ways in which many LDC governments have managed their economies to date have left foreign lenders less than optimistic about the future.

Motivating Forces

Crisis has been an impetus for technical creativity, of which the debt-for-nature swap is just one example. A more widely employed technique involves the exchange of debt-for-equity investments in the debtor country.

The Group of Thirty, a research organization of top bankers and economists, recently estimated that the volume of debt-for-equity swaps since 1982 has surpassed $12 billion. Chile is said to have reduced its debt by more than 10% using the vehicle. In a move designed to promote debt-for-equity swaps, the Federal Reserve Board last month increased from 20% to 100% the share that banks could own of nonfinancial companies in 33 debtor countries.

Another innovation is the "exit bond," which permits a smaller creditor to receive lower-yielding securities issued by the debtor government in exchange for loans.

Then there is payment-in-kind, illustrated by the recent decision of First Interstate Bank of California to accept clothing and other manufactured products from Peru in return for retiring $24 million of that country's debt.

Meanwhile, investment bankers are said to be seriously considering high-interest rate securities, called "asset-backed bonds," which would be sold like junk bonds. Some lenders have already turned certain loans into securities but held them for their own accounts.

Most banks are reluctant to discount their loans to the extent desired by some financial engineers. This is one explanation for the recent failure of Brazilian finance minister Luiz Carlos Bresser Perier's aborted attempt to win U.S. approval for a radical plan to write down its debt and convert it to securities.

Such financial moves seem only a partial solution at best. For example, the inaugural debt-for-nature swap retired only a small slice of Bolivia's $4 billion in external obligations. Similarly, the enthusiasm for debt-for-equity swaps has been tempered by the limited number of potentially attractive investments.

There is also fear that, as the Group of Thirty recently asserted, swap arrangements could "complicate an already difficult rescheduling and adjustment process without providing overriding benefits for either debtors or creditors." Critics variously charge that through swaps, debtors run the risk of exacerbating inflation, inflaming nationalistic sentiment, and by flooding the secondary market with bad debt, further undermining their ability to raise funds in the future.

And though capital flight has been reversed in many of the major Baker countries, according to Morgan Guaranty Trust Co. spokespeople, new money is in big demand. Many experts point out that additional capital is essential to any resolution of the debt crisis. Dozens of countries are reportedly lining up for loans.

Second Chances

Mexico has received $7.7 billion in new financing from commercial banks and multilateral institutions under a loan package renegotiated last year. And last month, Argentina and its creditor banks signed a $34 billion rescheduling agreement that included about $2 billion in new loans and triggered $3.35 billion in additional financing from the IMF and World Bank.

But while lead negotiator Citicorp recruited more than 300 creditor banks worldwide to subscribe to the accord, skeptics contend that the enthusiasm for new lending is better reflected by the 10% decline from 1985

to 1986 in LDC loans on the books of U.S.-based banks.

Sen. Bill Bradley (D-N.J.), chairman of the Senate's finance committee's international debt panel, argues that in the place of new lending, banks should provide interest rate relief and debt forgiveness on a case-by-case basis to countries that implement growth-oriented reforms.

Sen. Bradley also contends that, barring preliminary reforms, new lending is tantamount to throwing good money after bad. His advocacy of partial forgiveness and no new money has placed him at odds with Mr. Baker, who insists that while committing additional funds, the banks need not write down the value of their existing loans.

But both Mr. Baker and Sen. Bradley are at odds with commercial banks, which complain that under either plan, they are being asked to take the hit for the governments of the industrial countries.

Some experts believe that the recent wave of writedowns has cleared the way for an increasingly assertive role by the multilateral agencies and, in particular, Barber Conable, president of the World Bank, and IMF managing director Michel Camdessus.

"There is a power vacuum in need of being filled," says Richard Feinberg, vice president of the Overseas Development Council. "If the [World] Bank and [IM] Fund wanted to, they could step in with an affirmative, creative posture."

In fact, Mr. Camdessus won a verbal commitment at the Venice summit last June for an increase from $3 billion to $9 billion in funding for the fund's Structural Adjustment Facility, a short-term low-interest financing program targeted mainly at debtors in sub-Saharan Africa.

Yet IMF, originally established to redress short-term problems with current accounts and exchange rates, enjoys neither the mandate nor the funding to manage a global debt emergency of epic dimensions.

Meanwhile, although the World Bank and its multilateral brethren do enjoy a long-term perspective, they lack the funding and, some critics charge, the imaginative leadership needed to attract private sources back to the table.

Which all leads, some analysts say, to politics within and between each of the industrialized nations, principally Japan and the United States. While concerned about the debt-threat to their respective banking systems, each regards the other as its primary economic problem. And despite wide-eyed talk in the development community about Japan's surplus capital, neither government is anxious to lead a wholesale multilateral bailout.

Things could change for the better for debtors and creditors between now and January 1989, when President Reagan is scheduled to step down. But the experience to date has led few bankers and other observers to think that they will. ■

Dear Reader, How Are We Doing?

American Banker wants very much to provide you with articles that are both interesting and useful. Would you take a moment to give us some feedback on today's special section on **GLOBAL DEBT**? We hope to use your suggestions to make our special sections more valuable. Please return this questionnaire to Patricia Stundza, Feature Editions Editor, American Banker, One State Street Plaza, New York, N.Y. 10004 (212-943-5733).

(1) How useful was the information in this feature edition?

(A) Very Useful ☐
(B) Useful ☐
(C) Not Useful ☐

(2) What do you like **best** about this feature edition?

(3) What do you like **least** about this feature edition?

(4) What themes or topics would you like to see explored in future feature editions on **GLOBAL DEBT**?

(5) What other subjects would you like to see American Banker cover in feature editions?

Snags Seen in Proposed Irving Merger

Banking Observers Analyze Defenses Against Takeovers

By GORDON MATTHEWS

NEW YORK — The unfriendly effort by the Bank of New York Co. to acquire the Irving Bank Corp. raises the question of what defenses are available to such bids — and the more urgent issue of what measures would be useful for Irving.

Unsolicited proposals such as last Friday's $1.4 billion offer for Irving are rare in banking, particularly when the suitor is another major bank. But many industry observers believe hostile takeover proposals will become more common, especially if the Bank of New York's attempt is successful.

"Irving had not taken a lot of measures previously," said one lawyer who follows banking matters. "But they do have an established relationship with a good investment banking firm, Goldman, Sachs & Co., and that counts for quite a bit."

Irving's response to Bank of New York's offer, which it had rejected on Friday, was to say that its investment adviser was studying the bid. "That's the best tactic for now, while they mull the alternatives, but they'll have to make

Combining the Back Offices May Take Time, Hurt Morale

By PHILIP T. SUDO

NEW YORK — On paper, it looks like a perfect match: two big players in the securities processing business combining forces to create one gigantic market presence.

In practical terms, though, fusing the back-office operations of Bank of New York Co. and Irving Bank Corp. would put the merged firm at a competitive disadvantage into the next decade, Wall Street operations experts said Tuesday.

"It will be absolutely difficult," said Eugene N. Scalercio, chairman and chief executive officer of NFS Services Inc., an operations consultancy. "You're talking about a monstrous interface. They'll be giving up two years before they start to see the benefits of streamlining. They may have other reasons for doing this, but from a back-office standpoint, it will be chaotic."

Bank of New York and Irving officials could not be reached for comment. But another industry official said, "With the pace of the technological advancements in this business, the system will be outdated by the time they make it compatible."

Banks Step Up Standards for Quality Service

By LAURA GROSS
and JAY ROSENSTEIN

PHOENIX — When Sarah Gurtis hears a phone in her bank ring more than three times, look out.

The senior vice president for marketing at Sun Bank, Orlando, Fla., has little tolerance for what she sees as inattention to the basics of quality service.

"We hold people accountable. If the phones don't get answered in three rings, we call the responsible party in at four o'clock and ask why," she said during an interview at the Bank Marketing Association's 72nd annual conference. The meeting is being held here through today.

Like other banks today, Sun Bank is aggressively establishing standards for quality service. The importance of setting specific, concrete standards for quality — not just paying lip service to the general idea — was a topic widely discussed at the convention, both on and off the podium.

Among the specific ideas bankers mentioned were:

- Adding another teller if more than three customers are waiting for service.
- Limiting to three minutes the maximum amount of time customers have to wait in a teller line or on the telephone.
- Imposing so-called sunset rules requiring that telephone calls from customers or prospects be returned the day they are received.

This "deep drive for true quality" represents a change from previous years, said John A. Russell, vice president and director of marketing at Banc One Corp., Columbus, Ohio, and president of the Bank Marketing Association.

"Until deregulation, bankers were never forced to quantify quality," he said, adding that the automobile, communications, and airline industries have gone through similar adjustments as a result of increased competition.

Lenders Asked To Back Loans To Third World

By ROBERT M. GARSSON
and ROBERT TRIGAUX
Washington Bureau

WASHINGTON — World Bank President Barber Conable warned commercial lenders Tuesday that they should not expect the agency to continue alone as the main provider of new funds to Third World debtor nations.

Last year, the World Bank provided the equivalent of four-fifths of total net lending to the 15 counties that are central to the debt strategy, Mr. Conable said in a speech during the annual meeting of the World Bank and International Monetary Fund.

"The bank was prepared to accept this increased exposure because it was both prudent and necessary to help ensure a resumption of growth and development in the affected countries," he said. "But we cannot stand alone."

Instead, he said, commercial banks and the international lending institutions should commit themselves to restoring the stronger debtor nations to normal access to world credit markets within the next five to seven years.

Mr. Conable also called for a close look at "innovative market-based approaches" to the debt problem, echoing a theme struck earlier in the morning by President Reagan.

Mr. Reagan spoke in general terms, warning debtor nations against taking unilateral actions such as a suspension of debt payments, and urging increased cooperation among commercial banks, developing nations, and international lending facilities.

"Now is the time for rational decision making and responsible action," he said, apparently alluding to nations that have suspended payments or threatened to do so. "Those who chose to follow false prophets, to live in an illusion instead of seeking a solution, will be left with the consequences of their actions."

Mr. Reagan also joined the parade of officials endorsing alternatives to new debt, urging debtor nations to consider wider use of swaps in which lenders exchange portions of debt for equity positions.

While Mr. Conable and others have criticized commercial banks for retrenching on new loans in the developing world, bankers insisted that money was continuing to flow, though more selectively in the past.

"The commercial banks have not stopped lending," said Bank of America chairman A.W. Clausen, himself a former world bank president.

"There has been a slowdown," he said. "But the majors have participated in every deal."

A number of bankers attending the IMF-World Bank meeting said they expect international debt problems to remain for a considerable time. And while the bankers cautiously applaud the options opening up to them to restructure their foreign loans, they largely endorse current reforms to foster economic growth in developing nations.

An American Banker Special Report

19 of Top 25 Banks Post Losses in 1st Half

Superregional Holding Firms Emerge as Biggest Earners

By L. MICHAEL CACACE

NEW YORK — Thirty-five of the nation's 100 largest bank holding companies lost money in the first half of 1987, including the 16 largest firms and 19 of the top 25. Combined, the 35 companies lost $11.8 billion.

Citicorp accounted for almost 20% of that total, reporting a loss of $2.3 billion. The 10 largest firms accounted for 71%, reporting a combined loss of $8.4 billion.

Most of the companies' losses could be attributed to special additions to the allowance for loan and lease losses in the second quarter, which were related to loans to countries currently restructuring their debt.

For example, at the top six companies, Citicorp added $3 billion to its reserve for possible credit losses in the second quarter; Chase Manhattan Corp. added $1.6 billion; BankAmerica Corp. and Chemical New York Corp. each added $1.1 billion; J.P. Morgan & Co. added $875 million; and Manufacturers Hanover Corp. added $1.7 billion.

Because of their limited exposure to Third World countries, superregional banking companies emerged as the top five earners in the first half of 1987. Four were from the Southeast and one was from the mid-Atlantic region.

The top earner was SunTrust Banks Inc., Atlanta, with net income of $141 million in the first half, up 37% from $102.7 million for the period last year, or 16th place. For the full year 1986, SunTrust had net income of $245.1 million to rank as the 12th largest earner in banking.

Following SunTrust were two Charlotte, N.C.-based firms: First Union Corp., with net income of $138.7 million for the first half, up 28% from a year earlier, and NCNB Corp., with net income of $108.4 million, up 5.4%.

PNC Financial Corp., Pittsburgh, was fourth, with $98.5 million, down 19% from a year earlier, and Barnett Banks Inc., Jacksonville, Fla., was fifth, with $81.1 million, up 9%.

These are some of the findings in the *American Banker*'s third annual bank

CORPORATE FINANCE

3 Banks Agree to Test a Part Of Loan-Pooling Operation

By ANDREW ALBERT

NEW YORK — Three major banks have made at least a preliminary commitment to the proposed loan-pooling operations of Dimensional Corporate Finance Inc., agreeing to test the company's risk-assessment system.

Sources say officials from First Bank Minneapolis and First Interstate Bank of California, Los Angeles, signed so-called testing agreements during a two-day meeting at Dimensional's San Francisco headquarters last week. A representative of Chemical Bank, who also attended the meeting, signed a testing agreement later in the week.

Of the three institutions, First Interstate's presence is the least surprising, since it is among the investors financing Dimensional's preliminary work.

The development provides an important boost for Dimensional, which according to some bankers lost momentum this summer. Bankers have voiced concern that the loan-pooling plan is too limited, and as a result, Dimensional reportedly found it difficult to enlist banks to test the technology on which the entire project hinges.

But the three banks agreed to participate in the test after reviewing Dimensional's system last week, according to Michael Keischnick, president of the loan-pooling subsidiary, Diversified Corporate Loans Inc. He said he expects several other banks to sign testing agreements within the next couple of weeks.

By signing testing agreements, the three banks have given Dimensional the go-ahead to wire their institutions into its risk-assessment software pack-

Thrift Sells Credit Card-Backed Issue

NEW YORK — Great American Savings Bank of San Diego sold $110 million in pass-through certificates backed by its Visa and MasterCard receivables, and officials at the institution say they will likely return to the asset-backed market.

The certificates, with a 9.05% pass-through rate, were priced at 99.66 to yield 9.22%. At that yield, the Series A notes were returning 75 basis points more than the comparable U.S. Treasury issue.

The securities are expected to win an Aaa rating from Moody's Investors Service, with help from a letter of credit guaranteeing payment on 20% of the principal amount. The Federal Home Loan Bank of San Francisco provided the letter of credit. The bank reportedly hopes to become increasingly competitive with private-sector letter-of-credit providers.

Last week's issue was the fifth public offering of credit card receivables this year. Great American officials said they expected the deal to be treated as a sale for accounting purposes but not for regulatory capital purposes.

Great American used about $140 million of its $200 million credit card portfolio to collateralize the securities, which were sold through a grantor trust set up specifically for the deal.

The lead manager for the deal was Goldman, Sachs & Co., and First Boston Corp. served as comanager.

James A. Krzeminski, senior first vice president and treasurer for Great American, said the thrift's "overall corporate program is to look to liquefy all the assets we can. The exact timing [of sales] will depend on activity in a particular product. The general trend is to do more issues."

He said Great American might look next to commercial real estate loans or perhaps its portfolio of home equity lines of credit, which now accounts for about $59 million in receivables.

— Andrew Albert

1st Boston Regains Position as Leader In Asset-Backeds

NEW YORK — First Boston Corp., with help from super-issuer General Motors Acceptance Corp., regained its position as the No. 1 underwriter of asset-backed securities.

During the first nine months of this year, First Boston served as lead manager on nine offerings worth a total of $3.1 billion. The asset finance team at Salomon Brothers Inc., which had wrested the top spot from First Boston in midyear tallies, slipped to second place in the nine-month rankings. Salomon lead-managed six issues totaling $1.6 billion.

Asset Sales Report, an *American Banker* newsletter, ranked underwriters of asset-backed securities, giving lead managers full credit for each public offering they handled from Jan. 1 through Sept. 24. Issues collateralized by U.S. government assets were not counted.

At midyear, Salomon for the first time ranked ahead of First Boston, which had for the two previous years dominated the world of asset finance. First Boston managed to overtake Salomon with four third-quarter issues, including an innovative offering of $1.4 billion in securities backed by auto loans on GMAC's books. Thanks to that deal, the year's largest to date, First Boston's third-quarter asset finance volume more than doubled that of the entire first half.

Aside from its sheer size, the transaction drew market attention because of a feature that allowed investors to avoid the prepayment risk associated with the car loans. That risk was assumed by Morgan Guaranty Trust Co. in exchange for a fee.

GMAC has not been entirely faithful to First Boston, retaining Salomon twice this year to manage the books on auto loan offerings worth $485.8 million. And if interest rates had not moved wildly in September, GMAC likely would have employed Salomon to market more asset-backed paper — perhaps keeping Salomon in first place.

Conspicuously absent from the rankings are Merrill Lynch & Co. and Morgan Stanley & Co., two firms that for months have been working on their first public offerings of asset-backed

Data are from an American Banker survey questionnaire and banks' midyear earnings releases. The 1986 data are as reported in 1986, unless otherwise noted. **Primary capital** is: equity capital plus the allowance for loan and lease losses plus mandatory convertible debt plus the minority interest in equity accounts of consolidated subsidiaries. **Total capital** is: primary capital plus secondary capital. **Secondary capital** is: limited life preferred stock plus subordinated notes and debentures (not included in primary capital); plus long-term debt of the parent company and its nonbank subsidiaries with an original maturity of seven years or more. **Primary capital ratio** is calculated by dividing primary capital on 6/30/87 by total assets on 6/30/87. **Note:** The American Banker ratio is not calculated in the same manner as the Federal Reserve Board ratio. The American Banker does not add the allowance for possible loan and lease losses to total assets, as the Fed does. In the past, the American Banker ratio was only 5-to-12 basis points higher than the Fed ratio. However, the sizable allowance for possible loan and lease losses taken by many of banks in the second quarter have caused the American Banker ratio to be as much as 20-to-25 basis points higher than the Fed ratio. Therefore, for banks reporting sizable losses for the first half of 1987, the Fed ratio is used. A "†" indicates a Fed ratio calculated by the firm; and a **"#" footnote** indicates a Fed ratio calculated by American Banker. **Net Income** is income after taxes, loan loss provisions and minority interest, but before preferred dividends and extraordinary items. Excludes income from discontinued operations. **(a)**— On 1/31/87, Midlantic Banks Inc., Edison, N.J., and Continental Bancorp., Inc., Philadelphia, merged to form a new company, Midlantic Corp. **(b)**— Formerly Maryland National Corp. Changed title 4/29/87. **(c)**— Formerly United Virginia Bankshares, Inc. Changed tiele 9/1/87. **(d)**— Formerly Louisiana Bancshares Inc. Changed title 4/87. **(p)**— Pro forma. **(r)**— Rank firm would have had, if merger had taken place on, or before, 6/30/86. **(‡)**— Data are for 12/31/86. **( )**— Indicates a loss. **N.A.**— Not available. **(★)**— Revised since publication on 7/28/87.

An American Banker Special Report

19 of Top 25 Bank Holding Companies Post Losses in First Half

➾ Continued from Page 2

holding company midyear report, which ranks the top 100 companies by total assets as of June 30. This year's update has been expanded to include a list of mergers completed by the top 100 companies since yearend 1986. (The tables begin on page 16.)

Mergers continued at a fast clip among the largest holding companies. Thus far this year, 37 of the top 100 have completed acquisitions of 59 other banking companies. In 1986, 38 of the top 100 firms acquired 67 other banking firms.

Although Citicorp remains the nation's largest commercial banking company, with assets of $194.4 billion at midyear, there have been some significant changes among the top 10.

Chase Manhattan has surpassed BankAmerica Corp. as the second largest company. Chase's assets totaled $98.9 billion on June 30, up 9.1% from $90.6 billion a year earlier, when it ranked third. BankAmerica Corp.'s assets dropped 17.4%, to $96.9 billion from $117.3 billion, moving it down a to third place.

Chemical New York Corp., which in May acquired the $19.2 billion-asset Texas Commerce Bancshares Inc., Houston, moved up two places to rank fourth, with $78.4 billion in assets on June 30.

J.P. Morgan & Co. remains in fifth place, with $74.7 billion in assets, but Manufacturers Hanover Corp. moved down two notches to sixth place, with assets of $73.8 billion, down 2.3% from a year ago.

Among the top 100 firms, the biggest jump in rank was posted by Trustcorp. Inc., Toledo, Ohio, which moved up 30 places to 93d, with assets of $4.65 billion on June 30, compared with $3.09 billion a year earlier. Mergers were the primary reason for the gain. From midyear 1986 to yearend 1986, assets rose 37% to $4.23 billion.

During that period, the company acquired three Indiana-based firms: Salem Financial Corp., Goshen; St. Joseph Bancorp., South Bend; and First Bancshares of Huntington Inc. Since yearend, it has acquired three other companies: Commercial Bancshares Corp., Adrian, Mich.; William Fall Appraisals, Perrysburg, Ohio; and Starke County Bancorp., Knox, Ind.

Other Survey Findings

- A regional breakdown of the top 100 companies in assets shows that 29 are in the Midwest, 25 in the Southeast, 23 in the mid-Atlantic states, nine in the West, and seven each in New England and the Southwest.
- A regional breakdown of the top 25 earners shows that eight are in the Southeast, six each in the mid-Atlantic states and New England, four in the Midwest, and one in the West.
- Bolstered by the sizable increases made to the allowance for credit losses by many of the top firms, primary capital for the top 100 firms rose 17.7% to $153.1 billion for the year ended June 30. Also, the primary capital-to-assets ratios for the top 100 firms rose by 63 basis points to 7.84%.

Primary capital is the sum of total shareholders' equity capital, mandatory convertible instruments, the allowance for possible loan and lease losses, and minority interest in equity accounts of consolidated subsidiaries.

- The top 100 firms had $1.95 trillion in assets on June 30, up 8.3% from $1.8 trillion a year earlier.
- The brisk acquisition activity of the top 100 firms is reflected in the data on domestic banks and domestic bank branches. The top 100 bank holding companies controlled 1,421 banks on June 30, up 4.3% from the year before. And the top 100 had 21,911 domestic bank branches at midyear, up 10.2% from 19,888. ■

Strategic Dates

Oct. 1, 1987

CREDIT CARD INTEREST: The interest rate ceiling for credit cards in Connecticut will drop automatically on this date unless the state's legislature votes to reset it. The ceiling currently is being held at 18%.

Dear Reader, How Are We Doing?

The *American Banker* wants to make sure our survey of bank holding companies meets your information needs. So would you spend a moment to give us some feedback? Please clip out this questionnaire and return to: William Zimmerman, Editor, American Banker, One State Street Plaza, New York, N.Y. 10004 (212) 943-5712.

(1.) How would you **change** the survey to make it more useful? What would you add?

(2.) What did you like **best** about the survey?

(3.) What did you like **least** about the survey?

(4.) How do you use the survey in your work?

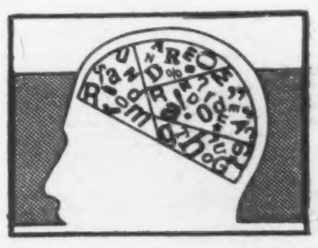
Random Thoughts



By SANFORD ROSE

The following consists of excerpts from a speech on asset-liability management given by the author at the joint examination and supervision staff conference of the Federal Home Loan Bank of New York.

Asset-liability management has been defined as the "controlled mismatching of maturities to maximize net interest earnings while taking reasonable business risk." Regal as this definition sounds, it is something less than useful. The focus on maturities is unfortunate. Interest rate risk does not arise from an imbalance in the maturity schedule of assets and liabilities. It comes from a cash flow gap.

Equal dollars in and out, and there is no rate risk. But if you get cash before you must disburse it, you are exposed to the threat of falling interest rates. Vice versa, you are exposed to the risk of rising rates.

Say that in the next few months, more of my liabilities than my assets will mature — or rather reprice, since it is the maturity of the yield not that of the instrument which counts. Am I necessarily liability sensitive? Perhaps not. Factoring in loan amortization and interest

High Court Upholds Securities Powers For Units of Nonmember State Banks

By JED HOROWITZ

NEW YORK — The Supreme Court Monday let stand a ruling that permits federally insured, state-chartered nonmember banks to operate securities subsidiaries and evade the underwriting limitations of the Glass-Steagall Act.

The high court turned down an appeal by the Investment Company Institute and the Securities Industry Association, challenging a 1984 ruling by the Federal Deposit Insurance Corp. The FDIC ruling permitted affiliates of state-chartered banks to underwrite mutual funds and engage in many other activities prohibited by the Depression-era Glass-Steagall law.

Two lower courts had upheld the FDIC decision, and the Supreme Court refused to review their decisions.

On the face of it, Monday's ruling means that if state law authorizes a nonmember bank to engage in securities activities, there is no ban under the Glass-Steagall Act. But the Competitive Equality Banking Act of 1987 appears to dull the effect of the original FDIC rule.

"The immediate effect of the court action is nil in a bottom-line sense," said Michael Crotty, associate general counsel of the American Bankers Association, noting that the recent banking legislation bars state banks from exercising new securities powers until March 1, 1988. "But it is a very significant ruling in that it will enable quite a number of commercial banks to eventually become affiliated in some fashion with securities dealers."

Meanwhile, affiliates of state-chartered banks that existed before the moratorium began on March 5 can continue operating. Regulators said they had no estimate immediately available of how many FDIC-regulated banks have securities affiliates, though the numbers are not believed to be high.

Notable among them is Boston Safe

Greenspan Cool On New Powers Asked by Banks

Observers Surprised By Testimony to Panel

By ROBERT M. GARSSON
Washington Bureau

WASHINGTON -- Alan Greenspan had been expected to serve as a forceful advocate for new bank powers, but Monday the new Federal Reserve Board chairman told a House subcommittee he is not yet ready to endorse some of the activities bankers consider least controversial.

Testifying before the Energy and Commerce subcommittee on telecommunications and finance, Mr. Greenspan refused to say whether the underwriting of municipal revenue bonds is an appropriate activity for banks.

Moreover, Mr. Greenspan told the committee there is no evidence that the securities industry lacks competition. A key argument raised by the banking industry in support of new powers is that consumers, state and local governments, and businesses would benefit from increased competition among securities underwriters.

Mr. Greenspan said a number of times in his testimony that he generally favors expanded bank powers. But a number of banking committee staffers and others expressed surprise that he was not more forceful.

Several said they assume he is waiting for an opportunity to testify before the House and Senate banking committees to give full vent to his views.

However, the acknowledgment that the securities industry already enjoys strong competition "was startling," said Karen Shaw, a former bank lobbyist who now follows financial-services-industry legislation for the Institute for Strategy Development.

"This was not the forum for his first

RANDOM THOUGHTS

Continued from Page 1

cash flows could conceivably change the calculation, rendering me asset rather than liability sensitive.

Popular ideas about asset-liability management also frequently ignore intraperiod differences in the timing of repricings. It is sometimes said that as long as the summary volume of assets being repriced equals the summary volume of liabilities being repriced in a particular period, there is no interest rate risk.

But if, on average, assets are being repriced earlier in the designated period than are liabilities, the institution is exposed to sizable reductions in net interest income if rates decline, even though, by the end of the period, the cumulative volume of repriced assets corresponds perfectly to that of repriced liabilities. Otherwise put, the traditional concept of a zero cumulative gap is an absurdity.

□ □ □

Good asset-liability management stresses the time value of cash. To what end? Is it to maximize net interest income, as was stated in the introductory quote? It is possible to maximize net interest income in the next couple of accounting periods while simultaneously laying the groundwork for the destruction of the institution.

Cast your mind back to the year 1978. Rates were rising, and the thrifts were long assets — liability sensitive. That is, they were liability sensitive from a composite balance-sheet viewpoint. Yet they were asset sensitive from a short-term income point of view because there was a lag in the repricing of liabilities with nonmarket-determined rates.

The rise in rates was eroding the market value of equity. Yet that same rise in rates increased net interest income because thrifts were able to invest amortizing principal and interest receipts at progressively higher yields. Thus the book value of equity rose at the same time as its market value was collapsing.

The very circumstance that was to plunge the industry into acute crisis temporarily created a roseate and entirely bogus aura of unprecedented prosperity. That prosperity abruptly terminated when nominally short liabilities became effectively short — that is, when the industry was forced to reprice liabilities at market-sensitive rates.

Presumably what the thrifts learned from this experience is the primacy of market over book values — that changes in market value foreshadow, are leading indicators of, changes in book value. So one must take steps to arrest the deterioration in market values despite any current buoyancy of book values. Yet one wonders how well this lesson has been learned.

Consider the current attitude toward risk-controlled mortgage arbitrages. Say that a thrift bought a current-coupon mortgage-backed security some months ago, funded it with a reverse repo, and hedged by lengthening the duration of the repo with rate swaps so that it more or less equaled the duration of the asset, provided that could be determined.

If rates had fallen sharply, prepayments would have accelerated. The extra cash being received would have had to be reinvested at quite unfavorable yields. Thus the market value of the arbitrage would have fallen because the duration of the assets had declined relative to that of the liabilities in a period of falling rates. And the spread would also have fallen because asset yields were dropping relative to fixed liability costs. Hence, the thrift would have had to scramble to rebalance in an effort to minimize the damage.

But when rates rise, as they have in the past six months, the effect on market values and book values is not symmetric. The rise in rates raises the discount rate on future cash flows, which should lower the duration of the asset. Simultaneously, however, prepayments slow, which raises that duration. In most instances, the prepayment effect swamps the discount-rate effect, lifting overall durations.

Since the duration of the asset is now greater than that of the liabilities in a period of rising rates, the market value of the arbitrage falls. But this decline in market values is not immediately reflected in reduced spreads and book values, as would be the case if rates had fallen sharply and prepaid cash had to be reinvested at disappointingly low yields. Assuming a complete prior hedge, the income effects begin showing up only when the swaps start to mature, raising liability costs.

Thus, focusing on book values and ignoring market values, the thrift appears to have the leisure to do nothing, which is what many are now doing. Damage control is expensive, so it is easier to sit with a position, praying that reversals in rates will save the day. That didn't happen in the post-1978 period, and it may not happen now.

□ □ □

Good asset-liability management necessitates a dual focus — both on net interest income and market value. This is difficult because it means thinking about the institution as if, in reality, it were two institutions, with two optimal rate sensitivity postures. In brief, one should be liability sensitive in the under-one-year part of the thrift or bank and asset sensitive in the over-one-year institution.

As long as there is a liquidity premium in some markets, it pays to borrow shorter than one lends. One is in effect being paid to take some expectational risk.

But since the liquidity premium reaches an asymptote in the under-one-year part of the yield curve, there is no extra bang for the buck in mismatching between under-one-year liabilities and multiyear assets. One is taking on a lot more expectational risk without an incremental premium. The expected value of the longer-term mismatch may still be positive, but the variance of returns is likely to be unfavorably high.

Therefore thrifts and banks should be long assets, or liability sensitive, only in the under-one-year part of their institutions. This is accomplished by calculating the market value of the rate-sensitive assets, multiplying that value by one minus the duration of these assets and setting this product greater than the product of the market value of the rate-sensitive liabilities and one minus their duration.

Otherwise put, since there is a profit in controlled, moderate short-funding across a confined segment of the yield curve in selected asset-liability markets, we want the duration of the equity supporting the under-one-year institution to be equal to some positive number. A positive duration of equity — longer asset than liability durations — means that, if rates rise, the thrift receives a below-market rate of interest from its borrowers for a longer period of time than it is enabled to pay a below-market rate to its depositors and other creditors. So the thrift is tolerating a higher price sensitivity on the asset than on the liability side, and the risk of a decline in equity values should rates rise, in order to capture the liquidity-premium profit.

To offset this exposure, it must create a condition in the over-one-year institution in which a rate rise will depress liability values by more than asset values, or reduce the amount of interest the thrift owes its depositors and creditors by more than the amount of interest owed the thrift by its borrowers. This is accomplished by having a negative duration of equity in the over-one-year institution — that is, a longer duration for the liabilities than for the assets.

In order to immunize the thrift as a whole against rate changes — which is desirable since there is no consistent profit in long-term rate betting — the duration of its equity must be zero. That is, the value of assets times their duration must be set equal to the value of liabilities times their duration. If net worth is positive — if the value of assets exceeds that of the liabilities — then the duration of assets must be less than that of the liabilities. The overall immunizing condition for an institution is thus moderate asset sensitivity.

If a zero duration of equity presupposes asset sensitivity, a negative equity duration requires even more asset sensitivity. If the over-one-year institution is sufficiently short assets so that the negative duration of its equity and the positive duration of the equity in the under-one-year thrift sum to zero, the thrift is enabled to take advantage of the liquidity premium without being exposed to interest rate fluctuations.

□ □ □

Whether this form of immunization is desirable is another question. Most thrifts don't feel they can make enough money unless they take substantial interest rate risk. That's because there isn't enough opportunity to profit from the management of credit risk in the traditional mortgage business. Lacking the broad menu of loan assets possessed by banks, the so-called "safe" thrifts — those that eschew the chancy, nontraditional real estate business — emphasize the big rate gamble and scorn the comparatively modest liquidity-premium profit, which isn't enough to pay their administrative expenses.

Thus there are limits to the role of asset-liability management. A knowledge of term structure theory and duration can prevent gambler's ruin, but its contribution to profits will not be impressive. Prosperity depends ultimately on diversifying into areas, especially the business credit area, where there is a substantial reward for the successful management of controllable risks. ■

Bank Closures Keep Mounting At Record Pace

By BARBARA A. REHM
Washington Bureau

WASHINGTON — A record 136 banks failed in the first nine months of this year, putting the tally of closings well on its way to the 200 failures that the Federal Deposit Insurance Corp. has predicted for 1987.

Bank Failures

By comparison, 108 institutions closed in the first three quarters of 1986, which was a record at that time.

As the fourth quarter began, the toll continued to mount, with six additional closings as of last Friday. That brought the total for the year to 142. For all of last year, 138 banks closed.

In the first three quarters this year, 41 agriculture banks failed. That is eight fewer "ag" banks — those with more than 25% of their loans to farmers — than had failed during the same period last year. During 1986, a total of 59 agriculture banks closed.

In all of 1986, the FDIC gave open-bank assistance to seven banks. In the first nine months of this year, 16 banks were kept open with cash from the FDIC. Four more assistance deals, involving more than 65 banks, are pending final regulatory approval.

Clearly, the FDIC is turning more to helping a bank through tough times rather than closing it down. "Open-bank assistance has the advantage that local borrowers continue to conduct their business with an operating bank, which means community disruption is minimized," FDIC Chairman L. William Seidman said in the agency's 1986 annual report, released last month.

How Failures Were Handled

Of the 142 closings so far this year, the FDIC reports that nine banks' depositors were paid off. In 32 instances, the deposits were transferred to another bank, and in 101 cases, the banks' deposits were purchased and assumed by another bank. In all of 1986, 21 banks' depositors were paid off, 19 banks' deposits were transferred to other banks, and 98 banks' deposits were purchased and assumed.

The FDIC's "problem bank list," those banks in danger of failing, stands around 1,600, up from about 1,450 at the end of 1986. The number is now leveling off, according to Mr. Seidman.

Six more banks have closed since the third quarter ended.

Western Bank-Westheimer, Houston, closed Oct. 1, reopening on Monday as a branch of Charter National Bank-Houston. Insured deposits of $224 million were transferred to Charter National because the FDIC received no acceptable bids.

The two other Texas failures were also in Houston and both were taken over by Texas Commerce Bank, Houston. The two were: Western Bank-North Wilcrest, with deposits of $43.8 million, and Western Bank-Westwood, with deposits of $44.8 million.

Also closed Oct. 1 were: Clay County State Bank, Dilworth, Minn., whose deposits of $10.2 million were assumed by Northwestern State Bank, Ulen, Minn.; and Security State Bank, Oxford, Neb., whose deposits of $11 million were assumed by Union Bank and Trust Co., Lincoln, Neb.

The State Bank of Greenwald, Greenwald, Minn., closed Oct. 2, and its insured deposits of $18.4 million were transferred to Rural Bank of Greenwald, a newly chartered bank. ■

FDIC-Insured Banks that Failed or Were Rescued in 1987

Washington Bureau

WASHINGTON — The following is a list of U.S. banks insured by the Federal Deposit Insurance Corp. that, since Jan. 1, have failed or have received FDIC financial assistance because they were in danger of failing.

A bullet (•) denotes a collapsed agricultural bank, defined by the FDIC as having agricultural loans exceeding 25% of its total loans.

The number of insolvent banks that have been either liquidated or merged into other companies through Oct. 2 is 142. Sixteen others, listed here after the bank failures, received financial help from the FDIC to keep them from failing.

The total number of bank closings in 1986 was 138. Seven others received financial help from the FDIC to keep them from failing.

□

1. **Bowie National Bank**, Bowie, Tex. Closed Jan. 8. Deposits of $12.6 million assumed by Bowie State Bank, a newly chartered subsidiary of Montague Bancshares Inc., Weatherford, Tex.

2. **The Security National Bank & Trust Co. of Norman,** Norman, Okla., closed Jan. 8. Deposits of $174.4 million assumed by a newly chartered bank of the same name, owned in equal parts by First Commercial Corp., Little Rock, Ark., and Northwest Arkansas Bancshares Inc., Bentonville, Ark.

3. **American National Bank of Grand Junction,** Grand Junction, Colo., closed Jan. 8. All but $2,000 of the total of $7.1 million in deposits were within the federal deposit insurance limit. Insured deposits transferred to Intrawest Bank of Grand Junction.

• 4. **State Bank of Cuba,** Cuba, Ill., closed Jan. 9. Deposits of $17.6 million assumed by National Bank of Canton, Canton, Ill.

• 5. **Latimer Bank and Trust,** Latimer, Iowa, closed Jan. 15. Deposits of $21.9 million assumed by the First National Bank of Clarion, Clarion, Iowa.

• 6. **The First National Bank of Rush Springs,** Rush Springs, Okla., closed Jan. 15. Deposits of $12.5 million assumed by First National Bank of Maysville, Maysville, Okla.

7. **First Charter Bank,** Denver, closed Jan. 15. Deposits of $9 million assumed by Century Bank and Trust, Denver.

8. **The First National Bank of Skiatook**, Skiatook, Okla., closed Jan. 15. Deposits of $13.8 million assumed by American Exchange Bank, Collinsville, Okla.

• 9. **National Bank of Frederick,** Frederick, Okla., closed Jan. 22. Insured deposits transferred to First National Bank and Trust Company, Frederick. All but $260,000 out of total deposits of $23.3 million were within the federal insurance limit.

10. **The First National Bank of Marlborough,** Marlborough, Mass., closed Jan. 23. Insured deposits transferred to Worcester County Institution of Savings, Worcester, Mass. About $1.5 million out of total deposits of $47.2 million were within the federal insurance limit.

11. **First Sierra Bank,** Bishop, Calif., closed Jan. 23. Insured deposits transferred to Security Pacific National Bank, Los Angeles. All but $673,000 out of total deposits of $23 million were within the federal insurance limit.

• 12. **The Farmers National Bank of Remington,** Remington, Ind., closed Jan. 29. Deposits of $33.6 million assumed by Lafayette National Bank, Lafayette, Ind.

• 13. **First State Bank of Pattonsburg,** Pattonsburg, Mo., closed Jan. 29. Deposit payoff. Deposits totaled $5.5 million, all within the federal insurance limit.

14. **Peoples Bank and Trust Co.,** Holdenville,

Okla., closed Jan. 29. Deposits of $19.3 million assumed by The Bank, McAlester, Okla.

• 15. **The La Pryor State Bank,** La Pryor, Tex., closed Jan. 29. Deposits of $5 million assumed by Zavala County Bank, Crystal City, Tex.

16. **Montgomery County Bank NA,** in The Woodlands, Tex., closed Jan. 29. Deposits of $44.3 million assumed by Texas Commerce Bank NA, Houston.

17. **Bear Creek National Bank,** Bear Creek, Tex., closed Jan 29. Deposits of $25.6 million assumed by Jersey Village Bank, Houston.

18. **Boulevard State Bank,** Wichita, Kan., closed Feb. 5. Deposits of $84.9 million assumed by Union Boulevard National Bank, Wichita, a newly chartered subsidiary of Union Bancshares Inc., Wichita.

• 19. **State Bank of Allison,** Allison, Iowa, closed Feb. 5. Deposits of $16.7 million assumed by Lincoln Savings Bank, Reinbeck, Iowa.

20. **Sunbelt National Bank,** Dallas, closed Feb. 5. Deposit payoff. All but $32,000 of total deposits of $11.1 million were within the federal insurance limit.

21. **Market National Bank**, Denver, closed Feb. 5. Insured deposits transferred to Women's Bank NA, Denver. All but $110,000 of total deposits of $8.9 million were within the federal insurance limit.

22. **Community Bank**, Seiling, Okla., closed Feb. 11. Deposits of $5.4 million assumed by First National Bank of Seiling.

23. **Federated National Bank,** Live Oak, Tex., closed Feb. 11. Deposit payoff. All but $127,000 of total deposits of $11.4 million were within the federal insurance limit.

24. **Security National Bank,** Midland, Tex., closed Feb. 12. Deposit payoff. All but $41,000 of total deposits of $7.7 million were within the federal insurance limit.

25. **First City Bank of Atoka,** Atoka, Okla., closed Feb. 13. Deposits of $12.4 million assumed by the Atoka State Bank, Atoka.

• 26. **First State Bank of King City, Missouri,** King City, Mo., closed Feb. 13. Deposits of $13.8 million assumed by Citizens Bank and Trust Co., Chillicothe, Mo.

27. **The County Bank, Manatee County,** Palmetto, Fla., closed Feb. 13. Deposits of $163.2 million assumed by NCNB National Bank of Florida, Tampa.

28. **First State Bank of Atmore,** Atmore, Ala., closed Feb. 19. Deposits of $11.4 million assumed by First National Bank of Atmore.

29. **Hub City Bank and Trust Co.,** Lafayette, La., closed Feb. 20. Deposits of $37.5 million assumed by the Hibernia National Bank, New Orleans.

30. **The First National Bank of Weslaco**, Weslaco, Tex., closed Feb. 20. Deposit payoff. All but about $366,000 of total deposits of $69.2 million were within the federal insurance limit.

31. **First National Bank of Crosby,** Crosby, Tex., closed Feb. 26. Deposits of $8.2 million assumed by a newly chartered national bank subsidiary of Central Bancshares of the South Inc., Birmingham, Ala. The new institution retained the name of the failed bank.

• 32. **Farmers State Bank,** Hart, Tex., closed Feb. 26. Deposits of $9 million assumed by Hale County State Bank, Plainview, Tex.

• 33. **The Lewistown Bank,** Lewistown, Ill., closed Feb. 27. Deposits of $14 million assumed by the National Bank of Canton, Canton, Ill.

• 34. **The First State Bank,** Rockford, Iowa, closed March 4. Deposits of $14.6 million assumed by First Security Bank and Trust Co., Charles City, Iowa.

35. **Liberty Bank**, Houston, closed March 5. Deposits of $50.5 million assumed by Central Bank of Houston.

36. **Sealy National Bank**, Sealy, Tex., closed March 5. Deposits of $7.8 million assumed by Austin County State Bank, Bellville, Tex.

• 37. **First National Bank in West Concord**, West Concord, Minn., closed March 5. Insured deposits of $8.8 million transferred to Farmers State Bank, West Concord.

38. **First National Bank of Sapulpa**, Sapulpa, Okla., closed March 5. Deposits of $7.5 million assumed by American National Bank and Trust Co., Sapulpa.

39. **Western Bank**, El Paso, closed March 12. Deposits of $39 million assumed by MBank El Paso NA, El Paso.

40. **Plaza National Bank,** Del Rio, Tex., closed March 12. Deposit payoff. All but about $38,000 of the total of $30.4 million were within the insurance limit.

79. **Bank of Oak Grove,** Oak Grove, La., closed May 21. Assets of $23.3 million. Deposits of $22.9 million in 4,800 deposit accounts assumed by West Carroll National Bank of Oak Grove. Failed bank's two offices reopened May 22 as branches of West Carroll.

80. **Lake Austin National Bank,** Austin, Tex., closed May 21. Assets of $42.5 million. Deposits of $37 million in 4,300 deposit accounts assumed by Greater Texas Bank Southwest NA, Austin. Failed bank's one branch reopened May 22 as a branch of Greater Texas.

81. **Texas Investment Bank NA,** Houston, closed May 21. Assets of $15.1 million, including about $54,000 in 17 accounts that exceeded FDIC insurance limit. Deposits of $13.4 million. Failed bank's one office will not reopen. This is an insured deposit transfer. Texas Investment customers will have access to their funds at River Oaks Bank, Houston, on May 22.

82. **Texas National Bank-Westheimer,** Houston, closed May 28. Assets of $27.5 million, deposits of $26.7 million in 1,200 accounts including $327,000 in 32 accounts that exceeded FDIC insurance limits. Failed bank's one office will not reopen. This is an insured deposit transfer to Texas Capital Bank-Westwood NA, Houston.

• 83. **First National Bank of Wilmont,** Wilmont, Minn., closed May 29. An insured transfer of $10 million of First National's $11.6 million of deposits was made to Farmers State Bank of Mountain Lake, Mountain Lake, Minn. First National reopened as a branch of Farmers State June 1.

84. **United Bank of Texas,** Austin, Tex., closed June 4. Insured deposits were transferred to MBank Austin NA, Austin. All but $1.7 million of the total deposits of $163.1 million were within the federal insurance limit.

85. **The First State Bank,** Frisco, Tex., closed June 4. Insured deposits of $39.3 million assumed by Promenade National Bank, Richardson, Tex.

86. **The Benton State Bank,** Benton, Kan., closed June 11. Transfer of $8.4 million in assets to First National Bank & Trust Co., El Dorado, Kan.

87. **First State Bank,** Milford, Tex., closed June 11. Assets of $6.4 million assumed by Ellis County State Bank, Milford. Ellis County is a newly chartered bank.

88. **Northwest Commercial Bank NA,** Houston, closed June 11. Jersey Village Bank, also of Houston, acquired $12.1 million in assets.

89. **Hamilton County State Bank,** Lockland, Ohio, closed June 12. The Provident Bank, Cincinnati, assumed $7.3 million of the failed bank's $8.7 million assets.

90. **Whittier Thrift and Loan,** Whittier, Calif., an industrial bank closed June 12. Assets of $14.8 million were transferred to Liberty Thrift and Loan, Orange, Calif.

91. **Eighty Niner Bank of Coyle,** Coyle, Okla., closed June 25. Deposits of $5.4 million were assumed by the Oklahoma State Bank of Mulhall.

92. **South Denver National Bank,** Glendale, Colo., closed June 25. Deposits of $47.7 million assumed by First National Bank of Southeast Denver, Denver.

93. **Liberty Bank & Trust Co.,** Greenwood, La., closed June 26. Deposits of $11.5 million assumed by Peoples State Bank, Many, La.

• 94. **Lanesboro State Bank,** Lanesboro, Minn., closed June 6. Deposits of $10.7 million assumed by the Goodhue County National Bank, Red Wing, Minn.

95. **First Midwest Bank,** Maryville, Mo., closed June 18. Deposits of $25.1 million assumed by the newly chartered First Bank of Maryville, a subsidiary of Citizens Bancshares Co., Clillicothe, Mo.

96. **Pelican State Bank,** Mansfield, La., closed June 24. Deposits of $6.8 million assumed by Peoples State Bank, Many, La.

97. **Bank of Brazoria,** Brazoria, Tex., closed July 2. Deposits of $24.2 million assumed by Moulton State Bank, Moulton, Tex.

98. **Citizens Bank,** Bryan, Tex., closed July 2. Deposits of $36.3 million assumed by United-Bank-College Station, College Station, Tex.

99. **Red Oak State Bank,** Red Oak, Tex., closed July 9. Deposits of $37.7 million assumed by ROSB Bancorp Inc., Red Oak.

100. **First Continental Bank of Rockrimmon N.A.,** Colorado Springs, Colo., closed July 9. Deposits of $5.7 million assumed by Valley Bank, Security, Colo.

101. **Farmers & Merchants Bank,** Eufaula, Okla., closed July 23. Deposits of $13.8 million assumed by Citizens National Bank & Trust of Muskogee, Muskogee, Okla.

102. **Bank of Los Gatos, N.A.,** Los Gatos, Calif., closed July 23. Deposits of $11.3 million assumed by Bank of the West, San Francisco.

103. **Bank of Granite,** Granite, Okla., closed July 30. Deposits of $12.7 million transferred to Farmers and Merchants Bank, Maysville, Okla.

• 104. **Farmers State Bank,** Kanawha, Ia., closed July 30. Deposits of $14.3 million assumed by The First National Bank of Clarion, Clarion, Ia.

105. **First National Bank of Yukon,** Yukon, Okla., closed July 30. Deposits of $38.5 million transferred to Bank of Oklahoma, Tulsa, Okla.

106. **Empire National Bank,** Los Angeles, Calif., closed July 30. Deposits of $7.6 million paid off by FDIC.

107. **The Security State Bank,** Davenport, Okla., closed Aug. 6. Deposits of $8.6 million assumed by First State Bank, Harrah, Okla.

108. **Security State Bank,** Roosevelt, Okla., closed Aug. 6. Deposits of $16.1 million assumed by First National Bank in Altus, Altus, Okla.

109. **Bayshore Bank of Florida,** Miami, closed Aug. 7. Deposits of $34.4 million transferred to Eagle National Bank of Miami.

110. **First National Bank of Luther,** Luther, Okla., closed Aug. 13. Deposits of $17.6 million assumed by First Wagoner Bank and Trust Co., Wagoner, Okla.

111. **First State Bank, Blanchard, Okla.,** closed Aug. 13. Deposits of $21.48 million transferred to First State Bank, Hinton, Okla.

112. **First National Bank of Navasota,** Navasota, Texas, closed Aug. 13. Deposits of $28.2 million assumed by First Bank, Navasota.

113. **McNulty Banking Co.,** St. Petersburg, Fla., closed Aug. 14. Deposits of $49.9 million assumed by Barnett Bank of Pinellas County, St. Petersburg.

• 114. **The First State Bank,** Willow, Okla., closed Aug. 20. Insured deposits of $5.498 million transferred to The Guarantee State Bank, Mangum, Okla.

115. **American Exchange Bank and Trust Co.,** Norman, Okla., closed Aug. 20. Deposits of $94.8 million assumed by the Bank of Oklahoma, Tulsa.

116. **American National Bank of Evanston,** Evanston, Wyo., closed Aug. 20. Insured deposits of $8.2 million transferred to Pioneer Bank of Evanston.

117. **People's State Bank of Mazeppa,** Mazeppa, Minn., closed Aug. 21. Insured deposits of $15.3 million transferred to First State Bank of Redwing, Redwing, Minn.

118. **Bank of North America,** Houston, closed Aug. 27. Insured deposits of $29.5 million transferred to Texas Commerce Bank, N.A., Houston.

119. **Citizens Bank of Glendale,** Denver, closed Aug. 27. Deposits of $3.1 million assumed by Prudential Bank, Denver.

120. **Rocky Mountain State Bank,** Salt Lake City, closed Aug. 28. Deposits of $16.3 million assumed by Citibank (Utah), Salt Lake City.

121. **First National Bank of Hammon,** Hammon, Okla., closed Sept. 3. Insured deposits of $5.5 million transferred to American National Bank, Elk City, Okla.

122. **First National Bank of Tipton,** Tipton, Okla., closed Sept. 3. Insured deposits of $7.1 million transferred to First National Bank in Altus, Altus, Okla.

123. **La Marque Bank,** La Marque, Texas, closed Sept. 10. Deposits of $6.1 million assumed by The First Bank of La Marque, La Marque, Texas.

124. **Waxahachie Bank and Trust Co.,** Waxahachie, Texas, closed Sept. 10. Deposits of $62.3 million assumed by Merchants State Bank, Dallas.

125. **Central National Bank of New York,** New York, N.Y., closed Sept. 11. Insured deposits of no more than $170 million were paid off by the Federal Deposit Insurance Corp.

• 126. **First State Bank of Rollingstone,** Rollingstone, Minn., closed Sept. 11. Deposits of $13.7 million assumed by Eastwood Bank St. Charles, St. Charles, Minn.

• 127. **The Talmage State Bank,** Talmage, Kan., closed Sept. 17. Deposits of $6.7 million assumed by The Abilene First National Bank, Abilene, Kan.

128. **Breaux Bridge Bank and Trust,** Breaux Bridge, La., closed Sept. 17. Deposits of $28.9 million assumed by MidSouth National Bank, Lafayette, La.

129. **Steeplechase National Bank,** Houston, closed Sept. 17. Deposits of $9.9 million assumed by Cypress National Bank, also in Houston.

130. **Mustang National Bank,** Mustang, Okla., closed Sept. 17. Deposits of $10.8 million assumed by The First National Bank of Moore, Moore, Okla.

131. **Stockmen's Bank and Trust Co.,** Gillette, Wyo., closed Sept. 18. Insured deposits of $96.4 million transferred to First Interstate Bank of Gillette.

132. **Mayfield State Bank,** Mayfield, Kan., closed Sept. 24. Deposits of $20.3 million assumed by the First National Bank of Harper, Harper, Kan.

133. **Murdock State Bank,** Murdock, Kan., closed Sept. 24. Deposits of $22.1 million assumed by Farmers State Bank of Norwich, Norwich.

134. **The Citizens Bank,** Drumright, Okla., closed Sept. 24. Deposits of $30.6 million assumed by the American National Bank of Bristow, Bristow, Okla.

135. **Commonwealth Bank,** Torrence, Calif., closed Sept. 25. Deposits of $78 million assumed by Capital Bank of California, Los Angeles.

136. **Valley State Bank,** Los Angeles, closed Sept. 28. Deposits of $76.5 million assumed by Capital Bank of California, Los Angeles.

• 137. **Security State Bank,** Oxford, Neb., closed Oct. 1. Deposits of $11 million assumed by Union Bank and Trust Co., Lincoln, Neb.

138. **Clay County State Bank,** Dilworth, Minn., closed Oct. 1. Deposits of $10.2 million assumed by Northwestern State Bank, Ulen, Minn.

139. **Western Bank-Westheimer,** Houston, closed Oct. 1. Insured deposits of $224 million transferred to Charter National Bank-Houston.

140. **Western Bank-North Wilcrest,** Houston, closed Oct. 1. Deposits of $43.8 million assumed by Texas Commerce Bank, Houston.

141. **Western Bank-Westwood,** Houston, closed Oct. 1. Deposits of $44.8 million assumed by Texas Commerce Bank, Houston.

• 142. **State Bank of Greenwald,** Greenwald, Minn., closed Oct. 2. Insured deposits of $18.4 million transferred to Rural Bank of Greenwald.

□

These banks, which have not failed, did require financial assistance from the FDIC in order to stay open.

1. **American National Bank,** Durant, Okla. The FDIC granted financial assistance Feb. 25 to prevent a failure of the $9.1 million-deposit bank. As a result of the transaction, American National Bank merged with First National Bank of Johnston County, Tishomingo, Okla. The combined bank was named First American Bank, Tishomingo, with the Durant office operated as a branch.

2. **Central Bank and Trust Co.,** Glenmora, La. The FDIC granted financial assistance Feb. 26 to prevent failure of the $28 million-deposit bank. The assistance facilitated the merger of Central Bank and Trust with Peoples Bank and Trust Co., Natchitoches, La.

3. **Syracuse Savings Bank,** Syracuse. The FDIC granted financial assistance May 13 to prevent a failure of the $1.1 billion-deposit bank. The assistance facilitated the merger of Syracuse Savings with Norstar Bancorp, Albany, N.Y.

4. **Security Bank of Rich Hill,** Rich Hill, Mo., received $225,000 in open-bank assistance from the FDIC on June 5. The FDIC also bought $542,000 of Security Bank's assets. The failed bank has $12.9 million in assets. Deposits total $12.7 million.

5. **BancTexas Group Inc.'s** 11 subsidiary banks received $150 million in FDIC assistance July 17.

• 6. **Valley Bank of Belgrade,** Belgrade, Mont., received FDIC assistance of $3 million July 31. Valley Bank was then acquired by Mountain Bank Systems Inc., Whitefish, Mont., which contributed $1 million toward Valley Bank's recapitalization. ■

Today

THE AFTERMATH

New York City's big bank lenders, which had $16.7 billion outstanding to the securities industry in early October, made margin calls to customers as the collateral stocks they were holding plummeted in value. ______ 2

The mutual fund industry coped well with the crush of investors trying to cash out of the stock market. Now it must manage to make the payouts, often by drawing against bank credit lines. Goldman, Sachs & Co. made $1 billion of its capital available to mutual funds. ______ 2

Chemical Bank, Marine Midland, and First RepublicBank, which had raised their prime lending rates last week, lowered them after short-term interest rates dropped sharply. ______ 2

London stock prices gyrated wildly, with record losses posted Tuesday. The Financial Times/Stock Exchange index of 100 leading shares plummeted 250.7 points, bringing its cumulative losses since Thursday to 500.3 points or roughly 23%. ______ 2

Share prices of banks involved in mergers or acquisitions were hard hit by the recent plunge in equities. Many transactions in the works have trigger points calling for renegotiated prices, which likely means more dilution of earnings for the buyer. ______ 3

A product that should get a big boost from falling stock prices is the federally insured certificate of deposit with a return linked to the rise or fall of the S&P 500 index. ______ 36

The market tumult has created an opening for banks to position their federally insured products as a safe haven. ______ 36

Consumers increasingly ventured into gold certificates in the aftermath of the crash, said some bankers who deal in precious metals. ______ 36

Financial Markets in Turmoil

After the Crash

The Challenge: Settling Those Stock Trades

By YVETTE D. KANTROW and DAVID O. TYSON

NEW YORK — Thanks to automation, clearing banks expect few problems in settling the massive waves of stock trades that will hit their back offices in a few days.

With the normal five-day settlement, last Friday's record New York Stock Exchange volume of 338 million shares will settle this Friday and Monday's 604 million shares next Monday. But the banking community appeared poised and ready.

Trading in the long-term bond markets — governments, corporates, municipals — has been moderate: Investors dumping stocks have switched mostly into the money market and interest bearing accounts at banks and thrifts.

SPC Securities Services Inc., New York, a subsidiary of Security Pacific Corp., Los Angeles, is responsible for 20% of the clearing of U.S. government obligations. Sal Ricca, managing director and chief operating officer, said volume has been more than normal the past few days. "But it's not really any more than our systems are used to," he said.

In fact, Mr. Ricca called the clearing of government securities "a voice of calm in all this craziness." And other large clearing banks echoed his confidence. Executives at Manufacturers Hanover Trust Co. and Irving Trust Co. reported their systems should have no problem handling heavy transaction

Bid to Expand Bank Powers Likely to Suffer

By JAY ROSENSTEIN and BARBARA A. REHM
Washington Bureau

WASHINGTON — Commercial banking's attempt to get new securities powers was dealt a blow by the stock market crash, observers said Tuesday.

Congress is expected to be more skeptical about proposals to let banks expand into the securities business, they said.

"This is clearly a sobering event to be considered when members start debating the advisability of conferring securities powers on banks," said House Banking Committee Chairman Fernand J. St Germain in response to a question Tuesday.

Robert L. Clarke, the comptroller of the currency, said that "undoubtedly, there will be people" who interpret the crash as proof that banks should not be permitted to expand into broad-based underwriting and trading of stocks.

However, action on a bill to expand powers is moving forward.

Sen. William Proxmire, chairman of the Senate Banking Committee, is among those leading the push for expanded securities powers for the industry. He has been circulating a draft bill that would allow bank holding company subsidiaries to issue, underwrite, distribute, and deal in securities of any type.

Kenneth A. McLean, staff director of the Senate Banking Committee, said

Fed Chairman Quits Meeting To Rush Home

By ROBERT M. GARSSON

DALLAS — As the nation's stock markets struggled to recover from Monday's crash, financial industry regulators rushed home to Washington to begin the process of restoring the confidence of jittery investors.

Bankers at the annual American Bankers Association convention here were stunned Monday as the increasingly grim news filtered into the meeting halls. But those interviewed stressed that the economy is fundamentally strong and added that the safety net in place should ensure against a repeat of the panic sparked by the stock market crash of 1929 that ultimately crippled the banking system.

Alan Greenspan, facing his first test as chairman of the nation's central bank, abruptly canceled an appearance before bankers here and flew back to Washington. Federal Reserve Vice Chairman Manuel H. Johnson canceled a dinner speech in New York and Treasury Secretary James A. Baker 3d cut short a trip in Sweden as well.

The Federal Reserve acted Tuesday to provide liquidity to the financial system through its open market operations. Restrictions on trading of stock index futures and options instruments seemed to help the market recover from the panic selling that sent the Dow Jones industrial average down 508.32 points to 1738.42 Monday in its sharpest decline ever.

The market was also buoyed Tues-

MARKETING MANAGEMENT

Commission Arrangements Are Worth Exploring

By JACK W. WHITTLE

EVERY BANKER admits deep down that expanded powers pose an opportunity to create new products. Some bankers welcome this challenge, while others would prefer not to be bothered with it. But when net interest margins shrink on your present product offerings, Marketing 101 teaches that you should bring on new products to sell to the same customers.

This is the same approach that the brokerage firms, insurance companies, real estate firms, and large retailers follow. For bankers, though, there is a catch: Most new products bankers are considering traditionally have been sold only through a commission-based system.

If it were not for the seller's vested interest, i.e., commissions, I think stock, insurance, and real estate sales probably would plummet. In these industries, the sales force expects a piece of the action, and they get it. The customer contact person — the one who closes a sale — reaps the best reward. On the other hand, back-office people at insurance companies, for example, never complain about not being commission based. The same is true among back-office employees of real estate and brokerage firms.

Mr. Whittle is the chairman of Whittle & Hanks Inc., a financial services consulting firm in Chicago.

Whittle Says:

When it comes to paying commissions, the situation is not all black or white. Every reward-based system can be tailored to the particular situation at hand.

Recognizing that employees fall into two separate categories — commission and noncommission — has caused many bankers a great degree of anguish. They are reluctant to begin commissions, as evidenced by often-heard remarks such as "I don't want a split in my bank," or "I'll do anything to avoid creating cliques," or "Our bank is a service business, and the people in the back office work just as hard as those out front to satisfy customers."

All of these statements are true. Yes, we are in the service business. Yes, we do have to include the back-office people when we recognize contributions. However, just because insurance agents earn commissions and computer programmers at the big insurance companies do not certainly does not mean that we bankers should throw up our hands in frustration and say: "I don't want to get involved in a commission-based program."

There are ways to be creative. When it comes to paying commissions, the situation is not all black or white. Every reward-based system can be tailored to the particular situation at hand.

Average Possible Rewards

Bankers frequently ask: "How much can I pay in commissions for new deposits?" or "What is the going commission rate for procuring an installment loan, home equity loan, or mortgage?" To assist our clients, we have directed considerable effort toward working up averages of what the possible rewards conceivably could be when it comes to sharing the profits on deposit accounts or loans with the seller.

This is not easy. First, you need to determine a profitability benchmark under various circumstances. For example, in the case of loans, you have to assume a certain average balance, maturity period, and closing cost.

Using the Fed's functional cost analysis, we meshed these variables with annual operating costs and net interest margin. For example, an installment loan with an average balance of $3,853, an average maturity of three years, and an opening cost of $84.51 results in $68.28 of annual operating cost. Further assume an investment earnings rate of 13.53% and an average interest expense of 7.54%. This gives us a net interest margin of 5.99%. Your loan yields a $403 average net contribution to profits over the life of the installment loan.

You could conceivably pass along to the one who makes the sale at least a $12 reward.

For each typical bank product, we have worked out a similar net contribution to profits. These estimates are rough, but they do get you in the ballpark. Moreover, this approach is not the absolute answer to what your commission should be.

As I have stated in earlier columns, our experience in counseling clients on commission programs suggests that by far the most reliable barometer of what a commission should be is what the employees who make the sale say. When these employees become part of the solution, they tend to support it wholeheartedly. Commission schedules that are imposed by management are not accepted as well.

Next, you must decide who really made the sale. Is it the person who did the interviewing? The greeter at the door? The bank employee who helped the customer initially and who suggested that he or she come back to apply for an installment loan? All played a part, but who had the most influence in prompting the sale? I say that the person who closed the deal deserves the biggest reward.

The Psychology of Selling

Now, you say: "What about the people in bookkeeping?" Well, there are several ways in which they can participate in your commission program. Before we consider the alternatives, however, let's look first at the psychology of selling.

Our experience has taught us that those who go on commission, perhaps base salary plus commission, part commission and incentive bonus, or some other arrangement, tend to work under great stress and pressure at all times. Not everyone is cut out for the work of selling. Although nonsales staff may say they are under the same kind of pressure, this is just not so. Sure, there is pressure to balance out. Sure, there is pressure to modify products to stay competitive. However, the constant stress of having to meet sales quotas day in and day out is a different environment compared with what most bank employees have experienced.

Back-office people need to realize that the pressure to sell is considerable. Then, if bookkeepers, for example, still want a chance to earn a commission, they should be given the chance. If they really believe they want to work under conditions that make the amount of their paychecks variable, let them do so.

Another way back-office staff can participate in commissions is by giving referrals for new business. Usually, the referral earns the employee so much money per product. Many banks pay a commission once the referral is given; they do not require that the transactions be consummated. Most big banks reward the referring employee only when the sale is closed.

Yet another way for back-office people to qualify for commissions, and perhaps the most sensible way of all, is to have them participate with the customer contact person. After studying major industries that have paid the commissions for long periods, we discovered that sharing is the norm within the service industry.

For instance, when you dine at a better restaurant, you are served by a maitre d', table waiter, bus boy, and wine steward. There is a formula for sharing tips. The same is true at bars. Most people on the same shift at a good bar pool the tips. The norm in New York is that 15% of the tip goes back to the support people, such as the dishwashers, who help make the whole thing work.

Our experience is that the pooled-commission concept works well in branches. A certain amount of the commission is for the person who closes the sale, and a certain percentage goes into a pool that is divided among all the people in that branch.

What about tellers? I believe tellers should not sell. It's a waste of their time. Instead, tellers should always render high-quality, efficient service. They can serve the selling function best by referring customers to the appropriate selling counselor in the trust,

ECONOMIC PERSPECTIVE

Some Cautious Commentary On the Crash

By ROBERT J. SAMUELSON

HEY, THIS IS exciting. Maybe terrifying. Wall Street's panic has been dizzying. To the superstitious, ominous coincidences are obvious. The Great Crash of 1929 also occurred in October. What does Monday's stock collapse mean?

Sorry, you won't find instant wisdom here. The best we can do is to provide some perspective, from the vantage point of a column written after the closing bell on Monday.

Caution No. 1: Treat all commentaries on the market (including this one) skeptically. No one really knows what's happening, and almost everyone has ulterior motives.

Brokers and government officials who talked soothingly of a "correction" aimed — unsuccessfully — to avoid a panic. Beware also of those who moralize about the "crash." If the stock market boom symbolized the Reagan prosperity, than the collapse is supposed to show that the prosperity rested on selfishness and greed. For some, that would be a satisfying verdict. It may also be bad economics.

Caution No. 2: The stock market's bark is typically worse than its bite. Even the Crash of 1929 didn't "cause" the Great Depression. Although the market's collapse helped end the 1920s' boom, mistakes in government policy converted a business downturn into the Depression.

Samuelson Says:

In the end, the stock market mostly reflects what happens in the real economy; its influence on the economy is secondary.

The Federal Reserve permitted the banking system to disintegrate. Between 1929 and 1933, two-fifths of the nation's 25,000 banks went out of business. Consumer deposits were frozen; business loans contracted. By 1933, unemployment was 25%.

What triggered the 1987 panic is anyone's guess. There were bad trade figures last week; the United States and West Germany were quarreling over interest rates. In a sense, the cause doesn't matter. Panics are driven by fear.

For much of the year, market analysts were saying that stock prices were too high based on traditional measures — profits, interest rates, underlying corporate assets. Investors rationalized away unanswered questions. The market subsisted on faith, and once selling pressures developed there was no strong case for anyone to buy.

The market always bounces around. Only with hindsight do we know which of its bounces has broader economic significance. All that's possible now is to examine the current decline.

Economic Perspective: Page 6 ➸

Equity capital is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. In addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments. **(a)**— Merged with Crocker National Bank, San Francisco, in May, 1986, under Crocker's charter. **(b)**— Formerly Michigan National Bank-Farmington. Changed title in March 1987 after merging 15 of its parent's bank affiliates. **(c)**— Formerly Citizens & Southern National Bank of Fort Lauderdale. Changed title in January 1987 after merging 14 of its parent's bank affiliates. **(‡)**— Restated for mergers. **(†)**— Rank bank would have had if figures had been availbale. **(★)**— The 12/31/86 and 12/31/85 totals are for the top 100 banks that year.

An American Banker Special Report

Equity Capital at Top 100 Banks Dropped Sharply at Midyear

By KENNETH J. HICKS

NEW YORK — Equity capital dropped appreciably for the 100 largest commercial banks at midyear 1987, unlike the previous year when equity grew one and a half times faster than assets, according to an *American Banker* survey.

The percentage of the banks' capital that is in equity also plummeted from midyear 1986.

But total capital, which includes loan-loss reserves, jumped 14.9% in the same period, more than triple the asset growth at the banks.

These are some of the findings of the *American Banker* survey, published today, of the top 100 U.S. commercial banks ranked by equity capital as of midyear 1987. The table on page 22 also shows the banks' equity capital and ranking for yearend 1986 and yearend 1985, along with each bank's equity capital-to-assets ratio.

A second table, on pages 24 and 26, is a geographical breakdown of the top 100. It includes primary and total capital and those figures as a percentage of total assets.

Because of large additions to loan-loss reserves, the composition of bank capital changed. For the top 100 banks, equity capital totaled $69.64 billion, a decline of 12.1% from yearend 1986 and 7.2% from a year ago. Asset growth at these banks was up 3.0% from a year ago.

Equity capital as a percentage of total capital plummeted to 59.3% at midyear 1987. At midyear 1986 equity accounted for 73.4% of total capital, and at yearend 1985 it was at 75.2%.

Equity capital is the sum of perpetual preferred and common stock, surplus and undivided profits, and capital reserves. At large banks, equity includes the cumulative foreign currency translation adjustments.

Primary capital jumped 12.9% to $107.8 billion, from $95.4 billion at midyear 1986. Primary capital is equity capital, plus the allowance for loan and lease losses, mandatory convertible debt, minority interest in equity accounts of consolidated subsidiaries, minus goodwill placed on the books after April 15, 1985.

Analysts with Merrill Lynch & Co. noted that regulators have been encouraging banks to raise their capital. "And they have been doing that through various channels," said Robert A. Baer, managing director of Merill Lynch's investment banking division. The question becomes, Mr. Baer said, "Is that window now closed to banks, given the market's volatility?"

The market crash on Monday had no direct effect on the value of equity capital carried on bank balance sheets. But the depressed market prices make new equity offerings less attractive.

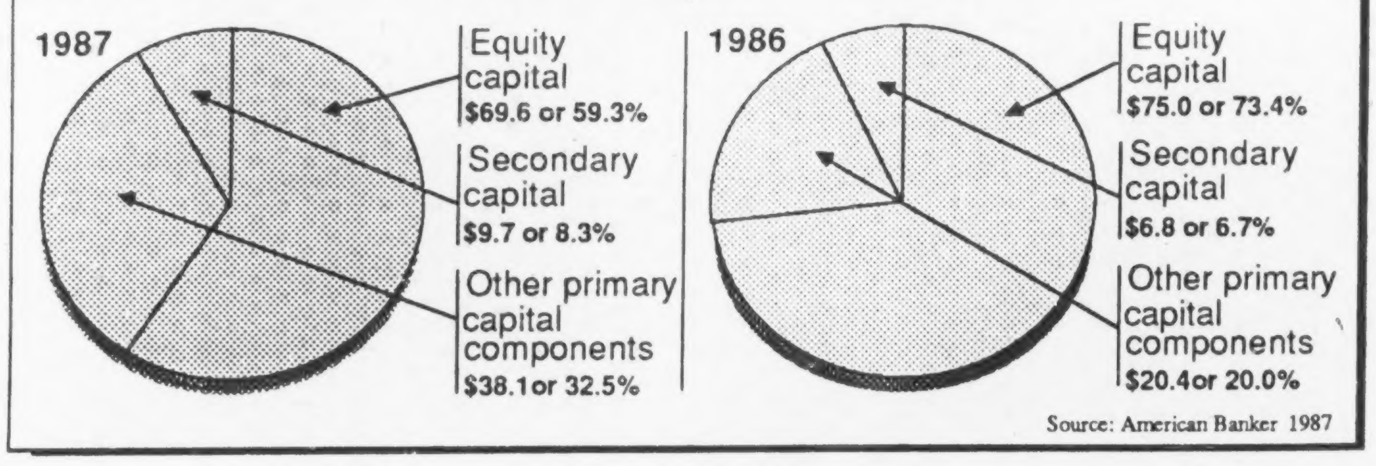
To raise equity capital depleted by huge loan-loss provisions for Brazilian loans in the second quarter, Citicorp, Manufacturers Hanover Trust Co., and Bankers Trust New York Corp. issued more than $1.5 billion in common stock in September.

Larry Cohn, a bank stock analyst with Merrill, said Tuesday that he does not expect other banks to raise equity in the near term. "Those banks that had clear-cut designs to raise their equity did so in September," he said.

Robert L. Clarke, the comptroller of the currency, said, "There's no question the climate for raising new equity capital has changed." For those banks that had raised funds in the markets before the sharp decline, Mr. Clarke said, "it was good for those who got in.

"For those banks which did not get their equity offerings in, they're going to go back and assess how to do that," Mr. Clarke said at a press conference Tuesday at the American Bankers Association convention in Dallas.

Total Capital in the Top 100 Banks (Billions of Dollars)



Source: American Banker 1987

Bank analysts consider equity capital a good measure of a bank's condition, because it does not include the allowance for loan losses and subordinated debt. The ratio of equity capital to total assets is considered a good measurement of a bank's ability to grow in the future and to withstand unanticipated losses.

For the top 100 banks, the midyear 1987 ratio of equity to total assets dropped to 4.81%, from 5.41% at yearend and 5.23% at midyear 1986. At money center banks, which took the heaviest loan-loss allowances at midyear, the fall was even more dramatic.

At the 11 banks considered money centers by the *American Banker*, the equity-to-assets ratio fell 88 basis points to 4.33%, from 5.21% at midyear 1986.

For the money centers, equity capital fell 15.4% to $24.9 billion, from $28.9 billion a year ago. As a percentage of total capital, equity dropped to 55.3%, from 76.4%.

Assets grew 1.6% to $559.8 billion at the money centers, from $551.0 billion. (Since all year-ago figures were not available for First National Bank, Chicago, it is excluded.)

For regional banks, the equity/capital ratio was down 47 basis points to 5.15% and equity comprised 58.5% of total capital, versus 71.6% a year ago.

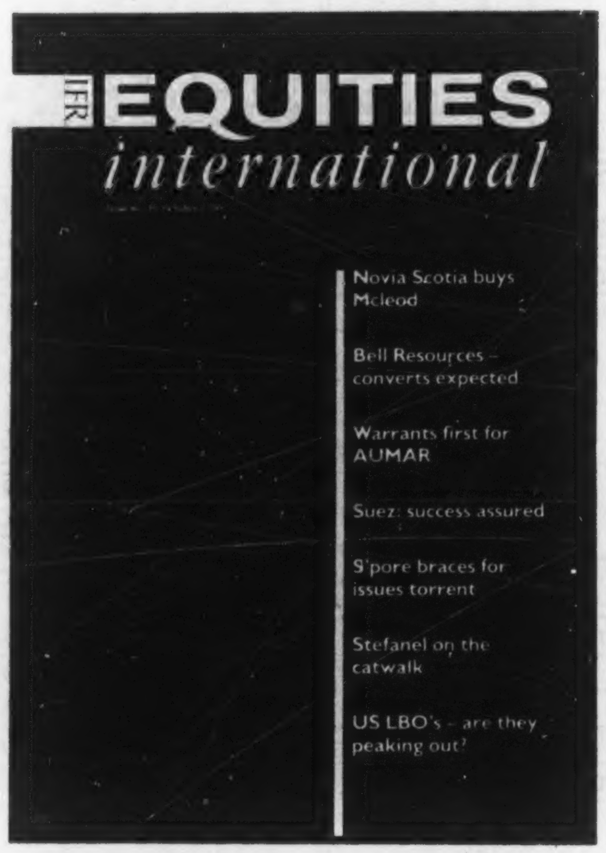
THE COMPLETE INFORMATION SERVICE FOR THE GLOBAL SECURITY MARKETS

IFR
International Financing Review
Financial Futures & Options
IFR Editor: John Evans



IFR
THE JOURNAL OF INTERNATIONAL SECURITIES MARKETS

INTERNATIONAL FINANCING REVIEW

The international bond markets have evolved into the second largest source of capital in the world. From the markets' earliest days, IFR has provided subscribers with a regular weekly information service on the deals, the people, and the statistics. IFR's incisive analysis is essential for all those involved in the syndication, trading and marketing of international debt and short term securities.

UK: £1530 pa *Europe and North America: £1760 pa*
Rest of World: £1910 pa *Prices include courier service.*

EQUITIES INTERNATIONAL

The only weekly information service on global equity trading, EI covers major placings and rights issues, the market in warrants and convertibles, as well as a detailed country by country analysis. Essential reading for all market makers, stock brokers and money managers.
£395 pa. (Courier service extra on request.)

THE JOURNAL OF INTERNATIONAL SECURITIES MARKETS

Share in the very best financial research and analysis. The evolution of new instruments, the effects of deregulation, and the impact of major international developments all require long term appraisal. JISM, the only quarterly journal to focus on these issues, makes this available to you.

Whenever possible, federal regulatory report of condition figures are used. **Equity capital** is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. in addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments. **Primary capital** is the sum of equity capital plus the allowance for loan and lease losses plus mandatory convertible debt plus the minority interest in equity accounts of consolidated subsidiaries minus "goodwill" placed on the books after 4/15/85. **Mandatory convertible debt** is the sum of equity contract notes and equity commitment notes issued prior to 5/15/85. **Total capital** is the sum of primary capital plus secondary capital. **Secondary capital** consists of limited life preferred stock and subordinated notes and debentures (not included in primary capital). **Equity Capital/Assets** is equity capital divided by total assets. **Primary Capital/Assets** is primary capital divided by total assets. **Total Capital/Assets** is total capital divided by total assets. **Please note:** that the allowance for credit losses is not added back to total assets in the computation of the primary and total capital ratios. Thus, these ratios will be higher than the bank's actual primary and total capital ratios as calculated by the Federal regulatory authorities. **(c)**— Calculated by American Banker using the bank's federal regulatory report of condition and the definitions above. **(e)**— The figure shown is equity capital. **(s)**— Calculated by American Banker using the bank's published report of condition and the definitions above.

Equity Capital Down Sharply At Top Banks

➸ Continued from Page 23

Equity declined only 4.9% at these banks. Assets at the regional banks rose 3.9% to $852.2 billion, from $820.2 billion.

Primary capital, for the top 100 jumped 12.9% to $107.8 billion, from $95.4 billion at midyear 1986. Primary capital is equity capital plus the allowance for loan and lease losses, mandatory convertible debt, minority interest in equity accounts of consolidated subsidiaries, minus goodwill placed on the books after April 15, 1985.

Since primary capital does include the loan-loss allowance and mandatory convertible debt, it can be a misleading measure of comparative capital adequacy. A bank with a sizable allowance for losses — which many of the big banks took in the second quarter — will have an inflated primary capital-to-assets ratio and could not be compared meaningfully on this basis with a bank with a more moderate allowance.

Bank analysts consider mandatory convertible debt to be "phantom capital," because it does not exist on the books as capital. Mandatory convertible debt is subordinated notes that can be converted into common or perpetual preferred stock in a specified period of 12 years or less.

Money center banks' primary capital jumped 22.4% to $44.4 billion. The other components of primary capital, excluding equity, accounted for 38.7% of money center banks' total capital, compared with 19.4% a year ago.

At the regionals, primary capital grew at a more modest 7.2%, and its components comprised 28.2% of total capital, compared with 20.3% last year.

Capital Ratios

(Dollar amounts in billions)

	Amount	% of Assets
MONEY CENTER BANKS		
Equity Capital	$25.78	4.33%
Primary Capital	44.35	7.45
Total Capital	47.96	8.06
REGIONAL BANKS		
Equity Capital	43.86	5.15
Primary Capital	63.43	7.44
Total Capital	69.52	8.16

Other Survey Findings

- Citibank remained No. 1 in equity capital, reporting $6.9 billion, a drop of 14.4% from Dec. 31 and 9.7% from a year earlier. The equity-to-assets ratio stood at 4.85%, down from 5.22% and 5.08% in the preceding periods. The country's largest bank maintained its place with the third-best ratio among the top 10 banks and moved up a notch to 11th among the top 25. Citibank's equity capital accounts for 9.9% of the top 100's total equity capital.
- Four of the five banks with the highest equity capital/assets ratio were the special-purpose banks set up to handle credit card operations. Holding the first and third ranks were Citibank subsidiaries — Citibank (Delaware), New Castle, and Citibank (Nevada), Las Vegas, with 81.45% and 14.89%, respectively. Second was the Sears, Roebuck and Co. subsidiary, Greenwood Trust Co., also in New Castle, at 14.95%. The fourth and fifth spots were occupied by Morgan Bank (Delaware), Wilmington, at 11.09% and Whitney National Bank, New Orleans, with 10.04%. ■

National City Starts Small Business Video Banking

By DAVID O. TYSON

NEW YORK — National City Bank, Cleveland, this week went into full commercial operation with the Harbinger Computer Services version of video banking for small businesses that it tested for a year.

Video Banking

The Atlanta-based Harbinger announced that Marine Midland Bank, Buffalo, N.Y., which has been testing it since March, also will roll out the personal computer service this month and that Wells Fargo Bank, San Francisco, will start a beta test with 50 customers next month.

The Harbinger small business product, called InTouch Cash Manager, has been in use since May 1986 at First National Bank of Atlanta, which helped develop it, and since August this year at the eight Illinois banks in Midwest Financial Group, Peoria.

C. Tycho Howle, Harbinger president, said in a telephone interview that two other banks will start beta tests next month. He declined to identify them.

Altogether, Mr. Howle said, about 700 customers a day connect into the Harbinger computers to do their banking. These include both small businesses using InTouch Cash Manager and consumers using the company's retail video banking service called the Promise, which is offered only by Fulton Federal Savings and Loan Association, Atlanta.

The Harbinger version of video banking has several unusual features. One of them, which National City will not make available until the end of the year, gives on-line customers the ability to order transfers between the offering bank and their accounts in any other automated clearing house banks. Harbinger claims that, contrary to some expectations, this feature has caused an inflow of deposits to its client banks, not a deposit drain.

Another feature is off-line processing: A user prepares a banking session in his PC and then connects up to transmit data back and forth, thus saving computer connect time and telecommunications costs.

National City Bank is running InTouch as a member of Money Station Inc., an Ohio electronic funds transfer network, which has licensed it from Harbinger for use by all participating institutions. The bank has had 30 small businesses in the beta test.

InTouch customers use an 800 toll-free number to connect their PCs into Harbinger in Atlanta, which can give them their balances starting at 7 a.m. each day. They can transfer funds among their accounts and get a daily electronic bank statement. ■

Deregulation has made today's banking and financial services industry more diversified and competitive than ever before. The premier publication in the industry is meeting its changing needs. *The Bankers Magazine*—reporting on the new realities.

It's by and for bankers. Now we give you wider and more in-depth coverage than ever before. That's because *The Bankers Magazine* is written by the people who are changing the face of banking. You'll learn from their strategies and successes—and their cautionary tales. And our distinguished Board of Advisers, drawn from financial institutions large and small, ensures a balanced outlook that's of interest to everyone.

Theme issues analyze crucial topics. We devote a good part of each magazine to a single theme, such as the national expansion of interstate banking…the new competition from nonbanks…and what's really needed for effective strategic planning. Coverage from all the angles gives *you* a broad working knowledge you can't afford to be without.

Quick-reading, hard-hitting columns keep you informed. Look to *The Bankers Magazine* for the latest on Strategy, Operations and Technology, Marketing, and all the key areas that affect the big picture.

Send for the first issue at no risk and experience the new perspective for yourself!

The Bankers Magazine.

The industry-wide perspective you can't get anywhere else.

Whenever possible, federal regulatory report of condition figures are used. **Equity capital** is the sum of perpetual preferred stock, common stock, surplus, and undivided profits and capital reserves. In addition, for large banks, equity capital includes the cumulative foreign currency translation adjustments. **Primary capital** is the sum of equity capital plus the allowance for loan and lease losses plus mandatory convertible debt plus the minority interest in equity accounts of consolidated subsidiaries minus "goodwill" placed on the books after 4/15/85. **Mandatory convertible debt** is the sum of equity contract notes and equity commitment notes issued prior to 5/15/85. **Total capital** is the sum of primary capital plus secondary capital. **Secondary capital** consists of limited life preferred stock and subordinated notes and debentures (not included in primary capital). **Equity Capital/Assets** is equity capital divided by total assets. **Primary Capital/Assets** is primary capital divided by total assets. **Total Capital/Assets** is total capital divided by total assets. **Please note:** that the allowance for credit losses is not added back to total assets in the computation of the primary and total capital ratios. Thus, these ratios will be higher than the bank's actual primary and total capital ratios as calculated by the Federal regulatory authorities. **(c)**— Calculated by American Banker using the bank's federal regulatory report of condition and the definitions above. **(e)**— The figure shown is equity capital. **(s)**— Calculated by American Banker using the bank's published report of condition and the definitions above.

Financial Markets in Turmoil

Clearing Banks Ready to Process Stock Trades

Continued from Page 1

volumes.

But Mr. Ricca said that while the systems that handle U.S. government securities have a lot of room before they reach the roof, systems that handle equity transactions do not. In his view, if stock market volume continues high for two or three days, there will be significant problems that can cause errors.

William T. Dentzer, chairman of Depository Trust Co., is more optimistic.

"Several days of trading at these high levels should create no problems for the Street," he said in an interview. "Certainly no problems for us. We would have to experience this for about a month before those kinds of stresses would show up."

Mr. Dentzer's trust company clears trades by book entry, eliminating paper certificates. It is the largest of the securities depositories, which represent one of the major advances in automation in the capital markets.

"There's a high degree of automation on Wall Street now," he said. "We settled, for example, about $8 trillion of securities transactions in 1986 and even before this we were running this year at $10 trillion annually. So the extent to which those deliveries are made by book entries and securities are increasingly immobilized, it takes a great deal of stress out of the system."

Chase Braces for Wave

Chase Manhattan Bank, one of the major processors of securities transactions, is braced for the tidal wave of stocks and expects to cope with little stress.

"In some ways this is a test of the work that we've been doing the last three to five years in building capacity," said a Chase information officer.

"We have reviewed all our operations and systems components globally and we have in place the capacity to handle the volume that has come through thus far," the officer said. "We are putting all kinds of mechanisms in place to protect our customers' assets, such as expanding disk space, standby staff people, and plans for running systems overtime."

Chase does securities processing worldwide and different markets have different settlement dates. So it already feels the impact of the frantic markets of recent days.

The bank's worldwide processing is done out of a hub in London. It interfaces with New York, since most of the investors are located in the United States, but the accounting and settlement is done mostly at a year-old facility in Bournemoth, England.

Anticipating No Difficulties

Chase anticipates no difficulties from delivery fails or credit problems that may arise in clearing. "We have the utmost confidence in the brokerage industry and the securities industry to pull through this," the information officer said.

One observer suggested, however, that mortgage-backed securities may present a clearing problem since they have not yet been put into a book-entry system. "Mortgage-backed securities clearers have had problems for a year and a half now and this will only make it worse," said Eugene N. Scalercio, chairman and chief executive officer of NFS Services Inc., a New York consulting firm in Wall Street operations.

But the large clearing banks disagree. Joseph Walsh, general manager of wholesale operations at Marine Midland Bank, New York, a major clearer of government securities, said problems caused by mortgage backed securities are likely to be minimal.

"That market matured last year and now we have better procedures and don't anticipate any problems," he said. "Maybe if you asked me that a year ago I would have said there would have been problems, but not today."

Business as Usual

Other clearing mechanisms reported business as usual amid increased activity, such as the Clearing House Interbank Payments System, which handles the clearing and settlement of foreign exchange, foreign trade, Eurodollar, and other international business transactions.

"We could see an increase in settlement transactions five business days after the last two active days," said William M. Walsh, senior vice president of data processing for the New York Clearing House, operator of Chips.

He said said Chips' international scope forces it to handle large volume fluctuations. If Chips closes for a U.S. holiday and international trading continues, the day the system reopens, it operates a double-day schedule, processing transactions from that day and the previous day.

Mr. Scalercio raised another potential problem. In the investment community as a whole, he said, back-office people have worked for their yearend bonuses and now there will be none. Psychologically, that will affect their work and possibly slow operations. ■

Stock Prices Dive On London Market

Continued from Page 2

problems."

Some firms are still likely to be looking at substantial losses. But John Aitken, a director of County Natwest Investment Bank, said that the larger London dealers tend to carry equity positions overnight of between $250 million and $400 million.

Thus the market decline since late last week has probably produced losses of $30 million to $50 million for some firms. "Some of these merchant banks only earn about twice that in a year," he said.

Bank lending exposure to securities is not a substantial part of total loans for the major London banks, Mr. Aitken said, noting that banks will probably hold back on demanding additional collateral on securities loans at least until the markets stabilize. Other sources said that London banks were refusing to increase their foreign exchange exposure to securities firms Tuesday, but this could not be confirmed at major banks.

London analysts said that in the immediate future, markets here will probably take their cue from New York. Investors, however, have been shellshocked by the events of the last two days, economists said, and it could be some time before the markets show any signs of life.

"The drama should be played out in Europe by today or tomorrow," said Larry Anderson, an economist at Deutsche Bank in London. "The question then will be whether there are enough investors left to give the market a bounce or whether we're in for a long bear phase." ■

CRASH OF '87

Thinly capitalized securities firms are tumbling as banks apparently refuse them funds to meet capital requirements. The New York Stock Exchange suspended three small firms: William D. Mayer & Co., AIG Inc., and Metropolitan Securities. ______2

As the market rallied, Reagan administration officials prepared to begin talks on ways to cut the deficit, which they hope will calm investors. ______2

Customers who bought equity mutual funds or stocks through their banks or thrifts are not blaming the institutions for their losses — at least, not yet. ______2

Financial institutions so far have failed to capture the attention of investors, who are awaiting redemptions on their mutual funds and thinking about a place to put that money, said industry observers. ______2

INSIDE

BankAmerica Corp. has dismissed two senior executives following a lengthy examination of problems with MasterNet, the company's $20 million computerized trust accounting and reporting system, according to sources. ______3

Quarterly losses continued at two large Texas holding companies, Allied Bancshares Inc., Houston, and First RepublicBank Corp., Dallas. But BancTexas Group Inc., Dallas, reported a $4.8 million profit for the quarter ended Sept. 30. ______ 10

Two of the nation's largest thrifts posted substantial declines for the third quarter. Great Western Financial Corp., Beverly Hills, Calif., said earnings were down 27%, and H.F. Ahmanson & Co., Los Angeles, reported a 50% drop. ______6

Vendor Express, a new product from Mellon Bank, is designed to help corporations cope with the U.S. Treasury's electronic payments program. By 1990, it could replace 77 million checks a year. ______ 10

COMMENT

For many years, institutions could count on receiving a refund on a portion of their FDIC assessment. But with the compounded rate of bank failures, the credit appears to be a thing of the past, writes Irvine Sprague. ______4

After the Crash

Bank Stocks Now More in Line With Issues in Other Industries

By JOHN P. FORDE

NEW YORK — Finally, bank stocks are market performers.

Since the beginning of the year, bank issues have consistently underperformed the general stock market. Investors — worried about the banking problems posed by Third World debt and interest rates — concentrated on industrial companies, which produced higher earnings and took the stock market to new heights.

Until recent days. The stock market's historic dive culminated in a record 508-point drop in the Dow Jones industrial average on Monday. While some other issues fared worse, bank shares were swept into the wave of selling.

A group of 15 stocks of major money center and regional banking companies checked by the *American Banker* lost a total of $8.3 billion in market value on Monday and Tuesday.

The total value of Citicorp's stock, for example, fell 17% to $7.4 billion in the two days of trading.

Market Capitalization Table
Page 14

Regional banks also posted declines. NCNB Corp.'s market capitalization fell 18% to $1.5 billion during the period.

One analyst said that, as of closing Monday night, his universe of bank stocks had fared better than the rest of the market since yearend 1986. In that time, banks had lost 6% of their value, while the Standard & Poor's 500 com-

NY Fed Seeks Capital Adequacy Data Before Considering Irving Takeover

By GORDON MATTHEWS

NEW YORK — The Federal Reserve Bank of New York has delayed consideration of Bank of New York Co.'s hostile effort to acquire Irving Bank Corp., citing serious gaps in financial data on the deal and requesting detailed information about possible managerial and computer system problems in combining the banks.

The regulator has asked Bank of New York to say how it will assure capital adequacy for the combined institution if it does not receive expected gains on the sale of some Irving assets and liabilities. It has also asked how the existing operations at Irving, such as correspondent banking, will be carried on at lower asset levels.

The New York Fed has also requested that the bank discuss "the managerial implications of acquiring an organization the size of Irving through other than a negotiated deal." It has further asked the bank to outline the safeguards it will install against any disruptions in computer systems handling the clearing of government securities and other financial instruments.

Separately, Irving on Wednesday reported a threefold increase in third-quarter earnings that could attract investors and raise its stock price. The results were heightened by an extraordinary $42.4 million after-tax boost from recognizing value in Irving's pen-

Chase to Slash Domestic Staff By 1,000 Jobs

3d-Quarter Report Shows Earnings Up by $88 Million

By JOHN P. FORDE

NEW YORK — Chase Manhattan Corp. will cut its domestic staff by 1,000 jobs, or about 2.2% of its total staff, by yearend through a voluntary early-retirement program.

Chase's plans, contained in its third-quarter earnings report, were announced here Wednesday as part of its latest round of cost-cutting initiatives. The report showed that the company earned $226 million in the third quarter, $88 million better than the same quarter of 1986.

Much of the gain came from nonrecurring items such as special gains that arose from recognizing value in its pension plan. There was also a $50 million tax benefit from the special loan-loss provision Chase took in the second quarter of this year.

Chase: Page 15 ➻

First Interstate Plans Restructuring

LOS ANGELES — First Interstate Bancorp Wednesday announced it will sell or restructure $6 billion to $7 billion in assets.

In a statement, the company said it was shedding assets "not essential" to the company's growth.

A source at the bank said "several hundred" jobs will be affected.

At the same time, First Interstate reported a $74.9 million loss for the quarter. The loss was partially due to a $95 million reserve established for the restructuring.

COMMENT

FDIC Insurance Rebates Are Thing of the Past

By IRVINE SPRAGUE

IT'S NEVER the first question asked. In fact, it seldom comes up second or third, but the issue rests deep in the subconscious of all bankers and before the day is out it is the single question that is always asked as I travel the nation speaking to banking groups.

"What happened to my FDIC assessment credit? When will it resume?" is the dual question that I can anticipate with certainty.

My answer is that, like the dodo bird, the assessment credit was a thing of beauty while it lasted.

The assessment system is simple. Banks pay the FDIC at the rate of one-twelfth of 1% of their domestic deposits each year. When the cost of bank failures and running the corporation is low, a large portion of the assessment paid is credited against the next year's payment.

Until 1985 the banks received the credit like clockwork, never missing a year. It averaged about 50% over the years, so the effective cost of FDIC insurance ran to about one twenty-fifth of 1%. The bargain of the century.

Then came Continental Illinois National Bank and Trust Company of Chicago, compounded by a bank failure rate that, after averaging less than 10 a year for decades, suddenly soared into the hundreds. This year's estimate is 200.

Big dollars are involved. For 1986 the banks paid $1.6 billion in assessments, or just under half of the total FDIC income of $3.3 billion. The remainder came from interest from Treasury obligations in which the FDIC's $18 billion fund is invested.

Why does Citibank, a much larger institution, pay less for FDIC protection than BankAmerica? The answer: The law is unfair.

— Irvine Sprague
Former Chairman and Director
Federal Deposit Insurance Corp.

For those who haven't paid attention or who are new on the scene, a review of the assessment practice as it has evolved over the years will be helpful.

Original Assessment

The law that created the FDIC in 1933 provided for an assessment of one-half of 1% of deposits, half payable on admission and half subject to call by the FDIC. In addition, provision was made for the laying on of an additional assessment equal to that already paid. This was never invoked.

In 1935, the assessment rate was reduced to one-twelfth of 1%, the figure that continues to this day.

When the FDIC fund reached $1 billion in the late 1940s there was pressure by the banking industry to reduce the assessment rate. Reluctant to do so at such an early date, the FDIC agreed to a compromise in 1950, effectively reducing the rate, not by lowering it but by introducing a rebate system.

After deducting operating expenses and the insurance cost of failures from the assessment income, 40% was to be retained by the FDIC to enhance its fund; 60% was to be rebated to the insured banks. The investment income does not come into the computation.

This was the procedure until 1960 when the rebate was upped to 66.6%.

It was 20 years before the next change and again compromise contributed to the final solution. In 1980 the insurance coverage was at $40,000 per account and the savings and loan industry was clamoring for it to be raised to $100,000.

Jay Janis, then head of the Federal Home Loan Bank Board, made it a crusade. As FDIC chairman, I wanted an increase to $75,000, but no higher. The House supported my position but the Senate insisted on $100,000. At the time interest rates were controlled under $100,000 but free to float at $100,000 or above.

My argument against going to $100,000 was that sharp and shady operators would see a golden opportunity to pay whatever was necessary to bring in brokered money in insured blocks of $100,000 and then use the funds for insider dealings, speculative lending, and a variety of innovative looting of the depositor money, with the government insurance eventually picking up the tab.

Tiny insitutions would balloon overnight and those who followed us as regulators would be faced with a nightmare of failures.

I lost the argument and we lost some banks. But the real carnage came in the savings and loan industry where compliant state legislatures gave the savings and loans the power to engage in all sorts of business that we bank regulators would never permit.

Since the Senate insisted on going to $100,000, I asked for something to help protect the fund. What we got was a reduction in the rebate figures back to the old 60%, plus a new provision that, when the ratio of the insurance fund to insured deposits dipped to 1.10 — $1.10 backing every $100 of deposits — the rebate would be capped at 50%.

There was additional language addressing what would happen if the ratios hit 1.25 and 1.40, but with the numbers headed in the other direction there is no point in discussing these options at this juncture. The ratio, which had fluctuated around 1.20 for decades, dropped to 1.12 at yearend 1986. In congressional testimony this summer, FDIC Chairman L. William Seidman said the ratio may well go down to 1.00 by yearend.

The issue of invoking the 1980 language is now moot, however, since there is no rebate of any kind available to be reduced to 50%. We entered 1987 with a negative carryover of $2.6 billion against the banks' assessment accounts and there can be no refund until this is wiped out.

The last year an assessment rebate was really due was 1983. Continental Illinois failed in 1984 but no loss was recognized on the FDIC books, so there was sufficient money to pay a $67 million rebate for the year. Those credits ranged from $2.3 million to BankAmerica Corp. to two cents to a tiny Florida institution.

Bookkeeping Criticism

The General Accounting Office refused to certify the FDIC's 1984 annual statement because no loss for Continental Illinois was recorded on our books, a bookkeeping decision that had caused dissension in our ranks.

When Mr. Seidman replaced William Isaac as chairman, one of the first things we did was to restate the books for 1984. We showed a $1.3 billion loss for Continental Illinois and put $700 million of it in 1984 and $600 million in 1985. The GAO then certified our statement.

It's good to see that good housekeeping seal of approval appear again in our annual report. But what to do about that $67 million already paid out?

After considering asking the banks for repayment, the solution was to put the $67 million in the negative account. It is now part of the $2.6 billion deficit for future bankers to worry about.

The question of setting reserves for Continental Illinois was a delicate one. Under the rescue contract the old Continental stock, still being publicly traded, becomes worthless if the loss finally tabulated reaches $800 million. The day of accounting is still two years away.

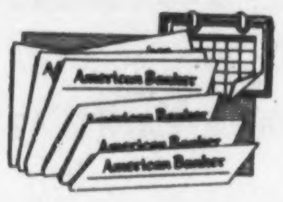
FLASHBACKS

What made news in the *American Banker* this week...



50 Years Ago

- Bank stocks reached new lows for the year on the American Banker Index. The index of 20 bank stocks fell to an average 37.4, matching the low of Oct. 18, 1935. The **American Banker** observed that prices were slipping to the level that existed at the start of the 1935-1937 bull market.
- President Franklin D. Roosevelt dedicated the new Federal Reserve building.
- Public Enemy No. 1 Al Brady, 25, and a 20-year-old accomplice were shot to death by agents of the Federal Bureau of Investigation and state police after he and his gang walked into an ambush in Bangor, Maine. The suspected bank robbers were caught in a hail of machine gun fire as they returned to a hardware store to buy a machine gun they ordered 10 days earlier. A floor plan of the Merrill Trust Co. was found in Mr. Brady's pocket. The gang was believed to be responsible for a string of jewelry store holdups and for robbing the Goodland State Bank, Goodland, Ind.

20 Years Ago

- The number of bank holdups rose to 655 in the first half of 1967. The level was 244 more than in the same period a year earlier. Embezzlement cases involving $10,000 or more dropped to 58 in the first half of the year, from 79 the year before.
- The Federal Reserve Board moved to broaden its control over credit used for securities transactions. The proposed Regulation G extended margin requirements of 70% to such lenders as corporations, partnerships, tax-exempt foundations, credit unions, and anyone acting as an agent for a foreign lender.

10 Years Ago

- The Senate Banking Committee refused to grant federal bank regulators permission to publish lists of financial institutions that were found to repeatedly violate the Truth-in-Lending Act.
- Bert Lance, former director of the Office of Management and Budget, told a packed auditorium at the American Bankers Association convention in Houston that he regretted the nation's bankers were embarrassed by disclosures of his banking practices. "I want you to know I haven't described any banking practices as being typical in the country," he said. Mr. Lance resigned after a report by the comptroller of the currency raised questions about actions he took while head of a Georgia bank.

5 Years Ago

- A report by the Securities and Exchange Commission said the 1980 silver crisis had the potential to disrupt the U.S. financial system. The report examined the attempts by the Texas billionaire Hunt brothers to corner the silver market. The SEC fined the Hunts' broker, Bache Halsey Stuart Shields Inc., and criticized the New York Stock Exchange for failing "to be alert to the potential of a crisis."
- Texas Commerce Bancshares Inc., Houston, credited its 18% gain in third-quarter earnings to strong loan growth. Loans averaged $8.7 billion, up from $6.9 billion in the same period in 1981.
- The heads of three financial regulatory agencies, attending the annual American Bankers Association convention in Atlanta, said they favored some consolidation of their functions as the differences between banks and thrifts continue to blur. But the three men — William M. Isaac, chairman of the Federal Deposit Insurance Corp., Richard T. Pratt, chairman of the Federal Home Loan Bank Board, and C.T. Conover, comptroller of the currency — differed on how such a restructuring should be accomplished.

1 Year Ago

- Lawrence J. White, an economics professor at New York University, was nominated by President Reagan to fill the open Democratic seat on the Federal Home Loan Bank Board.

— Domenica Trevor

Bank Board Unit Gets Interim CEO

Washington Bureau

WASHINGTON — John B. Zellars, chairman of Georgia Federal Bank, Atlanta, will serve as interim vice chairman and chief executive officer of the Federal Asset Disposition Association, the Federal Home Loan Bank Board said Wednesday.

Mr. Zellars will serve until a permanent CEO can be found for the organization. He replaces Roslyn B. Payne, FADA's president, who gave up the additional title of CEO last week after her performance was criticized by Congress.

FADA was chartered as a thrift by the Bank Board in 1985 to help the Federal Savings and Loan Insurance Corp. liquidate assets acquired from failed institutions.

Mr. Zellars has been with Georgia Federal since 1951 and was named chairman in 1982. He is also a past chairman of the U.S. League of Savings Institutions.

Mr. Zellars is one of FADA's original directors.

The interim job will not pay a salary, according to the Bank Board. ■

Bank Stocks Match Performance of Other Issues

➵ Continued from Page 1

posite index fell 7%.

The market's evaluation of bank stocks apparently excludes fundamentals, such as asset quality and earnings. "Lots of this movement didn't have very much at all to do with their being banks," said Raphael Soifer, an analyst at Brown Brothers Harriman & Co.

He believes much of the volatility in bank stock prices stems from program trading, which was limited by the New York Stock Exchange on Tuesday. Computer-driven trading in securities is concentrated on stocks included in financial futures indexes like the S&P 500.

"Those banks which make up a greater percentage of the S&P 500 show more volatility when trading programs are active," said Mr. Soifer. He cited program trading as a prime reason for the large drops at Citicorp and Morgan last Friday and Monday.

William Weiant, an analyst at First Boston Corp., also ascribed most of the problems in the bank stock market to "mechanical factors," such as program trading.

Concerning fundamentals, Mr. Soifer said bank stocks might have a brighter future if the market believes a recession is on the way. While he does not agree with that forecast, he said some investors consider bank stocks and utilities "defensive" issues. Earnings at such companies tend to be more stable during a recession than earnings at industrial companies.

The analyst said third-quarter earnings, which many banks have reported in the past two weeks, were not pushing stock prices in any direction.

All the major banks "have virtually come out either where we expected or above," said Mr. Soifer. Some, like Bankers Trust New York Corp. and Wells Fargo & Co., have reported gains above expectations and still seen their stocks take a beating in the market.

Mr. Weiant also said one of the banks he favors is Wells Fargo, San Francisco, which had "spectacular" earnings. The concerns of money center banks have been overstated in recent weeks, he said, predicting bank stocks as a group would fare slightly better than market average in coming weeks. ■

NY Fed Seeks Capital Adequacy Data Before Considering Irving Takeover

➵ Continued from Page 1

sion plan.

Bank of New York startled the banking community with its unsolicited $1.4 billion offer for Irving, which has rejected the bid and asserted it wants to remain independent. The proposal was unveiled on Sept. 25 in a registration statement filed with the Securities and Exchange Commission, followed by the Federal Reserve application on Oct. 2.

In a letter this week, William L. Rutledge, vice president of the New York Fed, said the regulatory filing had been "seriously deficient" in providing necessary financial information, particularly on Bank of New York's plans to divest parts of Irving and sell that bank's headquarters at One Wall Street.

Regional Federal Reserve banks, which process merger applications on behalf of the Federal Reserve Board, often request additional information before considering an application. Mr. Rutledge's letter was seen by some analysts and banking industry lawyers as having a more serious tone than usual for such a communication.

Nevertheless, one observer remarked that the letter should be viewed in context, noting that the Fed usually is asking for additional information on friendly deals. "It isn't normally necessary to ask for stuff on computer systems," he noted, "because in a friendly deal that sort of thing is all worked out in advance."

Others have also raised the question of Bank of New York's ability to manage a combined organization that would be double the bank's present size. Together, Bank of New York and Irving would have had assets of $42 billion at midyear and ranked 11th in size among the nation's banking companies.

Concerning management, the New York Fed asked Bank of New York to discuss how much of Irving's management it could retain or would need to replace, and to "focus in particular on any areas of Irving's current operations where [Bank of New York] has relatively less managerial experience.

A Bank of New York spokesman noted that the bank and its lawyers had not yet had chance to study the regulator's letter concerning the application and could not comment on it.

Meanwhile Irving, which has seen the price of its stock dwindle in the past week to a level at which it traded before Bank of New York's takeover bid, has reported third-quarter earnings that were almost triple its income for the same period of last year.

The earnings, however, included several sizable nonrecurring items, such as a $42.4 million after-tax gain from recognizing value in its pension plan and a $20 million reduction in taxes, which arose from Irving's special loan-loss provision of the third quarter.

The price of Irving's stock, for which Bank of New York Co. has offered to pay $80 a share in cash and stock in its takeover offer, has been pummeled in the stock market this week. It faded to $44.50 by Wednesday morning after closing trading Friday at $65.38 and being in the high 70s after the takeover attempt was announced in early October.

In the third quarter, Irving earned $95.9 million, which compared with $32.6 million in earnings in the third quarter of 1986. Per common share, Irving earned $5.20 in the third quarter of 1987, up $1.73 in the same period last year.

Joseph A. Rice, Irving's chairman, attributed the increased earnings to improved noninterest income, which included the $86.7 million pretax gain on the settlement of some pension plan obligations.

He added that the growth of noninterest income reflects Irving's program of increasing earnings from such banking activities as factoring, foreign exchange trading, fiduciary and securities services, and certain capital markets activities.

Third-quarter noninterest income increased 105.6% to $202.3 million in 1987 from $98.4 million in the comparable period last year. The improvement included a significant contribution to income from the settlement of certain pension plan obligations, through the purchase of annuities from a major life insurance company, in accordance with Statement of Financial Accounting Standards No. 88.

Excluding this gain, Irving's noninterest income rose 17% in the third quarter, principally due to higher trust income, foreign exchange trading revenue, and other noninterest income. ■

After the Crash

Major Borrowers Might Shun Equities Markets

Current Volatility Could Send Governments and Corporations Back to the Banks

By JOHN J. DUFFY
London Bureau

LONDON — Among the many repercussions likely to flow from the crash in stock market prices, experts say, is a potentially major shift in the way governments and large corporations raise money.

The rout in the equity markets and the severe volatility in the bond and currency markets, finance experts say, will ultimately have an impact on the headlong trend toward securitization — the phenomenon of turning loans into securities that can be traded freely in the public markets.

With many sectors of the securities markets now effectively closed to all but the world's top-rated issuers, the market crisis may have the effect of turning many borrowers back to conventional banking products such as loans.

Boost in Loan Demand Seen
Page 22

"If you want floating-rate money today, where do you go?" asked Robert Russell, an associate director of County NatWest Investment Bank.

"You can't go to the equity market. You can't go to the floating-rate note market. You basically have got to go to a bank," he said.

A shift away from securities and toward bank credit products is likely to be more pronounced in the Euromarkets than in the U.S., experts say, largely because of the regulatory and structural differences between the two markets.

In the U.S., for example, the Glass-Steagall Act prevents banks from offering note issuance facilities, or NIFs, currently the most rapidly growing loan product in the Euromarkets. And structurally, the U.S. debt markets remain basically healthy while the Eurobond market is struggling with severe problems brought about by currency volatility, illiquidity, and fierce competition. The problems have frightened away many borrowers.

"During the whole of this year we have seen a resurgence of interest in syndicated loans from people who have

MARTIN MAYER

Musings from the Pit

LAST week in this column, it was noted sorrowfully that nobody at the Federal Reserve seemed to have read Bagehot. He wrote that in times of financial crisis, the central bank should not only make everyone liquid, but should also see that the recipients of that liquidity pay for it at a relatively uncomfortable price.

Trying not to make trouble, I did not argue that the excess funds the Fed was giving away would erode the exchange value of the dollar (which is what, more or less inevitably, happened), but that they would beat up the long bonds, a result that is still in our future.

Meanwhile, on Wednesday, we were treated to the highly unedifying spectacle of our central bank desperately pumping dollars into open-market operations with one hand, and desperately buying them back in the foreign exchange market with the other. This is not conducive to long-run confidence in the currency or the country.

Continued, it will make the deficit worse, because losses in the foreign exchange market will reduce the annual payment the Fed makes to the Treasury in return for having been given the seignorage in farm.

There is and always was a way out: which is to use the banks as — in E. Gerald Corrigan's nice phrase — conveyor belts for government policy. Instead of spreading out the liquidity through open-market operations and driving down interest

Stock Drop Leaves Some Thrifts Sorry They Converted

By LINDA ELLIS

NEW YORK — The feeling might be mutual among recently converted thrift companies: It would have been better to remain a depositor-owned association than convert to a stock company in the year of a market crash.

Take the case at Goldome FSB, Buffalo. In July, the thrift sent the first solicitation for its stock conversion at $8.50 to $11.50 per share. It was undersubscribed, so Goldome shifted the range and went to market in August at $7. The stock plunged 50%, to $3.50, between the offering and last Tuesday

Would you feel more secure with a credit card program that offers very little risk?

If you have some good reasons to have a credit card program and also some good reasons not to want the full risk of running one, talk to Franklinton Financial Services.

Franklinton offers the perfect solution, and takes on the responsibility for conducting the program from beginning to end. Or, if you have a program now and want to convert, Franklinton may be interested in purchasing your portfolio. What could be easier? You benefit, and have the advantage of security, too.

It's just another way Franklinton takes a personal interest in your needs. And another reason why Franklinton is one of America's most popular credit card processors.

Call Joette Kuharic at 614/863-8222 for more information. You'll find her very helpful.

Talk to Franklinton... America's personal favorite.

Musings from the Pit

Continued from Page 1

rates, the Fed should have thrown open the discount window (as it did in the aftermath of the Penn Central collapse) and urged the banks to support their customers on the cuff, but at a price.

It's easy to run down borrowings later, and meanwhile the Fed could assume a lot of control over what the banks did with the money. In a time of crisis, people want to look to their government and, for a while at least, lifted eyebrows would have controlled even the most sophisticated of the banks' trading departments.

There's no shortage of crisis days ahead: The Fed still has time to change its procedures, if it has the will.

The problem, in part, is that leadership now requires a frank admission that the nation is going into a recession. The task is to make it as short and shallow as possible at a time when the normal macroeconomic tools have been rendered inoperative by our foolish accumulation of debt through the years of prosperity.

With some boldness from our trading partners, who will need another place to lend their money and sell their goods, and who have a large stake in our rapid recovery, it might be possible to use this recession as a time for improving the effective demand of the LDC debtors on the world economy.

If the Japanese were to take steps to ease the pressure on Brazil, for example, it would help us as well as the Brazilians. The money's there: We won't be borrowing so much internationally for a while. Stranger things have happened, as the song says, but I can't remember when.

From the point of view of the banks, the terrible thunderclouds of the last weeks do have some silver linings.

Deposits have flowed back to the safer intermediaries (how helpful it was that Comptroller of the Currency Robert L. Clarke could assure the public that banks are not involved in the stock market!).

The regulators will not have the chutzpah to bend the law for the purpose of inviting the commercial banks to join the investment banks in what will be a pretty capacious graveyard.

And securities that were supposed to be salable have turned out to be about as illiquid as stones. It will be a long time before anybody who thinks he may need the money some day buys a junk bond again.

This is a mixed blessing, of course, to the many banks and thrifts (some of them very large institutions, too) that stocked up on junk bonds because they needed yield and are now stuck with them in sickness as in health.

But on the longer view it does mean that more of the business that ought to be done by banks — because banks, if they take the trouble, can know the borrowers — will be done by banks once again.

The drive for securities powers is, of course, dead.

One of the most interesting comments made on Continental's troubles with First Options is that the bank had been dumb to put that $625 million in as a loan, exceeding its legal lending limits, because the holding company could always have put it in as a capital infusion, which was perfectly legal. That states the case against permitting bank holding companies to own such things, far beyond my poor power to add or detract.

This was Drysdale again, of course: Bankers thought they were in a processing business, when really they were extending credit. The very bad behavior of Morgan stock in the downturn argues that at least some investors have been worried that something of the sort could happen at Euroclear.

The question to be answered in the coming months, in any event, is not whether the giant banks should have new securities powers, but whether some of the powers they have been awarded or have assumed in the last half-dozen years should now be specifically withdrawn. "Deregulation" will be, if it isn't already, a dead issue.

Even if Congress does not extend the moratorium, the regulators, even the fellows in those jobs today, will not have the chutzpah to bend the law for the purpose of inviting the commercial banks to join the investment banks in what will be a pretty capacious graveyard.

Indeed, after the experience of fourth quarter 1987 in London and Tokyo, it is by no means clear that the big banks are going to be so eager to take part.

Since the worst destruction by far has been in the third-tier stocks of the Amex and the OTC market, I do hope that Congress will, however, consider allowing small banks — of less than $500 million or so in footings — to underwrite and make markets in the securities of companies that qualify for Reg A treatment by the Securities and Exchange Commission.

These companies are the lifeblood of capitalism in the United States, and the Wall Street types who used to court their business will be gone.

But the money center banks and the big regionals had better stick to banking for a while. Assuming the loan losses are controllable, it will be a better business than it's been, anyway.

Among the miscreants of the last two weeks, Citibank stands out strongly. It was a very reluctant lender to the market.

It published a quarterly report among the more misleading of its species. "Earnings" were increased by a $140 million deferred "tax credit," which refers to the taxes the bank won't have to pay in years to come on income that will be offset by expected write-offs on the loan portfolio.

Meanwhile, unbeknownst to the readers of the 10-K, Citibank has in fact paid these taxes to the IRS because, under the 1986 tax law, the famous addition to loan-loss reserves is not tax deductible.

A miracle of accountancy has made an increase in earnings out of what is at best a wash with negative implications — for the $140 million paid to the IRS will be out of the earning assets, and the $140 million "credit" can't earn anything because it isn't there. Then bankers wonder why people don't have "confidence" in the banks.

And despite the demands of public policy and the Fed that the bank increase its equity, Citicorp proclaimed and apparently indulged in a major buyback of its own stock. It's a long time between drinks, but there are those of us who remember from our reading that Charlie Mitchell did that in 1929, when it was National City Co. and National City Bank, not to very good effect.

Chairman John Reed told David Lascelles of *The Financial Times* that the company was paying $45 a share for Citicorp stock, which he considered a grand bargain. Last I looked, the price was below that. How do we account for those losses in the next quarterly report? Do we put our own stock in the investment portfolio, where we can carry it at cost?

Stock buybacks should be made illegal, anyway: They diminish the equity base of the economy, and they are a form of market manipulation, pure and simple. They impact directly upon the earnings or wealth of the executives who order them. And most of these executives have stock options or own stock in the company, or have pension plans tied to the value of the stock.

In Citicorp's case, moreover, there is an additional element to be considered. Nobody has said more loudly that Brazil and Mexico must not use their exchange reserves to buy back their debt at a discount, because that would be cheating the banks and would make it impossible for banks to lend to them again.

Citicorp just sold $1.2 billion of stock for $57 a share. The people from whom they have now bought it back at $45 — no small fraction of them in the underwriting community, which got snookered into increasing the issue at the last minute — may not be so happy to see Citicorp again! ■

LETTERS TO THE EDITOR

Private Insurance Could Guarantee Capital Level

To the Editor:

As you know, to some degree there is a forbearance program set forth between the Comptroller of the Currency and the other regulators. However, there have been very few regulations that I have ever agreed with, but I do think the following would be worth considering.

First and foremost, capital-to-assets for a bank is pretty well accepted at 6%. As we both know, some of the larger banks and banks in general have fallen to little more than 4%. However, other banks have capital as high as 10% and above.

I am now addressing a problem for a bank that would have 4% or 5% capital to assets. Why couldn't large insurance companies in this country get together and form a special company, since they have huge assets, and offer banks the following: an insurance policy that would insure a bank having a minimum of 6% capital to assets.

For instance, if the capital of a bank should fall to 5%, and the regulators came in and said that 5% was not adequate and they wanted 6%, then a bank could show them an insurance policy that guarantees 1% capital.

In turn, a bank would pay a premium to the insurance company for the policy. In order to qualify for this insurance, a bank would have to be run properly, maintain an adequate reserve for losses, and its delinquency would have to be within its peer group.

The bank would also be required to have a certified public accountant conduct annual audits. If banks would adhere to this, I think this would be a safe investment for insurance companies. At the same time, regulators could be more at ease knowing that banks would have an insurance policy that would guarantee and additional 1% capital, if the regulators felt this was needed.

We must get the private sector involved in various aspects of regulation and have the regulators serve in a reduced capacity. For instance, I believe the regulators should be concerned with the quality of loans, plus testing the quality of loans against our reserve for losses.

Several years ago an event occurred that was quite comical. A little woman examiner carried our stock ledger around with her for three full days and she held it very close to her body. Finally I asked her the purpose of carrying the stock ledger around with her, and she replied, "Quite frankly, I am checking on you because you purchased 10 shares of stock from someone and I want to see if the proper amount was paid for the stock!"

Only the government could spend three days on such a very small transaction. Eventually she found out that I had paid the proper price for the stock. This little woman examiner then walked away quite happy — which proves to a great degree that no regulator ever kept a bank from going under because the examiners really do not look at the proper things when they come in to do their specialized work.

We cannot cure the world, but I do think examiners should spend time on loan review and the private sector should be responsible for helping a bank maintain capital adequacy.

Abraham Lincoln once said that the government should never be involved in affairs that the private sector can do for itself. Let's get government out of some areas and get the private sector into some areas. This in itself will help reduce the federal deficit.

Market Drop Leaves Some Thrifts Sorry They Changed Ownership

➔ Continued from Page 1

as the stock market has been blindsided by historic losses.

"Most thrift stocks have gone down; we are no different," said a spokesman for Goldome.

A look at the recent behavior of thrift stocks that have been offered to the public this year, or that have been acquisition targets this fall, shows winners, losers, and issues that never made it to the starting gate. The latter are, in most cases, just as glad not to have their stock in the running.

The stock of Anchor Savings Bank, Hewlett, N.Y., was off 47.8% Tuesday from its first trade in February.

At Greater New York Savings Bank, New York, where the stock was off 36.8% since a June conversion, Philip A. Cimino, first vice president, investor relations, said he has nevertheless had only "a couple of calls" from stockholders. Mr. Cimino cited the market in general as responsible and said Greater New York is faring no worse than typical thrifts in New York State.

Heritage Federal Savings and Loan Association, Olympia, Wash., nearly made it to the post office with its offering circulars but decided early last week to hold back and hope for "some market stability," said Sandra Seagroves, its vice president and marketing director.

Planned Conversions Are Off

"Conversions in the pipeline now are all but dead," said John J. Lyons, managing principal of Lyons, Zomback & Ostrowski Inc., New York, a bank and thrift consulting firm. "The market for newly converted thrifts has been sliding dramatically since well before Oct. 19.

"Oct. 19 iced the cake," he said. "It is difficult, if not impossible, for thrifts to convert today, absent the smallest doing a purely community offering. Larger private investors and institutions have very little interest in thrift stocks."

On the brighter side, Cottage Savings Association, Madeira, Ohio, brought its initial public offering out at $10. It traded Tuesday at $15.50, a 55% jump since January. John L. Schinner, chief financial officer, cites good earnings. Ruth Myers, assistant vice president, said the thrift has had a few calls from stockholders concerned about the news from distant Wall Street and has advised them to hold on to their shares. Obviously, the new owners are listening.

The winners aren't sure why they are winning, anymore than the losers know why they are losing.

Anthony J. Calabrese, president of Washington Bancorp, Hoboken, N.J., parent of Washington Federal Savings Bank, has seen the stock move up a fraction from $10.50 in the past two weeks.

"It could be our performance, which is great," he said. "Or it could be that we're in a prosperous area. Or it could be something else."

Acquisitions and mergers have been impacted by the market crash.

On Oct. 21, two days after the worst decline in the Dow Jones industrial average in history, stock in Fairhaven Savings Bank, Fairhaven, Mass., was selling at $11. At midnight it was acquired by Citizens Financial Group, Providence, R.I., for $17 a share, making it the largest percentage gainer among all financial services stock for the week of Oct. 19-23.

Carteret Negotiations Ongoing

On the other hand, on Oct. 22, Home Group Inc., New York, said it wanted to renegotiate a lower price for Carteret Bancorp, Morristown, N.J. A $22.50 share price was struck Aug. 4; last Friday Carteret stock closed at $12.38. Negotiations are ongoing and several analysts said the whole deal may end up in court.

"Most acquisitions already arranged are being canceled," said Reid Nagle, president of SNL Securities, Hoboken, N.J. "A lot of new deals will arise, but at different plateaus and on different terms."

For a conversion in the pipeline — and there were 22 applications to the Federal Home Loan Bank Board in August and September — postponement and reissue of the stock offering means, by Bank Board regulation, that financial statements have to be updated and significant printing costs incurred again, Mr. Lyons said.

"Indeed, it will cost us hundreds of thousands of dollars, maybe $300,000, mostly in printing costs, to go through with a postponement, but we are absolutely attempting to do so," said Joseph D. Gioffre, president, Greenwich Federal Savings and Loan Association, Greenwich, Conn.

Greenwich was set to convert Nov. 13. "The pricing was forced too low for us," Mr. Gioffre said. "Until we see stabilization in the market, we will not go public. Right now, though, we're trying to get the Bank Board to tell us what to do and they're uncertain."

"There is no stigma attached to slowing down or postponing," Mr. Lyons said, "but there is that loss of market momentum."

"Our timing is perfect — perfectly lousy," mourned Thomas W. Schini, president of First Federal Savings and Loan Association, La Crosse, Wis. "We re-evaluated our stock conversion Oct. 5 and decided to go ahead. We lowered our range and had a resolicitation period that ends this Friday [today] and it's too early to tell how it's going. We're relying on our investment banker, PaineWebber, to advise us on this as we go forward."

Austin J. Mulhern, president of Security Federal Savings and Loan Association, Cleveland, is holding a meeting with his board today to consider an extension of the thrift's planned stock offering and conversion. "We have to talk about the market. But if we knew what it would look like in 90 days or so, we could all retire," Mr. Mulhern said.

First Federal Savings Bank, Cleveland, said the recent stock market decline has forced several changes in the thrift's proposed initial public offering. The initial shares will be offered within an $8 to $10.50 range, down from $10.20 to $13.20. The stock subscription period is being extended from Nov. 7 through Nov. 16.

At Benj. Franklin Federal Savings and Loan Association, Portland, Ore., G. Dale Weight, chairman and chief executive officer, has watched his thrift's stock fall from $7 to $4.50 in the market carnage.

"Lot of jitters around right now, especially about interest-rate-sensitive stocks, and we were not spared," Mr. Weight said. "But we're recovering and our investors are not showing a lot of concern." ■
